

Cryptocurrency and other prophetic revelations received by Christopher Harris - 20/4/2025

This list of prophetic dreams and revelations received in faith from God are for prayerful consideration and review by Christians, requiring the correct interpretation and timing from the Holy Spirit. The fulfilment of these dreams may take numerous years. Seek the Lord Jesus Christ.

The date of dreams is written day/month/year. The list is sorted from oldest to newest. All values are in \$USD unless otherwise specified.

25/2/2024 – Update: LUNC Validators and Continuing God's Mission for me 49MB MP4

<https://www.mediafire.com/file/tfdjdzqv7zey6f3/>

26/1/2018: “Update: We are nearing the end of February 2018. The crash the Lord spoke to me about which occurred this month was a more minor market crash from 11k to 6k (still a 46% crash). A market crash was fulfilled, however, it was not the major 30k to 2k crash I was shown. THIS IS STILL COMING. Prior to this the Lord has revealed to me another crash from \$12,200 to \$4850 approx. Then a move to \$30-35k then 2k, then 60k. This is the sequence the Lord has revealed to me. May God bless you.”

26/1/2018: “Further update: I do not know what February 30 means, as this is not a real date in the current calendar. I believe it means something, perhaps a short time outside of the February window into March, may be hinting at another crash. I know there is a coming crash to \$4,850 but I do not know when it will be. This will be a greater size crash than what occurred in early Feb (46%), an approx. 60% crash. I do not know when this will be, but I believe it will begin shortly after BTC reaches \$12,200. May God bless you, Christopher.”

26/1/2018: “Nocis, I didn't say it was the best entry at \$58 I said it was a very profitable entry at \$58, which it is! LTC will go to over \$900, that is still a very profitable entry. God showed me it would go to \$58 long before it went there. When I posted this LTC was \$178 USD. Also, in the dream where it hit \$58 USD the big crypto exchange OKEx crashed! This hasn't happened yet, so the Lord could have been showing me the LTC entry at \$58 is when OKEx crashes and fails (a major exchange). You need to consider what I share properly without incorrect assumptions. Sometimes it takes interpretation to make the right interpretation of what I receive from God, and I can make mistakes in interpretation. God bless you.”

16/2/2018: “UPDATED TARGETS 16/2/2018 – PLEASE SEEK THE LORD AS TO WHAT YOU SHOULD DO. As posted on Z3News comments: The Lord showed me a safe selling point of \$11,300 Bitcoin USD, then I saw \$11,600 clearly, and after that (recently) I saw \$12,200 but faintly, which could mean we only touch this price. Target sell for me is between \$11,500 and \$12,000. The top of the downtrend channel (on the BTC chart) is about \$12,200 but as time goes on this gets lower to around \$11,600 so if we reach the top faster more likely we will reach the \$12,200 target I received (we may only touch it briefly). The Lord showed me after this high to \$12,000 approx. (I don't know exact turning point necessarily) we will crash approximately 60+ percent in the market, with the target low I saw of \$4,850, and I saw 444 which I felt was potentially about cryptos could be \$4,440. Others on Z3 have received the target LTC price for this next drop at \$87 and \$89. Watch the price of BTC as LTC reaches this price, it may be under my target of \$4,850, if so, the next target is \$4,440. Interestingly if LTC reaches \$240 when BTC reaches 12k (seems likely), to reach \$87 or \$89 is a 63.8% drop. If we apply this to my target of \$12,200 BTC we reach \$4,422 after a 63.8% drop, fulfilling both of the targets I received (potentially). After this I believe we will begin the major third wave rise I saw to \$30,000 to \$35,000 (I don't know exact top) before a major 95% crash to \$2,000 BTC. This I believe will coincide with a LTC price target of \$58 for the bottom of this crash and a very profitable entry into LTC at this price (I was shown to enter at \$58 with all my investment but it will only be temporary for me before I move back to ETN). At this time, I was shown also one of the largest Bitcoin exchanges OKEx exchange will fail and collapse. This could be the reason for the crash from the heights of 30-35k (look up Mt.

Gox which was a 90% crash due to hacking and exchange failure). I believe the crash could be news based and in my dream the exchange failed and there was fraud involved. It is important to seek the Lord Jesus regarding your buy and sell points, this is what has been revealed to me and I am going with this. Seek the Lord for confirmation. Also seek the Lord regarding your exit strategy during the third wave towards \$35,000, as the exchanges may not be a safe place to keep your money or coins. You may want the coins you are holding in safe wallets not on exchanges. You may want to cash out into your bank account entirely and wait for the crash, meaning you could miss the very bottom, but you could transfer back in and buy at the lower prices. Otherwise, you need to seek the Lord regarding an exchange that will remain safe you could keep your \$ on to position you to re-enter the market at the bottom (when BTC is \$2,000). I am seeking the Lord regarding this (safe exchanges) and will update if I receive anything further. I love you my brethren. May God bless you. Christopher.”

25/2/2018: “Dream update: LTC takes small pause before following BTC. Update on LTC dream. The first part of the dream I describe in this video was seeing BTC shoot off from the low 9k area (under 9,500) then the chart switched to LTC as I saw it shooting up. I just had a dream now that repeated twice which explains LTC takes a little pause before following the BTC breakout. I saw tonight twice (it repeated) LTC break up when BTC hits 11,300 specifically. God bless. Christopher.”

25/2/2018: “UPDATE ON RECENT DREAM- \$400 MAY NOT BE TOP (As posted on Z3 News today while BTC at \$11,150) "I should have probably described this earlier. But here is more detail of the recent dream since it could have more significance. I was in a bus with my close friend and it was dusk/night and I had the laptop open. I saw BTC at about \$12,200-12,400 and LTC at \$750 and I was trying to sell but I wasn't logged in the exchange. Then I saw outside a man take a shotgun from his car and approach over to us. I had to decide whether to login and sell or try to defend us. I went to defend ourselves in the dream, the man pointed the gun in the window but didn't fire. I went outside and confronted him and he had a knife/sword instead of a gun and I ended up fighting him. Turns out he was a demon in human form. After the fight ended I drove away. So I don't know if \$400 is the top of this move in LTC, or if it may go up higher to \$750, but there is difficulty selling here as we were under attack. I don't know. If BTC reaches the \$12,200 area and LTC is far away from \$750 then it seems the dream is unlikely to be genuine about the figures. I'm unsure about this dream but thought I'd explain more, since it was the only dream I had of LTC where I tried to sell. I'm not sure exactly my approach, but looking to exit around \$12,200 area as this seemed another sign of danger around that area. God bless. Christopher."

25/2/2018 “Update: had a dream I checked on my phone the prices app and LTC was \$481. So as far as I'm concerned this confirms the move above \$400. \$750 is final target but at this level in my other dream almost immediately danger was involved. I don't know if LTC will take off soon from 11,300 BTC area or later on the way back up through 11,300 after going down some first. I'm still holding and going to be very cautious and planning exit into fiat at or near my final BTC target of \$12,200. I believe after these figures are achieved the drop towards \$4,850 will occur. Please seek the Lord God Jesus Christ for your approach. God bless. Christopher.”

3/3/2018 “UPDATE: (yesterday) as posted on Z3news "I was praying to the Lord when are we going to make the move in BTC to 12.2k and LTC and in the midst of a crazy dream last night about something else I saw that BTC was going to 9.2k and would go up from there. This could be the breakup for BTC I saw from 9k in my dream rather than what happened earlier from 9.3k, as we didn't have enough in the rally to break the previous high nor hit

12k. I believe the rally from 9k will be the one that LTC will break out from at 11.3k and the one I saw in my dream, so I believe the final upward move to mid 12k will occur soon. God bless, Christopher."

4/3/2018 "UPDATED DREAMS PINNED HERE LTC targets I've received recently \$307 USD, \$400, \$750, \$481. BTC target is \$12,200 then \$4,850, and I saw it going to mid 12k when LTC is at \$750, but there was danger was at this area. I don't know if LTC will surge to \$750 in all exchanges or it may surge on certain ones. Plan your exit if you see fit. Seek the Lord Jesus. May God bless you. Christopher."

4/3/2018 "UPDATE: (Today) as posted on Z3news: "Dear brethren, the \$9.2k I received has been fulfilled for BTC, however, I don't know if we head up from here directly or continue further down. In the dream I knew we were going up from \$9.2k, so whether we go down some now I believe we are heading up towards mid 12k soon. I had a number of dreams last night I want to share. One was that I hadn't been checking prices in a while and looked at my laptop and BTC was \$12,400 and LTC was \$692. I was considering selling though LTC \$750 had not been reached from my other dream and I was trying to log in. The price in the other dream of LTC at \$750 I didn't see exactly but probably more around \$12,600 but was high danger at this level. The Lord may have given me this as a better safer exit point potentially, though there was the similar theme of not being logged in my exchange. The dream changed and I saw Bitcoin under \$1000 in the \$900s and I was thinking in the dream why are they selling at these prices! Then I saw \$16,000ish for a moment and \$7,700ish on Coinmarketcap and I saw/heard it was the recovery from the major low, the prices were recovering and those who held or bought in at the low prices were happy. Before this night of dreams I prayed to the Lord whether I should get involved in UVXY. This night I dreamed of seeing FAZ at \$71 and seeing UVXY at \$2,700ish area, at the same time. This shows to me UVXY will move first (currently worth \$15.5 USD, FAZ \$10.47), and is more profitable in the short term. I am looking to obtain some now. These were the figures I saw tonight and the dreams I had. Please take this to the Lord for personal confirmation, for strategy, guidance, your own personal action and seek Him for approval. May God bless you, your brother Christopher."

As posted on Z3news 15/3/2018 "I saw LTC at \$850 last night. Could be a top of a big run. Previously I saw \$750 when BTC was around mid 12k (maybe 12.6k), and before I saw \$12,400 BTC and \$692 LTC. My \$12,200 target could be a turning point (if we touch in 12k twice like Jeremy's head touch on the ceiling before trash collecting trampoline dream), but it doesn't seem to be the top of BTC. The danger I experienced around \$750 LTC could be related to being unable to login and place orders. I had limit orders in at \$730 but moving them up to \$800. I also had a dream last night after my honesty and loyalty to the Lord was tested I received a large card with KING on it with a square in the top left that was green. The words on the card (kind of resembled a playing card) was (or was close to) "RIGHTEOUS are cryptocurrency" and on the back "Cryptocurrency is yours". On the front there was a large 800 on the top right. Just before I received the card after the test I saw a black screen with 750 (seemed like my previous number) and a couple of smaller numbers. So I believe the first part is kind of what Christine was talking about the Lord views us in a way as cryptocurrencies (I can't remember her post on this). Then the next is He has given this for our use. I took the \$850 LTC dream and the 800 on the card (with the green square) as confirmation for me to put order at this price (\$800 usd). I had a dream few days ago of my parents seeing LTC move over \$1,000 aud and I told them I had my order in at \$950. This is about \$730 usd. So I think the move over \$750 is happening. Beware of exchange login issues and lockout. I don't know necessarily sequence and as I said we could touch 12k twice.

So watch for break of BTC from 9.2k and LTC at 11.3k BTC. My 41 hour dream for the top if it's days is the 16th (thanks James for reminding). I saw recently \$1,100 LTC when BTC seemed near 11k but this seemed to be later like after a crash recovery (potentially during third wave rise or recovery after third wave crash) but showing LTC doing strong. This is my updated dreams and recent info. Take it to the Lord for confirmation and your approach. My exact approach is subject to change depending if we turn at \$12,200 or continue rising. I'm watching to see for second touch in 12k before move to \$4,440 to \$4,850 (my targets) region according to Jeremy's dream. We hit Bob's number \$8,200 awesome now we have LTC news tomorrow seemingly and the upper targets remain. May God bless you. Christopher."

Clarification: my 41 hour dream is either a top or a turning point and is either today or tomorrow IF 41 hours means days. Here's my post made 4th Feb 18 Aus time " I was asking the Lord last night when we were going to top and when we would turn. I received last night in a dream 41 hours. Not sure if it's crypto related or something else, but for me that is Monday at 10pm to 12am (41 hours since I had the dream). I had the dream about 5.5-7.5 hours ago. I also had a dream yesterday I think of hearing/seeing the number 2 and 11 and saw a dirt bike doing a wheelie then going fast around a sandy corner with high traction. Not entirely sure if it's market related or not." The dirt bike could mean time starts from 11th Feb, I don't know for sure. I saw this morning in a dream after praying if we were heading to 12k before sub 5k, I saw 9,200 ish BTC and 11,300 which were both the breakout targets the Lord showed me again. I believe we are heading up to 12k BTC to fulfill the other targets the Lord showed me and also today or tomorrow we will possibly change direction and head up again properly. Will see how it goes. God bless. Christopher.

UPDATE: As posted on Z3news 17/3/2018: "I prayed about whether \$800 USD was a safe sell and last night I saw LTC ticking up \$794, 795, 796, then it started ticking back down some, the dream ended. I don't know if there is a turning point just before \$800. I did see \$850 but it's possible it could reach this on an exchange but not all others, or it will move thereafter. In any case I've reduced my limit sell orders down some to account for this from where they were at \$800. God bless, Christopher."

As posted on Z3News this morning 21/3/2018 "Dear Julz and others, interesting you mention this. I saw a few days ago in a second dream of BTC under \$1,000 it was \$400 while LTC was \$400, I saw online people were calling it "catsh#\$ coin" and remarking on the continual bad news with it, then I saw BTC shot up to \$950 and I saw myself at the computer and I said something like "how are they selling? It's going to go to \$60,000!" dream ended. I saw also last few days BTC between or around 10-11k and LTC was \$1,100. I was thinking after that this could be from a crash recovery where LTC does very well. I also in another dream saw LTC tick up to about \$975 then move down fast to \$930 then the dream ended. Possible top of a huge run I don't know. I don't believe \$750 is the top of the big LTC run but there is some danger at this level (approx. mid 12k BTC) so I have my orders in already as it could have to do with exchange lockout (I had another dream of seeing online people couldn't login exchanges during a big LTC bull run). As I mentioned before I saw \$850 and prayed about a sell point and saw price slowly up to \$796 from \$790 or so then ticking down slowly. Then after is when I saw the higher \$975 figure and fast retract from there. Not sure exactly where it fits in or when these would be fulfilled but felt I needed to share. Having a lot of targets I've shared not yet fulfilled was making it harder for me to share but I know I need to tell and not worry about it. Just know that I don't know exact sequences I try to tell you what I've heard and seen and my interpretations are not going to be correct all the time. With regard to my 41 hour dream this was a top or turning point I had prayed for when I received that so

from the 17th (41 days from the dream if it starts from then) we have somewhat turned so far (hit the low on 19th) or it marks a turn, otherwise it may mean months or I may not understand it fully. Lastly I prayed yesterday again if we are going up to 12k before down to sub 5k and I saw low \$9000 area in a dream. When I previously prayed about that I saw \$9,200 and \$11,300 the breakout areas I was shown. I'm still holding, the Lord hasn't shown me to sell yet (aside from my earlier figures) and my previous advice is still "hold and pray" (doesn't necessarily mean it applies to you). See how it goes! Please seek the Lord for confirmation and what you should do (it works the best when you ask Him directly!) Praise the Lord! God bless, Christopher." And later today 21/3/2018 on Z3news "I forgot to mention I had another dream within the last week of being in a room with my parents who were by the computer and they were watching the Litecoin prices and they went over \$1000 AUD (approx. \$770USD) and I mentioned I had a sell order at \$950 and they were happy. I did move this up since the dream though as I received further numbers and prayed for a sell price and saw the slow tick up to \$796 then slowly down to \$785ish (USD) (doesn't mean this is the top necessarily, just what I saw). In any case watch for breakout BTC \$9,200 area and for LTC breakout \$11,300 area. Consider putting your orders in early (I have). I believe limit sell orders \$750 to 790 for LTC is okay if you have them in advance, but know this is based on my interpretation of what I received so please seek the Lord regarding what you should do. God bless, Christopher."

UPDATE dreams: As posted on Z3 News today 22/3/2018 at 1pm "This morning I woke up 22/3/2018 at 4:30 am (it's now 12:30pm), and I wrote down a dream I had. I was in a public place like a gathering outside and it felt like we were all investors and watching the Bitcoin price and there was some excitement in the air. Somebody I knew from high school came over and he had been walking in the rain (though it didn't seem rainy there) with two guitars. On the smaller one the string had been damaged during his travel and he was trying to tune it but it didn't sound right. Another friend I know took the guitar and tried to tune it but it made an ear-splitting sound. I was inside a caravan and watching the BTC price on my laptop. I was seeing it around the \$9,200 area move to \$9,500 then hover around here then when I checked again the price was \$10,400 or so. The atmosphere felt bullish like there was excitement from the people. I realised we were nearing the higher targets I've received but saw that I wasn't logged in to my exchanges and tried to do so and somebody reached inside the caravan window and turned my computer off. Turns out it was a friend I knew and I told him not to do that since I was trying to trade and another friend I knew was with him and he said "we know you are worried you will miss out on a 3x gain" and it seemed like I was complaining too much. Then a genie came inside and scattered things around my room and I realised my computer screen was gone (I didn't see it I just knew it happened). I realised I had a backup screen. Then I saw I was running out of power on the laptop (it seemed like a laptop sometimes but a desktop computer other times). Then I tried logging in and the computer was behaving strangely, my mouse pad was also gone and I couldn't find the exchange pages. I realised I couldn't log in. I heard "there's going to be a lot of noise tomorrow" (It felt like it was related to the run in prices. I did see LTC at \$210 area. It could be that a lot of people aren't able to log in and sell during the higher prices and there will be a lot of complaints, or it could be something else). Then I felt relief since I had put my limit sell orders in already so just realised I will rely on that and hope they are fulfilled and trust in what the Lord showed me. Dream ended. I had a dream later that night of seeing on a chart the current move from low 7k area to 9k and I saw BTC was going to correct some (maybe towards 8k). I was telling my sister this is a normal correction since it usually never goes straight up and always corrects some before continuing up. So this last dream may be some comfort if the price begins to correct some that I believe we are still heading up towards the

higher mid 12k targets and the higher LTC targets. I don't know how the two touches to 12k area will work with my LTC targets, we could reach the higher prices on the first or second touch, I don't know. My older BTC target is \$12,200 so it's possible price could turn here or keep going up, but I have seen higher than this also \$12,400 and around \$12,600. I feel the first dream is probably suggesting the enemy is going to try to interfere to stop people from benefiting from this trade in some way, but I felt relief due to having my limit sell orders in. I'd welcome other views. May God bless you, Christopher." AND "The two touches in 12k I am referring to is from Jeremy Stager's dream. I'm just saying I'm not sure of exact sequence, but I felt comfort in the dream of having my orders in place in advance. God bless, Christopher."

Had a dream today 26/3/2018 of seeing \$7,200-\$7,400. My previous dream of seeing the correction from 9k on a chart, I didn't get to see it finished just saw it when it was part down in the 8k area. We could be heading further down some.

AS posted on Z3 26/3/2018: "This same morning 26/3/2018 my close friend had a dream (my friend explaining). In the dream there was a big red rubber helium balloon with a string attached. The string was fairly long but we realised if we blew the balloon up the balloon would be quite big and go up high in the sky and the string wasn't strong enough. We anchored the balloon down under a chair and it was bobbing there. Then we took it from 1 strand of string to 4 strands and was twisting it to make a much stronger rope and she was working on this when she woke up, it was almost at four strands. She knew the cord would be under a lot of pressure and it was going to be a weak point. She woke up and was thinking about it and felt it was very clear and received that the string on the balloon was a tether, and was referring to "Tether" (USDT), it was in a holding period and others were concerned about Tether and making sure it was strong enough and reinforcing it. Nothing was wrong with the balloon which could be filled at any time. They were quickly trying to secure it and secure it well. The balloon was partially inflated but could take more air and float much higher, it was a very big strong balloon that could even pick people up. The intention wasn't to fill the balloon yet until the Tether was fixed. Interpretation (mine): the balloon is the market, which is mostly dictated by BTC. The market can inflate much larger, and is a balloon full of helium so it wants to go up but it couldn't go freely up as it was secured to the chair and it was bouncing around a bit up and down but constrained. It was being kept down and held down, "ride delayed due to maintenance". The string connected to the balloon is Tether, which needs to be shored up to handle the tension and pressure of the balloon rising and growing (there are USDT markets in most of the main volume currencies). So the balloon can't rise and grow until the tether is shored up and strengthened, and in the dream this was almost completed. This suggests the market has been suppressed to sure up the strength of Tether, before the market will be allowed to work normally and the balloon inflated and allowed to rise, but a much stronger 4 strand cord (Tether) is now almost connected so the balloon doesn't fly away. This also suggests the fastening of the extra cords and winding into rope is almost completed and the balloon is ready to be inflated and to rise. I believe this may also suggest Tether will not go down yet, but is being used in a way to control/rein in the market. I think once this strengthening is done by those who are involved the market will take off again. This is my interpretation and thoughts, please seek the Lord for understanding. Very interesting dream. May God bless you."

Posted on Z3 27/3/2018 "Going to have to apologise and issue a correction. In the dream of my parents at the computer seeing the Litecoin prices go over \$1000 I DO NOT KNOW if this was USD or AUD (I did not see the screen). I previously assumed it was AUD since my

dad does look at charts in AUD mostly and uses an AUD exchange. But I realised this could have changed since I tell him I look at USD prices mostly. I need to be more careful with how I say things to be the most truthful to what I saw. So I do not know if the \$1000 is AUD or USD and it was WRONG for me to assume it was AUD (the way I stated it was not true as I didn't see an AUD figure I was told it went over \$1000). It is possible it is USD since in another dream I definitely saw a move up to \$975 then a decrease to \$940. I don't know if this is the same bull LTC run. In the dream I told my parents I sold at \$950 and they were happy. I was thinking this was AUD previously but please know I am unsure. I am praying further about this and will update if I receive any further clarification. I realise I need to be more cautious about what I ask the Lord precisely and what He shows me exactly to convey it faithfully without assumptions. I am trying to improve in this. I am praying further regarding this coming LTC move as I have received a number of figures and need some further understanding. My apologies. Christopher. " If I receive any further clarification from the Lord I will likely make an update video. Regards, Christopher.

Update: 5/4/2018 as posted on Z3news " Had a dream last night I thought I'd share. In the dream I saw someone on a basketball court maybe at the free-throw line and he shot and it went in the hoop. This may have happened twice. I felt it was crypto related and it felt it had to do with BTC and LTC and that I should remember I had it. Rough possible interpretation: the height of a basketball player around 6ft brings the ball to his head to throw so about 6ft or \$6,000. The throw goes up higher than the hoop. The hoop is usually 10ft high. So the throw goes in an arc from 6ft to 12-15ft then drops through the ring at 10ft then goes straight down. So maybe \$6,000 area to \$12k plus then straight down from 10k. I also had a dream that night of BTC spiking up really quickly (at least it seemed like it in my dream) and it hit \$15,000 before seeming to quickly drop. I saw 15k and a few lower numbers. There was also again a login issue and I saw on an exchange people's orders failing to list. I don't know if we are heading for this soon as it could be a later move, but it may be next I do not know. Seemed to have a bit of similarity to my basketball dream. If we hit 15k in BTC I can see LTC hitting the \$975 I saw or even higher (if it happens at the time of the LTC run). I'm not 100% about where it fits in or anything, I'm playing it more safe with my sell orders, but just felt led to share. May God bless you my brethren. Christopher."

UPDATED DREAMS LIST, as posted on Z3News today 15th April 2018: "Dear brethren, I have received from the Lord to 'SORT' what He told me. I am trying to figure out the things He is telling me to SORT (He also told me ORGANISE and PRAY) so I figured I'd set out the prophetic numbers the Lord has shown me in dreams. Know that I don't know the exact sequence or timing! Where there is a full stop it means a new dream starts I am describing. BTC numbers: \$12,200 saw faintly (possibly fulfilled on certain exchanges in move to \$11,800 or not). \$12,400 while LTC is \$692. \$12,600 approx. while LTC is \$750. BTC \$15,000 and fall sharply. \$16,000. BTC \$4,850 and possible target \$4,440. BTC third wave to \$30,000 to \$35,000 max then crash to \$2,000, recovery to \$60,000 (I don't know how long this all takes and these are approximate figures). BTC \$400 recovering to \$950. Another of seeing under \$1000 BTC. Breakout up from \$9,200 area BTC. \$8,600 (my most recent figure). \$9,200-\$9,500 in dream then going to \$10,400 bullish atmosphere investor excitement (recent), in this dream issues logging in/exchange issues, troubles trading, had this in other dreams too. Basketball shot I saw once maybe twice into a ring seemed to be related to BTC and LTC, interpretation could be following the arc of the ball in ft (10ft ring) or something else. Explosion on a chart under \$7,000 BTC (could be big rise already occurred or attack related as I was told there would be an attack on Madison Square Gardens). Declining numbers then lowest I saw \$6,700, fulfilled, higher numbers up to \$8,500 area I

saw. LTC numbers: LTC breakout when BTC \$11,300. LTC \$307. \$400. \$692. \$750 (danger around this level which could be login related/exchange issues so have orders in). \$790 to \$796 then tick slowly down to \$790 again (asked about selling at \$800 shown this). \$850. Ticking up to \$975 then dropping to \$940. Seeing \$1,100 LTC while BTC was \$10,000 or \$11,000 (seems it could be after a crash where LTC recovers stronger than BTC). My parents telling me LTC went over \$1000 and telling them I sold at \$950 (unsure if AUD or USD, but the other dreams are USD unless specified). I saw LTC at \$58 USD being very profitable entry, in the same dream I saw OKEx (a big bitcoin exchange) failing with fraud involved and people couldn't withdraw their coins, in the dream I couldn't get my Stellar off the exchange it was gone. PPT: shown after the LTC run PPT is good to get into, saw Philakone analysis saying PPT to \$1,000 in the dream I wanted to get some PPT after the LTC run. CLAY: shown in two dreams at different times this coin will go up greatly. As far as I know it hasn't been made yet. XLM Stellar: Shown to go 50/50 personally with ETN/XLM and that something big was going to make the price take off soon. Mount Axiom or Axoin: had a dream about someone who had some connections whispering something crypto related to me and my friend about the two rich crypto related brothers (I looked up after it could be the Winklevoss brothers) being involved in a coin called Mount Axiom or something that it was going to take off big. It was hard to hear, there is only one coin called Axoin but I'm not sure if it's that or not. This was recent. ETN numbers: Shown it will do exceedingly well by the Lord and is my main coin, the Lord will pay wages for spiritual battle through this (is what He told me) and those led will be involved. Saw it in top 5 on Coinmarketcap. Saw other coins going up but ETN going up WAY more. Shown selling on an exchange and very excited about the price. Another dream I checked phone and price was 51 cents. Shown investors in ocean, big wave rise called the third wave which was big and fast, when it crashes I was shown fish from the bottom of the ocean floor would rise up and I would fish them (I believe fishing ETN at very cheap prices, potentially other coins too, this could be the \$2,000 crash). BCH numbers: \$100,000 Bitcoin Cash in AUD at some point. I had people around me I normally wouldn't so something could have changed in the world. Gold: \$130,000 to 140,000 AUD gold but conditions in the world were worse, demonic activity/possessions, paper money had failed but gold was still valuable, used small sized increments of it to travel by boat and barter and was useful to have. Bitcoin Gold and Ethereum: shown a dream of a group of investors who became very rich from these two coins at a future time. In the same dream I saw FAZ at \$71 and UVXY at \$2700. DOW drop from 20-22k to 10-12k. Market being held down until Tether is secured before the balloon can be pumped up and float upwards (close friends dream). These are financial related dreams. I have many war, invasion (US, AUS), nuclear strike (US, AUS), extermination (US, AUS), demon, zombie, and disaster related dreams also that I share on my YouTube channel (recent ones too). Regarding possible overall sequence I could be wrong but I believe we will head up to \$12k area before going down to \$4k area BTC. Then we may begin the third wave to 30-35k BTC with the drop to 2k and recovery to 60k. The LTC low of \$58 could happen when BTC is near \$4k or \$2k. The LTC numbers were mostly paired with the 12k area of BTC so I believe we are heading there for a big LTC run from 11.3k BTC with a potential top of BTC at 12k or 15k. Whether we go to sub 5k BTC now or go to 12k area first I don't know, I'm leaning towards going to 12k first. Also I haven't received anything about RDD but still hold some nor have I received anything myself about Tether collapsing yet etc. (I have asked). Please seek the Lord for confirmation regarding your approach. This is what I can remember I have received so far. Much of it is unfulfilled. Some has been fulfilled already (I didn't list those mostly). Praise the Lord! I hope this helps in having a list of my dreams simplified, you will need to take your own interpretation, timing and sequence and seek the Lord to do so. This can sometimes

feel like a puzzle and when we add what we receive as a body usually there is enough to work it out. May God bless you, Christopher."

As posted on Z3News today 17/4/2018 "Saw in a dream last night a glimpse of the BTC chart, didn't see numbers but looked like we backtracked and went back down to where we were before the recent break out (around 6.5-7k level). If true then it seems we still haven't broken out properly yet. The \$8,600 I saw earlier has not been hit yet nor \$8,500. It is possible that is a reversal there. Christopher."

Posted today 19/4/2018 on Z3news 1am "Saw last night in a dream something to do with Christine and \$10,400 BTC and \$1030 LTC (this seems to be later after a crash recovery potentially as it doesn't fit in with my 12k and \$750 LTC area numbers, I had another figure earlier of 10 or 11k and \$1,100 LTC so this is a confirmation of this). Also something about seeing a small relatively unknown coin Christine spoke about going way up and thinking it was good to invest in, I assume this is Reddcoin (my first dream about it). Then I saw \$7,130 BTC. This might just be a checkpoint though. We didn't hit \$8,500 or \$8,600, looking for a move here before going down but can't be sure since the dream I saw it dropping back to the previous level, I couldn't tell where it dropped from. Christopher."

As posted on Z3news today 19/4/18 "Ok just woke up. Saw a chart on computer screen in my room I saw prices dropping sharply and fall below a support box marked on the screen (perhaps below 6.5-7k), then it went almost vertical up, a far greater vertical move or climb than the one we had recently from 6.5k, it seemed to be a real explosion up in prices. I didn't see the top and I checked prices I didn't remember other prices but I saw LTC was \$195 and it was still moving up. Regarding RDD unsure when it will move, it's been doing well already I didn't see how the big move up effected other coins. I think this drop is soon, I wonder if we make 8.6k first, I do like the 2k free-throw interpretation of my basketball dream from 6.6k area. Christopher."

UPDATE: As posted on Z3news today " In a dream last night I was telling my friend BTC is going to go to 8.9-9.2k (approx.), I couldn't remember exactly the figures I said but I was sure about it in my dream. I think we may go there as 9k-9.2k has been a resistance and may be the beginning of the sharp downward move I saw recently to at least 6.5-7k area. I also was trying to sell at 8.7k but couldn't login and felt maybe it was for a reason in the dream, so I am possibly viewing that as 8.6k not being a turning point but a bit higher. So my current view is we will make it to 8.9-9.2k and this could be the top of this move with a sharp decline after, retracing our recent run then a very strong breakout after this (seemed like the real explosion dream, I know I said the recent vertical seemed more like it but in my dream the surge I saw was vertical or near vertical and at least double the recent 1k vertical breakout) I was only drawn to the LTC price at \$195 and couldn't see other prices but I knew it was going higher in the dream so could be signalling it's time for the LTC run at that point. We'll see, just sharing and that we may make 9k area before a sharp drop retracing and a bit further down then a big fast rise. That's how I see it, please seek the Lord. Christopher."

UPDATE: Dream posted 22/4/2018 on Z3News "Just woke up at 8am. Right before I woke up I had a dream the price was \$8001 or so and I was telling my friend it could go back up and she and I were excited about buying back in as we thought it may only be a correction so far with one more move up before going down. Dream ended. The fact this happened at 8am and \$8,000 is a confirmation to me of prices going to 8k (minor correction) then potentially going back up to 9-9.2k before a drop which could be the beginning of the sharp drop I saw to at least to 7k-6.5k. Cool dream. God bless, Christopher."

Update: this morning posted on Z3News "Short part in dream tonight, price was \$8450 area saw a chart that had been dropping I was still planning to buy at \$8000 and felt led to go with what I received earlier. Dream ended. That is my plan. Two dreams about it, I didn't have to have those dreams so going for it myself. God bless, Christopher." 23/4/2018: UPDATES: As posted on Z3news this morning " Dear brethren. As I was near waking up a vision popped into my mind. I saw RDD at 1.2 cents and it was up 50 %. Dream ended. This means it was 0.8 cents and it went up by 50% to 1.2 cents (I don't know if it was 24 hrs or less). Perhaps that is where the bigger move up begins from 0.8 cents. We are currently lower than that at the moment. I think RDD is moving up soon. The 8k I received to buy maybe it hasn't moved by then and is one of the final buys at cheaper price. Not sure. Seems for the Lord to show me a smaller move like this is significant in some way. God bless." 24/4/2018: "Also forgot to mention one other dream last night of Reddcoin I was telling my sister and people around me about it in the dream and investing in it. This is several confirmations I have received from the Lord regarding Reddcoin (RDD) going up. Please see the prophetic words from brothers and sisters in the Lord on Z3News. God bless you, Christopher." Made several posts on Z3, but here is latest 26/4/2018 "Update: regarding what I have seen the price at 8k and moving to 8k in BTC, I don't know if the price moves up from here (I did mention this in my first dream of seeing 8k that I thought the price would move up in the dream so this could happen), or if it's a minor bounce, or if we continue down for the more severe correction I saw at least to \$7,130 and below. It is possible 8k is a turn around and we head up again, and the correction comes later. I don't have enough information from what I've received yet to know. I am buying at 8k because the Lord showed me to, so it is possible this is a good buy point, and the correction is a bit later, or it is possible that only applies to me for some reason and we keep going down further. I am sharing what I receive but please seek the Lord for understanding and confirmation and what you should do. It was a fairly stressful day seeing BTC go to 9.7k as I was thinking it could fulfill the previous dream I saw of seeing BTC move from 9.5 to 10.4k, but this didn't happen and it seems that will happen later. When I mentioned my most recent dream I was unsure if it went all the way down or rebounded at 8k, I don't know, I couldn't tell. So in summary I believe we are heading to 8k, where we move from there is either up, a temporary rebound, or continue down to lower areas (possibly towards 6k) before the big spike up. God bless, Christopher." As posted on Z3News 27/4/2018: "This morning in a dream I saw \$7,890 or so, I saw also RDD up 93% (I don't know when), and something about ASIC mining chip FUD causing BTC/market to drive really low (I'm not sure but maybe it was in the 4k's), I don't know when this is. God bless, Christopher."

As posted on Z3news 27/4/18 "Given the timing we are nearing the time Christine believed RDD may move up, and I saw 50% and 93% moves in RDD, and that 8k could be coming later possibly after a move up first, I decided to move my funds in USDT into RDD. I realised the Lord isn't giving me every piece of knowledge but some things, and I need to use prudence and wisdom to make decisions with what the Lord has given me. Given the upside in RDD, for me it's better to be safe and be in. I'm still watching for the BTC correction to 8k, perhaps there is a good buy point for coins there (different options of the loaves of bread). I'll be watching the 8k figure closely but for now have decided to be in. God bless." UPDATED DREAMS FOR ETN: As posted on Z3News 10th May 18 "Had a dream this morning I just woke up I was reading written down on paper a technical analysis for RDD from someone (I don't know who) but there was a prophetic reasoning given, the analysis was saying a RDD's target of 5 cents. I did feel some urgency with this dream, but please seek the Lord. I also saw a chart of RDD that showed it dropping but then turn around some (maybe 15-20% up). I also saw people in a prophetic discussion forum (it wasn't Z3, one I

haven't seen before) mentioning ETN had hit a prophetic target of 31 cents and next target was 4 cents and 51 cents (target I received in the past). Something like this. Seems a large move in ETN soon. God bless, Christopher."

As posted on Z3News today 10/5/2018 "I also later dreamed of seeing a chart of BTC and it was at \$12,000 when I was looking at it, and I was waiting for it to move to \$12,500 and I think I was going to exit. I was in something else (not BTC) and I think it could have been LTC. When I saw the chart it looked like not vertical but a very steep angle from a long way down. It had been climbing really fast and steep up from a lower price. I also thought in the dream wow it's seems like it will drop really hard from that as it looked like it climbed in such a steep angle. That was it. I was thinking this could be near the top of the explosive move I saw upwards from what could be from near 7-6k area, as the move was steep upwards. The fact the price was 12k and I was waiting for 12.5k makes me think it was LTC I was in, as the older dreams I was shown LTC at \$692 at \$12,400 BTC and LTC \$750 at BTC mid-12.5k ish area with danger after \$750 LTC in my dream. So that could be possibly the upcoming LTC run to be prepared/ready for. God bless, Christopher."

RDD update and LTC run update: As posted on 12/5/2018 on Z3News "Dear James, to be specific I saw a big severe drop through two boxes on the screen I believe were support boxes. I also received a number of \$7,130 BTC or so. For this reason I believe the two support boxes may be \$7,000 and \$6,500 meaning we could bottom at \$6,000. This was the lowest bottom that occurred so far since the all-time BTC high and I believe we will likely revisit this. From the bottom I saw a HUGE spike upwards in BTC price, bigger than I believe we have seen before in recent times. Additional reason is that my dream of the red bar of soap dropping on the floor then splitting into 10-12 red beautiful rubies shows RDD will spike the greatest when the prices hit the floor (BTC). In addition to this, I was praying for a sell price for some time and last night I received it, but I am not allowed to share it. What I can say is that it confirms the major spike of RDD will be near the bottom of the move down I saw in BTC. Please seek the Lord regarding your sell order. This is important to understand because if your sell orders are filled and you receive BTC from the RDD spike, you may NOT want to put this into USDT, because in the dream I saw of the major drop to I believe 6k ish area, there was a huge explosion upwards in price, and I believe this explosion will go all the way up to 12k and 12.5k and the LTC run will occur I have seen for a long time coming in dreams. This means both BTC and LTC will rise greatly from approximately 6k if I have this right, and the RDD proceeds will be in before this, meaning if you convert into USDT you will actually LOSE value. The best thing may be to convert your BTC into LTC slowly or at the pace you can as both will be rising. I was shown LTC will take off from 11.3k BTC area greatly, so there may be time to transfer BTC into LTC before LTC takes off in a greater profit percentage. Targets to look for are \$692-750 LTC as fairly safe targets in the \$12.4 and to \$12.6k ish BTC area I have received. I received further targets up to \$975 and potentially over \$1,000 but you need to seek the Lord which target you go for. There is the possibility of a move all the way to 15k BTC as I saw this and price retracting sharply from this peak, which could result in the higher LTC prices fulfilled. Also to watch out for are two touches in 12k or above area per Jeremy Stager's dream before the crash to 4k area BTC. The LTC run may only occur on one of them. My plan is to move any BTC from RDD proceeds into LTC, and aim to sell at \$700-750 USD or if I receive a stronger confirmation to aim higher I may. This will turn the RDD proceeds into LTC and have them multiplied. In addition if you exit the market from LTC into fiat you can wait for the drop to 4-5k area BTC and re-enter cryptos at very cheap prices. I will be re-entering ETN heavily personally, among others coins shown to me. I believe things are about to happen and we need to be

prepared and ready, to follow the Lord and where and what He is guiding us to do always. My views are based on interpretation so can be mistaken. Please seek the Lord. May God bless you my brothers and sisters. Praise Jesus! Christopher."

As posted on Z3News this morning 15/5/2018 "Wow just woke up from an epic dream. I was with my family and my mum was telling me about the council telling homeowners to clean up their autumn leaves. I saw a neighbours ash tree (someone told me it was ash) bare and cut back. Then my dad walked out of the house checking his phone and suddenly announced "Yes! The big red egg went off" (I know it was green but he called it red). I was shocked and surprised, he said it went to \$3 and I started to celebrate but then was terrified because I had remembered only a few minutes earlier I had cancelled my sell order and was about to put it back in and got distracted for a few minutes but didn't put it back in. I raced towards the computer in a panic praying "Lord deliver me from my idiocy" and got to the computer and tried to put my order back in but was having trouble and then I got delivered because I woke up from the dream! I am not touching/messing with my sell orders. This may be a warning/encouragement to others to be ready, it is coming! The beginning of June is winter beginning in Australia and I should be seeing my family on the 29th May if plans go ahead which is near the end of autumn if the falling leaves finishing is a timing indicator. Praise the Lord we are close!"

UPDATED SEQUENCE: RDD may take some more time before it spikes. Here is my post on Z3News dated 17th May 2018 about a dream I had this morning showing a coming sequence in Cryptos: "I had a dream last night which changes my understanding of the coming sequence I had been thinking for the price rise in Reddcoin (RDD). What I saw was a section of the coming moves in Bitcoin (BTC) and RDD, and it was surprising to me. I will give the dream, then potential factors regarding interpretation. In my dream, I was looking at a brown wooden sign with black writing engraved in it with some things I didn't understand, but I knew it was about RDD. I saw 4 and in my mind I said, "Oh, I should sell at 4 cents". Then I saw the chart of BTC on Tradingview.com and I saw it begin to drop very fast and quickly in a single candle all the way down (I don't know the time frame of the candle). It kept on going and hit \$6,000. As it hit \$6,000, I saw in the same view the RDD price was going down and hit 0.23 cents as BTC hit \$6,000. Then BTC suddenly rocketed from \$6,000 with explosive force (RDD also began rising). In the dream, I was looking at the chart saying, "Oh look, it's the explosion from the drop I saw and BTC is going to \$12,000 now." I was watching the BTC chart full of green, ups and downs, but moving quickly up. But then I became surprised as it didn't stop at \$12,000 but kept going all the way to \$30,000! As I saw it approaching \$30,000, I saw RDD increase in price and hit a top of about 1.7 cents at BTC 30k. Then Bitcoin dropped suddenly and fast and I saw RDD dropping again from 1.7 cents. Dream ended. So this was surprising to me. What this seems to indicate is that RDD will not take off until this sequence is fulfilled. We still seem to have some more up and down moves of the kite before take-off. My idea that RDD could take off at the coming drop to \$6,000 seems to be mistaken. This confirms a prophetic dream shared by Z3er Ed H who dreamed of walking up a sand dune and at the top was various gems of different colours (other coins performing well), but on the other side and down the hill was covered in red gems (Reddcoin performing well on the market decline). What I believe this means is that RDD will take off sometime after \$30,000 is reached in BTC. I didn't see when it would take off as the dream ended, only that it hadn't gone off YET. My dream of the red bar of soap splitting into red gems when it hit the floor shows also RDD will take off during a decline, but I believe now it will be after a move to \$30,000 in BTC. When I saw the red gems on the floor, there was another large white gem and a few other gems already there potentially showing other coins

had moved first. This might mean other coins will perform well (the other gems seen at the top of the sand dune), before Reddcoin takes off somewhere in the decline of BTC from \$30,000 (based on the sell price ratio I received from the Lord seemingly around \$5- \$8k). Here is my updated idea on where it might move. This is speculative as I don't know the exact sequence. In a separate dream recently, I saw a prophetic Technical Analysis of RDD moving to 5 cents and it felt more urgent. This could be fulfilled soon as I received again an instruction to sell at 4 cents. This could happen sometime after BTC reaches \$8,000 potentially as I was shown that as a good buying point for RDD, or that move could be later. There is a BTC decline to \$6,000 with a cheap entry of RDD at 0.23 cents (it moved quickly) before a fast spike upwards. It could be that RDD moves before this sequence that I saw. If this happens and RDD goes all the way to \$3 and \$5 then drops back to 0.23 cents, it would be a huge fall. It's either RDD moves before this or after this. I can't be entirely sure, there is a lot of information so it's difficult to understand the sequence. So far, I'm not doing anything. If RDD moved first that would be good, but I'm not sure. I only have some parts of the puzzle and have to figure out how the rest fit in. The basics of what I understood from this dream is that RDD will not take off YET. It may take some more time. I don't know how fast BTC can move to \$30,000, it seemed very fast in the dream but this doesn't always translate. It seems there will be some more up and downs of the kite of RDD. For those who are holding this is fine, but it might take some more time. I don't know how this fits in with my dream seeming to indicate the end of autumn here (I don't know if ash tree means anything particular) for the RDD move to \$3. This makes interpreting things more challenging. There seem to be some good trades shown here, but uncertainties on what coins will move and when. If RDD moves to 4 cents, I'm planning an exit and re-entry near \$6,000 BTC and I will probably hold RDD from there. I might enter into ETN when BTC reaches \$6,000, and I don't know how the LTC price run works into this. If RDD moves soon to 4 or 5 cents and you sold and re bought at 0.3 cents this would be a 13x gain of coins. This is assuming RDD moves to 4 or 5 cents soon and not later. Plus, I have seen BTC go to \$30,000 then drop to \$2,000, so we could have the major decline to \$2,000 after it reaches \$30,000. We might go lower than \$2,000 as I have seen BTC under \$1,000 and LTC at \$400 and BTC at \$400 before moving quickly to \$1,000. This could mean LTC reaches a high price during the BTC run to \$30,000, and the previous exit targets I was suggesting may not be appropriate. I have seen \$975, \$850, and potentially over \$1,000 if this was USD for LTC. This is a lot to consider and think about. Especially since my recent RDD dream had a warning about not having sell orders in place. Caution is needed as there are more possibilities here than I can discuss properly. Please seek the Lord regarding your approach. Making trades is always risky, and if it is more comfortable for you to hold and wait, that is safer. It seems there will be some price moves before RDD takes off majorly. Watch for a RDD move towards 5 cents because I was shown this with more urgency. What I saw this morning in this dream is part of the sequence and must be interpreted and fit into the right timeline so again please seek the Lord. Regarding ETN, I've recently seen 31 cents being reached and my friend received something about selling at 35.5 cents which seems it could be ETN related. I also saw 4 cents and 51 cents (not sure what is first). I don't know when ETN will move, but it might move in the coming move to \$30,000 BTC. The move of RDD from 0.23 cents to 1.7 cents is approximately 7.4x price. The move from \$6,000 BTC to \$30,000 is 5x price. If ETN is under 2 cents at 6k and moves to 31 cents this is 15.5x price. The run to \$30,000 BTC could be the third wave rise in ETN I saw long ago, with a cheap entry coming at the crash from \$30,000 in ETN. I have been watching for this for a LONG TIME and do not want to miss it. I don't know if the LTC run happens during this climb to \$30,000, if it does I don't know where the top of LTC is, as it could keep going quite high. For that reason I'm unsure now regarding an exit point for LTC but I'll still be watching \$11,300 BTC for LTC take-off. I

think the Lord is having us seek Him personally for guidance in these matters because they can be difficult to understand the right sequence. Knowledge without understanding can be troublesome to deal with correctly. Pray to the Lord for wisdom and understanding."

UPDATE RDD/ETN/XLM: As posted on Z3News 1st June 2018 "This morning I had some interesting things come up. First I had a dream of seeing RDD on my blockfolio app going up and quickly changing in price as I refreshed and I saw a price of 0.0499 (4.99 cents) and I forgot I wasn't logged in so quickly was trying to log in to sell. That was it. Then I dreamed of seeing Stellar Lumens (XLM) at \$0.91 (91 cents) on Coinmarketcap and being surprised and impressed. That was it. Then I dreamed of seeing Electroneum (ETN) at 30 cents and commented in the dream "wow that's a good return from 2 cents", and I also saw (I'm 90% sure) Reddcoin at 30 cents at the same time. Both were \$0.30 (30 cents). Dreams ended. Some interesting information here. Please seek the Lord regarding your action/understanding. I was praying to the Lord last night if I should sell at 4 cents and to confirm this to me, so I take this as my own personal confirmation to make this trade (please seek the Lord before you decide to). It also seems as if both Electroneum and Reddcoin will make a move to 30 cents, and this will be after RDD reaches 5 cents. If RDD reaches 5 cents and I sell, I am planning a re-entry into RDD and also picking up some ETN and XLM (though a larger holding in RDD as I was instructed previously with "larger bowl"). I don't have any figures for re-entry yet aside from 0.23 cents RDD at \$6,000. This could be reached after some other things occur, or the rise to 30 cents may occur during the rise to 30k. In the dream of seeing RDD at 1.7 cents at 30k I did not see the price of RDD the entire time from 6k to 30k, I saw the price when BTC was near 30k, so there is a possibility of moves up and down between then. So my view is there will still be some ups and downs before RDD takes off to \$3 and \$5. Also this is the first figure I have seen for Stellar XLM. I saw RDD spiking to 29 cents in a previous dream, and now I see 30 cents again. I'm not sure if this is a possible trade area quite yet. Another person mentioned about seeing 29 and also people excited about 7, or something like this but I can't find the comment. So this is further focus I have received of a move to 29/30 cents, both for ETN and for RDD, and that they will be at 30 cents at the same time (I believe). Regarding ETN I believe it could be a good sell point but regarding RDD I'm not sure yet. God bless. Christopher."

As posted on Z3News on June 5th 2018 "Was recent, in last few days. Wasn't thinking about LTC but it came up. No price for BTC when this is reached. Not sure when it will be reached either. Last time we hit 6k LTC didn't go that low so perhaps there are more moves before the 6k sequence I saw. Tonight in dream I saw RDD at 0.4 cents and rebounding to 0.6 cents. Not sure when this move is. I previously saw day or so ago RDD at 0.96 cents moving to 0.78 then I was waiting for it to move to 1 cent and I was expecting it to move some lower from 1 cent. Few smaller moves not sure how to place it though. God bless. Christopher."

As posted on Z3News on 9/6/2018 "Had a dream this morning of seeing RDD on an exchange and chart move from 12 cents to 20 then I saw it had gone to 59 cents and I was trying to login to sell. That was the dream. I wasn't aware of another potential trade for RDD. I've been shown about 5 cents but in this dream I was trying to sell at about 50 cents. Please take this to the Lord for confirmation and if you should act on anything or continue holding. God bless. Christopher."

As posted on Z3News 22/6/2018 "Dear Brian thank you for sharing that. The night before last I had a dream of being with other people as evil was coming upon the earth, we were climbing up high but higher than trees and we went up high. We were all standing on a see

through floor up in the air and it seemed it was my brothers and sisters in Christ. I then saw the Lord on a throne (He was huge in size), but the room seemed to be fairly simple. I could only see the bottom half of Him. He said "come and worship me" and he was saying this to us all. So I jumped off the floor we were on in the air and when I hit the floor my legs stopped working but I didn't care (was a big drop), so I crawled over and began to worship the Lord with my head on the ground. As I was worshipping Him I felt amazing peace and joy doing so. Then surprisingly I saw a list of assigned roles on a book flip through to near the end and I knew my name was there but I didn't know what it said exactly, and the book went on an angle so I couldn't see the other names there, but it was near the end of the pages I saw. Then surprisingly as I was still worshipping I saw a view of Reddcoin with an exchange price/chart. I saw it then go up an absurd percentage, way way up and I knew God was doing this. I was surprised to see this, that part of the dream ended and I was before my laptop as I was looking to put anything extra I had into RDD. That was all. I believe the Lord wants us to worship Him in this time and believe in His promise and keep holding on. God bless my brothers and sisters. Love Christopher."

As posted on Z3news 2/7/2018 " In dreams last night saw RDD at 0.96 cents moving to 0.93. Similar to what I saw earlier of 0.96 to 0.78 then anticipating it back to 1 cent and then down. Then I saw \$8,800 BTC (not too long ago saw 9k) and later this morning I saw ETN at 13.7 cents after a crypto app alert went off (earlier saw 31 cents as next target, not sure if it keeps moving up from 13.7). May God bless you. Christopher."

As posted on Z3News 5/7/2018 "...Something relevant I saw clearly this morning in a dream, I saw the Coinmarketcap list and I saw that BTC was at \$7,600 approx. and it was up 80% in the 24 hour increase section. This means it was at about \$4,200 and went up 80% to \$7,600 in 24 hours! Quite a huge move. I also saw in dream last night 0.31/0.41 cent RDD..." May God bless you. Christopher.

As posted on Z3News on July 8th 2018 "I had a dream this morning of being at an airport and rushing to board a flight, there was a gap in the front of the line myself and another could walk in, but I felt bad about cutting the line so I didn't. I noticed there was reddish carpet going into the plane. The plane was in the same room as everyone and there was a long line of people waiting to board the plane. In the dream I had a boarding pass to that plane but I thought the line was too long so I went to try to go board another plane I thought would take off quicker. When I did that the plane I was meant to go on left and I couldn't board the other planes because I didn't have the right boarding pass, and they left later than the first one anyway! I initially thought it was something to do with the rapture because I didn't remember the red carpet at first, but when I prayed to the Lord I thought about "lift off" and that this was about Reddcoin. That people are patiently waiting in line to board the plane as it was going to lift off, they all had tickets and were patiently waiting. I was representing those who were impatient and didn't want to wait and went to try to board other aircraft (other cryptos?) but my ticket couldn't be used on those aircraft (the Lord's will was for me to wait for the first aircraft) and they took off later despite me wanting to leave quicker. I think this is speaking to impatience and a desire of wanting something that will take off quicker. But I believe the Lord is encouraging us to patiently wait with our tickets to board the plane and have lift off. I believe the plane represents RDD and will take off in the Lord's timing but we need to be patient. If we are not patient and go after another plane with the wrong ticket the RDD plane will leave without us and we won't be going anywhere. That's my interpretation anyway. I think this goes with this Word by Ivette and what you mentioned Christine, to

continue to be patient and as the Lord told me before, in this time worship the Lord Jesus, worship our God and trust in His promises. God bless. Christopher."

As posted on Z3News 11/7/2018 "Saw recently in dreams \$4,600 BTC and also in another 0.63 cents RDD. I didn't mention this but I saw 0.53 cents earlier but it wasn't that far from the current price at the time, then a few days later it hit 0.53 and exactly rebounded, so mentioning this encase 0.63 is something similar. God bless. Christopher."

As posted on Z3News today 15/7/2018 "This morning in a dream I saw clearly \$10,325 BTC and then a bit later I saw \$13,000 and seemed like it was meant to drop to the first figure (10325). Not exactly sure that was the feeling in the dream, but two figures I'll share of \$10,325 and \$13,000. God bless. Christopher. "

As posted on Z3News 18/7/2018 "These two posts from dreams I had on July 5th and 6th look like they are fulfilled "The dream I saw where I saw from above a road which represented BTC going down to the coast, then going up some then the road went near vertical up..." and "Saw last night a strong move up past \$7,100 in BTC. God bless. Christopher." The strong move up happened. I'm watching 0.63 RDD and higher RDD targets towards 1 cent. Otherwise I've got 8,800 and 9,000 BTC with higher figures near 12/15k. God bless. Christopher."

As posted on Z3News 21/7/2018 "Saw in a dream last night Bitcoin chart on trading view, the part of the chart I saw it had gone up a lot with large green pillars back to back (strong uprise) and price was \$11,100 or so and RDD was 0.9 cents or 0.99 cents I can't remember which, at the same time. God bless. Christopher. "

As posted on Z3News 24/7/2018 "Dear Z3 I saw yesterday 23/7/2018 in a dream of RDD going to 1 cent (some ups and downs in between) and BTC went up seemingly to at least 10k (I didn't see exactly, but from earlier dream I saw \$11,100 when RDD was near 1 cent), then I saw RDD go down and I saw BTC at what I think was around 5k or lower. So I think we're going up for a bit, then going back down again. I think RDD is going to top near 1 cent from this move, then the market heading lower towards 5k BTC again. I've been shown potential sells at 0.63, 0.96 (re-entry at 0.8) and 1 cent. I have 0.31 cent RDD target outstanding so I assume that could be reached near 5k BTC and seems a good re-entry. I don't know when the 0.23 RDD and 6k BTC I saw is coming I assume a bit further out. God bless. Christopher."

As posted on Z3news today 25/7/2018 "I saw 0.71 cent RDD today and 0.70 yesterday in dreams, could be the top or turning point of the move to 0.63. God bless."

As posted on Z3News on 29/7/2018 "Had some important crypto info in dream this morning 29/7/2018: I saw a chart on trading view of BTC topping out around \$8,800 to \$9,000 or so, then a huge red drop fast steep to \$5,600 approx. Then it rebounded very strong vertical up from \$5,600 area and the words "Tsunami Wall" came up on the chart as I saw the price go up with green and it went to at least \$10,000. I didn't see the exact top of BTC but I saw RDD at 0.96 cents and going to 1 cent. Then the dream ended. I think this provides further context for my previous dreams. The move to 8.8-9k could be the 0.71 move for RDD, then the drop to 5.6k could bring RDD to the 0.31 target I received and another Z3er received, then a huge move to 10k at least (I saw 11k earlier at 1 cent RDD) and RDD tops around 1 cent. I believe from there we will have another correction to maybe 4-5k as I saw BTC drop from 11k to this area. These are some strong up and down moves that could be traded

potentially. Sharing with you my brethren. See my other dreams above to fit this in. Christopher."

As posted on Z3News 3/8/2018 "On 5/7/18 I had posted this "I also saw in dream last night 0.31/0.41 cent RDD" I didn't know what it meant exactly but seems it was a decline from 0.41 to 0.31 which has happened now. Hope we heading up from here. Last night in a dream I saw 0.15 cent RDD, lowest price I've seen. Might be a good buy for those with \$ on the side and could be reached when BTC declines either to 5.6k I saw, or the 5k or lower I also saw after 11k (described in above posts)."

As posted on Z3News today 14/8/2018 "I had a dream on 12/8/2018 (2 days ago here in Aus) that I didn't share though I should have. RDD was 0.23 cents at the time. In the dream my dad said "I'm going to get red hurts" as if he was talking about a movie or something. Then later in the night a dream of a friend being pushed off the stairs by someone and falling down (was high stairs). I thought they were dead but they turned out okay, then a woman said to my friend to get that office gear off you (a red suit I believe) before you drop like fire. So I thought it was about RDD, but I didn't share my apologies. I have a lower target of 0.15 cents but not sure if this is a bottom. God bless. Christopher."

As posted on Z3News 26/8/2018 "Saw 0.15 and 0.8 last night written on paper which I believed was referring to RDD in cents. Could be 0.15 is at or near the low and 0.8 is next move up from there. Could be a good point to put any extra \$ in around 0.15. God bless. Christopher."

As posted on Z3News 13/10/2018 "Hi everyone, I am sharing a dream here I received on 1st September 2018. I did not share this at the time because it seemed like it may be contradictory to another dream I had and numbers I received. I have felt led to share this and have not had much dreams about cryptos lately (this was the latest). In the dream I was outside in what looked like a cafe type setting and I saw a laptop open with two people next to it and drawing in close and pointing at the screen, I saw something stock related going to around 5,600 I thought, the two men were remarking and they seemed worried about the severe dip in the stock market, I saw some red drops on a chart that was something to do with the market but it seemed like it hadn't been that long since it was going down or it wasn't completed yet, and I took over the mouse as I wanted to check crypto prices (it was on trading view) and saw BTC was \$44,000 and then I thought to look at Reddcoin and saw it was 0.89. I didn't immediately share this because it seemed potentially contradictory to what I've seen earlier of a move to 30k and a decrease from there. Also when I saw 30k BTC I saw RDD at 1.7 cents previously and the price seem to move down from there. I am sharing as this could possibly be another sequence, and I apologise for not sharing earlier. I felt led to share now as it was on my mind for some time. The dream seems to indicate a large move up in BTC when there is a stock market drop, the drop being enough to cause seemingly regular people to be worried. May God bless you. Christopher."

As posted on Z3News 27/10/2018 "I saw after I woke up this morning an image come into my mind of my RDD holdings on Blockfolio (the app on mobile) they were less than half what they are now in USD. This may mean the 0.15 cent RDD target I saw earlier is coming soon. God bless. Christopher."

As posted on Z3News 12/11/2018 "Hi everyone, this morning after I woke and still in bed the number 5977 BTC came to me. I had not been thinking about crypto much at all and when it

came to me it also came with a peace. Perhaps a drop to at least there coming soon. God bless. Christopher. "

As posted on Z3News 14/11/2018 "I had a dream this morning 14/11/2018 and I saw a trading view chart with my dad and saw the Dow I believe had dropped significantly in up and down jagged spikes. I saw it had stepped down in stages about 3 times and then I saw the price of RDD was 0.138 cents and changed to 0.17 cents. I believe the Lord may be showing a good entry for RDD here, confirming the last two dreams I've had of this price range. God bless. Christopher."

As posted on Z3news 21/11/2018: "I had a dream a long time ago about Bitcoin Cash moving from about \$400 to \$800 usd. I can't remember the exact figures and I think it was over 6 months ago as I can't find it in my last two dream books. I will try to find it and update exactly what it was. Anyway, this morning 21/11/2018 I saw the Bitcoin cash price rising. I couldn't remember the price where I first saw it begin, but I know it went past \$800 and towards \$1350 and I said assuming "oh it's going to stop at \$1350" but I was shocked to see the price go all the way to \$11,000. That was the dream. God bless. Christopher."

As posted on Z3News yesterday 2nd Dec 2018 "This morning in a dream I saw RDD on a chart and it was going up fairly steeply I didn't see an amount for the rise, then it went down and sideways for a while fairly stretched out and lower and I saw the price was 0.12 (I think cents). I was going to buy at that price and the dream ended. God bless. Christopher."

As posted on Z3News today 3rd Dec 2018 "This morning in a dream I saw a big candle up (or a fairly steep move up) on BTC chart and price was 6500. God bless."

As posted on Z3news 7 Dec 2018 "Saw this morning in a dream on a trading view chart BTC was at \$13,000 USD. God bless. Something I saw earlier, probably two weeks or so ago was 0.068. I wasn't sure what it was about so I didn't share it but I'll share it now."

As posted on Z3News 9 Dec 2018 "Dear brethren, I prayed last night regarding the rise in RDD and where it would go, then this morning I had a dream. In the dream I saw on my laptop the price of RDD at 0.89 cents and it was up a high % (I can't remember exactly how much) and I was quickly trying to log in Bittrex and sell. That was the dream. I prayed for confirmation and afterwards dreamed of telling people about my dream. I previously dreamed of prices at 0.9 cents, 1 cent, 0.63 and 0.71, I did see some price slightly over 1 cent but I don't think I shared them (1.1) but I think a top may be near 1 cent based on this dream: As posted on Z3News 24/7/2018 "Dear Z3 I saw yesterday 23/7/2018 in a dream of RDD going to 1 cent (some ups and downs in between) and BTC went up seemingly to at least 10k (I didn't see exactly, but from earlier dream I saw \$11,100 when RDD was near 1 cent), then I saw RDD go down and I saw BTC at what I think was around 5k or lower. So I think we're going up for a bit, then going back down again. I think RDD is going to top near 1 cent from this move, then the market heading lower towards 5k BTC again." As I had the dream of RDD rising then going back to 0.12 cents I believe this accords with this dream. Another dream to consider is this one: "As posted on Z3News on 29/7/2018 "Had some important crypto info in dream this morning 29/7/2018: I saw a chart on trading view of BTC topping out around \$8,800 to \$9,000 or so, then a huge red drop fast steep to \$5,600 approx. Then it rebounded very strong vertical up from \$5,600 area and the words "Tsunami Wall" came up on the chart as I saw the price go up with green and it went to at least \$10,000. I didn't see the exact top of BTC but I saw RDD at 0.96 cents and going to 1 cent. Then the dream

ended.” So Based on this there could be a rise to 0.7 cents area for RDD maybe corresponding with 8-9k BTC, a drop to 5.6k BTC, then a steep rise to 10k+ BTC with 1 cent RDD. After 1 cent RDD I believe the market will drop again and RDD 0.12 cents could be fulfilled then. I know we hit less than 0.12 cents already, but in the dream I had of seeing 0.12 it happened after a rise in RDD and a period of time of decline. Consider these dreams and I believe to watch out for potential turns around 0.6/0.7 cents RDD and 0.9-1 cent RDD area, looking for a re-entry at 0.12 cent RDD after there has been a rise. Again I’m not certain of exact sequence so seek the Lord for confirmation and instruction. God bless you. Christopher.”

As posted on Z3News 20th Dec 2018 "In a dream last night I saw a forum with people talking and it was Christmas themed with snow and stuff in the design of the forum. People were talking about Bitcoin, the price was at \$5,000 and they were talking about it going to \$5,450 and I saw RDD was at 0.76 (cents I believe). I also saw after this scene \$11,200 BTC. I was initially reluctant to share this because I have seen some other figures of 1 cent RDD around 11k BTC so I wasn't sure if this fit in and I am not as sure about this dream, but I'll share it anyway. God bless you." And posted on 23 Dec 2018 "Something I received in a dream on 22nd November 2018 was seeing 1 cent and 1.17 cent RDD and BTC was \$5,555. I was planning to wait for more confirmation before sharing this one, but it kept coming to mind and it goes along with the last dream I shared, so I'll just share it now anyway. God bless."

Saw in a dream this morning 29/12/2018 seeing my computer and I checked the crypto prices and BTC was at \$7,400 and RDD was 1.42 cents. God bless. Christopher.

As posted on Z3News "Hi everyone. This morning 22/2/2019 I had a dream and in the dream it was early March like maybe the 1st to the 3rd and RDD had gone up. I was logged on my exchange and I think I was considering selling. As I was thinking in the dream I knew at the end of March RDD was going to go up much higher. That was it. Potentially a good move coming soon, if it's this March. God bless you. Christopher."

As posted on Z3News 23/2/2019 "Hi everyone. I had a dream this morning I saw a person in my room on the table with his laptop out. He then said "I'm going to check the Bitcoin price" and then he said "wow it's at 10k". Then I told him to show me the chart and I saw it was at 10k (I didn't see exact figure or the details of the chart). I then told him I had a dream months ago BTC would spike from 4.2k area. Then later in another dream this morning I was telling someone about BTC going to 10k. Thought I'd share. God bless you. Christopher."

As posted on Z3News 28/2/2019 "Hi everyone, yesterday I had a dream and I saw the market was up, then it went down something like 59% and BTC was 3-3.2k. This would be a decline from \$8,000 to \$7,600 area to 3-3.2k. I have seen \$7,400 to \$7,600 area BTC earlier. I could only be seeing part of the decline in the dream and not necessarily from the top. I have previously seen a continued decline in BTC to 3.2k area and RDD was 0.18. I think this would be after a rise in RDD as we are currently at 0.12. So we could have a temporary rise in BTC/RDD followed by another drop (potentially 0.18 a good re-entry). Regarding possibilities for March which I think will be a good rise (if it is this March): we could see a move up to 5.5k area BTC and 0.76 RDD, or we could go higher to \$7,600 to 8k like I have seen (80% move up in BTC), but I have also seen higher at 10-11k. The numbers I have seen frequently range from 0.71 to 0.76 cents area for RDD and 1 cent to 1.4 cents. I don't know how big of a rise will occur March (if it's the right one), the first was decent enough for me to

log on the exchange and consider selling, and the second I knew would be much bigger at the end of March (I don't know how much) which is what I said in the dream. I have other figures also of a 4-5 cent move. Something to consider. Please seek the Lord. God bless. Christopher."

Updated RDD related dream: (additional ones posted below from 22/3/2019. Earlier dreams posted on last two Crypto update vids in pinned section top comment) As posted today on Z3News "I had a dream this morning 22/3/19 and I saw a BTC chart and the price dropped fast to 3.4-3.6k then when I checked again it had gone straight up to 4.4k. I saw at this price RDD was \$0.0089 (0.89 cents). Then I was trying to login to sell. The scene changed and someone who seemed like a friend was excited with me about the move in BTC and I told him what I saw, being excited about the RDD move. After this I had a lot of distractions in the dream trying to make me forget what I saw. I felt like the move was soon. I said 0.89 cents RDD was my target and I was planning to sell and rebuy lower. God bless you. Christopher."

As posted on Z3News today 31/3/2019 "Dear brethren, I've had a few dreams recently. In one yesterday I saw a vision when I thought I was awake properly and I saw a chart on trading view. I saw a rise to around \$4,300 area then a drop down, then a rise to \$4,400 area and RDD was 0.0089 then an extended drop. I'm not sure on a re-entry after 0.0089. The other RDD number I received was \$0.0018 at \$3,200 a while ago, but it may go lower. That could be a good re-entry. Then this morning 31/3/2019 I had a dream of seeing the price go to \$4,200 area and RDD was \$0.00145 and in the dream I had sold and then the scene changed and I saw the price of BTC dropping it was about \$3,800 and RDD was around \$0.0010 and I was considering buying in for the \$0.0089 move. The price was near the line I drew on my chart for \$3,600. Anyway consider these matters. We could have a short continued move up to \$4.3k area then a drop to around \$3.4-3.8k area, then I expect a faster rise in BTC to \$4.4k and RDD to \$0.0089, followed by another drop to at least \$3,200 I believe with \$0.0018 RDD. Good trades to be made here if done correctly. Seek the Lord. God bless you. Christopher."

As posted on Z3News today 8/4/2019 "After seeking the Lord on these matters I wanted to add something. In the first dream above I described on March 31 of a vision I saw when I thought I was awake, and this was a trading view chart. I gave some of the details but not all of it, because I needed to seek more confirmation. In this vision I saw the chart moving, but it was going in the opposite direction, from right to left and not left to right. I thought that seemed odd. So I saw the first rise up (it seems I didn't get the top as it went further than I thought), then I saw it drop down. Where it will drop I assume (I didn't see in this dream) is 3.4-3.6k area which I saw in another dream but this may not be the exact bottom. Then I saw the rise to \$4,400 area with RDD at \$0.0089 (this also may not be the top). But then I saw an extended drop after. I didn't detail what this "extended drop" was because I wanted to seek the Lord more. So what I saw in the vision was a zig-zag up and down to shockingly what I think I saw was \$100 at the end. Then a few days later in a dream I saw \$1,770 and \$1,550 BTC in a dream and I wanted to buy in, so I took this as confirmation of lower BTC. I also saw \$3,570 the day before I saw those lower figures, so I think we're still on track at the moment for a decline being the drop I saw, and hopefully after that drop the bigger upward RDD move near 1 cent. After this I saw a continual moving lower in price, even very low BTC. What this sequence reminded me of was my Reddcoin bar of soap dream, where I saw a red bar of soap in a mansion bathroom drop off the sink area and it fell onto the ground and split into 12 or so red gems. This could be something to do with the price

dropping to the ground before the bar of soap (the investment seeming to be a “bar of soap”) turns into 12 or so brilliant red rubies. I have seen some low BTC figures in the past, but I thought I’d share this, that we have some lower BTC figures I’ve seen that may be coming up. I am not certain how this will play out. I’ll be seeking the Lord for further understanding, but for now I wanted to share this. God bless you. Christopher."

As posted on Z3News today 9/4/2019 "Thank you James for sharing. I had a dream yesterday. In this dream I was in my home in the kitchen. Then I saw numbers for Reddcoin like on a digital reader and it was showing me at first \$0.0089. Then it changed to \$0.0123 and waited on this for a few seconds, then it changed to \$0.0140 but was there for only half a second then I thought it changed to \$0.0160 but for a micro second. Then the numbers changed fairly rapidly and I saw \$0.19 (19 cents) and it paused on this, then I saw it go down, then I saw \$0.59 (59 cents) cents and it paused on this and went down, then it was no longer in cents as it went \$1, \$2, \$3, \$4, \$5. It moved through those dollar numbers quickly so I couldn't tell if there was any certain sequence. Then interestingly I saw some statements like: “out of stock” or “out of order” then some bank notices and requests for bank verification and things like this. I think that might be to do with trying to withdraw the proceeds to the bank, there might be some verification needed. In the dream after I saw the numbers I was trying to tell a family member. Then today (one day later) I had a dream where I was telling some people about my dream yesterday, so I will share it. Anyway this was an encouraging dream for me. The bigger prices are certainly coming. I think the focus on the \$0.0089, the \$0.0123, \$0.0140 and \$0.0160 are showing potentially the higher prices for the \$0.0089 move. The price seemed to stay on \$0.0123 (1.23 cents) for a fair amount of time, perhaps indicating it's a safe sell point, but was less time on the \$0.0140 (1.4 cent) and only a split second on the \$0.0160 (1.6 cent) I saw. That would be a great move. I believe that move is coming after we go back down in BTC to around \$3.4-3.6k. The days are coming when God's revelations of these matters to us will come to pass. Keep holding on. God bless. Christopher."

As posted on Z3News today 11/4/2019": "I saw a sequence this morning in a dream. Before this, two days ago I saw BTC up 23% in green. Then one day later I saw \$4,160. I wasn't sure what these meant so I prayed to the Lord. Today He showed me. I just had a dream where I saw the BTC price rise to about \$6,500 (almost exactly 23% up from current price \$5,300). Then the scene changed and I saw a chart showing a massive and fast drop and the price \$3,100, which rebounded to \$3,600 and stayed there as the dream ended. I think this is the setup before the 1 cent RDD move. God bless you. Christopher."

As posted on Z3News today 13/4/2019 "Yesterday I had a dream of seeing BTC rise from I think about \$3,300 area really fast and really quick on a trading view chart. I saw it rising up and as the chart rose up it looked like it we had just come from a severe decline. I saw it keep rising up to \$7,400 or so and the dream ended. This may be the same rise where the 0.89/1+ cent RDD move occurs that I saw. God bless. Christopher."

As posted on Z3News Today 17/4/2019 "Hi everyone. I woke up from a dream this morning and in this dream I saw a BTC chart rise up to about \$8,000. Then the scene changed and I saw it dropping, the view moved to a Bittrex screen and I saw BTC dropping (I didn't see the chart), but I saw numbers changing going lower (I can't remember them exactly) and the final number I saw was \$220 and the dream ended. This is now a few confirmations I've received of BTC going extremely low. I don't know how long this will take, or what moves will occur in between, or what will happen with RDD at this time. God bless."

As posted on Z3News 26/4/2019 "Saw \$3160 in a dream this morning. I assume it's BTC."

As posted on Z3News 1/5/2019 "Had a dream this morning and saw BTC at about \$7,170 on trading view and RDD was \$0.0020 (0.20 cents). God bless you."

As posted on Z3News 10/5/2019 "This morning in a dream I saw on trading view that BTC was at \$9,900. Then I had another dream after where someone told me they saw \$9,700 (or so, I can't remember exactly), and I said I had just seen a price near 10k. I said to them I didn't know if what I saw was the top. God bless you. Christopher."

As posted on Z3News today 13/5/2019 "Hey everyone. I just had a dream and I believe the Lord was showing me that we are going down to \$3,200 now, we aren't going up to 10k yet. In the dream I saw the price was at \$3,200 and I was remarking that wow even my original trade I was shown was going to work (selling at 14.5c RDD). I was talking about how I needed a greater faith. I didn't see the RDD price at \$3,200. I previously saw RDD at \$0.0010 (0.10 cents) around the \$3,800 area, and I saw in another dream which I didn't share RDD at \$0.0008 or (0.08 cents). I believe once we go back to 3k we are setting up for the 1 cent RDD move, so be prepared for that. Hope this helps. God bless. Christopher."

As posted on Z3News 20/5/2019 "Thanks Ed. I had a couple of dreams recently. I don't understand exactly how things will go. Two days ago I saw in a dream a declining price on a chart to what seemed about \$5300. Then the scene changed and I saw a number \$8,883 or so. Then this morning in a dream I saw the price go up on a chart to just a bit over 10k then drop down with a big wick. It seemed like it dropped so fast I saw numbers dropping then I saw \$800, then the scene changed and I saw it go up again. Then some guy told me you could pick up BTC for a few hundred dollars. I am not sure on the sequence and timing. God bless. Christopher."

As posted on Z3News 29/5/2019: "Hi Tim and Z3, I saw BTC at \$9,500 on a Trading view chart in a dream this morning. God bless."

As posted on Z3News 30/5/2019: "Hi John and everyone, I saw BTC was at \$2,220 on a Trading View chart in a dream this morning. God bless. Christopher."

As posted on Z3News 2/6/2019 "Thanks for sharing Robson, I had a dream this morning of a huge crash in BTC, it was massive, I was watching the chart go lower and lower, and lower, and some very low buy orders I had were filled. Then I saw some numbers in the few hundreds of dollars come up in my view, which was Bitcoin. In the dream I celebrated and praised God at being able to buy BTC so cheaply, and the dream changed and I was telling someone that this major crash was definitely going to happen. This was the dream. I do believe this will take place, as to the timing I do not know. I have now had several dreams of a major BTC crash below \$1,000. God bless. Christopher."

As posted on Z3News on 23/6/2019: "Hi everyone. I had a dream yesterday of seeing the DOW at 17,600. That would be a good move in UVXY and FAZ. Not sure how long it will take to be fulfilled. Also today another dream of BTC under \$400 and I was trying to buy. Not sure when, but I had more \$ than I do now on the exchange, so guessing that something moved before then. God bless. Christopher."

As posted on Z3News: "I had a dream this morning 11/7/2019 of seeing the BTC chart, it had fallen steeply to about 7.5-7.8k, it was recovering and I was mentioning to my friend that I thought it would make another severe drop soon. I was planning to put aside more \$ to buy lower. That was the dream. God bless you. Christopher."

As posted on Z3News 10/8/2019: "Hi everyone, I saw in a dream last night RDD trading at \$0.0020 or \$0.0022 or so. A few days ago I saw \$12,500 BTC (when BTC was \$10,700). I should have shared that earlier, but perhaps we are moving up a bit higher for now. God bless. Christopher."

As posted on Z3News 15/8/2019 "I saw a sequence last night in a dream, I saw BTC dropping to 10k area, then I saw it going way up steeply and I saw \$26,000 and the dream ended. I prayed for confirmation because I was not sure about how it would fit with what I have been shown so far, and there was a confirmation I received after but I don't remember the details of it. So take it to prayer as I'm not sure when this could take place. God bless you."

As posted on Z3News 20/8/2019: "I saw \$8,160 or so BTC on the chart in a dream last night. God bless. Christopher."

As posted on Z3News 25/8/2019: "I saw in a dream this morning the price of BTC change to \$8,777 in red. I didn't see the price before it changed but I knew it had gone down. God bless you. Christopher."

As posted on Z3News 28th September 2019: "I saw in a dream this morning BTC like it was on Blockfolio at \$11,000 then change to 12 or 13k. God bless."

As posted on Z3News 29/9/2019 "I had a few dreams I haven't mentioned. One was on 1st September seeing \$6,200 BTC, then on 4th September \$5,500 BTC and again on 25th September \$6,200 BTC. God bless. Christopher."

As posted on Z3News 11/10/2019 "I saw \$8,900 BTC in a dream on Blockfolio this morning, thought I'd share. God bless."

As posted on Z3news 14/October/2019: "Hi everyone I had an interesting dream last night. I saw RDD on the exchange and I saw someone put a very big order in (represented to me by a 1 with a lot of zeros behind it) and I saw the price shoot up suddenly to \$0.06 (6 cents). I didn't see what price it shot up from. I have a very old target for RDD of 5 cents so this is a confirmation for that. God bless. Christopher."

As posted on Z3News 15 October 2019: "Early this morning I had a dream and I saw BTC at \$35,000 to \$36,000, it was very slowly ticking up, like a snapshot, and the dream ended. This goes with one of my earlier dreams of seeing a rise in BTC to 30/35k. God bless. Christopher."

As posted on Z3News on 26/10/2019: "I had a dream this morning where I saw RDD move to \$0.0025. I didn't see the price from where it rose. God bless."

As posted on Z3News on 1/12/2019 "Hi everyone. I had a few interesting dreams this morning. The first I was looking at the Blockfolio app and saw the prices refresh and I saw

BTC at \$9,000 and RDD at \$0.10 (10 cents). I went back to sleep praying about this dream and got a confirmation, though this time I saw the price was \$0.20 (20 cents) for RDD, it had gone up massively and it seemed sudden. Then later this morning I saw RDD at \$0.00027 go to \$0.00017 and I wanted to buy. A couple of days ago I saw in a dream \$22,000 BTC. In terms of this I believe we are heading lower for RDD, but when it does rise we will be having some major multiplying moves. Yesterday I had a dream of the US and AUS markets and financial groups/leaders in fear/panic that they were anxiously awaiting a massive drop in the markets. It was like they had done all they could to avert it and were trying to make it appear as if business was normal but they were very worried of a coming major crash. There was an urgency with this dream. I expect that this will be coming soon. God bless you. Christopher." As posted on Z3news 19/12/2019 "Hi everyone. I had a dream this morning where I saw BTC was at the low \$4,000's and I knew the price had declined. Then the scene changed and I saw the price was now at \$3,100 or so. I also had a dream a few days back of seeing BTC at \$11,300 and the price up 25-30% or so. God bless. Christopher."

As posted on Z3news today 20/12/19 "Hi Z3 I had a dream this morning of seeing the RDD price at \$0.00019 and I saw \$4,000 BTC, but I can't remember if this was at the same time in the dream or with a scene change. God bless. Christopher."

As posted on Z3news 31/12/19 "Hi everyone. I just woke up from a dream where I was in a room of people. There was a part where I heard a woman of God rebuking a Christian church and their music to another woman. The other woman was angry and didn't want to hear it and disputed. I yelled out to the same woman they were "Churches of hell", but my voice was drowned out by others. The angry woman then accused the woman of God about cryptocurrency, as she had prophesied about it before. The woman of God then told her that Electroneum will soon go up. Then that woman of God told me that prophecy directly. I thought about buying ETN with what I had on the exchange. Then one minute later ETN started rising, and it went up 8x. I was shocked it went up that much. I said "Wow it would have been good for me if I had bought!" The woman of God said to me that she wondered if that angry woman had seen what happened to the price. That was the dream. The exchange I am on is Bittrex so this dream occurred when ETN was on Bittrex, as I knew in the dream I had the choice to directly buy ETN with what I have on there. This is the second dream I've had of ETN being on Bittrex. God bless you. Christopher."

As posted on Z3News 28/1/2020 "Hi everyone, I had an interesting dream this morning that I wanted to share. In the dream I saw a chart of BTC and I saw it had risen some to about \$9,100. Then it sharply dropped and continued to drop, Then I looked and saw the chart again and the price was \$2,600. Then there was a scene change and I saw the BTC price was extremely low like less than \$1 and other coins were also very low. I then saw a list of coins with BTC at the top but it wasn't regular BTC, the name was wrapped in plastic film and I heard a voice saying "this one will be more useful to you sooner", and I said "Oh is that BTC SV?" Then the dream ended. I was wondering if the plastic film on the BTC name represented it being new, as BTC SV was a recent split from BTC. This dream seemed to indicate a coming period of extremely low prices, or a failure of the market before a recovery. Please take it to prayer. God bless you. Christopher."

As posted on Z3News on 9th March 2020: "Hi Z3, I'll share a dream I had on 29 Feb 2020. In this dream I was in my home, checking the price of the Dow and it was between 8,000 and 10,000. I knew the market had greatly crashed. Then the power went out. That was the dream. God bless you. Christopher."

As posted on Z3News 13/3/2020 "Hi Marcio, thanks for mentioning. The full sequence I saw was a major drop to around \$3,000, then an increase to \$4,400 with RDD at \$0.0089. Then I saw BTC decline to \$200. I believe we are potentially coming up to the time for the first major RDD move (moving up to \$0.0089 to \$0.016 area). The lowest target I have for RDD is \$0.00017 which has not yet hit and on 1/12/19 I had a dream where I saw RDD move from \$0.00027 to \$0.00017 and I wanted to buy (good buy price potentially). I have been out of the market for a long time waiting for this crash. Tim saw this crash from 7.2k down very fast and we have dropped accordingly. I also had multiple dreams about a crash such as steep drop from 7.5-7.8k area on 11/7/19. I saw \$6,200 twice, \$5,500 (dreams posted 29/9/19) which the price has blasted through. The dream I had on 1st Dec 19 of an imminent major crash in the world financial markets took place (before I heard about coronavirus). On 19/12/19 I saw BTC at \$4,000 and then at \$3,100, and another dream of RDD at \$0.00019. Look for the potential for the RDD rise I saw occurring from the 3k BTC area to \$0.0089 RDD at \$4,400 BTC with a near top of \$0.016 RDD for that move. This will be a big trade (50x move from \$0.00017 to \$0.0089). I will share another dream I had yesterday which I believe is about the financial markets. In this dream I saw a woman walking down hill on a street and she thought she got to the bottom of the hill, Then the screen panned left and I saw the hill continued much further down almost out of sight, and she sighed as she knew she had to walk down the entire hill. Then the scene changed and I saw a forest area on a hillside, and there was a valley with no trees cutting down the hill, I had a drone-camera like view as I was travelling downhill along the valley, and I saw this valley cut out of the trees go all the way down hill (a big steep hill) and at the end was the ocean. I have seen 11-12k, 17k and 8-10k for the DOW in separate dreams. I believe my dream signifies continued market decline. Thank you and God bless you. Christopher."

As posted on Z3News 17/3/2020: "Hi I saw 6,677 or so DOW this morning as I was waking up. Earlier in the night I saw \$3,600 BTC and later \$8,100 BTC. Thanks. Also I want to share a dream I posted on Z3 on 1st December 2019: "Yesterday I had a dream of the US and AUS markets and financial groups/leaders in fear/panic that they were anxiously awaiting a massive drop in the markets. It was like they had done all they could to avert it and were trying to make it appear as if business was normal but they were very worried of a coming major crash. There was an urgency with this dream. I expect that this will be coming soon." Looks like we have a major crash ahead. God bless you. Christopher."

As posted on Z3News on 21/3/2020: "Hi Z3News I had a dream this morning where I saw the price list on Blockfolio and BTC was \$800 and then I checked again and it was under \$200 and I checked again and the price said "n/a" and then I checked again and the price was around \$400 to \$600 and seem to be bouncing around under \$1,000. This was the dream. I've had confirmatory dreams of this price range including on 17/4/2019, 2/6/2019, 23/6/2019, 28/1/2020, It may be good to have some funds to pick up BTC at those low prices. God bless you. Christopher."

As posted on Z3News 25/3/2020 "Yesterday 24/3/2020 I had a dream and saw a big up in the crypto market due to some kind of announcement. God bless."

As posted on Z3News 13/4/2020 "Hi everyone, I had a very interesting dream this morning. In the dream I saw the price of BTC was at \$2,000. I knew it was dropping quickly. Then I checked the price and BTC was at \$0.002 (yes this price!). I was shocked and went to try to buy some. I also heard a voice talking about this happening due to a "China hack" or something like this. Very interesting. It may go with the dream from this thread of BTC under

\$200 and the price hitting “N/A” which means “not applicable/not available/no answer”. God bless you, Christopher."

As posted on Z3News 12/5/2020 "I had a dream yesterday where I saw the lower section of a BTC chart. On the left it showed it had gone up (perhaps a move we have already had) and on the right it had come back down (didn't see the top of the chart) and it was a big decline down to \$3,100. God bless. Christopher."

As posted on Z3News 20/5/2020 "Hi Z3 I want to share a significant dream I had on 6/5/2020. I have now decided to share it. In this dream I saw the price of BTC drop from \$9.2k to \$5k to \$2k crashing very quickly, and the price continued to drop to \$200 and then to \$0. I was hopeful my low buy orders had been fulfilled but then I wasn't sure if I had set them or not. The scene changed and I was still in the same place in front of my computer and the BTC price was at \$9,2k again, and I was shocked it had rebounded like that. That was the dream. This is in accordance with several other dreams I have received and shared already. You may want to consider having some low buy orders in for BTC. God bless you. Christopher."

As posted on Z3News 22/5/2020 "Hi Tim you're welcome, I praise the Lord for showing me. Very interesting the dream you shared. This morning I also had a dream and I saw BTC at \$281. The Lord is confirming these things. God bless you. Christopher."

As posted on Z3news 10/6/2020: "Hi everyone, yesterday 9/6/2020 in a dream I saw BTC up %110 percent and RDD up %80 percent. This morning I saw in a dream that BTC was up fairly significantly (I saw it on a chart but didn't remember the specifics well). Not sure on timing. God bless. Christopher."

As posted on Z3News 3/7/2020 "I received two dreams about a week ago. In one I saw BTC at around \$11,000. The day after in a dream I saw the BTC prices of \$11,000 and \$7,000. God bless. Christopher."

As posted on Z3News 26/7/2020 "Hi Z3, I had a dream this morning and saw BTC at \$7,300 approximately. Also I had a dream where I saw a mainstream front page article on an Australian news website talking about how they expected the Dow to drop to 9,000. God bless. Christopher." As posted on Z3News 6th August 2020 "Hi Z3, I had a dream on 1st August 2020 where I received the knowledge of gold at \$300, then after this BTC going up a lot. That was short but I believe it was from the Lord. I don't know what would cause such a low gold price. I also had a dream on 17th June 2020 where I saw four steps written down. The first two I couldn't make out, but the third was "\$10 trillion taxpayer bailout". The fourth step was "Hyperinflation". I believe the dream was about the USA and was economic related. I believe that way bigger taxpayer bailouts are coming and after this is hyperinflation. God bless you. Christopher."

As posted on Z3News on 10 August 2020 "Hi Z3, I had a dream two days ago (8th August 2020) of seeing BTC at \$14,000. I then saw a chart with a lot of green candles that the price had gone up. Then I saw RDD at I believe 0.20 cents (\$0.0020). God bless, Christopher." As posted on Z3News 14th August 2020 "I had a dream this morning of seeing the BTC price change from about \$10k to \$380. Then later in the night I had a dream of \$200 BTC. God bless. Christopher."

As posted on Z3News 31/8/2020 "Hi I had a dream this morning where I saw online people were talking and celebrating a major Reddcoin (RDD) move. I saw the price had gone up to \$0.23 (23 cents). I was surprised. That was it. God bless you. Christopher."

As posted on Z3News 3 September 2020 "Hi Z3, this morning in a dream I checked the price of RDD on my phone it was down 45% and was \$0.00086 and I wanted to buy some extra. We are not that far off the price (price now is \$0.00113). Only recently the price was \$0.0014. God bless. Christopher."

Posted 25/10/2020: "I had a dream a few weeks ago where I saw Bitcoin Cash (BCH) on an exchange and I had a lot of coins, and the price was very low (I didn't see it), then the price moved up to \$100 USD and I thought this was a good price to sell some coins. I believe this is after the "crypto winter" or massive BTC crash that I believe will bring down the market, and is showing BCH will make a good recovery in time. Also about one week ago I dreamed of seeing BTC at \$6,000 and another dream of \$20,000 I believe. God bless you. Christopher."

As posted on Z3News 28/11/2020 "Hi Z3, I had a dream yesterday (27/11) and I saw BTC had crashed and the price was around \$1,124, and there was a short dream after this where I heard "Buy some when BTC is at \$5k". Then this morning I received a short dream where I saw I had posted this to z3, being a confirmation. God bless you. Christopher."

As posted on Z3News 29/11/2020 "This morning I had a dream where I received "Buy at \$300" in reference to the BTC price. Also on 23/11 I had a peculiar vision where after I had woken up and was laying there with my eyes closed I saw a vision of \$2,100 in red letters quickly zoom in towards me as it got bigger. I wasn't sure what that was about, but it's possible it has to do with crypto (BTC price). Also David yes I saw the sequence BTC to \$30/35k then to \$2k then to \$60k. God bless. Christopher."

As posted on Z3News 10/12/2020 "Hi Z3 I saw in a dream this morning BTC at \$6,700 after a major decline, and 25,000 DOW and -25% but I don't know if this was BTC or the DOW the -25% was referring to. God bless. Christopher."

As posted on Z3News 15/12/2020 "Hi Z3 just sharing few short dreams. I saw BTC at \$11,700 on 11/12/2020, and saw \$10,000 twice in two dreams on 1/12/2020 but I wasn't sure what it was in relation to (could be BTC). Thank you. God bless. Christopher."

As posted on Z3News 20/12/2020 "Hi Z3, I had a dream this morning where I was personally directed to buy today, where I saw instructions for myself written on a poster even telling me to buy by a certain time today. Before I was mostly on the sidelines awaiting BTC crash. I had been praying for a few days if BTC was going up to the \$30k+ area God showed me ages ago or is it going to crash first. The dream today may indicate we are continuing to head up for the third wave/\$30k/35k BTC before the major crash to \$2k and below where the extremely cheap prices will be (fishing from the bottom). I believe RDD could have a good rise from here as my dream from 17th May 2018 I saw RDD at about 1.7 cents (\$0.017) when BTC was nearing \$30,000, then I saw BTC dropping fast and RDD dropping fast from 1.7 cents. I don't know for certain what will happen as the instructions were for me personally, but I wanted to share. God bless. Christopher."

As posted on Z3News 20/12/2020 "Hi Z3 I made a PDF document compiling all the crypto dreams I received that I could find. The first part of the document links crypto videos I made

on my YouTube channel where I discussed dreams that are not written in the rest of the document. The list is up to date as of today 20/12/2020 and is written in order of OLDEST to NEWEST (scroll to the bottom for newest). Please be advised these matters require godly interpretation of sequences and timing. In some cases I was overzealous in my interpretation of the sequences and timings, so consider my interpretations separately from the dreams themselves. Please seek the Lord Jesus Christ in prayer and guidance regarding your financial decisions. Here is the link: [removed as updated document provided] God bless you. Christopher.”

As posted on Z3News 26/12/2020 “Hi Z3 I had a dream on 21/12/2020 where I saw the price of BTC on my laptop and the price was \$855,000 AUD each coin (which at current exchange rates is equal to approximately \$650,000 USD) and I sold 3 coins. After I woke up from the dream I was surprised to see such a high number. I then asked God for confirmation and shortly after saw a vision of people gardening and working the soil with a hoe and the seasons quickly changing in the background (I believe this is showing both the passage of time and how our investments are like planting for harvest). Then I saw a brief vision of the number \$60k change rapidly moving to over \$800k (I didn’t see USD or AUD in this vision). I believe the Lord is showing me what kind of numbers can be expected over a longer term for BTC, which is very high. I imagine many other coins will increase to great prices. God bless you. Christopher.”

As posted on Z3News today 29/12/2020 "Hi z3 I had a dream this morning where I saw BTC moving up around 28k and then I saw RDD at \$0.0155 (1.55 cents). This confirms the dream I had over 2 years ago of RDD at 1.7 cents around BTC 30k. Perhaps this is very soon, that would be great if so! God bless. Christopher."

As posted on Z3News "Hi Z3 yesterday 30/12/2020 I saw BTC at \$16,000 in a dream so I wanted to share.”

As posted on Z3News 5/1/21 "Hi Z3, yesterday I received a dream where I checked my phone and was shocked to see RDD at \$5. I thought in the dream this happened sooner than I thought and I rushed over to try to login to the exchange. There was a thought in the dream that BTC had dropped and people were funnelling money into RDD, though I’m not sure if it was from the dream or my conscious reacting to the dream. In any case I have previously seen over \$3 RDD which occurred while leaves were on the ground in Aus (Autumn/Winter time). We are in summer now. Also I’ll share on 21/12/20 I had a dream about April 17 and New Year something to do with BTC. God bless. Christopher."

As posted on Z3News today 9/1/21 "Hi Z3 I saw in a very brief vision RDD move from \$0.0027 to \$0.0040. God bless. Christopher."

As posted on Z3News today 9/1/21 "Also on 28/12/20 I saw \$50,000 in a dream. I don’t know why but at the time I thought it was something else and not related to crypto so I didn’t share, but now seeing BTC break \$40k it could be that it was about BTC. God bless. Christopher."

As posted on Z3News 18/1/2021 “As I was laying down to sleep tonight 18/1/21 I heard audibly “Five, One, Zero, Zero, Zero” which is 51,000. It could be about BTC though I didn’t see a reference to BTC. I haven’t heard numbers like that before. God bless. Christopher.”

As posted on Z3News 19/1/2021 "I had a dream today where I saw BTC at \$28,000. God bless. Christopher."

As posted on Z3News 22/1/2021 "Hi Z3 I had a dream this morning where I saw the price of Electroneum (ETN) was at \$51. Yes \$51. Then the next part of the dream I was telling my brother my dream and what an amazing return it will have given the current price is about half a cent. I take that as confirmation of telling my brethren in Christ. Then I saw a chart of BTC having dropped down substantially from a higher price, a major decline and the price was \$11,000. God bless you. Christopher."

As posted on Z3News today 30/1/21 "Hi Z3 this morning I had a dream to buy some Ethereum and Stellar Lumens, and the amount for me personally to buy was told to me. Then I woke up and prayed for confirmation from God and had another dream after confirming it. And a few days ago I had a dream of BTC at \$7,000. God bless. Christopher."

As posted on Z3News 1/2/21 "Hi Z3 I had a dream this morning where I saw the ETN price rising rapidly and quickly changing and rising to over 30 cents. I had a prior dream of a 30 cent target for ETN from 1st June 2018, and this is a confirmation. God bless. Christopher."

As posted on Z3News 11/2/2021 "Hi Z3 this morning I had a dream where I heard "BTC fading, Reddcoin continuing to drop". I don't know when this will be applicable. Then later I heard "59,000". I believe that is referring to BTC. Then near before I woke up I saw section of a rainbow with its colours (similar colours to RDD logo). I will draw Z3's attention to previous dreams I received where I was shown about selling RDD at 4 cents and the dream I had where there was a prophetic and technical target of 5 cents for RDD. I believe 4 to 5 cents could be the target for the move up past 1.5 to 1.7 cents I have seen. The Lord has directly led me to be prepared for this move and it could be soon. God bless you. Christopher."

As posted on Z3News 13/2/21 "I am aiming for the 4 to 5 cent area which the Lord has led me to, based on the dreams I shared above of selling at 4 cents (a clear marker) and the prophetic and technical target of 5 cents in the other dream. I was also given a sell price in this region (though it is private). I don't know if we may go to this area early or late march but I hope it's this march, and I hope it will be soon based on some other reasons. I also had a dream yesterday about a big RDD move "very soon" but the figures I received I am not certain because I didn't remember very well from the dream. It was something like 6 or 7 or 67 (I don't know cents or dollars). I have seen 19 and 59 cents before. God bless. Christopher."

As posted on Z3News 15/2/21 "Hi Z3, before I woke up yesterday I received "ETN moving first". Then this morning I saw written buy prices for ETN of 1.5 cents (\$0.015) and \$0.004. Then I saw steel water bottles over the fire with water inside I was tending them and they represented ETN and they were heating up, shaking and getting quite hot. I believe the Lord is showing me that 1.5 cents (current price) is still a good buy for ETN based on what it will soon move to, and that it may make a big move soon and heat up (price action). The \$0.004 represents another buying opportunity (I don't know when that will be reached). Targets I am looking for with ETN from dreams I received are 13.7 cents, 31 cents and 51 cents. I did post in this thread of a move in ETN over 30 cents. God bless. Christopher."

As posted on Z3News 17/2/21 "Hi Z3, I had a dream a few days ago I saw my Blockfolio amount had increased based on what I have now would correspond with a RDD price of \$0.019 (1.9 cents). This morning I had a dream where I saw ETN moving from 1 cent to 0.44 cents. Then I saw the price of ETN at \$0.45 (45 cents). I don't know when the 0.44 cents will be reached, and from my previous dream of two buy prices written of 1.5 cents and \$0.004 (0.4 cents) could mean they are at different times so I don't know if ETN will go down to that level before taking off. It might be risky to wait for a lower entry when it could move earlier. The move for ETN based on my dreams looks to be a big one, over 30 cents, potentially 45 cents as much as 51 cents or higher (I have not seen any tops). God bless. Christopher."

As posted on Z3News 18/2/21 "Hi Z3 this morning I had a dream of seeing my Blockfolio amount increased corresponding to a RDD price of approximately 4.71 cents based on my current holdings. God bless. Christopher."

As posted on Z3News 26/2/2021 "Hi James and Z3, thank you for the post. I want to share some significant dreams I received this morning. I one dream I saw ETN and RDD moving up. I saw RDD was nearing 1 cent (\$0.01), a decent rise. Then I saw ETN was at \$0.88 (88 cents). I was shocked, and the two prices were side by side, and I believe I saw that ETN was 88 cents and RDD was 1 cent. Then I saw ETN had kept rising and was over \$1 and the dream ended. I prayed about this and was shown to take a larger holding in ETN, and saw the prices of 1.2 cents to 0.4 cents for ETN (probably highlighting the similar buy range I was shown earlier). I also saw a dream of my father and mother had written a number of ETN price targets between \$5 and \$5.30 on a large whiteboard. Also I'll add that yesterday I received "reinvestment opportunity 45k" which I thought meant when BTC was at \$45,000 but I'm not sure when that is relevant. Please seek the Lord regarding your approach. God bless you. Christopher."

As posted on Z3News 27/2/21 "I saw in a dream this morning the whole crypto market seemed up, fairly significantly. Also on 23/2/21 I had two dreams where I saw ETN at 4 cents. God bless. Christopher."

As posted on Z3News 2/3/21 "Hi Z3, a few dreams I had yesterday I saw RDD at \$0.0089. I also saw 2 cent RDD. I also saw 0.00000006 BTC. I assume that is a lower price for RDD given it trades in that kind of range. I also saw \$20,000 BTC. God bless. Christopher."

As posted on Z3News 10/3/21 "Hi Z3, a few dreams to share. This morning I heard "Each coin \$91,000". I assume that is BTC, no idea on timing but that is quite a high price. I had a dream on 7/3/21 of seeing a \$ amount in the ETN web wallet corresponding with a ETN price of 10.6 cents. I also saw BTC at 50k and it had been up 20%, meaning a rise from about 42k. On 6/3/21 I saw a dream that ETN was rising and was at 18 cents, I saw a vertical list of prices written above this with the top number 111 cents. In the same dream there was something about gold contracts with ETN, or something to do with gold and ETN, I'm not sure. God bless. Christopher."

As posted on Z3News 21/3/21 "I had a dream this morning of seeing the number 68,000 (approx.). It may be about BTC. God bless. Christopher."

As posted on Z3News 21/3/21 "Also this morning I dreamed of seeing the ETN price on Blockfolio move from around its current price to 30 cents. I also had a dream where I saw a scene outside of heavy snow with someone in a big puffy coat, and this was to do with investments. It made me think of crypto winter is coming (I just made a video yesterday about that topic on my YouTube, here's the link if you are interested). Then I saw gold/silver

being represented by a rubber band stretching forth fast to \$35,000 (I assume gold price), then snapping back (a big crash). The lowest price I've seen for gold is \$300 that I received on 1/8/20. God bless. Christopher."

As posted on Z3News 26/3/21 "Hi Z3, I have some dreams to share from the last few days. On 23/3/21, I saw in a dream BTC was at 77k, and I saw a hand drawn chart with a line up to 91k (the previous figure I received). That night I also saw BTC at \$39,000, and at \$50,000. On 24/3/21 I had a dream where I saw the BTC price on an exchange, the price was over 100k. The price froze on a figure like 109k, then changed to 111k and froze there for several seconds. I sold at this price in the dream and saw my balance on the exchange (based on my current holdings would equal an ETN price of approx. \$1.50). Then I saw the price change lower rapidly, numbers were flashing lower and lower all the way to \$0. Then I saw my balance on the exchange was also \$0 and I was confused. Then I was telling my brother this was important information. Then I woke up. With this dream my interpretations are that 111k is not necessarily the top of the move. While I saw the numbers rapidly changing to lower values for BTC all the way to \$0, I believe there will likely still be ups and downs during that time. My holdings on the exchange going to \$0 might be because I hadn't converted into fiat, or it may suggest that BTC going to \$0 might cause the exchange to even fail or that you will not be able to withdraw. These are my thoughts about it. The crash happened very rapidly in the dream but I don't know how much time it would take in reality. This dream suggests it is important to be able to exit safely when you decide to, and that your funds may not be safe on the exchange during a BTC crash to \$0. I believe this would be the crash of the third wave (from my earlier dream) giving those strong buying opportunities (fishing from the bottom) and beginning of a crypto winter time period before recovery (I made a YouTube video about my dreams on this topic recently). On 25/3/21 I saw 2.2 cent ETN in a dream. Later I heard "22.5k strength". I believe this could be referring to BTC having a strong support at this level. Then I had a dream of seeing ETN at 7.89 cents, and I heard someone was saying that people were about to pile into ETN to try to take advantage of the rise. Later I received \$2.10 and \$3 (I believe these could be ETN prices, as I received over \$5 before). Please seek the Lord regarding your approach and interpretation. God bless. Christopher."

As posted on Z3News 2/4/2021 "I have some dreams to share, and a few amazing ones I received this morning (Good Friday, praise the Lord). On 29/3/21 I saw 2.2 or 2.5 or so cent ETN price. On 31/3/21 I had a dream where I saw BTC price on an exchange, it was crashing, I didn't see the upper figures only the lower ones, changing rapidly to \$20, \$18, to zero, up to \$18, then it changed to \$32,000, then went back to zero again! In the dream I was trying to place orders but was having difficulty due to the rapidly changing price, and it made me think to have orders set in advance. Later in the night I had a dream reminding me that Tim saw BTC drop from 32k area, and to mention this also. Then I had a dream of having RDD on Bittrex, and I saw my amount rapidly reduced to zero and someone was withdrawing my RDD and had stolen it. I saw on my computer there was an unknown program on the taskbar that I knew was responsible and I thought it was a keylogger. This dream I believe is a warning to beware of theft of your crypto, to take precautions. I don't believe this literally applies to me, but was given to me so I could share as a warning. After I got this dream I enabled only withdrawals to selected wallets, and I already had two factor authentication (google authenticator) on my account. Please secure all your crypto holdings and don't let the enemy steal from you by not taking proper precautions yourself. Then later that night I had a dream of ETN target of 29 cents and saw a lower figure after under 10 cents but I can't remember it. Yesterday on 1/4/21 I had a dream where I saw a post on my YouTube video about ETN, and it said something like "I wish I would have gone all in on ETN..." and it had

many thumbs up. I believe that person and those who agreed were lamenting because they only held a small portion of ETN in their crypto portfolio, and they didn't believe the prophetic dreams potentially, so when it went up they regretted not being all in. Then today 2/4/21 I had a dream where I saw posts online about how BTC had dropped to \$20,000. Then I saw \$64,000 BTC price. Then I had a dream where I saw ETN and RDD side by side. ETN was rising and went up to 30 cents, and RDD rose also and went up to 2.4 cents. Then while ETN was still at 30 cents, RDD dropped to 1 cent. As I saw this it seemed ETN paused on 30 cents for a while, then suddenly dropped and crashed, and I saw only the ETN price as it went all the way to \$0.00513. This is a very amazing set of dreams because I believe the Lord is showing me, and you, that my earlier dreams of ETN prophetic target of 30 cents is confirmed, but ETN will drop from there or soon after (that may not be the exact top). Then the price will go to the second buy price I was given by God. The first was 1.5 cents and the second was 0.5 cents, both it is clear now represent buying opportunities. I believe the ETN price moving to 0.5 cents may correspond with BTC moving to 20k. I don't believe this is the major crash to zero and crypto winter I have been shown, and I believe the market will recover to 100k plus BTC I saw and over \$1 ETN. What this could mean I will show by an example: Say you put in \$500 in ETN at current price of 3.2 cents (15,600 ETN coins). If you sold at 30 cents this would be \$4,687 (over 9 times your money). Then if you used that to rebuy ETN at 0.5 cents (\$0.005) you would have 937,400 ETN (60x more ETN than you had before). Then if you sold this at \$1 ETN when BTC moves over 100k you would have \$937,400 (1874x increase from \$500). Then if you cashed out and put aside some of this to buy when BTC crashes to zero and under \$1,000, the ETN you would have would be enormous. Then hold until longer term \$51 target. The multiplication of wealth is phenomenal. I believe the Lord gave this to me so I can share with you and those who are led by God will be blessed and will be able to bless others. These are my interpretations of what I received, please seek the Lord and exercise your own decisions. God bless you. Christopher." As posted on Z3News 10/4/2021 "Hi Z3, I have some recent dreams I want to share. On 3/4/21 I saw \$0.0032 ETN, and saw BTC at 19k and saw a minus 44k next to it, as if it had been subtracted from it, meaning it had gone down from 63k. On 8/4/21 I had a dream where I was trying to sell something on Bittrex at \$0.044 (4.4 cents). I believe this could be RDD as I have this area as a target and sell price from other dreams. Today 10/4/21 I saw ETN at \$0.93, and saw \$0.0045 but I didn't see what it was (may be ETN again). Interestingly I had a dream where I saw different instructions written down overlaying my view in a dream and I saw RDD's price changing up to 15 cents, then up to 80 cents, then up into the \$ range. I saw at the bottom of the writing it said "RDD to \$1 soon..." and it also said "Be conscious in what you do My sons". I believe that is a message from the Lord. Conscious can mean being aware and also being deliberate and intentional. It could apply generally but may apply to receiving money from the Lord, to be conscious in what we do with it. These are my thoughts on it anyway. Also I believe both ETN and RDD are very significant and will be used by the Lord. God bless you. Christopher."

As posted on Z3News 12/4/21 "Hi Z3, this morning I saw in a dream \$545 silver. Later I saw around \$54,000 which I assume may be BTC. At the current silver price of \$25.1 this is an approx. 21.7x increase. Gold at \$35,000 where I saw it on 21/3/21 is an approx. 20.1x increase from its current price of \$1,740. God bless. Christopher."

As posted on Z3News 14/4/21 "Hi Z3, yesterday on 13/4/21 I saw in a dream 40k BTC and ETN was at 1.7 cents (\$0.017) I believe. Today 14/4/21 I saw in a dream RDD at \$0.0025. Then I saw in a dream ETN at 3.1 cents (\$0.031), and saw it rising up. In the background I saw writing saying something like 60% first wave, 90% second, as the price moved up to 37

cents (\$0.37) and the dream ended. Then later in the night I saw in a dream the vertical axis of an ETN chart with prices listed from 0 to 10 to 20, 30, 40, 50 in cents. Then I saw the price on the chart move steadily from near 0 up to 10 cents, then to 20, and 30, 40, 50. It was a line moving vertically up through these prices. Then it rose above 50 cents and I saw more prices above, and it sped rapidly through 60, 70, 80, 90 cents and then my view changed and I saw a Trading View page of a person called "ETNBEARGUY" and his image was a picture of a chicken and I saw him post something like "OMG ETN TO \$1!!!" This was the dream. From this dream it showed ETN moving up rapidly in one huge move from near zero to \$1. On 10/4/21 I saw \$0.0032 ETN, and received \$0.004 as a buy price for ETN on 15/2/21, so these are prices to watch for ETN and buy zones. For example \$500 into ETN invested at \$0.004 is 125,000 ETN and sold at \$1 is \$125,000 (250x increase). The last part I believe was humour from the Lord showing a person who spoke against ETN (ETN bear) and his image was a chicken and he was astonished when ETN hit \$1 as he was used to speaking against ETN rising, and never thought it would happen. As of now my view of the dreams is I am looking for a move to the 30 cent area, though I don't think that's the exact top of the move and it may go higher, and a crash to \$0.00513 which I saw. I did see ETN at 2.2 cents (\$0.022) on 25/3/21 so we could possibly go there before moving up to 30 cents. After the crash from 30 cents to \$0.00513 from that range I am expecting the massive spike to \$1. I hope those led may be ready. I hope the Lord guides you and strengthens you in faith. These are my interpretations of what I received, please seek the Lord in your approach. God bless you. Christopher."

As posted on Z3News 21/4/2021 "Hi Z3, I have some dreams I want to share. On 18/4/21 I had a dream where I saw BTC at \$289 and RDD at 5.1 cents (\$0.051). Later I saw in a dream RDD at 5 cents (\$0.05) and ETN at 5.1 cents (\$0.051) at the same time. Then I had a dream where I checked my phone for the prices on Blockfolio and saw ETN was at \$0.25 (25 cents). On 19/4/21 I had a dream where I saw someone talking about a technical analysis of ETN and I saw a chart showing a price move up to 50 or 60 cents (\$0.50 or \$0.60), I wasn't sure which one. I also saw 48 cent (\$0.48) ETN in a dream later that night. On 20/4/21 I saw in a dream \$38,000. I wasn't sure what it was at the time. Then today 21/4/2021 in dreams I saw 100k BTC and the price was down 15% (so from 117k), also 80k BTC and 90k BTC. Then I saw 38k BTC (confirming previous \$38,000 I saw), and later saw the BTC price on a chart declining down to 38k. I also saw two figures for ETN of around 32 and 35 cents (\$0.32 and \$0.35). I believe the move for ETN over 30 cents may be up to the 50/60 cent area, so heads up on that. I think it's possible we could go to 38k BTC soon, which corresponds with the 40k BTC and 1.7 cent (\$0.017) ETN I saw on 13/4/21. Please seek the Lord regarding your approach. God bless you. Christopher."

As posted on Z3News 24/4/21 "Hi Z3 on 23/4/21 I saw in a dream 1.6 cent RDD (\$0.016). Later I had a dream where I heard "Reddcoin break at..." and I saw the figures \$0.42 and \$0.037 (3.7 cents). I'm not sure what that means. I have had dreams about selling RDD around 4 cents (\$0.04). I also saw \$0.0072 RDD but because I am posting this later RDD already hit that after dropping from \$0.01. I'll try to post earlier in case the dreams have a short fulfilment. God bless. Christopher."

As posted on Z3News 1/5/2021 "Hi Z3, I had a brief vision this morning after waking up, I saw the market was up, it seemed significant, and I saw RDD was up something like 60 percent. God bless. Christopher."

As posted on Z3News 4/5/21 "Hi Z3, this morning in a dream I saw ETN was around 4.5 cents (\$0.045). I had another brief dream of seeing RDD at \$0.0097 (almost 1 cent). That's not a huge move from where we are but I thought I'd share. God bless. Christopher." As posted on Z3News 12/5/2021 "Hi Z3, I want to share some recent dreams. On 30/4/2021 I had a dream where I saw the price of BTC on trading view and I was shocked at first, to see how many digits were on the screen. Part of the number was cut off, and then the screen panned over some and I saw the price of BTC as astonishingly right around \$111,000,000,000 (111 billion dollars). I counted out 12 digits (not decimals), and then I received the word "Government Stimulus" and the dream ended. I was surprised by this one, and took a bit longer to share it. I believe it is very possible due to possible hyperinflation and devaluation of currencies. On 1/5/21 I saw in a dream \$3,800 BTC. On 11/5/21 I had a dream where I saw a man comparing before and after the value of his crypto, as the market had gone up significantly and he compared the amount he had before it rose to after it rose, and he had made a good amount and was pointing it out (I didn't see how much). This seems to suggest the market moving up significantly, but I am not sure on timing. Today 12/5/21 I saw in a dream 37 cent ETN (\$0.37). Later this morning in a dream I saw the BTC chart which seemed like the current price level, then I saw BTC at \$3,100 with a -85% next to it. An 85% drop to \$3,100 would mean a drop from approximately \$20,600, which is near the level I have been shown before. Please seek the Lord. God bless. Christopher."

As posted on Z3News 15/5/21 "Hi Z3, this morning in a dream I was talking about ETN nearing \$0.004. Then later in a dream I saw ETN was at \$0.007 and I saw this on the chart, and it looked like there was some kind of support further down represented by a line. This brings me back to the two buy prices for ETN the Lord gave me of 1.5 cents (\$0.015) and \$0.004 on 15/2/21. It looks like we could be heading down to the lower figure, I'm not sure on timing.. Please seek the Lord. God bless. Christopher."

As posted on Z3News 17/5/21 "Hi Z3 I had a dream this morning where I heard a man talking about RDD dropping from a certain point and it looked like it was from 8 Satoshi (0.00000008 BTC). It seemed the price was above this but then it went to 8 Satoshi and he pointed it out and then the price of RDD crashed very hard. That was the dream. God bless. Christopher."

As posted on Z3News 20/5/21 "Dear Z3, I had a dream this morning of seeing a price at \$0.00015. I did not see what it was but I believe it may be RDD. My dream from 1/12/2019 was seeing RDD move from \$0.00027 to \$0.00017 and I wanted to buy. Also on 20/12/19 I saw BTC at \$4,000 and RDD at \$0.00019 but I wasn't sure if it was at the same time. Also I had a dream this morning where I was discussing with another person that another very severe crash is coming, it seemed like maybe the market had gone up some as I was warning of the impending crash. I am looking for ETN buy price of \$0.004 I saw and lowest I've seen of \$0.0032. For RDD as I said above. I was hoping we were going to head up before such an extreme crash, but this would present an opportunity to obtain more coins at low prices. On 10/4/21 the Lord showed me 19k BTC with a -44k next to it (down from 63k). Previously on 10/3/21 I have seen BTC at 50k up 20% (from 42k). I don't know what ups and downs we will have but be prepared for a very deep crash. I don't believe this is crash to zero for BTC as I saw that happening after BTC reached 111k, but it's good to be ready either way. God bless you. Christopher."

As posted on Z3News 25/5/21 "Hi Z3, this morning after I woke up I had a brief vision where I saw the RDD price move from \$0.025 (2.5 cents) to \$0.03 (3cents). God bless. Christopher."

As posted on Z3News 27/5/21 "Hi Z3, yesterday 26/5/21 I had a dream of a warning of the economy dropping in the USA and I saw an image of Biden and then the Dow was at 17k. That's a 50 percent drop from current levels, and it seemed to be under Biden in the dream. God bless. Christopher."

As posted on Z3News 29/5/21 "Hi Z3 this morning in a dream the price of BTC was at 20k. Then later I had a dream seeing the number for BTC in red of 20k and ETN was 0.34 cents (\$0.0034). I believe the red means the price went down. I believe we are going down to 19/20k as I was shown earlier in a dream I received on 3/4/21 and shared on 10/4/21 when BTC was 58.5k, the dream was seeing ETN at \$0.0032 and 19k BTC with a -44k next to it (down from 63k). The market topped at 64k which was 4 days later and has been down since, so praise the Lord for showing me that dream, and I think the rest is coming soon. The buy price for ETN I received of \$0.004 is coming into play. I do expect we will go up from there to the higher targets in the over 30 cent move as \$0.004 is the lowest buy price I've been given by the Lord for ETN. Yesterday I was given in a dream \$0.488 (48.8 cents) as a target to share with others for ETN and I believe that is a target for the over 30 cent move. God bless. Christopher."

As posted on Z3News 31/5/21 "Hi Z3, this morning I had a dream where I saw BTC spiking up from 20k, then my view changed and I saw RDD going up steeply on a chart and I had a RDD sell order at \$0.04 (4 cents) that was fulfilled. God bless. Christopher."

As posted on Z3News 3/6/21 "Hi Z3 this morning I had a dream about the RDD market cap being up \$80 million. I checked and it turned it this would be an increase to about \$0.0075 price. A few days ago I had a dream where I saw a chart moving sideways then it quickly curved and went straight down. My assumption is that this is BTC or the crypto market, and may be about the crash to 19/20k. God bless. Christopher."

As posted on Z3News 8/6/2021 "Hi Z3, this morning I had a dream where ETN was at 4 cents (\$0.04) and it seemed like BTC was around the same price, and hadn't moved that much. Then after the dream I had another dream of different people saying the same thing of ETN to 4 cents, and I was telling someone also. God bless. Christopher."

As posted on Z3News 23/6/21 "Hi James thank you for sharing. The Lord has been showing me about long/short opportunities recently, some have been correct with amazing accuracy, but I also have received attacks in the form of deceptive dreams from the enemy to try to make me confused and doubt what I initially received. That said, what I share I believe is from the Lord. I saw this morning BTC peaking at 34k and declining to retest the bottom (the 28k bottom but I didn't see exact price it went down to) then bouncing hard and rising over the 34k peak but I didn't see a figure for how high it went. I have received a few figures around \$54,000 today and yesterday but I don't know if it will go that high or will be less. On 16/6/21 I prayed about a bottom or safe exit and I received after spiritual battle a figure in the low \$16,000's. I believe we may go under the 19k I saw at least for a short time. I saw today a chart in a dream of BTC moving from 19k to mid 14k. I also in another dream saw a decline from a higher point and halfway down what I saw the price was 41k. Also today I saw a special revelation of BTC crashing from a peak of 35k to \$200 then rising to 66k and

crashing to \$0 or \$200 (I can't remember which). Now I don't know exactly when that will be but my view is that it could be the entry into the crypto winter time period I saw where cryptos were near 0 for some time. Now the right interpretation of timing is needed. I suggest everyone pray to the Lord and ask what you should do. Doing long/short and seeking the Lord is like a faith journey with a lot of battles so make sure you seek the Lord. I will try to share if I receive something more that I am sure about. God bless you. Christopher."

As posted on Z3News 24/6/21 "Hi Z3 I need to make a correction to the dream of seeing BTC peaking at 34k. In this dream I saw the top of a hill on a chart of BTC peaking at 34k, then decline sharply and go down. I did not see a figure it went down to. Then it spiked up and went higher than 34k and I did not see a figure. I do not know if it was bouncing off 28k that was an interpretation I did not see that so it was wrong to assume. It is very possible we could go lower before bouncing, possibly even to 19k (my dream before the market crashed was 63k to 19k), and I believe this is more likely than bouncing from 28k again, as we have hit 28k two times already. Also I have received a figure I believe is significant at the 19k level. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 24/6/2021 "Dear Z3 and Tim, this morning I had two dreams where I saw BTC crash from seemingly around the current price all the way to zero or very near zero. In the first I saw it crash through 19k then 16k and under 10k then to zero. I dreamed about BTC crashing to zero before and also on 2/4/21 where I was prompted to mention Tim Price's dream (in the above post). I am not certain with timing, but I believe it will happen, and I suggest you consider having low buy orders in place for BTC, as if they are fulfilled you will rejoice. God bless. Christopher."

As posted on Z3News 26/6/21 "Dear Z3, on 21/6/21 I saw BTC move from 32k to high 39k and I saw this twice. This reminds me of the dream I posted above of seeing a peak of 34k, moving sharply down and rebounding and moving above 34k. This could be what may be happening or is soon to, and it's possible the rebound point is 32k or around it. We may retest the high of 41k area before continuing the downtrend. I have also seen a few figures around 43-44k. Please seek the Lord regarding your approach, I wanted to share if this is may be coming up. God bless you. Christopher."

As posted on Z3News 26/6/21 "Hi James and Z3, I had some dreams this morning which may give further understanding. First have a look at this BTC chart on trading view by author TradingShot, I believe the 34k top I saw was not an exact figure, it did go above to 35.5k at most before declining. I saw the price decline sharply then rebound above 34k significantly. It is possible it is about a smaller time-scale but I don't believe so. This morning I had a dream of 3 impulse waves downwards and wave 4 went up some, then wave 5 went down very steeply. It seemed in the dream we were beginning the wave 4 up before the steep decline. I believe the bottom may not be in yet and the move will go down further likely retesting 28k, perhaps wicking under. But then I believe we may be going to the top of the channel identified in the trading view chart of 40k area, before beginning another decline I believe which will break the 28k area and go down to 19k. Yesterday I saw a brief vision of 28k area being broken hard through to the downside. I believe my dream of 32k BTC to 39k is not indicative of the exact turning points, but part of the move, and it may drop lower than 32k before moving up to 39k and may peak around 44k area. I believe my interpretation of what I have received coincides with the chart also. So we may have a further steep leg down before bouncing IMO, then moving above 34k up to test the upward resistance. There we may fail to break the upward resistance and fall down to 19k. Please seek the Lord regarding the correct

interpretation and sequence. If you use leverage don't assume prices received are exact turning points and give yourself plenty of room. Make sure prophetic aligns with what the trend and the chart is doing in this type of trading as this helps get the right interpretation. God bless. Christopher."

As posted on Z3News 27/6/21 "Hi Z3 I saw a vision of a chart as I woke today. The chart appeared to show moves with no figures but I knew what it meant. It began with a downtrend line from the 41k move that hit 28.5k that already happened, then up to the 35k move, then down to test the bottom, then up to 35k again, then down to test the bottom again, then up to 40k area. This is what I saw but without the figures but I believe it's as I said. Be prepared for a decline from 35k area to retest the bottom before a move to 40k. This is important information. I also received numerous figures around the 34k area. God bless you. Christopher."

As posted on Z3News 27/6/21 "Also I saw a figure two days ago in a dream of "\$35,100 top" but I didn't know what it meant at the time, so I believe we will top around 35k on this up move, before moving down to test the bottom, then rebounding to 40k. Leave room if you are leveraged as I have received top figures that were very accurate but some within as much as 1k to 1.5k from the very peak of the top most wick. Please seek the Lord. God bless. Christopher."

As posted on Z3News 27/6/21 "Also this morning I saw in a dream ETN at 1.1 cents (\$0.011). God bless. Christopher."

As posted on Z3News 29/6/21 "Hi Z3 I've had a few dreams of a wick going up extra high before this move turns over and tests the bottom. I have two figures in the high 36k, so be cautious. God bless. Christopher."

As posted on Z3News 30/6/21 "Thank you James I agree that's what I think also. I have had dreams tonight I believe we are near the top for this move just shy of 37k, and some figures I received around 34-33.5k. Also highest figure of 39k for the next leg up. Also when this whole move is done and we head back to the bottom I got the figure \$26,800 which confirms your 26k James. When this third wave leg up ends I think it may not retrace all the way to 32k. Depending on the count, next could be an overall 4th wave down to 34k and the fifth wave to 39k. If the wave count is correct (count it from the beginning of this move from 30k) if we have a 5th wave up, wave 4 can't go lower than wave 1 which may be right around 33.5k. I may be mistaken on this as also saw \$31,349 tonight. I also just had a dream of BTC dropping quickly but then it started going back up quickly without dropping too far, and it was like it turned around quicker than expected. From what I have been shown so far, I am looking at a turn around 37k, dip to 33.5-34k (possibly 32k area) rise to 38-39k, crash to 26.8k, rise to 40k plus, crash to sub 19k. The later moves I usually get more info as we get closer, praise the Lord. Also I recommend Kucoin futures mobile app and trading view mobile app for charts. You can have a lot of capability with these, though obviously futures have higher risk than the leveraged coin options. I got into this in recent times because I had a vision about shorting BTC. Futures have the advantage of being able to make profit from market moves before the major prophetic coins take off, which can be used to increase holdings. It is not easy, I've had some good results and some losses, and discernment, interpretation and seeking the Lord is vital. Thank you Hoyoung for sharing your dream, I believe the Lord wants us to seek Him to guide us and to help us understand what is coming next. God bless. Christopher."

As posted on Z3NEWS 1/7/21 "Hi Z3 I had some dreams showing a rise up past 35k BTC I believe towards 38k as I saw 38k also. We may be done with the 4th wave correction and are moving up for the final leg up of this move and I believe it's to 38k before hard crash to 26.8k. Please seek the Lord, be careful if you are in a short position. God bless. Christopher." As posted on Z3News on 1/7/2021 "I also saw this morning in a dream a chart down from the recent 36.5k peak and it bounced and seemingly retracted up half way, then went down lower than where it bounced. I'm not sure if this happened shortly after I dreamed this in the early morning with the short term move to 35.2k, or if there is a higher bounce before dropping. I believe we are in the setup for the move to 38k but I don't know where it begins from (how low we will go first) as I didn't see that. Please seek the Lord. The major clearer moves I am more certain on, intermediary moves and turning points not as much. God bless. Christopher."

As posted on Z3News 1/7/21 "Looks like I got off track with thinking the move to 38k was from 35k. I only saw a rise from 35k to 38k, that didn't mean it would not go lower, my apologies for that. I am now thinking we are going to 32k before moving up. This goes back to the dream I posted on 26/6/21 of seeing 32k to 39k twice. This I believe is soon and an important trade. I saw as high as a high end 39k figure so give room if you short from the top of that move. After we hit 39k I believe we are crashing hard to 28k. Please seek the Lord. Interpretation is very critical and the also the right timing. It's easy to get off track but seeking the Lord He will help you. These are very large moves and God willing He will help us in them. God bless. Christopher."

As posted on Z3News 2/7/21 "Hi Hoyoung, as of now I believe the move to 39k is the final leg of this move which began from 30k. I can see 3 large waves, wave 3 topping at 36.5k, wave 4 we are in now down to not sure how far, wave 5 up to 39k. I believe the crash will be to at least 26.8k which is a number I saw recently. It's possible we go lower but I don't think it's 19k yet. I believe we will then move above 40k even possibly over 50k I have some higher targets like 54k etc. I believe the crash from here will be a major one that will break through down to 19k. That's my view at the moment based on the June 27 dream I had seeing that chart. It looked like this move tested the bottom but didn't seem to go way below (like 19k) before moving up higher than the previous move. Ill share if I receive more guidance from the Lord. God bless. Christopher."

As posted on Z3News 2/7/21 "Hi Z3, an update. This morning in dreams/visions I saw zig zag sideways price movement. I saw around \$33,890 twice. Then I received "up then down further". This was before a short leg up to \$33,900. I then saw figures under 33k, and one at high 24k. That is very low I am not sure if we are moving that far down. If we do it would change my perception of this move, that this move is over and we are going to the 40k leg next. I am not certain of that. Please seek the Lord on this. I also saw \$0.0033 ETN and I believe that is a great buy price. God bless. Christopher."

As posted on Z3News 3/7/21 "Hi Z3 tonight I woke up after seeing around \$18,900 in a dream. I have seen such low figures before. I don't know if we are going all the way down to that on this move. Please seek the Lord regarding sequence and timing. God bless. Christopher."

As posted on Z3News 5/7/21 "Hi Lisa I'm not sure on the sequence at the moment, I had some figures highlighting 32k. We may go there and head up. Please seek the Lord for your approach."

As posted on Z3News 6/7/21 "Hi Z3 I had some dreams today of a big fast green candles upwards after a reversal, I saw approx. 37.5k and 35.7k. I have seen figures around 36.8k a few times over the last few days also. God bless. Christopher."

As posted on Z3News 6/7/21 "Hi Z3 I had some more dreams indicating a huge breakout upwards. In the dreams it appeared to begin from around 34k area. I had multiple confirmations, and it may be soon. If we do, the target is 38k. I was told previously about taking a short from around 38k also. Please seek the Lord in your decisions. God bless. Christopher."

As posted on Z3News 7/7/21 "Hi Z3, I had two dreams of seeing a chart move from 35k to 15k. I don't know when it will be. Please seek the Lord. God bless. Christopher."

As posted on Z3News 9/7/21 "Hi Z3, I saw the following sequence in a dream this morning, approximately 33k to 40k to 31k BTC. Later I also saw the figures \$27,800 and in another dream I saw \$65,100 or so in red. God bless. Christopher."

As posted on Z3News 10/7/21 "Hi Z3 this morning I had a dream BTC had gone to 40k then declined to 30k. I also had two dreams one today and one a few days ago indicating a drop below where we went recently (below 32.8k). In the dream from an 8/7/21 I saw big green candles moving up to 34.5k and I wanted to go short. I believe this may be close to fulfilment as we reversed and are heading back up to where we dropped from 34.5k area. My current thoughts (interpretation) are that we will rise a bit further, be rejected again and go down to 31k area (not sure on exact bottom) and bounce very hard to 40k. Have a look at this chart which presents an interesting channel, topping around 34.6k and with a bottom value around 31.5k before moving up, this chart represents what I am currently looking for <https://www.tradingview.com/chart/BTCUSD/C1RwxWSE-Good-enough/> Please seek the Lord regarding the correct sequence, timing and interpretation. God bless you. Christopher."

As posted on Z3News 10/7/21 "A short correction to my post above, the dream from 8/7/21 the big green candles were moving up towards 34.5k which was the price around the time I had the dream, but I didn't see it go all the way to 34.5k but it was moving towards it and seemed close and the dream ended. It may or may not make it all the way there. God bless. Christopher."

As posted on Z3News 12/7/21 "Thank you James. This morning in a dream I saw ETN was at \$0.024 (2.4 cents) and RDD was at \$0.021 (2.1 cents). I was talking about how that was a great return especially from RDD's current price (\$0.00187 to \$0.021 is an approx. 11x increase). It reminds me of the dream I had a long time ago about RDD at 1.7 cents and BTC in the 30k area. God bless. Christopher."

As posted on Z3News 13/7/21 "Thank you James for sharing. I saw in a dream this morning the BTC price crashing hard and it seemed to be about \$30,500 and I wanted to go long in the dream. I don't know the bottom of this move down, so seek the Lord in your approach, and my desire to long may be a general desire not about going long from a specific price. God bless. Christopher."

As posted on Z3News 14/7/21 "Hi Z3, over the past couple of days I have been seeing visions of an upward movement. I also saw a movement of a chart that appeared to go down, up, then down again. Yesterday I believe, I had a dream where I saw the BTC price with

green candles moving up past \$33,800. We just bounced from the lower trend line (see here for example <https://www.tradingview.com/chart/BTCUSD/QLjMdIov-btc-expectedmovment/>), and might head up to the top of the channel before continuing lower. Please seek the Lord. God bless. Christopher."

As posted on Z3News 16/7/2021 "Hi Z3, in dreams this morning I saw a BTC move going up to \$33,250 and I exited, but the move continued up to around \$35,250 (another 2k), is what I saw. I saw in another dream the figure -0.56 ETN. I believe this is about a big drop for ETN, after it moves up. I shared a target of \$0.488 before for ETN, I believe the move over 30 cents may be as high as \$0.60 potentially, therefore the drop of \$0.56 would take ETN very low back down, which is consistent with the dream I had where I saw ETN move from \$0.30 to \$0.00513. I saw in a vision \$21,240 in red which I believe is BTC. I also saw some visions of some big uptrend with a lot of green candles. I believe we may be heading to the \$30,500 figure I saw for BTC, and potentially reversing near there and heading up to 35k. Please seek the Lord. God bless. Christopher."

As posted on Z3News 19/7/21 "Hi Z3 I saw in a dream today a big drop from seemingly around current price area down fast to 30k, rebounding fast up to around 32k, then dropping fast back toward 30k it got close and the dream cut off. This goes with the dream I posted earlier about seeing the price crashing to 30.5k and wanting to go long, but from today's dream it looks like a double bottom so be cautious. Yesterday I saw \$33,480 BTC and also \$9,233 BTC. I believe we may be heading for this crash to 30k sequence, once that's complete then moving up to 33 to 35k. From there I think the market may roll over again and go lower (maybe 26k?) before the move to 40k. I'll give an update if I receive more relevant dreams. That's my current interpretation, which can and does change. God bless, Christopher."

As posted on Z3News "Hi Z3, an addition, I saw in a dream this morning the BTC price trading sideways above \$30,200 and heard someone say "If it drops through it will go straight back up". I have a resistance level marked at \$30,150 and a fib level just under at \$30,100. I believe that's what the person was referring to, that the price may go under this but will go straight up afterward. According to my dream sequence we are near the end of the first decline to 30k before moving back to 32k. In that dream the price traded sideways around \$32,000 for a while before dropping again near to 30k. God bless. Christopher."

As posted on Z3News 24/7/21 "Thank you for sharing James. I had a dream a couple of days ago about BTC dropping to 31k and rebounding up to 32.5 or 33k. It seemed to me to be a sequence before crashing down to 30k. I saw yesterday \$26,110 and \$19,290, and today around \$25,590 and I also saw \$55,000. Also today I saw \$31,300, and \$31,500, which could be related to a bounce from near that area. Please seek the Lord. God bless. Christopher."

As posted on Z3News 3 days ago (looks like I forgot to post it here also) "Hi Z3, an update. We crashed to 30k, we went lower with the lowest wick to about \$29,300, before rebounding and we are currently at \$31,561. Praise the Lord for showing me this sequence, though I didn't know it was going under 30k that far. Now the price already dipped to 30k and went under. When I saw the price rise up, then I saw it trading sideways at 32k and drop towards 30k. I don't know if it went up higher before trading sideways at 32k and dropping. Heads up we could go up higher than 32k, I have some figures around \$33,400, one today of \$34,968, the earlier dream of a move from 33k to 35k. It is possible we go higher before dropping back to 32k, trading sideways, then finally dropping towards 30k. I clearly saw the price drop from the 32k area towards 30k. Now the drop to 30k was cut off in the dream so I don't know how

far it will go. I saw in a dream today \$27,400 and \$40,700 next to each other, and I have an older figure of \$26,800. It could be that after this rise, we crash to 30k and lower possibly to 27k, and this might be the beginning of the rise to 40k. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 25/7/21 "Hi Z3 I saw in a dream this morning seeing the BTC price crashing from seemingly around the 34k area which was the price when I had the dream. I saw a chart which looked like the similar chart of the price at the time (not completely definitive as I didn't see numbers) then I saw the price went down to 29.3k and the dream ended. I saw this move but didn't see whether there were ups and downs on the way down. I mentioned about a move from 33.2k to 35.2k on 16/7/21 and warned again 3 days ago we could head to 35k as I saw a figure in high 34k. I am looking for a turnaround soon then heading down to 30k. I believe this will be at least to 29.3k, and possibly lower as I shared before figures in the 26k range. Please use stop losses if you are trading futures as interpretation of sequences is difficult. God bless. Christopher."

As posted on Z3News 27/7/21 "Hi Z3 I had some dreams to share. Please seek the Lord on the sequence and timing. Yesterday in a dream I saw the BTC3S price was \$47, then something about going long. Today I saw in dreams BTC price of \$16,000. After this I saw \$42,000. Then I saw \$30,000. When I shared about seeing \$55,000 a few days ago, I saw specifically the chart of the price at the time, then on the chart where it reads the price it suddenly read \$55,000 (approx.) with two \$55,000 on top of each other, and I was shocked. I don't know if it implies we are heading there or not, or if the double stacked \$55,000 means its more significant or something else. Please seek the Lord. God bless you. Christopher." As posted on Z3News 28/7/21 "Hi Z3 I had a dream this morning of seeing BTC push up to 42k with large huge candles and the dream ended. I assume it will go there soon. There is an old top of \$42,300 which would be a resistance, something to watch for. God bless. Christopher."

As posted on Z3News 30/7/2021 "Hi Z3, I saw in a dream this morning the figure \$41,700. Later in a dream I saw the figure \$25,700. I believe that is for Bitcoin (BTC), and these ranges have been shown to me numerous times. God bless. Christopher."

As posted on Z3News 1/8/21 "Hi Z3 I saw in a vision this morning a drop in BTC price, and seeing something similar later. I didn't see the magnitude or timing. Then later I saw in a vision \$43,800. We may be going higher than 42k. God bless. Christopher."

As posted on Z3News 2/8/21 "Hi Z3 I saw in a dream this morning the figure \$16,000. I believe that is about BTC. Later I had a dream seeing the BTC chart and the current price was about \$53,300. I now have seen numerous figures in the 53-55k area, the 26-27k area and 15-16k area. Please seek the Lord regarding sequence and timing. God bless. Christopher."

As posted on Z3News 3/8/21 "Hi Z3 this morning before I woke up I had a dream where I saw the BTC price crashing very severely, continuing to go down. I didn't see the price it went to, but I assume towards 30k at least. I don't know exactly when it will start. God bless. Christopher."

As posted on Z3News 5/8/21 "Hi James thank you for sharing. I had some dreams recently I want to share. Yesterday I saw \$49,853. I saw two figures in low 40k (we moved up from 38k so sharing this late). I saw \$21,819. I saw 100k. I saw -\$65,329 (like minus symbol). Today in

dreams I saw 0.29 (I thought it may be about ETN about the 30 cent plus move). Then I saw \$50,500 in a vision. Then I had a dream of the BTC price rising up to 50k, there was a sharp decline but then the price pumped to 62k and I wanted to sell BTC and ETN, and then I saw the BTC price was at 55k. I also saw the figure 71%, describing an increase (perhaps it could be BTC which would be a rise to 68k, but I'm not sure). Please seek the Lord for the correct interpretation and sequence. Be aware if we move to these higher figures it's quite possible ETN could run. As I mentioned some time ago when I got the two buy prices for ETN of 1.5 cents and \$0.004 at the same time in a dream, that I didn't know if \$0.004 would be reached before the rise to 30 cents. We didn't get down to \$0.004 yet, and I believe this occurs near 19k or so. I have dreams showing a major crash, but timing I don't know. We could head up to 50k plus area first, and if we do then watch ETN. Please seek the Lord. God bless. Christopher."

As posted on Z3News 5/8/21 "Also I didn't mention but I saw \$30,718 yesterday. Today also I saw \$0.62 and \$0.615 (I believe these could be ETN prices) and \$1,411 which I believe is a very low BTC price. We may be heading to 30k/26k area, and possible this comes before 50k, but I don't know for sure. Please seek the Lord. God bless. Christopher."

As posted on Z3News 6/8/21 "Hi James thank you for sharing your dreams and this writeup! I had some dreams this morning I want to share. The first was that I was on Kucoin and saw the BTC price crashing very steeply with what seemed like a single candle. The crash continued and I had thought it was going to stop, but it kept going steadily down to zero. I was shocked and checked my low BTC buy orders but didn't seem like they got filled, but some did. Then I was trying to go long as the price began to rise and steadily recover (quickly though), and I mentioned be careful encase there is another crash. In this dream the price declined quickly but steadily to the point where it seemed tradeable. It wasn't a momentary flash to zero and back up. My order not getting filled (only small part was) suggested to me to raise them up somewhat. In the dream I saw a 0 figure seeming the price went to that, but it somehow it didn't correspond with my order being filled, consider that how you may. Later in a dream I saw \$0.096. I asked what it was and saw RDD so that is 9.6 cent RDD I believe. Later I saw \$39,130 and \$39,358, not sure about these figures as they are close to where we are currently. I also saw \$28,492. Then I saw \$0.009 RDD price (approx. 300% from where it's at now). Then I saw an ETN price of \$0.0038 (just under the buy price previously I was given of \$0.004). Please seek the Lord. God bless. Christopher."

As posted on Z3News 8/8/21 "Hi Z3, I've had some dreams over the last two days, and took some extra time before sharing this time. On 7/8/21 I heard the phrase "Short Squeeze" and saw \$0.41 which I believe is ETN. A short squeeze is a large spike in price that is fuelled by short positions closing. I saw \$35,700 and \$34,000. I saw Blockfolio the whole market was red and ETN was \$0.005. I heard in a dream "The Black Swan is getting closer". The meaning of black swan is "unpredictable or unforeseen event, typically one with extreme consequences." I saw BTC at \$343,000. I saw the BTC chart, I saw a big spike up, then a reversal of the spike going back to where it started, then it traded sideways and dropped rapidly (not sure on \$ prices). Today in dreams I saw \$0.38 and \$0.52 ETN and something at \$0.023 (2.3 cents). I've been seeing a lot of ETN prices lately. It's possible it could run soon, but I don't know, I asked about it but wasn't shown anything definitive. God bless. Christopher."

As posted on Z3News 10/8/21 "Hi Z3 I want to share some dreams I had recently. Yesterday I saw \$33,000 in a dream. I saw a big red candle form downwards on a higher time frame

(maybe daily?), this could possibly already be fulfilled from the \$46,800 top. In another dream I saw a chart of BTC it was significantly under the smoothed 200ma (so under 33k). I saw \$14,790 in a dream. In another dream I saw a big move up over \$62,000 but I didn't see where it started from. Today in dreams I saw high end \$66,000. I saw \$38,900. I saw a short vision of BTC trading sideways and retesting the 0.5 fib at \$46,800. Also a short vision of BTC dropping under the 200ma (under approx. \$45,000). I have seen numerous figures around the 39k area, perhaps there is a correction before moving higher, I don't know. Please seek the Lord regarding the correct sequence and timing. God bless you. Christopher."

As posted on Z3News 12/8/21 "God bless and thank you for sharing. I just woke up from a dream and I saw the BTC market moving up from 35k fast with high volume to 50k I believe it was, it was very close and the dream ended. I don't know how far it went down prior, but I saw it moving up from around 35k. I also saw \$0.0092 ETN. God bless. Christopher."

As posted on Z3News 13/8/21 "Also James I saw a steep drop from 50k BTC area I didn't see how far down but it was a significant sell off, which then the price went up to 62k afterwards and I wanted to sell ETN, then I saw the price stable at 55k. I shared this dream earlier. That decline could be the B wave possibly? I have some dreams to share also from the last few days. On 11/8/21 I saw \$73,000 BTC. I saw \$0.89 which could possibly be ETN. On 12/8/21 I saw \$0.105 and \$0.12 ETN. Today 13/8/21 I saw \$34,090 BTC and I saw \$53,800 BTC. I saw \$128,000 BTC. I saw \$0.0072 RDD. I saw ETN at \$0.31. I saw ETN rising suddenly to \$0.50. I saw ETN hit \$0.009 and slightly under but go up quickly (not sure when this is). I saw ETN at \$0.72. Then I had a dream seeing ETN going up, and next to each major price level were different comments of people who were upset and frustrated they missed out getting in, the price levels were from 5 cents up to 18 cents, there appeared to be a small correction, and the chart kept going up. Some of the comments were like "I can't believe I missed out getting in!", "What! Look at it suddenly go", and other more frustrated comments, as the price kept on rising. I take that as a warning to be careful as possibly the spike to over 30 cents is soon (I don't know how soon, but the Lord told me previously "ETN Moving First". Please seek the Lord. God bless. Christopher."

As posted on Z3News 15/8/21 "Hi Z3, I want to share some dreams I had recently. Yesterday 14/8/21 I saw BTC very near 50k and I was wanting to sell ETN I had. After I sold I saw the chart and it looked like the top was possibly up to as much as 50-53k. After this I had a dream seeing BTC at 18k, with a line drawn with past lows being shown by red arrows showing this was a support level. On 13/8/21 I did see \$53,800 BTC. Today I had a dream of a large grizzly bear seeming to attack someone close to me, and I thought the bear was standing on top of them and I went up to the bear and stabbed it in the side of the neck/shoulder. The bear moved to the side but was unphased and just stood there motionless. I saw the person close to me was not under the bear but was off to the side and was unharmed. They then told me that BTC would go up some first, and to "get out". I believe the drop that happened today was not the real bear move about to come. Later I had a dream that BTC went up to re-test the high. Later I had a dream that ETN had declined to \$0.004 and people on Z3 were remarking about it. I saw something about ETN and heard about "next week" and seeing big red candles and crashing. I also had a dream about BTC to zero. Early in the night I had a dream I saw myself holding a huge fish that I had caught, it was like the size of the fish you see on the show River Monsters, so big you normally physically couldn't hold something so heavy. Fish has been shown to me before as crypto and price related (fishing from the bottom ETN after 3rd wave). This dream I believe may show me catching a huge fish, possibly meaning BTC as it flash crashed to zero, that would be a huge catch indeed! I recommend varied price low buy orders for BTC. At the moment I'm thinking we could go up and re-test the high, perhaps go

as much as 50-53k before a big bear move. Otherwise if I'm wrong about that we could start the bear move earlier. My bear dream reminded me of Hoyoung's bear dream he had recently. I had a dream on 8/8/21 where I heard "August 18" as I saw the top of a crypto move. I didn't share this immediately as I wanted to pray more about it, but we are coming closer to the date, and my other dreams suggest a possible top soon, so I thought I'd share it, but I am not sure about that dream. God bless. Christopher."

As posted on Z3News 16/8/21 "Hi Z3. I had quite a strong dream this morning. In the dream I was sitting at my computer. I have a ticker widget at the top of the screen which shows the BTC price and ETN price. All of a sudden I saw the ETN widget say \$0.42. I hesitated for a moment and then looked closer to make sure I wasn't reading it wrong. I immediately went to the exchange page. I knew ETN was still rising and I sold my coins. After I sold I saw a chart of ETN with two peaks touching or almost touching \$1. I was shocked it went up that high. I don't know the timing. Earlier in the night I saw \$53,300 BTC and \$53,260 twice. God bless. Christopher."

As posted on Z3News 17/8/21 "Hi Z3. This morning I had a dream of seeing 1913 in green. At the time I checked the BTC price, if that's indicating a rise it would be a rise to 48k. I saw \$56,000 BTC. Also I had a dream about shorting from 51 to 56k BTC. That's quite a range given I suggest you seek the Lord regarding your approach. I also saw 35k BTC, and \$0.068 ETN (6.8 cents). Yesterday I saw a move down to 36k, and in another dream I heard the phrase "We have to get to \$24,500". God bless. Christopher."

As posted on Z3News 18/8/21 "Hi Z3 I had some dreams this morning I want to share. I saw BTC3S at \$8. I saw ETN back up around 1.85 and also 1.95 cents. I saw \$38,800. I saw \$35,000, \$23,000, something about technical analysis to \$21,000. Most recently right as I woke up I saw a big red candle plummet down on the 5 min BTC chart from around 44.5k going off screen, fully appearing to break down from the upward channel we have been in. If we were heading up I thought this channel would hold. I am thinking we could move lower, and my recent bear dream is possibly active, and I don't think it was a harmless bear because the way my loved one spoke with seriousness about getting out, but that it would rise some first (which it did), and it was a really big grizzly, if it wanted to attack it could. I posted recently about hearing about next week and seeing ETN crashing but I'm not sure if there's more to it. I thought we may try 50k before going down but I'm not so sure now. My other dream of 35k to 50k in a big move is something I'm keeping in mind, and the lower ETN figures I saw. Regarding August 18 seeing the top of a crypto move, as we ticked over to 12am last night and began the 18th of Aug ETN was at 1.89 cents which is very close to its recent high, and has declined since then. I don't know if its applicable to ETN or something else as I wasn't sure about it when I shared. Please seek the Lord regarding your approach. God bless. Christopher."

As posted on Z3News 19/8/21 "Hi Z3, this morning in dreams I saw BT3S at \$10. I saw \$0.94 ETN. I saw BTC 15 % down, and when I saw this and woke up BTC was at \$44,700, so 15% down is \$37,995. I saw in a clear dream a close up shot prominently showing 3 bars of 1kg silver in the air as they were rotating around slightly. I believe this is about buying silver. God bless you. Christopher."

As posted on Z3News 21/8/2021 "Hi Z3, some dreams to share I received today. I saw \$50,500 BTC, \$50,656, and \$50,700. I saw \$0.026 (2.6 cent) ETN, and 2.7 cent, 3.0 cents, 3.4 cents. I saw ETN at 2.4 cents with BTC at 45-46k and another dream of ETN at 3 cents

with BTC high 45k. I saw there would be a drop and it would be to 37-39k area. I believe this correlates with my dream of seeing the rise to 50k, sharp drop, then rise to 62k. I believe we will move to 50-53k area and crash to 37-39k and then rise again to 62k. Please seek the Lord. It appears based on my dreams ETN was rising after the drop lower, and I have an old target of 4.5 cents for ETN which seems likely. Targets for exits I've been shown is around 50k area, 62k, (short 51-56k range) and entry 37-39k, but seek the Lord for your approach. God bless. Christopher."

As posted on Z3News 22/8/2021 "Hi Z3 in a dream this morning my view was under the ocean seeing a huge amount of sharks swimming around for a few seconds, and it ended. I'll attach an image of roughly what it looked like. Seems bearish to me. May come into play soon. God bless. Christopher."

As posted on Z3News 23/8/21 "Hi Z3, this morning I heard in a dream a story about 5 bears and 4 attacked and one circled around. Please seek the Lord. I don't know when it will be active. I also saw this chart pattern (see image). God bless. Christopher."

As posted on Z3News 24/8/2021 "Hi Z3. This morning in dreams I saw \$54,080 BTC. I saw BTC moving under \$37,125. I saw RDD at \$0.016 (1.6 cents), and at \$0.011 (1.1 cents). God bless. Christopher."

As posted on Z3News 25/8/2021 "Hi Z3, in a dream this morning I was shocked to see the BTC price at 12k as I didn't think it would go that low. I've seen plenty of lower numbers without being shocked in the dream of seeing them. I think that means the 12k is unexpected. Another possible interpretation of the 5 bears and 4 attacked I heard is that each bear is \$10,000 points and 4 bears is a \$40,000 decline, with the meaning of the 5th bear circling around I'm not sure. I'm not saying this is a definitive interpretation, but I wanted to put it out there as a possibility. Also, when I saw the dream of a crash from 50k and a rise back up to 62k I don't know how severe or how far it went down in between. Please seek the Lord. God bless. Christopher."

As posted on Z3News 27/8/21 "Hi Z3, this morning I saw \$54,000 BTC again. I saw \$2.07 and \$1.78 in red which I thought were BTC3S prices (indicating a rise). I was wondering whether we may go to 54k and this would seem to fulfill the U Shape with the steep crash on the second spike I saw, I'm not sure. Also the 4 bears attack could be \$4,000 points (each \$1,000), and we went from 50.2k to 46.2k area which is a \$4,000 point drop so could possibly be fulfilled. I also saw 1.89 cent ETN. I'm thinking we either go to 54k and drop to 37-39k or we drop first, I'm not sure what is first. God bless, Christopher."

As posted on Z3News 28/8/21 "Wow epic dream and interpretation brother praise the Lord. This morning I saw right before I woke up a 4WD like a hummer drive fast off the bank and plunge straight down into icy cold water and it completely disappeared. Then I saw a fleeting vision of 49k. I think there is potential for serious downside. God bless. Christopher."

As posted on Z3News 28/8/21 "I just looked on the hourly chart and the market has made 2 distinct spikes and could be about to drop like the U shape I posted recently. Have a look. Each spike was to 49k area. That could be it. God bless. Christopher."

As posted on Z3News 30/8/21 "Hi Z3. This morning I had a dream I was sleeping and woke up and saw ETN was at \$0.30 cents and I was hoping I was dreaming as I wasn't ready for it to spike. I saw it move up to \$0.55 and \$0.70 and I think up near \$1 and I was feeling horrible

because I wasn't in, and had been trying to buy lower to increase my holdings, and the dream ended. I think this is a dream warning ETN could spike at any time so you could miss out if trying to wait for lower prices. My other dreams of ETN have been similar with a sudden spike in prices. The dream I had of "next week" and seeing ETN crashing has been fulfilled this week as we came down from a peak of 1.94 cents bottoming at 1.17 cents (a 40 percent decline). Please seek the Lord. God bless. Christopher."

As posted on Z3News 1/9/21 "Hi Z3, yesterday in dreams I saw \$1.44 BTC3L (long coin), (currently \$1.09), could put that around 51k BTC. I saw \$46,200 BTC we went towards it but didn't make it there. I saw \$37,700 BTC. Today I saw ETN move from 4 cents to 15 cents to 37 cents it was rising and the dream ended. I also saw written down ETN with 192 next to it, I'm not sure what it means, possibly \$1.92? God bless. Christopher."

As posted on Z3News 2/9/21 "Hi Z3, a few dreams to share from this morning. I saw \$46,200 BTC. When BTC was at \$48.2k I heard double bear, I'm thinking that could be at least a \$2,000 decline. I saw the BTC chart and due to the fib level I have up its coloured green for the background, but it suddenly became red background. I looked and the red coloured fib begins for me from 37k area. I saw a lake and was at the shore and saw myself getting into a small wooden row boat. Perhaps this means I was about to start fishing or would soon? I saw BTC huge crashing red candles very very big, nothing we've seen before recently. I saw the figures of BTC declining to 10k (didn't see where from) and to zero. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 5/9/21 "Hi Z3, yesterday I saw 38k BTC in a dream. Today I saw mid 51k BTC. I also saw \$100,000 BTC and ETN was around \$1.10 at the same time. God bless. Christopher."

As posted on Z3News 10/9/21 "Hi Z3 this morning in a dream I saw \$28,000 BTC. Then later I had a dream where I saw under water again seeing lots of sharks, (like the other time I posted with the image), except this time the sharks were frenzying and swirling around seemingly attacking something that fell in the water. It was like this photo but with even more sharks. My thoughts are more significant sharp decline is coming. God bless. Christopher."

As posted on Z3News 11/9/21 "Hi Z3 this morning I had a dream about BTC going up a lot, there wasn't much else to it (not sure on timing). Later in the night in a dream I saw BTC was at \$30,000, and in another dream after I saw BTC at \$12,700. God bless. Christopher."

As posted on Z3News 12/9/21 "Hi Z3, this morning in a dream I saw ETN moving to \$0.033 (3.3 cents) and then moving down to \$0.0159 (1.59 cents). I posted on 21/8/21 about ETN moving from the 46k area up past 2 cents, and being 3 cents around high 45k area, and we just took off some recently. I didn't mention it before but when I saw the 3 cent figure on 21/8 I heard the word "Target". Please seek the Lord in your approach. God bless you. Christopher."

As posted on Z3News 13/9/21 "Hi Z3 I had some dreams this morning I want to share. I saw ETN at 3 cents and the scene changed and it had dropped back to 1.1 cents. I saw BTC

\$30,870. I saw around mid-3.5 cents ETN. I saw \$50,100 BTC. I also saw a sequence which was from I believe 30k BTC to 92k. God bless.

As posted on Z3News 16/9/2021 "Hi Silent Warrior, I hadn't checked my website in a while but noticed you left a comment in late June about receiving a dream of the crypto Chainlink (LINK). On 11/8/2021 I had two or three dreams in the same night about a crypto called LINK (I wasn't sure if it was caps or not) and there was some type of message about "next block" it would go on a run, I'm not sure. There was the feeling from the dreams it was a good crypto to invest in and it would do well. I believe it's the same coin you were shown about, so when I checked the comments and saw you had shared about LINK, I realised it was likely the same LINK I had my dream about on 11/8. I wasn't sure if you posted on Z3 about it already. God bless. Christopher."

As posted on Z3News 17/9/2021 "Hi Z3, yesterday in a dream I saw the price of BTC change to 30k. In another dream I saw ETN at 1.8 cents. Today in a dream I saw BTC at \$13,000, and a dream of ETN of 1.86 cents in red. God bless. Christopher."

As posted on Z3News 18/9/21 "Thank you Hoyoung I am doing well. I had a dream a few days ago I forgot to mention it is similar to Silent Warriors recent posted dream. I saw a chart of BTC with a big drop down very steep long red wick then a huge steep recovery back above where it dropped from. I don't know on what kind of scale this was on but it seemed like a major move so a bigger scale. Today in a dream I saw BTC at 44-45k. I saw 43k BTC. I saw ETN moving down to 1 cent (didn't see where from this time). I saw ETN prices of 3.4 cents, 3.8 and 4.2 cents. God bless. Christopher."

As posted on Z3News 22/9/21 "Hi Z3, a few dreams to post I had recently. On 20/9/21 I saw ETN at \$0.074 (7.4 cents) and \$0.0137 (1.37 cents). Yesterday 21/9/21 I saw ETN at \$0.0302 (3.02 cents), and I saw \$0.008 ETN (0.8 cents). I saw a chart appearing to show the current position of ETN, overall up from the low area (didn't see figures), then a later dream of seeing what looked like a bit of a rise then a declining chart. This may be showing some upside but limited before substantial decline. Today 22/9/21 I saw \$0.84 ETN (84 cents). I also had a dream where I saw ETN on Bittrex and the price was \$399 and I saw the phrase "Wow breakout move on Bittrex". In the dream I was shocked as I was expecting there to be a decimal point before the numbers, but it was definitely \$399 or so. Then after this dream I had another dream where I was telling others about ETN going to \$399. I believe this is from the Lord, and it calls to mind my original strong dream on ETN from the Lord, where I was shown it would do exceedingly well and be in the Top 5. I don't know how long it will take to reach \$399, but that's the biggest price I've seen, with the former largest price I saw was \$51. To put that in perspective, even 10,000 coins would be worth almost 4 million dollars. God bless you. Christopher."

As posted on Z3News 23/9/21 "Hi Z3, this morning in dreams I saw BTC at 46k and ETN at \$0.04 (4 cents). Later I saw \$0.0158 (1.58 cents) ETN, and I saw also a BTC figure at high 49k. God bless. Christopher."

As posted on Z3News 29/9/21 "Hi Hoyoung, thank you for sharing. This morning in a dream I saw BTC at 30k. God bless. Christopher"

As posted on Z3News 30/9/21 "Hi Z3, this morning I had a dream where I saw BTC had dropped to 31.5k. I didn't see where it came from but it seemed like it wasn't far off in the

future. Then the scene changed and I saw ETN at 11.3 cents. I believe that may be after we go to 30k. Later I also heard the number like this "Two, One, One, Five, Three", which is (21,153) which I believe is likely BTC. I also saw \$0.006 ETN, and \$0.0148 (1.48 cent) ETN. I'm wondering whether we move up above 3 cents then BTC drops to 30k (or lower possibly), ETN declines to 1.48 cents or lower. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 3/10/2021 "Hi Z3, this morning in dreams I saw BTC dropping towards 30k and saw the ETN price at the same time getting lower and lower and it went to \$0.006 when it seemed BTC was near 30k. I did not see where the fall began from. Then I had a dream later in the night and I saw written down "37k to 20k" and I believe this was BTC. I also saw a brief vision of 4.6 cent ETN (\$0.046). Please seek the Lord regarding sequence and timing. God bless. Christopher."

As posted on Z3News 4/10/21 "Hi Z3, this morning as I was waking up I heard the words "Bitcoin's in danger". I assume it's about a decline but don't know if it's more than that. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 10/10/21 "Hi Z3 I saw some figures in dreams lately that I want to share. On 3/10/21 I saw 4.6 cent ETN (\$0.046). On 7/10/21 I saw about 100 LTC sold for \$190,000 (\$1,900 each), I saw \$9,100, \$41,000. On 8/10/21 I saw 44k, 34k, 37k. On 9/10/21 I saw \$51,000 and later saw \$70,000. I saw a chart for BTC had come straight down, traded sideways then half way straight back up, looking kind of like a fish hook. I also saw 1.8 cent ETN (\$0.018). Today 10/10/21 I saw \$72,200. Please seek the Lord. God bless, Christopher."

As posted on Z3News 12/10/21 "Hi Treasure888, no I don't have an interpretation for every figure I receive, and I don't always post my interpretation as it can often be wrong. If there is a sequence I see I will usually explain that in my post. Some figures are just price points which can identify certain significant levels. These are often later confirmed by subsequent dreams. Sometimes I get more information in the dreams, sometimes I don't. People should seek God for their own confirmation and pray for direct guidance for themselves. For example today I saw ETN begin to rise and it rose to 4 cents. It seemed as if it was rising from near where we are now in BTC. I also heard about a crash from 70k. This would seem to say we are heading up to 70k, and crash from there, the previous 70k figures are confirmation of this price level. Crash targets are 30-40k, possible stabilise here before moving from 37 to 20k, possibly lower. I only get snapshots of time when I see a sequence I don't know the order or timing. God wants us to seek Him and try to figure things out. It's not easy but He is definitely behind it, you can see a consistency in all the crypto dreams posted here by Christians. Proverbs 25:2 "It is the glory of God to conceal a matter, but the glory of kings is to search out a matter." Also, Colossians 2:2-3 "...To the knowledge of the mystery of God, both of the Father and of Christ, in whom are hidden all the treasures of wisdom and knowledge". And to Jasoncobb, you are equating prophetic dreams from God to divination and sorcery which is information from demons. I have explained why God does not always reveal things in a direct manner. You can see many examples of this in the Bible. People have seen ETN at \$51 and even higher such as myself, showing the long term potential of ETN which is very valuable information. Some dreams you can discern more information, but God expects us to seek Him to guide us, and not rely solely on prophetic dreams, as He will lead us in faith. It's like part of the picture and the other part can only be found by seeking Jesus. As the scripture says, "For we know in part and we prophesy in part."

(1 Corinthians 13:9). If you are new to Christian prophetic dreams I hope this gives you more understanding."

As posted on Z3News 12/10/21 "Also, yesterday I had a dream where I saw BTC was at \$300 on Kucoin and decreasing steadily to \$200 and \$150 and I saw BTC3S was at \$19. I also heard about a recovery after a fall/crash of BTC to \$1.8M (\$1,800,000). I think that could be after crypto winter or BTC crashing very low for a time, the crypto market as a whole may have a massive expansion and could take quite some time to reach those levels. God bless. Christopher."

As posted on Z3News 14/10/21 "Hi Z3, this morning I had a dream of seeing BTC heading down to 30-37k I didn't see exactly where, and I saw ETN was at around \$0.006. This is very similar to the dream I shared on 3/10. Also something I hadn't shared yet, I was praying on 4/10/21 (the same day I heard "Bitcoin's in danger" and posted about it), and I was asking about when BTC would crash and I heard "2 weeks". This brings it to approx. 18/10. Interestingly Evergrande is set to possibly officially default at this time, so might be a trigger. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 16/10/21 "Thank you very much Amanda. You can buy ETN directly in USDT (a 1:1 USD equivalent) on Kucoin. Also I have \$0.004 for ETN as a buy price, a low I've seen of \$0.0032. A dream I posted on 5/8/21"Then I had a dream of the BTC price rising up to 50k, there was a sharp decline but then the price pumped to 62k and I wanted to sell BTC and ETN, and then I saw the BTC price was at 55k." The coming drop could be from near 62k. I was shown recently about a crash from 70k but I don't know the timing on that, if we go there now or not. I haven't been shown exactly what price BTC would be at when ETN spikes. God bless you. Christopher."

As posted on Z3News 22/10/21 "Hi Z3, this morning in a dream I saw a chart of BTC at 62k with two big green wicks moving down, like the price attempted to drop suddenly but was recovered. This could be a signal of direction, and an impending sharp drop. Yesterday 21/10/22 I saw BTC at \$40,800 in red. I saw 30k BTC on 20/10/21 and separately saw 30 cent ETN. On 19/10/21 I saw BTC at 49k and ETN at 1.3 cents (\$0.013). On 17/10/21 I saw BTC at 50k, and it seemed like it had come down to 50k. On 16/10/21 I saw \$1.88 in green which I believe was ETN. I also saw \$0.59 (59 cents) ETN with an image of a bent wrist with the hand pointing down. The shape this makes is like the top of hill so I think 59 cents is somewhere near the top of that particular move. Some time ago on 13/9/21 I was praying about a sell price for ETN and got multiple answers. I will share them because I don't think they were private for me only, I don't expect them to be exact tops but possibly a good price overall. One was \$1.86, one was \$0.54, another was \$0.0317 (3.17 cents). The \$1.86 is similar to the \$1.88 I saw recently. The \$0.59, \$0.54 is similar to the \$0.48 target I posted already for ETN. I've seen numerous prices in the 3 cent range. I believe there could be multiple moves. Possibly a move up past 30 cents to 50 to 60 cents and lower. Then a move from low to \$1 and higher. Please seek the Lord regarding your approach. God bless you. Christopher."

As posted on Z3News 28/10/21 "Hi Z3, a few dreams to share. On 24/10/21 I saw a list of coins about 7 or so, all were very low and down a lot of % for the day, and BTC was at \$300. Then the scene changed and BTC was near zero, and the other coins were very low also (couldn't tell specifics of the coins or their prices), and I remarked in the dream "Wow what a good time to buy". On 26/10/21 I was praying about the "Two weeks" I heard on 4/10/21

regarding Bitcoin crashing, and received about BTC crashing to zero with a strong feeling of the Lord. Two weeks after 4/10/21 and before three weeks, BTC had the major flash crash on Binance but this was localised to Binance. I believe this was what the two weeks was about, and it was drawing attention to the flash crash, and the coming flash crash to zero, which won't just be on the one exchange. I believe in having orders in place for that and to be ready, but I don't know when it will happen. Today 28/10/21 I saw a chart of BTC coming down to 48k, though I didn't see the higher figures. God bless you. Christopher."

As posted on Z3News 8/11/21 "Hi Z3, bit late in sharing but on 5/11/21 I saw in a dream BTC at approx. \$36,900 and BTC3S at \$1.94. God bless. Christopher."

As posted on Z3News 10/11/21 "Hi Z3, last night in dreams I saw the price of BTC in digits moving. The first part was a bit vague but I saw something like 60k to 50k. Then the price went back up above 60k, then it changed from 60k to 16k instantly. That was the dream. I believe that is identifying a sequence. What that looks like to me is a possible smaller drop, recovery, then a major crash. Later in the night I had a dream I was preparing salmon, cutting each fillet off a large fish, and frying it, and next to me was a medium sized brown bear trying to get at the food. I was wondering why we had this bear in the room with us. The bear kept on trying to reach for the food with its mouth and paw and I kept pushing it back while wondering "This bear might attack me, why do we even have it here with us", like it was a pet or something. Then the food was ready and we left the room for some reason and came back and the bear was laying on the ground and had eaten all the food I had made. That was the dream. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 11/11/21 "Hi Z3, this morning I saw ETN at 1.29 cents (\$0.0129) and again at 1.3 cents in another dream (\$0.013). I saw in a dream after this BTC was at 46k. God bless. Christopher."

As posted on Z3News 12/11/21 "Hi Z3, this morning I had a dream where I was in a room with others on computers, some friends and people from my high school. I checked my phone and saw BTC at \$70,000. My view changed and I just saw the digits \$70,000 increasing to \$75,000 which stood out to me. The price hovered there in the dream, then I'm not sure if it went higher, but next thing I saw the price in digits rapidly decrease and suddenly it was at \$10,000. It hovered there and then quickly changed to zero and seemed to go back up some. My view went back to the room and I was shocked as I knew I saw it go to zero. I checked my phone on Kucoin and saw my low BTC buy orders were filled, and I was praising the Lord. Then I saw BTC was hovering at \$70. I was remarking about how it wasn't long before it happened. That was the dream. I've spoken before about having low BTC buy orders ready. God bless you. Christopher."

As posted on Z3News 17/11/21 "Hi everyone, I have some dreams to share. On 15/11/21 I saw people in a chat group talking about BTC going to 89k then crashing. I saw BTC3S at \$1.1, I saw BTC 55k (I don't remember if it was the same time as the BTC3S price). I saw BTC prices 83.5k, 120k and 100k. I saw \$0.716 which usually is ETN for me as when I see BTC3S I know it's that or it shows it clearly. I saw 75k BTC and \$0.41 which I think is ETN. I waited a bit and prayed for confirmation after those dreams. Today 17/11/21 I saw about 85k BTC the same people on the group chat talking about it so I take that as confirming the 89k dream (James also saw mid 80k). Then I saw 57k BTC in green. I saw 67k BTC. Then I saw 61k BTC to 47k BTC in a move. I also saw \$0.63 which I believe is ETN. Please seek the Lord regarding correct interpretation and sequence. I am thinking that possibly after BTC

dips (to 47k maybe lower to 37k), it rises substantially to 89k and ETN may run during that rise, could be the over 30 cent move to approx. 60 cents. I have been shown in the past about ETN being over \$1 when BTC was over 100k but I don't know if that's later. I don't have a concrete understanding of these things so please seek the Lord. I am looking for the 3 cent move for ETN to be fulfilled, then after that the 30 plus cent (\$0.30) move to \$0.005 (I believe the 30 cent move goes higher to about 60 cents based on additional dreams). From 89k it could be the crash to 10k then 0 for BTC. My previous dream I saw it from 75k go down, but I wasn't sure if it went up higher first, so that still fits. I also have a dream of BTC crashing to zero from 111k which seemed like crypto winter entry, so I don't know how it all fits together. Anyway I'm sharing more interpretation than normal but please seek the Lord regarding your approach. Many people are receiving dreams now and by consideration of those dreams, prayer, analysis, and seeking the Lord hopefully we can find the right approach. God bless you. Christopher."

As posted on Z3News 21/11/21 "Hi Z3, a few dreams to share. On 18/11/21 I saw 3.9 cent ETN. On 19/11/21 I saw \$30,800 BTC in red. Later I saw 68k BTC, 36k BTC, and 18k BTC. On 20/11/21 I saw a move from 35k BTC to 48k BTC and it seemed relevant to ETN (perhaps a move to 3 or 4 cents). I saw \$23,800 BTC. I saw something about BTC going back to 57k. Today 21/11/21 I saw 60k BTC clearly. I saw also \$60,300 BTC. I prayed about entry/bounce for ETN and seemed like I received \$0.009. I received something about Bitcoin Cash (BCH) having high utility. I saw 4.2 cent ETN. I don't know the significance of all these things but I thought I'd share them. I am wondering about BTC moving lower to 30-37k, and possible entry for ETN being near \$0.009 or better, then BTC moving up to 48k and ETN rising to 3-4 cents, as I have an older dream of ETN at 3 cents and BTC around 45k. I've had dreams of ETN moving from 3 cents to 1 cent so I'm wondering if BTC falls again lower, before taking off to higher prices (75k, 89k) and ETN possibly running during that move (30 cent+ move), and possible flash crash timing after reaching 75k. These are my thoughts and could be wrong. Please seek the Lord regarding interpretation and your approach. God bless you. Christopher."

As posted on Z3News 22/11/21 "Hi Z3, this morning 22/11/21 I saw in dreams, a big "BTC3S" in caps on a poster in a dream. Also 43k BTC twice (maybe first destination?) Then later I saw approx. \$35,598. God bless. Christopher."

As posted on Z3News 26/11/2021 "Hi Z3, I have some dreams to share. Please seek the Lord regarding interpretation and sequence. On 23/11/21 I saw in dreams BTC prices \$29,400, and \$31,650. I saw in a dream about BTC moving 15 times the recent drop, and about "15 up", which I thought was 15k. On 24/11/21 I saw \$63,800 BTC. On 25/11/21 I saw in dreams the prices for BTC 67k, and 16k, and 47k, and about a down move to 40k. Today 26/11/21 in a dream I saw 19.5k BTC, then \$74,600 approx. after that, then 10-15k after that. It seemed to be a sequence. If so, that's lower on the first move than I expected as 20k should align with ETN \$0.004 entry I was shown. I'm not sure how it all fits in. I saw in another dream \$62,500 approx. and in another dream 65k. Later I heard in a dream about the market dropping and ETN and another coin I couldn't remember dropping more than others. I had a dream about BTC at 100k and ETN at \$1.24. Then shortly after it repeated and I heard the phrase "Good amount of food for feeding people". I think this is referring to the amount of resources available for feeding people after selling ETN at this level (could be for spreading the gospel type works which is spiritual food and literally feeding people). I saw \$3 which I wasn't sure but thought was for ETN. Then I saw in a later dream I think it was \$0.00005, and my thought was this was ETN's price during crypto winter (fishing from the bottom). I

think knowing about these extremes is really valuable info. For some reason it seems for a time crypto prices will be so low, like people were abandoning crypto, before a huge recovery and long term price fulfilment. God bless you. Christopher."

As posted on Z3News 28/11/2021 "Hi Z3, yesterday 27/11/21 I was considering regarding the lower prices for BTC I have seen in dreams, being uncertain how far it would go down, and was praying about a good buy price for ETN. That night I received in a dream \$0.004 ETN. This is the same buy price I was given on 15/2/21 along with 1.5 cents for ETN. I prayed for confirmation and had a dream seeing the following ETN figures, \$0.0132, \$0.007, and \$0.004. I prayed again and saw \$0.009. My thoughts on this are that the three numbers may be individual entry points where the price moves from, but that eventually each will be hit, I'm not sure. I also had a dream that night where BTC was dropping, I was thinking "Okay how far down is it going?" And I watched it go down under 50k, then under 40k then to around 35k, but then it just kept going down as I was shocked and went to zero. I saw ETN went low also at least to \$0.004 but that was all I saw I didn't see other low figures for it. Then it showed ETN moving up to \$0.195 (19.5 cents) and the dream ended. After this I received about "Top 1%, fewer than few %". I then received about "From the top to the bottom of the ocean, then hoist the sails" as I saw a sailing ship on the ocean raising its sails and preparing to move. Please seek the Lord regarding interpretation, sequence and timing. God bless you. Christopher."

As posted on Z3News 30/11/2021 "Hi Z3, a few dreams to share, please seek the Lord. Yesterday 29/11/21 I saw in a dream BTC \$61,700. I also saw \$83,700. I also saw 377k and 113k. Then I had a dream where someone was telling me about BTC going to 61k then going back down. Today 30/11/21 I had a dream of seeing 2.2 cent ETN (\$0.022). I then had another dream of seeing ETN at 1.3 cents (\$0.013) then it instantly changed to 2.1 cents (\$0.021). Then after I had a dream seeing ETN moving up from 1.5 to 1.6 cents (\$0.016). I also saw mid 44k BTC. My thoughts from this are that possibly soon we could move to 61k BTC, and ETN may move from 1.3 to 2.2 cents or so. God bless. Christopher."

As posted on Z3News 1/12/2021 "Hi Z3, I saw in a dream this morning 1/12/21 ETN was at 6 cents and I was surprised thinking wow, and trying to decide whether to sell or not but I wasn't sure in the dream. That was the dream. I'm not sure when this applies, if this is the same move I was shown to 3 cents, or a bigger move later. God bless. Christopher."

As posted on Z3News 3/12/21 "Hi Z3, I have some dreams to share from the last few days. On 1/12/21 I had a dream about BTC to 24k then other moves (not shown), seeming to be the first part of a sequence. This reminds another sequence I saw on 26/11 of 19.5k to 75k to 10-15k. Also I had a dream about the stock market plunging, seeing a chart with big red vertical candle going down far. It felt like a major drop and like it was soon in the dream, but not sure on timing. A few days prior I had a dream something about BTC going over 100k unexpectedly. On 2/12/21 I saw BTC at 58k and ETN at 4.5 cents (\$0.045). I also saw 53k BTC, and also 3.79 cent ETN as a price separately. Today 3/12/21 I had a dream about a move to 91k then lower, which goes along with a previous dream I had about a crash from 89k. I had a dream where I saw Stellar (XLM) and another coin (couldn't tell what it was) going up either 10,000% or to \$10,000 I couldn't tell (I'm thinking it was the former), and heard a few seconds of horse racing music, this in particular from 30 seconds in the video <https://youtu.be/uUpDG680uew> I believe this was God reminding me about XLM as I was shown about it in the past strongly, and it will do very well in the big race of cryptos. I also had a dream about a move of BTC to 112k to 9k, which is similar to what I've seen before of

111k and crashing to zero. Please seek the Lord in any trading. The safest approach is buying and holding. I believe having low BTC buy orders is very important, and costs very little \$. God bless you. Christopher."

As posted on Z3News 5/12/21 "Hi Z3, I want to share some dreams. On 4/12/21 I saw \$0.00007 which I believe was ETN (confirming the other low figure I saw which I believe is ETN crypto winter price) and \$0.12 ETN. I had a dream about a person having 1.5 million dollars from crypto gains, and heard about if they bought ETN and waited a few months it would be worth 1000s of times more. I believe this dream is showing the long term wealth multiplication potential of ETN, and that it's good to invest in for long term gains. Today 5/12/21 I had a dream where I checked my phone and BTC was at 36k. I then saw the price at 67k and suddenly dropping to zero. I saw \$0.008 which I thought could be ETN. I saw 20k BTC. I saw \$0.316 BTC3S. I also saw \$53,800 BTC. I had a dream where I saw the market was down and BTC was at 26k. I had a dream of Stellar XLM moving from \$0.12 (12 cents) to \$38. I saw a sequence something like this (see image) and we seemed in the dream to be at the arrow area. That makes me think we could drop soon to 36k or possibly wick into 20k area. Possibly the \$0.0132, \$0.007 and \$0.004 ETN prices I saw previously were not individual buy prices but were prices that would be hit on a downward move. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 9/12/21 "Hi Z3, a few dreams to share. On 6/12/21 I saw \$36,130 in green (I think in green means it's moving up to that price from something lower). On 8/12/21 before sleeping I received a brief message of 55k to 70k. In dreams that night I saw 1.3 cent ETN to 2.2 cents. I also saw 2.2 cents to 1 cent. Today 9/12/21 I saw 25.2 cent ETN in a list of other coins, each coin had a small oval portrait next to it, and ETN's portrait was of a woman who looked like a royal princess. I had a dream where I saw 1.3 cent ETN and heard "Don't forget to play". Later I saw 67k BTC in green. I am fully expecting a big move up to 60+k as I have a lot of upper figures but not sure whether we are going to visit the 35k area first before moving steeply up. On 12/8/21 in a dream I shared already I saw a fast move up from 35k to 50k. I'm still leaning towards a down move before the bull up but I may be wrong. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 14/12/21 "Hi Z3, I have some dreams to share. On 10/12/21 I saw BTC at 33k in red. I also saw 2.5 cent ETN separately. I also had a dream of the BTC flash crash, where I saw the price move down from 35k to 20k, and someone called me who was also watching the drop. Then it went under \$30, to \$17, and it was on \$8 and stayed there for a bit in the dream. I checked the exchange but it was lagging a lot but orders I had went through. The person on the phone said they couldn't see if their orders went through as the exchange was lagging for them also. I was praising God for telling us about the flash crash in advance and was very happy, I thought the dream was real life and then I woke up haha. On 12/12/21 I saw 56-58k BTC but no indication of timing on that. On 13/12/21 I was praying about the first flash crash and had two dreams about it not going to zero. I also saw a vague sequence about it not hitting zero, BTC spiking back up to 12k then going to zero. I think these flash down, spike up and flash to zero could be very fast, and could seem like the same move, as at lower prices there could be intense market buying to raise the price temporarily followed by continued heavy selling pressure. I've had similar shown in previous dreams. One on 31/3/21 where I saw BTC go to zero, up to 32k then back to zero. On 23/6/21 I was given a special revelation of BTC 35k to \$200 to 66k to zero or \$200. Whether it hits zero or not on the first crash, be warned there could be an additional move down to zero (multiple crashes) after the first move. I don't know whether they will be fast or have some time in

between. To be safe you could set not too low orders and some lower ones. This way if it doesn't hit zero your higher orders were filled, but if it does then you have some lower also. If the price moves up you could sell a little BTC to add more low orders encase it goes back down. These are my thoughts, but please seek the Lord and He can help you be positioned according to His will for you. On 14/12/21 I saw \$0.0086 ETN. I also had a dream about "Next rally from 36 and up". I believe that may mean we are heading lower to 36k and the next major bull rally will occur from that price area. When we get to that area I'll be watching for the flash crash, but I do not know when it will be. According to a dream I had previously it was sooner than I had thought, and didn't seem far off, but timing can be difficult in dreams. God bless you. Christopher."

As posted on Z3News 16/12/21 "Hi Z3, in dreams today 16/12/21 I saw a BTC chart image like this (see image linked below). I also saw 68k BTC, I can't remember if that was the peak on the chart or if it was a separate dream. Then I had an interesting dream about ETN's/crypto's future. I heard about there being a big announcement for ETN. I heard about new crypto regulation. I heard about an initial event and then waiting for the boost. I heard about trying to buy near zero as best you can. I heard there would be a race between cryptos and about the efforts put into ETN for years by their team, implying it would be doing very well in the race. I heard and saw these things written down, there were more words but this is what I could remember. Right after this the enemy attacked with a distracting dream about demonic cartoon ants running around, it was completely pointless and lasted for about 15 seconds to try to distract me from what I had seen and make me forget when I woke up. But they failed because I was paying close attention praise Jesus. My thoughts on this are the initial event seemed like the flash crash, and the boost seemed to be waiting for the recovery from crypto winter. There was the direction to buy ETN/cryptos near zero, and there would be a race between cryptos I believe after crypto winter. This goes along with the XLM dream I had hearing the horse racing music. I believe the dream is significant as the enemy tried to stop me remembering the details, and it contains important information. Later I had a dream of what I believe is crypto winter prices as I saw BTC at \$0.001 and ETN written under it at \$0.00005 or so. I do not know what would cause such a thing, but if you know in advance you know it's an amazing buying opportunity. I also saw in a dream 1.7 cent ETN. I also saw 46k BTC in a dream. Please seek the Lord Jesus. God bless you. Christopher."

As posted on Z3News 18/12/21 "Hi Z3. Just a few short dreams to share. Yesterday 17/12/21 I saw ETN \$0.007. Today 18/12/21 I saw 48k BTC. I also saw \$58,500 BTC and right after an image of a sword/machete. I'm not sure what that means. I saw in a dream about a low to 16k to 20k for BTC. Also yesterday I was looking at the elevation function on my watch, and was looking at the temperature function on another device. So this morning in a dream I saw elevation at 0. I also saw temperature from 2.5 C to 0. I thought it was just small reminders to me about the BTC flash crash to zero. God bless you. Christopher."

As posted on Z3News 18/12/21 "Also while resting today 18/12/21 I saw in a vision the market down 19 percent including BTC and a number of other cryptos. If that takes place from current levels that would be a move to about 37.6k. God bless you. Christopher."

As posted on Z3News 24/12/21 "Hi Z3, I have some dreams to share over the last few days. On 19/12/21 I saw \$0.003 XLM, which is very low (perhaps crypto winter level price as it's currently 28 cents). On 22/12/21 I saw in a dream ETN shooting up in price from very low. There seemed to be a figure there I saw in the \$8,000's which I thought was BTC. I saw ETN go up to 17 cents and up further and heard a voice exclaim "\$1.92!". This major move looks

to me to be happening after BTC moves up from 8k, so possibly after the BTC flash crash a major ETN move. This goes with a previous dream I shared on 28/11/21 where I saw the BTC flash crash then I saw ETN moving from \$0.004 to 19.5 cents. Also on 22/12/21 I saw \$86,030 BTC in red. On 23/12/21 I saw 79k BTC. I saw a sequence of 15k to 81k to 15k BTC, which is similar to previous sequences I posted. I also saw 56k and 58k BTC. On 24/11/21 I saw \$49,030 BTC in a dream. Please seek the Lord Jesus regarding interpretation. God bless you. Christopher."

As posted on Z3News 28/12/21 "Thank you for sharing this dream James. Yesterday 27/12/21 I had a shark dream too. That day I saw your post and remembered I had a shark dream also that night. My dream was I was in the ocean watching from a third person perspective from a few feet under the water, and a big great white shark swam at me very quickly from the left and opened its mouth wide to bite me, but I was able to dodge out of its way and it continued forward and bit/ swallowed someone else instead who was also in the ocean. Immediately after this I saw short visions of other types of sharks (one like a hammerhead) swimming really fast (seemed faster than I've seen them swim normally) and swallowing whole what seemed like 40 to 50 cm sized fish, and it happened two or three times with different fish and different sharks. That was the dream. My interpretation is the ocean is investing/investors. The shark is a big bear move or big institutional investors who will sell, coming from the left to right as charts move that way, I dodged so I was not eaten or hurt (I'm already in BTC3S), but another investor was attacked by the great white shark and suffered greatly. Then I saw other sharks moving very fast eating the smaller fish (smaller investors), swallowing them up, so heavy losses for the small fish. Today 28/12/21 in a dream I was instructed to buy more BTC3S with some \$ I had spare. It's rare for me to receive direct instructions from the Lord to buy. Last time I saw the BTC3S on the sign dream BTC flash crashed really hard. So I'm expecting a big drop coming soon. Also I had older shark visions including a feeding frenzy of sharks which I feel hasn't been fulfilled yet. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 28/12/21 "Also I forgot to mention on 25/12/21 I saw a dream about 150k XRP (not price but amount of coins) which is the first dream I've had of XRP. I saw in a dream BTC at 20k in green. I also saw in a dream BTC movement something like this (see image). It went down fairly steeply, to 35k area and lower, I couldn't tell how far it went down, then it went back up, sideways for a little bit then took off at an approx. 45 degree angle straight up a long way, which is I believe is confirmation of the dream I had on 14/12/21 of "Next rally from 36 and up". What was clear is that the drop went below 35k, recovered, then BTC took off moving up from 35k on a big rally. God bless. Christopher." As posted on Z3News 9/1/22 "Hi Z3. I have some dreams to share. On 8/1/22 I saw 6 cent ETN (\$0.06). I also saw \$36,000 BTC. I also saw a price zone for ETN of \$0.0033, which I thought was a good buy price (previously I was shown \$0.004 as a buy price so that is similar). The same night I had a dream of BTC was at 61k then it crashed very fast, under \$100 it went under \$50 and rebounded up (I didn't see figures clearly after this). BTC was then at 5k and I was trying to check my account but was having issues with the Kucoin app. That was the dream. Today 9/1/22 In dreams I saw 14k BTC. I saw \$2,511 in green (moving up I'd say). I had a very interesting vision of looking at a middle aged man wearing swimming trunks sunbaking laying on a lounge chair on a sunny beach with yellow nice looking sand. He was sitting up and facing toward my view, looking away from the ocean, but was close to the water. He looked happy and carefree. I saw behind him a huge black fin in the water slicing through the water moving toward him very quickly. It seemed like a huge shark that was going to attack him even though he was on the beach. The shark was moving

very fast and the attack seemed imminent. After the vision I thought of how killer whales attack seals on the beach they will literally launch onto the sand to attack their prey (see photo). It could be that the man on the beach was an investor in a position he thought was good, he was carefree, perhaps he didn't think we were going lower? But right behind him was an imminent attack on him. In this dream the shark had not yet attacked. The fin was huge so I think the shark is huge. I believe there will be a major drop coming soon. Please seek the Lord regarding your approach and interpretation. I also had a dream of BTC around \$4,000 and ETN was at \$0.003, I saw the both together. God bless you. Christopher."

As posted on Z3News 14/1/22 "Hi Z3. Some dreams to share. On 10/1/22 I had a dream where BTC was at 63k. On 12/1/22 I had a dream where I heard about ETN "It is a ten". Then I saw ETN moving up and I was heavily in ETN. That was the dream. The "It is a ten" is the same words from Maria's crypto poem she received about ETN, to me meaning it's a 10 out of 10 (top tier). I also saw in a dream 48k BTC. I had a dream also about seeing BTC at 160k and then saw it suddenly dropping down past 50k and all the way to zero on Kucoin. Three big red 0's showed up as it was being slammed down to zero repeatedly on Kucoin. I think this is the same flash crash I saw from 110k to zero. So I believe there are at least two flash crashes, and there is some mystery about it but I recommend having some orders you always leave in place for low BTC. On 13/1/22 I had a vague dream about 45k then lower to 36k or so. We went up recently to 44.5k, not sure if that's enough or if we will move higher. These moves don't necessarily signify the top or bottom. Today 14/1/22 I saw ETN at 4.7 cents and also at 0.8 cents, I'm not sure which I saw first. I also had a dream where all these different news outlets were reporting on the flash crash that just happened, and there were some outlets mentioning something about the stock market as well, like it was related in some way. Please seek the Lord Jesus. God bless you. Christopher."

As posted on Z3News 15/1/22 "Hi Z3. I saw 28k BTC this morning. Normally I'd wait for a few more dreams to post, but I had another dream where I was posting it. God bless. Christopher."

As posted on Z3News 24/1/22 "Hi Z3, I want to share some dreams. On 19/1/22 when BTC was at 42k I saw in a dream the sequence of 40k BTC, then flash crash, then 67k. I believe we could be at the flash crash part now. This goes with the special revelation I received on 23/6/2021 of 35k to \$200 to 67k to \$0 or \$200. On 7/1/22 I had a dream about the flash crash where it felt like it was happening very soon. On 20/1/22 I saw in a dream BTC was at 19k and I was excited about it as I have been waiting for the crash. On 23/1/22 I had two visions of BTC at 10k and later I saw 3k BTC. Today 24/1/22 I saw in a dream \$0.0033 ETN, reminding me of the previous buy zone dream of \$0.0033 (posted on 9/1/22), so that seems like a good entry. I suggest people make sure they have their low BTC orders set. After that I'm looking to pivot to ETN heavily. RDD buy price I was shown from a dream from 1/12/2019 I saw it move from \$0.00027 to \$0.00017 and I wanted to buy. For XLM I was shown \$0.12 to \$38 and price is at \$0.193 so I'd imagine it may go quite a bit lower than \$0.12 if it drops in proportion to the others. Please seek the Lord and God bless you. Christopher."

As posted on Z3News 26/1/22 "Hi Z3, this morning in a dream I saw a BTC chart that looked like this (see photo). It was going sideways then a huge red candle formed going straight down. I don't know what timeframe it was on, but clearly showing a big drop. God bless. Christopher."

As posted on Z3News 31/1/22 "Hi Z3 some dreams to share. On 29/1/22 I had a dream where someone sent me 0.85 ETH but it was worth 35k (41k per coin). On 30/1/22 I saw 88k BTC in red, and in another dream 16k. Today 31/1/22 I saw 19.5k BTC and 77k. I believe the higher values are later. I saw a person mentioning BTC3S on a chat, highlighting this to me again. I had an abstract dream about BTC and it was turning over. My view on that is we are changing direction and heading down, which we already started to do when I got up in the morning. I also heard softly in a dream "It's happening now, it's happening now, it's happening now". I believe this is about the flash crash, and it is indeed coming soon. God bless you. Christopher."

As posted on Z3News 10/2/2022 "Hi Z3, this morning in dreams I saw \$2.6 BTC3S (I saw \$2.6/\$2.7 also about a week ago) and heard someone mention about \$3. I had a dream of seeing BTC at 20k and BTC3S was around \$6 to \$7. I was excited in the dream as I was waiting for it to drop further. God bless you. Christopher."

As posted on Z3News 12/2/2022 "Hi Z3, in a dream this morning I saw 41k BTC. I also had a dream after where I saw the BTC price was at \$26,800. Yesterday I had a dream I saw SHIB at \$0.199. This is the first dream I've had of seeing a SHIB price. God bless. Christopher."

As posted on Z3News 19/2/22 "Hi James and Z3, today in a dream I saw BTC3S I believe it was, at \$0.54, confirming the price you saw James. I also saw a short dream of BTC moving up significantly with large green candles, I don't know where from. I also saw \$37,100, \$45,100 and 18k in green. I don't know how these things fit or the timing. On 17/2/22 I saw in a dream \$7 BTC3S I believe, which confirms the \$6 to \$7 price I saw at 20k BTC area previously. Please seek the Lord regarding sequence/timing. God bless. Christopher."

As posted on Z3News 21/2/22 "Hi Z3, last night before bed I received the word "Nosedive". I believe we are about to see a major crash in the market. I believe it will be fast and steep. I am on watch based on the previous dream I shared on 24/1/22, where I saw the sequence BTC 40k to Flash Crash to 67K, as we are under 40k. Please be on alert with your orders, don't mess with them and make sure you are ready. I also had another dream of the flash crash last night. In the dream I felt urgency and heard a soft voice say "It's here now", and I wanted to go and post to share with others to make sure they were ready, but before I could I saw my Kucoin widget change from 35/36k to 20k to 10k to 0. The figure \$0.001 came up. I woke up but was still dreaming and realised it was only a dream though it felt so real, but I said "That's good it was, because it's for the glory of God people can know it's coming in advance." Then I woke up for real. I felt led to share and say I believe it's coming very soon and to be ready. God bless you. Christopher."

As posted on Z3News 22/2/22 "Hi Z3, this morning I had a dream where I saw a man standing with some other people in a street and it looked kind of like a protest or demonstration. He was holding a large sign with this written, "51% ATTACK". That was the dream. This is a serious vulnerability of crypto where if some group controls enough mining power they can stop transactions and double-spend crypto, causing a huge loss of confidence. Here is a link explaining in detail <https://www.investopedia.com/terms/1/51-attack.asp> I believe this could be something to do with the BTC flash crash, or possibly crypto winter. God bless you. Christopher."

As posted on Z3News 25/2/22 "Hi Z3, this morning in a dream I saw a screen with a female news anchor reporting that world markets were nosediving. There was a feeling of intensity

and that they were crashing severely. In a separate brief vision I saw a Christian celebrating after the flash crash had happened. God bless you. Christopher."

As posted on Z3News 26/2/22 "Hi Z3, I have an important dream to share that I had this morning. The dream was very short. In the dream I saw a map centred on Ukraine also showing a large area around Ukraine into Europe/Russia. I then heard the words "Small World War" and woke up. I prayed for confirmation and heard the words "Short World War". I prayed again and didn't receive any indication it was from the enemy. I believe this is from the Lord. Right now the markets are seeming to recover, but for what I shared recently to occur, where the news reporter was saying world markets were nosediving, I imagine we are going to see a major escalation in war in this region. Also, on 9/2/22 I had a dream where I heard "April crash". I prayed after I woke up and heard "Surely it is coming". I prayed again and received nothing to indicate it was from the enemy. I believe this also was from the Lord and there will be a crash in April. I don't know if this is the flash crash (I am expecting that imminently), or world market crash. I had waited until now, but felt led to share publicly. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Z3News 28/2/2022 "I received some dreams and a word from the Lord Jesus Christ today regarding a soon breakout of war (escalation), and that it was Putin's evil plan to use many nuclear weapons on Ukraine's cities but Jesus is stopping it. Here is the video. God bless you. Christopher."

As posted on Z3News 2/3/2022 "Hi Z3 this morning I saw in dreams BTC3S at \$4, then I saw \$10 moving up to \$13. Then in a separate dream I saw \$20 BTC3S. Also yesterday 1/3/22 I had a dream where I was in what seemed like the bottom of an old church bell tower, inside it was wooden with thick wooden columns in each corner going up high. I looked up to the top which seemed like at least 10m (32ft) tall to the ceiling, and suddenly as I looked up I saw a large bunch of 2-3 inch wide orangish gold coins were falling right toward me and were very close to my face as the dream ended. I believe these were Bitcoin. I didn't feel fear or worry when I noticed them falling on top of me, when normally you would try to take cover or at least close your eyes. I believe the bell type tower represents the church, the coins fell from the top of the tower and free fell all the way down to me. I looked up and there they were, about to fall on me which conveyed the suddenness. Though I was surprised there was no fear so that is good for us. As I was standing on the bottom and the coins fell to me it represents our buy orders which by patient waiting at the bottom, God will have the BTC coins drop down to us. It was like an airdrop from God. I feel the dream is a nice encouragement from God. God bless you in Jesus Christ name. Christopher."

As posted on Z3News 7/3/22 "Hi Z3, I have some dreams to share. On 5/3/22 I saw in dreams twice 31k BTC and once 27k. Yesterday 6/3/22 in a dream I saw a person on Telegram say "A thousand in KLAY". I knew this was referring to KLAY coin which is called Klaytn, and this confirmed to me it is the "clay coin" I was shown about twice and posted about on 15/4/2018, though I didn't have the right spelling at the time. On the CMC chart I see history from 2020 where it was around 12 cents, after it went to a high of over \$4, now around \$1.12. I believe this dream confirms this is the coin I was shown from 2018 and is a good one to invest in. Today 7/3/22 I saw in a dream BTC at 54k. I also saw in a dream something close to this chart which I knew was the stock market (possibly Dow), see the picture. It was a huge crash which looks like a flash crash, and immediate recovery and then an arc into another steep crash. I wonder if crypto will mirror this. This could be based on war escalation. I did not get any indication where we are in the chart if we are at the top or

yet to begin the move. I heard today in a dream “White Hot” which I believe was in relation to war, and could be about the severity as when something becomes so hot it turns white. There are also white phosphorus weapons. In another dream I saw someone in a public square giving a news report as a huge group of Polish people were screaming out and yelling something like “Liberty” in Polish and drowning out the reporter and it felt like they were rallying themselves for war. God bless you. Christopher."

As posted on Z3News 13/3/22 "Hi Z3, some dreams to share. On 4/3/22 I saw in a dream a pair of shorts with a red label that said "CODE RED". Sounds bearish to me. I have been hearing regarding war lately. On 8/3/22 I heard in a dream, "Is this war? Yes it is. A serious war." That night I saw in a dream BTC was at \$8,700. On 9/3/22 I saw in a dream about Russia committing more troops into Ukraine, I received a figure over 330,000 total. Yesterday 11/3/22 I saw in a dream RDD at \$0.006 (that is 10x from where it's at now). I also saw 11k BTC and 47k BTC. On 12/3/22 I heard in a dream "Buy". Directly after I saw written "BTC3S". My thoughts are that this is about buying BTC3S. Later I saw BTC at 32k in a dream. I heard also in a dream "Warnings about GDAX". GDAX is a crypto exchange now called Coinbase Pro. I believe that's a warning about it and I suggest you seek the Lord if you trade/hold on there. Today 13/2/22 in a dream I saw a Russian soldier in a red hued uniform and he seemed evil and dangerous. I then heard the word very impactfully "Bloodshed". I also heard in a dream "Times will be very hard". Later in a dream I received the thought of Russia then I suddenly heard a sound of a big cat savagely growling like it was attacking something with its claws. Later I heard in a dream "Press the button". I did not like the sound of that and prayed against it. I also heard "Communism". Please seek the Lord regarding crypto sequence interpretation. My thoughts are that we are very close to April which I have received about a crash then. We may go up higher to 47k but I don't know for sure, and expect the downside is much greater than the upside, which may be why I received about the BTC3S. I am still waiting for the BTC flash crash at any time. Regarding war I believe what the Lord showed me that World War 3 is about to break out, and that it likely started when Russia invaded Ukraine. Markets will plummet. What I have received so far is "Small World War", "Short World War", "A Serious War", "Bloodshed", Russia is dangerous (big cat savage growl), "White Hot" in severity, "Times will be very hard", "Communism", "A Domino Effect", "War is About to Break Out", "Nosedive". These are recent words I have received. I don't believe this is the end yet (the tribulation), but something quite bad and could feel like it. Please seek the Lord Jesus Christ and prepare yourself spiritually, mentally and physically. In an old dream over a year ago I saw people standing in line to go into the grocery store due to rationing, and I heard about grain shortage. These things are shaping up now in a big way. God bless you. Christopher."

As posted on Z3News 14/3/22 "Hi Z3, I have some different dreams and words I received today 14/3/22 to share. In one dream I saw a screen with a media report that the sides for WW3 had formed. I saw that India sided with Russia and China and North Korea. I saw the allies (NATO) including Turkey were all together opposing them over Europe. I then saw the news reporting on a series of major cyber-attacks on companies/industries/countries that kept getting worse and the last one I knew was very severe and the dream ended. Then I received in a dream “Putin’s gas price 500”. I looked up the main European gas price and it is at €131 euros after a recent high of €225 euros, so I expect this to spike over €500. I also received the word “They are setting their bombs”. I also received “Tactical Weapons”. This could involve preparation of tactical nuclear weapons. I received “Russo-China alliance”, perhaps showing the strongest two of their WW3 alliance. I believe it’s likely more countries will be on Russia and China’s side such as Syria and Iran. I have a previous important prophetic dream and

word from God about Russia and Iran invading Israel which I'll share here, <https://youtu.be/neVk2YPinVw> and https://youtu.be/uUWnljzz7_g I had an abstract dream where I saw a tall cooking pot which represented Putin with a 1cm hole in the bottom and as I saw this large cracks started forming in the bottom and the side of the stainless steel pot. My interpretation of this is that Putin is made of steel but has a hole (weakness) which will turn into large cracks, so he will crack. I don't know what this means exactly. I also received in a dream about a "Forced Withdrawal", which I thought applied to Russia/China, and may involve being forced to leave occupied territories. I also received the word "Chechnya", which is a war fought by Russia where the main city Grozny was sieged and heavily destroyed by artillery and airstrikes with the UN calling it the most destroyed city on earth. This may be an indication of Russian tactics against Kiev in Ukraine. I had a dream and was in a room which seemed like a strong bank like a vault, with 4 inch thick steel walls and I knew it represented Coinbase, but there were two 4x4 inch holes in the wall, a vulnerability. Then I heard that they were having problems with their two factor authentication so had announced a suspension of operations or withdrawals, I wasn't sure which. God bless you. Christopher."

As posted on Z3News 15/3/22 "This morning in a dream I heard the phrase "Russia Escalates", and right after I heard, "A major attack". Also in a dream I had the thought about this image I posted earlier on 26/1/22 (see below), where in the dream I saw the BTC chart seemed like the daily and seemed like though we have had some ups and downs we have been quite consistently at the same price level for some time (the sideways movement in the image) possibly indicating the major downward drop (nosedive) is soon. God bless you, Christopher."

As posted on Z3News 16/3/2022 "Hi Z3, something I didn't share before but feel like I should now was on 9/3/22 in a dream about something else my brother said with seriousness that "Russia and China's currencies were collapsing." I believe this is significant based on current events as China is being warned not to help Russia evade sanctions. My dream could indicate China may assist Russia in a way that brings heavy sanctions against them which damages their economy/currency. Also today in dreams I saw BTC prices of \$6,700, also \$3,031, and \$2.24 BTC3S. There was no indication of a sequence with them, but sharing anyway. God bless you. Christopher."

As posted on Z3News 17/3/2022 "Hi Z3, I have some dreams to share that I received this morning. I heard in a dream "Circle the violation zone then protect it" and I knew this was NATO saying this. I then heard a news report saying "Germany approved using military force in Ukraine". I had the impression about military force being used to protect supply convoys to Ukraine. Then I saw a map and saw a huge green/brown tsunami heading towards Ukraine's borders and I knew it represented NATO forces and I said to myself in the dream, "Is this it? World War 3?" I believe NATO is going to take action and will help Ukraine. I also had a crypto related dream I saw BTC was at 11k and it went to 10k. I was thinking how the nosedive I heard was fulfilled and it was a huge drop. Then I saw it at 8k. I was in a room with other people and I said to them "Did you see Bitcoin has gone under 10k?" Then the scene changed I checked my phone and saw the BTC chart on Kucoin and saw the flash crash had happened it appeared to flash crash from 8k to near 0 (at the bottom of the red candle I saw the number 0.2), then back up quickly, I didn't see the price it recovered to as it was off the screen, but it didn't seem like it was very low for long. That was the dream. I believe these things are very close. God bless you. Christopher."

As posted on Z3News 18/3/2022 "Hi Z3, in a dream this morning I heard the words, "It went to 10k from zero", I believe this is about BTC recovering quickly to 10k from the flash crash. Later in a dream I saw a written statement saying "Transfer BTC at 10k to XRP and wait until you see what you get". I believe this is about converting BTC to XRP as while BTC has a good amount to rise from 10k to fulfill a previous sequence I saw (66k), this is an approx. 6x gain, whereas holding XRP from 10k BTC might be more than a 6x gain. XRP might still be cheap at 10k BTC also and may not have recovered as quickly as BTC yet. Now I believe this applies to ETN also as I saw in a dream I posted earlier after the flash crash I saw it increased from \$0.004 to \$0.19 (47.5x), and could go higher as I've seen numerous figures in the 50 cent range. Yesterday in a dream I saw a brief clear vision of a Shiba dog. So I think it's good after the flash crash to pick a point to diversify BTC into alt coins, and based on these dreams I've been highlighted ETN, SHIB and XRP. I'll probably put some in other alts also such as RDD and XLM and aim to keep some BTC too. I had been wondering and praying weeks ago about when to convert BTC into other coins after the flash crash, and this was an answer, so I'm aiming to do so around 10k. Keep in mind I did see in the past a dream where BTC crashed back to zero from 10k so I'd suggest setting some more low BTC orders also from 10k encase that does happen. I think this way if you have some BTC, some alts, some more low orders, you'll be set for the bull move to at least 66k. This is based off my special revelation dream of 35k to \$200 to 66k to zero/\$200. I have seen some dreams where it crashed from higher than 66k but that's what I'm going off at the moment. Please seek the Lord Jesus regarding your approach. Also this morning in a dream I heard, "Poland was attacked", and right after I heard, "Declared Article 5". Article 5 is the NATO defence treaty requiring all NATO members to come to the defence of the NATO country that is attacked and consider it as if they themselves were attacked. God bless you. Christopher."

As posted on Z3News 19/3/2022 "Hi Z3, this morning in a dream I saw a Russian general in a camouflage uniform saying "We will not back down". That was it. God bless you. Christopher."

A dream to share, as posted on Telegram 22/3/22 "Hi brothers and sisters, I have a short dream to share. Yesterday 21/3/22 in a dream I saw a woman concerned that her low BTC buy orders disappeared or were cancelled. That was it. Please check your orders are in place. I believe Kucoin's orders are considered "good until cancelled", but Bittrex reserves the right to cancel orders over 28 days old. Please check your orders are all in place, and do so periodically. I think the Lord is reminding to check your orders so that people don't miss out. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters. I have some dreams to share. This morning 23/3/2022 in a dream I heard "Constant war into 2023", and heard a dramatic and urgent sounding news reporter giving war related updates as I understood there were continual new developments. I believe this dream shows that war will become worse and continue into 2023. Then later I had a dream and I saw a person who picked up another person and they merged together and I knew it represented a partnership and it was, "Italy, Oil, Texas", and I received about "EU Oil". I believe this dream could be about Texas supplying the EU oil and possibly increasing their production, as the EU imports a quarter of their oil from Russia. Texas is already the highest oil producing state in the USA. I also had a short dream where I saw Chinese people protesting on the street holding signs that said, "NO WAR", and the dream ended. I also had a dream I was in the backyard of a Russian couple and they had just bought a nice block of land, showed me their house, where they planned to grow vegetables, their child was playing in the background and as I was leaving and shook the man's hand he said "For Putin", in a strange statement of gratitude to the Russian

President, like it had become a common greeting. I was surprised as it came out of nowhere and the dream ended. This dream I believe shows that many every day Russian's completely support what Putin is doing, that this support is widespread, and that the Russian propaganda is strong. Going with this dream yesterday 22/3/22 I had a dream where I was repeatedly getting the message that RT (Russian Today) the Russian State news agency is causing people to become very confused. That was the dream and the message. RT is targeted towards foreigners the same as CGTN (Communist China State media). This dream goes with the previous dream. God bless you. Christopher.”

Hi Z3, as posted on Telegram 25/3/22, "Greetings brothers and sisters, I have some significant dreams to share. One dream I received earlier I did not share it yet, and I received it about a month ago on 26/2/22, which was shortly after Russia invaded Ukraine. In the dream I heard the words, "The siege is over, the capital is cleared". Then today 25/3/22 I had a dream where I saw Zelensky pleading for help and equipment to be sent to Ukraine, but being frustrated about the support being limited. Then I was in a room full of generals at tables in their military uniform suits with ranks and awards, which seemed like a meeting of NATO, but there were lots of Ukrainians there too. I did notice Putin was standing in the background in the room watching what was going on. The NATO generals were discussing grimly the situation with Kiev and how the Russians were closing in and the situation felt dire. There was an impression like Ukraine was considering surrendering. I put up my hand and interrupted, and proclaimed to them that I had a dream shortly after Russia invaded, and in the dream I heard, "The siege...of Kiev...has been lifted." As I said those last few words the Ukrainian people in the room burst out with joy, celebrating and hugging each other, believing they would be victorious, and yelling out in Ukrainian, "We are one! We are one! We are one!" I knew they were not going to give up and believed in the dream I told them. And the dream ended. I believe this dream confirms my previous dream, that there will be a siege of Kiev and things will seem dire, but that the siege will be lifted and Kiev won't fall. Though my words in today's dream were a bit different than the previous one, they had the same meaning, in that the threat against Kiev was lifted. I believe the celebrating Ukrainians showed they will continue to believe in their victory against Russia. I believe the Lord Jesus Christ will deliver Kiev, and Ukraine will be victorious because Russia will fail to take their capital, and be forced to withdraw their siege. I believe Putin in the room where he shouldn't be could be about him having spies to report to him what is said. After this dream I prayed and received no indication this was from the enemy, but had peace. I also received "Tactical nukes". Previously I posted about hearing "Tactical Weapons", so I believe these may be used, perhaps if Russia feels like they are losing and cannot take Kiev. But as I shared earlier, in the word from Jesus He gave to me, I believe He will deliver the Ukrainian cities from Putin's plan to use nuclear weapons, so they won't be turned to "Hot lava". I also received the message "\$200 Oil". This is very high (all time high is \$147). I also received the date "7 April". I don't know what that is about, I prayed to ask what it was about but did not receive any further information yet. Please seek the Lord Jesus Christ. God bless you. Christopher." As posted on Telegram "In a dream this morning 27/3/2022 I received about SHIB making a huge 200x move. I didn't receive any timing indication. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters, this morning 30/3/2022 I had an impactful dream where I saw a tall wooden ship mast on land, and it was connected to a building. Standing on top of the large mast were many Chinese Communist Party (CCP) soldiers in military clothing each holding a spear. There were many ropes leading down from the mast to many very large glass bottles and what was inside was hidden by curtains. A woman who I knew to be from Taiwan was outside the building and she took some action to

remove the curtains on the glass bottles, and the curtains fell away. Inside each bottle was a Taiwanese woman who was being held as a sex slave by the soldiers, one even had a baby with her inside the bottle. When the Chinese soldiers saw their veil over their secret slaves was removed they were extremely angry. They yelled at the woman and threw their spears at her but miraculously the many spears missed and she was unharmed. Then the CCP soldiers sung in unison in their anger, "Taiwan must fall, it's a murder of humanity, Taiwan must fall". They sung this with extreme passion like it was their favourite song. Then I saw that someone had come to help the imprisoned Taiwanese women. I didn't see who it was but the CCP threw their spears at him and again miraculously all their spears missed, and the man came and took action against those CCP soldiers, and the dream ended. I believe this dream is prophetic in showing that the CCP's hatred of Taiwan will manifest in a desire to commit genocide against them, and they plan to plunder and destroy them severely, possibly in revenge for them seeking independence, having democracy and western values. This will include taking slaves of the women and horrible deeds. I believe God will help those who defend Taiwan, represented by the man who came to Taiwan's aid and that the CCP's spears all missed him. God also delivered the woman who exposed the CCP's soldiers' atrocities. The ship mast may represent Chinese invasion by boats. I believe that Taiwan will face a genocide from the CCP if they are invaded and are not helped. I believe it's God's will that Taiwan is helped against the evil plan of violence against their people. I don't believe if China takes Taiwan there will be a peaceful integration. Perhaps it could appear that way on the surface, but under the curtains I believe the CCP will brutalise Taiwan and their people. This is not to be taken lightly as there are witness and victim reports of Uyghur women gang raped, brutalised (in obscene sexual violence involving electric batons), sold as sex slaves and having forced abortion/sterilization performed on them by CCP soldiers in internment camps in China in what is already being called genocide. This is how CCP soldiers treat those who are deemed an enemy. How true would this be of the Taiwanese people. Please seek the Lord Jesus Christ and pray for the people of Taiwan, to know Jesus Christ and be delivered from evil, and pray for God to help and deliver them from the wicked plots of the Chinese Communist Party, as well as for those people already suffering at their hands. God bless you. Christopher."

As posted on Telegram "Greetings brothers and sisters, this morning 1/4/2022 I had a short dream where I saw the inside of a military paratrooper type plane. I didn't see anyone, but near the rear end of the plane (where troops normally jump out) was a parachute sitting upright, and my view focused on it and it felt significant. Then the dream ended. When I woke up I thought it could be in relation to crypto. Later in the night I saw a brief vision of it again, the upright parachute in the plane, showing its significance. My thoughts on this are that I previously shared about hearing the word "Nosedive" and the dream of the reporter saying markets were "Nosediving", and we are waiting for the crash I've seen of BTC. A parachute is for jumping out of a plane. Perhaps the plane is about to go down and you need your parachute on so you will fall safely to the ground. Or that it's time to jump out of the plane and you need your parachute (perhaps positioning yourself for the crash?). The parachute and military type plane could indicate maybe it's a war related reason. I'm not sure on the interpretation but I thought I'd share. God bless you. Christopher."

As posted on Telegram 3/4/22 "I posted this dream on 13/2/22, "In a dream I saw a Russian soldier in a red hued uniform and he seemed evil and dangerous. I then heard the word very impactfully "Bloodshed". Please lookup the massacre of Ukrainian civilians in Bucha by Russian soldiers, the images, videos and photos (you can find them on Twitter). This is being reported within the last 24 hours, mass graves, civilians killed and their dead bodies lying all

over the streets, people executed with their hands tied behind their backs. This is extreme wickedness, as I shared in my dream! Please pray for the Ukrainian people. God bless you. Christopher."

As posted on Telegram 4/4/22 "Praise the Lord my dream of 25/3/22 (posted above) about the siege of Kiev being lifted, is fulfilled about one week later. "Civilians whose towns and villages were occupied by Russian troops laying siege to Kyiv have been celebrating the invaders' withdrawal." <https://www.abc.net.au/news/2022-04-04/ukrainians-emergecelebrate-as-russians-pull-back/100963856>"

As posted on Telegram 5/4/22 "Greetings brothers and sisters, in a dream this morning I received the words "Victory in Donbas". Donbas is in Eastern Ukraine (held by Russia/Separatists) where Russia is thought to be shifting most of their military forces to focus on securing. After prayer I believe the victory is a Ukrainian victory against Russia in the Donbas. This would be a huge defeat for Russia. Also in a dream I saw written "BTC3S". I had a follow-up dream where I was thinking the crash could be anytime now. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram "Greetings brothers and sisters. This morning 6/4/22 I had a dream where I was being shown about war crimes by Russia in Ukraine being much greater than the Bucha massacre. The dream showed in an abstract way the Bucha massacre compared to more Russian war crimes and the latter was like a tower many more multiples in size, and on the top of the tower was an open top military vehicle with four Russian soldiers inside. I believe this was from the Lord and shows the Russian war crimes against the Ukrainian people are or will be much worse or on a bigger scale than what was discovered in Bucha. Later in a dream I received the words "Wagner Group". This is a huge Russian mercenary company that is fighting against Ukraine, their logo is very demonic. Also this morning in dreams I saw \$6,700 BTC, and \$12 BTC3S. No timing was shown, please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram "Hi brothers and sisters, this morning 8/4/22 in a dream that I knew was talking about Putin, I received the words, "He is attacking the body of Christ". I believe this was from the Lord and is very true. I have already posted about the Bucha massacre and the horrible abuse of civilians by the Russian army in their unjustified invasion of Ukraine. Ukraine has between a 71 to 87.4% Christian population (depending on the poll), and many civilians have died and many have been killed and abused in war crimes by the Russian army. Many more have been displaced and suffer due to the invasion. Many of these people are Christians who believe in Jesus Christ, our brothers and sisters in the body of Christ. The Bible says, 1 Corinthians 12:26 "And if one member suffers, all the members suffer with it; or if one member is honoured, all the members rejoice with it." Putin is not only attacking the body of Christ physically by war, but spiritually in his propaganda which has infiltrated many English speaking Christians. Due to being deceived they have fallen for lies in thinking Putin is righteous, is doing God's will, and has a just cause in his invasion, they have been deceived into supporting an evil communist dictator and parroting his deception and state propaganda. I have seen many examples of Christians succumbing to this deception. What will these people do when Russia and Iran attack Israel as God showed me will happen? Will they still side with Russia? This spiritual attack leads these people into a cold and heartless spiritual state where they justify the mass killing of Ukrainians (of whom many are Christians) due to various false justifications such as eliminating Nazism, Russia was defending itself, biolabs, finding evidence of USA election fraud, that he's stopping the New World Order, and other

deceptions. Please pray for our brothers and sisters in Christ across the world and especially for those in Ukraine, as well as pray for those Christians who have fallen victim to Satan's deception through the communist dictator Putin, that they may repent and receive the truth and that Jesus Christ may help them. God bless you. Christopher."

As posted on Telegram, "After prayer regarding "7th April" I received a few things this morning 9/4/22 in dreams. I received "Vessels restricted" and something to do with Turkey. Also I received "Weapons Shipments", and also received "Economic Collapse". These were all from separate dreams. Now BTC did decline some but it was not the crash yet. In terms of weapons shipments, the UK announced £100 million, Australia \$26 million, NATO including US agreed to supply heavy weapons to Ukraine, US said they would send more weapons, US released list of weapons already sent, so there was a lot in terms of arming Ukraine, which would have a big consequence in the war. In terms of economic collapse, which could be regarding Russia, we saw EU approved new sanctions on Russia including banning coal, as well as the US and UK approved new sanctions. The USA I believe the day prior blocked Russia's access from using their frozen foreign reserves in US banks from servicing their foreign debt, heightening their risk of default. This is a big deal. In a rare move the UN voted to remove Russia from the UN human rights council. Also there was the missile attack on the Kramatorsk train station killing at least 52 civilians. There was a lot that happened on this day, more than usually occurs on any day in particular, and the time surrounding it (timeframe differences between AUS and US). Numerous of these could have far reaching implications for the war and the economy. While it was not the flash crash yet (I wasn't told it would be), we must continue to be patient waiting on the Lord Jesus Christ to bring this according to His will. In my dream I shared earlier on YouTube where I saw the Christians who lost their jobs due to vaccine persecution, I was shown Christians praying on their knees, myself included, asking God to bring the wealth transfer and there to be no delay, so I encourage you to pray also. Lastly I will share a dream I had yesterday 8/4/22 I saw high profile Russians like sportspeople or Olympians rebelling against their government, some Russian police tried to arrest them and got punched in the face and the rebelling Russians escaped. I expect we may see some high profile acts of disobedience in Russia. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, this morning 13/4/22 I had a dream where BTC was at \$19,500. I saw there was a major decline. I was happy it had gone down and saw some discussion online about it. That was the dream, it felt significant, I prayed about it and I believe it's from the Lord. Later I had a brief dream of BTC3S but with no clear details. I take that as a further confirmation for BTC3S. Also a few days ago on 10/4/22 I received the words "Evergrande big shares news". I don't know what that means, their stocks are currently suspended on the HK stock exchange, but is actively traded in the US. I also received "Farm shortages". God bless you. Christopher."

As posted on Telegram "Hi brothers and sisters, this morning 14/2/22 in a dream I heard "Inflation report after May over 10%". This is showing a continued increase in inflation. I also had a dream where I heard "More than half of Russia's soldiers cut down". I believe this is speaking of coming major losses to the Russian army. Earlier in a dream I didn't share yet, on 3/3/22 I received "Soviet leader overthrown". I believe this in relation to Putin, and goes with the cracking steel pot dream I shared earlier. I did see this morning in dreams some BTC prices also, one of 48k, another of 45.7k, and a BTC3S price of \$0.70 (current price is \$0.83). I prayed about the figures but didn't receive guidance on direction so I don't know how they fit. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram 17/4/22 "Hi brothers and sisters, I have a few short dreams to share. On 15/4/22 I received in a dream, "Russia has an enemy - self". I believe this could be about internal conflict in Russia, or Russia taking actions that will harm themselves. Today 17/4/22 in a dream I received, "Russia will cause an outpour with westerners". An outpour is the act of pouring out, and could be an outpour of outrage, grief, emotion, support, or physical things I am not sure. It seems to indicate Russia will do something that will bring a very strong reaction from westerners. I also had a dream where I knew the USA was at war and I wanted to support the war effort, as it felt like a righteous cause. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I want to share a few short dreams. On 19/4/22 I saw in a dream an ETN price of \$0.0029 (we are currently at \$0.0054). I also heard in a dream, "Zelensky - How to lead a country during war". I believe this was from the Lord, and based on his demonstrated actions he represents a good example of a leader defending their country from invasion. I also believe Ukraine should be supported in repelling the wicked Russian invasion. Today 20/4/22 in a significant dream I received that chemical weapons will be used. I believe this would be a major escalation, and could be the "Russia Escalates" I received in a dream and posted on 15/3/22 (though Russia committed many war crimes and atrocities since that date). God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams I want to share with you. On 21/4/22 I saw in a dream BTC at 37k area. On 22/4/22 I saw in a dream a battle map of Ukraine, like the ones they publish to show the areas of fighting or occupied territory. I saw on the map Kyiv was under attack again and forces were down from the northern border coloured red around the city. Based on this I expect in the future a new Russian attempt at taking Kyiv. Also in a dream I saw \$17.9k BTC. Today 23/4/22 I saw in a dream the BTC price widget on my computer show \$2,300 BTC. I also had a dream today where I was checking the BTC chart on my phone as usual. I saw that all of a sudden a huge red candle started forming and I was looking at it with suspense. As this was happening some epic type instrumental music started playing, as the red candle did not stop and kept on plummeting and crashing down and down, and went all the way down to zero in what appeared to be a single candle (I have been viewing the chart on the daily). It was very intense. I was shocked watching it happening thinking, "This is it!" I thought it was real then woke up from the dream. I've said it many times already but make sure you have your low limit BTC buy orders in place. I am expecting this could happen anytime. I am still expecting "April Crash", though I don't know if it's the flash crash or a regular crash. God bless you. Christopher."

As posted on Telegram 8/5/22 "Hi brothers and sisters, I have a few dreams to share. On 1/5/22 I saw BTC at the 32k to 30k area. I was waiting for confirmation about that, and today 8/5/22 I saw in a dream BTC at 31k. I also saw BTC3S was at \$2.28 but I wasn't sure of the BTC price at that time. On 26/4/22 I had a dream of the flash crash it went to near zero and then went to \$15 and stayed there for a while in the dream. I heard a voice say, "This is to give the poor another chance to buy BTC", and the dream ended. I believe this indicates that if for some reason your low orders don't hit or they weren't in place, BTC will stay low for a short time to give you another opportunity to buy low, so consider this. Also just to let you know I got married a few days ago to my beautiful wife, thank God and praise the Lord. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have a few dreams to share. Today 12/5/22 in a dream I saw the BTC price at \$21,348. Yesterday in a dream I saw BTC3S at \$2.55. I had

a dream today of seeing a stablecoin go back to \$1. I was wondering if this was TUSD but now I'm thinking it is USDT, as it depegged recently and hit a low so far of \$0.94, and I believe the Lord may have given me the dream to reassure me about USDT that it will return to \$1. Also ETN has hit the buy range I was shown of \$0.003 and \$0.004. That said I am personally planning to buy after the flash crash. We have had a major crash, and have continually declined since April, where before I shared about "April Crash", and at the start of April BTC was at 47.5k and BTC3S was \$0.60 (almost 300% increase so far). We are now at 28k BTC (down almost 20k) and I expect more decline, lower ETN, and looking and waiting for the BTC flash crash. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters. This morning 13/5/22 I had a dream of seeing Luna at \$0.5. I wasn't sure about the dream I didn't get good confirmation, but I wanted to share with you. Right now Luna is very cheap and trades on Kucoin at \$0.000014. I had the dream about a stablecoin returning to \$1 but I didn't know for sure which one it was. If there is any return of confidence in UST, Luna may also rise. I'm sharing this as an unconfirmed opportunity. If you decide to put any money in please only what you are prepared to lose, as I'm not sure if my dream was from the Lord and I didn't want to wait for confirmation possibly over the next few days before I posted. I did put some in Luna just in case the dream was from the Lord, it was a small risk and an amount I'm prepared to lose. Please seek the Lord. God bless. Christopher."

As posted on Telegram, "Greetings brothers and sisters, I have some dreams to share with you. This morning 14/5/22 I was praying earnestly regarding the Luna dream I shared yesterday and about the coin in general. Early in the night I received a dream of seeing Luna at \$0.004, and also \$0.40. I take this as a confirmation of the \$0.50 dream I had. Now I don't know how long that would take or what would be involved in reaching \$0.40/\$0.50. I prayed more and received nothing negative about it the whole night and before I woke up I had a dream where I heard a news article being read saying something like "Those who bought Luna at its lows become the new crypto millionaires and wealth holders". I prayed after this repeatedly and only got peace with no indications it was from the enemy. Therefore I share this as what I believe is a dream from the Lord. You can seek Him for confirmation also. As an interesting point, though Luna's coin supply became inflated, it is now at 6.5 trillion on coin market cap, whereas Shiba Inu is at 549 trillion (84x more Shib coins in circulation than Luna). If we take the current Shib price at \$0.000013 and multiply this by 84x this would be \$0.00109 Luna price for it to be priced according to how Shib is now priced (based on their supply of coins). With a current Luna price of \$0.000074, I believe this may be undervalued and represent a good buying opportunity. When I first shared Luna was at \$0.000014. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters, I have some good dreams to share that I received from the Lord this morning 15/5/22. I was praying about Luna and also about the coming BTC flash crash. First, in a vision I saw a coin bouncing downhill toward a large sewer gutter and the impression was that it was going to fall in. This is a warning about a coming bouncing decline with a sudden vertical drop (the gutter). I prayed about this further as I was worried about Luna declining if BTC goes down. I prayed about what would Luna reach before the crash. After this I saw in a dream Luna with two zeroes, which is \$0.00XX. I believe this means Luna will reach two zeroes before the crash. I had a dream a bit later where I saw what was like a news report, and BTC had declined to 19k and further to 10k and lower, different companies flashed on the screen with huge negatives to their stock price and I knew this was a huge crash both for crypto and the stock market. After this dream I sought

the Lord worried about making sure to get out in time. I had a dream of seeing BTC at 38k. I have seen this also a few days ago, I am not sure if we head there before the crash or not. Then I saw in a dream Luna at \$0.0017 or so, and thought it had got there quick. I prayed more asking again about a safe sell price and had a dream of \$0.004 Luna. I also saw \$0.4 in another dream. These are the same figures given in my last post by the Lord. So I plan on exiting at \$0.004 partially. I also saw in a dream on my computer screen the price widget for Luna was \$118. I was surprised by that and wasn't sure about it but saw in a later dream \$124 or so Luna as well. I don't know what kind of circumstances are involved to reach such a price, maybe severe inflation, many years, I don't know. But Luna is definitely one of my prophetic coins. I suggest you set some low orders for it also when BTC flash crashes we might be able to pick up very low Luna again. This is what I wanted to share with you. I'm thankful to the Lord for showing me these things, and for giving me the dreams so I could share, and from when I first shared here on Telegram Luna is already up 26x. An amazing surprise by the Lord. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I want to share a few dreams with you. This morning 17/5/22 I saw in a dream \$0.0000073 Luna. That's very low and would be a major drop from here. I got no timing associated with it so I don't know when it will be reached. I also saw in dreams \$0.007 and \$0.10 Luna. The vision I shared on 15/5/22 of a coin bouncing downhill and heading towards a sewer gutter is quite bearish. It could have been Luna, and represented by this image below in the comments, and possibly fulfilled already. As I shared earlier, I prayed and asked what a safe sell price Luna would reach before BTC crashes and saw in a dream \$0.004. What is possible is that Luna declines on its own, before BTC crashes, then goes up again and hits \$0.004 before the BTC crash. This is a possibility as Luna has declined significantly from its recent high of \$0.00046 and currently is at \$0.000175. Now I hope we don't go down to \$0.0000073 now, and that is later, possibly reached when BTC crashes, but I am sharing this as a possibility, as I don't know the exact timing and sequence. It doesn't really change my approach just that if it does go down that far I'll try to buy more. I also had a dream of seeing BTC crash and then I saw written steps which said BTC to 22k then to 8k/10k then to \$1-2. I knew this was the flash crash. The \$1-2 had a yellow background highlighting it. It felt again that the flash crash was close. I believe at least \$0.004 Luna will be reached before the BTC flash crash. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share. This morning 19/5/22 after praying about the new Luna coin that is being planned to be forked from the current Luna, I received "Zero". I prayed again about the same thing and received, "Worthless". Later in dreams I saw \$0.00041 Luna. I also heard in a dream, "Race to the bottom". After this in a dream I saw a chart of Luna that looked like this (see comment section). Later I saw \$3 Luna, and also \$0.12 Luna very clearly. There is a lot of uncertainty and fear regarding Luna due to the proposed new fork. I believe we are in the right Luna and what I have been shown will come to pass. If Luna heads down very low like the price I saw \$0.0000073, then I suggest you could take the opportunity to buy again. This could be a second chance at the lows based on the word I shared earlier, "Those who bought Luna at its lows become the new crypto millionaires and wealth holders". I don't know if that low price is reached soon, or after the \$0.004 Luna target and when BTC crashes. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters, praise the Lord Jesus He have me some good dreams this morning 20/5/22, and so I can share them with you. In the first dream

I saw UST (Terra Coin) rising from low quickly to \$1. This confirms the previous dream I had of a stablecoin returning to \$1, and confirms it is UST and not USDT (which depegged to \$0.94 but returned to \$1). This also confirms Beverly Trowbridges dream of a stablecoin going from \$1 to 5 or 7 cents then to \$1. I prayed and believe it is from the Lord. With UST regaining its peg, it's likely to have huge price consequences for current Luna, as the new Luna (being forked) is not linked with UST anymore. Later I had a brief dream of seeing \$0.00382 Luna. I also had a dream of seeing the Luna chart and suddenly it dropped to zero, and it seemed to happen very quickly. This is great information. I suggest you could go and set limit buy orders for Luna on Kucoin, from \$0.0000073 and lower towards zero. We could pick up a lot of Luna in the crash, which would be multiplied in the bull run. I don't have a timing on it. It goes with the "Race to the bottom" word I received which may be about Luna and new Luna crashing to zero, which could be when it forks. I'm not sure exactly. I want to also share here a dream I posted on 13/5/22 in the comments but not on the main page about USDT, "Hi everyone, I had a dream this morning also, I saw a scene outside a building I knew represented Tether HQ. I saw a large group of men picking up a huge pallet out of a truck full of cash stacked up and running into the building. My interpretation of this is that Tether (USDT) has a lot of cash to stabilise their coin, so in my view we don't have anything to worry about with them yet. Their price is also back up to \$0.998 from a low of \$0.94." I believe USDT is fine for now, I use it and will update if the Lord warns me about it later. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters in Christ, this morning 21/5/22 I had a dream where I saw an advertisement saying, "Powered by Luna", and with logo/promotion and it seemed like they were successful and influential. I took this as meaning the future of Luna is strong. I also had a dream where I checked my phone and saw that Luna was at \$0.01 (1 cent). I saw my orders had been filled and was surprised it went that high. This is 2.5x the previous safe sell I received of \$0.004. Perhaps it not up at \$0.01 for long. Please seek the Lord regarding your approach. I didn't get timing associated with it aside from it seemingly happened quickly and suddenly. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I was thinking about an important detail from the dream I posted today 21/5/22 of Luna at \$0.01 (1 cent). I was considering it further and realised when I saw my phone in the dream and saw Luna was at \$0.01, I knew my orders filled and checked to see my holdings. I saw there was a lot more than should normally be, based on the Luna I hold right now. Meaning that in the dream I had a lot more Luna than I do now. For this reason I believe the \$0.01 move is after the Luna drop to zero. This would explain how I obtained a lot more Luna, and explain the amount I had after the sell orders filled from my dream. So what I would say is you could set some low buy orders for Luna (from \$0.0000073 and lower), and be prepared to buy for its crash to zero, as I certainly will be. This dream also shows I will be successful in obtaining a lot more Luna (my low orders are already in place). When people panic and sell to zero remember it's your opportunity from the Lord, who is giving us another chance at the bottom. Then we are looking at a move to 1 cent after this I believe. I don't know if we will have an upward move before the Luna crash to zero. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters, I have some dreams to share. Yesterday 23/5/22 I had a vision of seeing a large move up in Luna where it seemed to plateau before going down some. When it began it looked similar to the current chart but I can't be sure. I also had a dream people will buy Luna before the fork, so they can receive the airdrop of the new Luna. I expect a rise before the 27th snapshot for the fork. Today 24/5/22 I

saw in a dream \$0.00036 or \$0.00039 Luna, which is about 2x from current price, I've seen that area before. I also had a dream of seeing Luna rise past \$0.004 and up to \$0.01 and kept going to \$0.02 and the dream ended. I also saw a new low price for Luna of \$0.0000016. This would be a great entry price and lower than the previous one I saw of \$0.0000073. Now we are heading to the fork on the 27th, and I expect based on my dream the price to rise. I don't know if we will hit \$0.004 or if it will rise a smaller amount. At some point the crash to zero is coming, and at some point the rise to 2 cents is coming. I prayed to the Lord which comes first \$0.004 or the crash but did not receive an answer, so I believe we need to individually seek the Lord and ask for His guidance. He won't tell me everything otherwise nobody would need to seek the Lord themselves about it. For me I am holding Luna and have low limit buy orders. My only certain exit is \$0.004 and above, so I'm not sure if I'll do anything if we don't reach this price. I don't know what will cause the crash to zero either. My dreams are small snapshots and need the right interpretation and sequence. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I had a remarkable dream this morning 25/5/22. After praying significantly about it I wanted to share it. In the dream I saw Luna was at 1.5 cents (\$0.015), and I was rushing to sell, it looks like it wasn't the top as there was a green wick above this suggesting it went even higher. Then I saw in the dream a chart that looked like this (see the image in the comments below), showing a huge apparent vertical rise to at least 1.5 cents followed by a huge drop to zero, then a recovery, a more gradual big bull run back to at least 1.5 cents. Praise Jesus this is amazing information. The multiplication potential is huge. This indicates the crash to zero is after a major rise. This would mean my previous dream of having a lot of Luna and seeing a rise to 1 cent was after the crash. It still fits as we will see 1 cent before and after the crash to zero. God bless you and please seek Jesus. We could be close to some major financial deliverance. Christopher."

As posted on Telegram, "Hi my brothers and sisters, I have some dreams to share with you. On 26/5/22 I saw \$0.12 Luna again, and \$0.0007. I didn't see sequence or timing. On 27/5/22 I saw 3.X cent Luna so \$0.03X. I didn't see what figure the X was, so Luna in the 3 cent range. Today 28/5/22 I heard the words, "Luna under attack". I prayed and asked if it was old Luna or new Luna and received old (so LUNC). I prayed about the type of attack but didn't get a clear answer. So I expect some type of attack on LUNC, maybe it's a FUD attack (fear, uncertainty, doubt), or something more. As new Luna is launching there might be some interested in making the first look bad. Anyway I expect this to be temporary, and could be a decline in price though I didn't see that. Also today I had a significant dream. After I prayed numerous times to the Lord and tested the dream and I believe it's from God. I saw a huge BTC bull move to at least 60k, then the scene changed and I saw it at 60k and went short and it then crashed severely to 22k and it kept going to 6k. I was shown about going long and going short (using BTC3S and BTC3L). So I believe the market will soon turn bull and make a triple top before crashing hard. When it crashes hard from 22k down to 6k, that is likely the crash to zero occurs there, though I didn't see it in my dream. I have had previous dreams of the crash to zero occurring from around the 60k area. I had received a lot about going short back when BTC3S was at \$0.60, and we are at \$1.7, and down to 28k BTC, so I believe we are about to go bull again. Here's a dream I posted on 9/1/22 "I had a dream of BTC was at 61k then it crashed very fast, under \$100 it went under \$50 and rebounded up..." This is a confirmation. On 10/11/21 I posted "Last night in dreams I saw the price of BTC in digits moving. The first part was a bit vague but I saw something like 60k to 50k. Then the price went back up above 60k, then it changed from 60k to 16k instantly." Also on 12/11/21 I posted "I checked my phone and saw BTC at \$70,000. My view changed and I just saw the

digits \$70,000 increasing to \$75,000 which stood out to me. The price hovered there in the dream, then I'm not sure if it went higher, but next thing I saw the price in digits rapidly decrease and suddenly it was at \$10,000. It hovered there and then quickly changed to zero..." Also, "5/12/21 I had a dream where I checked my phone and BTC was at 36k. I then saw the price at 67k and suddenly dropping to zero." Now the last high in BTC was about 69k. I expect a quick move up to that area. During this time we may see some good movement in LUNC. Then it's a major crash to 6k at least, likely to zero. I'm still always keeping some low BTC orders encase. Please seek the Lord Jesus Christ. God bless you. Christopher." As posted on Telegram, "I forgot to mention but today 28/5/22 I also had a dream of numerous attempts to pass a governance vote, seeing the image of voting on the Terra governance website. My impression of this from the dream is that numerous attempts to revive LUNC will be made, before possibly being successful. The issue now to get a burn tax proposal introduced most of those who hold the voting power were in favour of Luna 2.0. So maybe after the new Luna launch we can get some focus back on LUNC to revive it and make some good changes. I also saw in a dream buying more LUNC. I'm buying what I can and holding for major move. I think the chart I saw for LUNC might be a big overall chart, and the move to 1.5 cents and above could coincide with BTC to 60k then the drop to zero can be when BTC drops to zero, followed by a slower rising recovery. These are my thoughts at present. Please seek the Lord. God bless you. Christopher."

As posted on Telegram 28/5/22, "Hi brothers and sisters, I have an important dream to share I received on 21/5/22. In the dream I was in a room with my brother and others and was proclaiming to them with confidence something similar to these words, "Ripple will lose their case, this will trigger the BTC flash crash to zero, but it will be overturned and it will be fine again." I believe me telling my brother and others this in the dream is for me to share with my brothers and sisters in Christ. Currently the USA SEC (Securities and Exchange Commission) is suing Ripple (XRP) alleging their crypto is a security as opposed to a virtual currency, and has breached fundraising laws etc. Here is a quote from CNBC of Ripple CEO about the significance of the case, "Garlinghouse said there's a lot at stake if his company does not win the lawsuit. "This case is important, not just for Ripple; it's important for the entire crypto industry in the United States," he said. "It would really be negative for crypto in the United States." If Ripple loses, most tokens trading on platforms in the U.S. would be deemed securities, Garlinghouse said, meaning those platforms would have to register with the SEC as broker dealers. "That's cost, that's friction." "If you determine XRP as a security of Ripple, we have to know every person that owns XRP," he said. "That's an SEC requirement. You have to know all of your shareholders. It's not possible." So it looks like Ripple losing to the SEC would be huge bad news for crypto, leading to a major crash even BTC to zero. The dream indicates the decision against Ripple will be overturned and it will be fine again, likely leading to the next bull run after the crash. I was shown to get in XRP after the BTC flash crash, converting BTC to XRP (and other alts) when BTC is at 10k after it recovers from zero (as posted on 18.3.22). Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share this morning 29/5/22. I saw another couple of low prices for LUNC of \$0.000032 and \$0.000014. I don't know when they will be hit. I had a dream of seeing a chart and I knew it was the bull run I posted about yesterday. The price was at \$74,000 BTC and it looked like it was dropping down. I saw the price of DOGE was \$0.34 (currently \$0.08). Then as BTC was dropping some I heard the words, "Short Coin", which is a reference to BTC3S on Kucoin. That was the dream. I believe this is another confirmation of the soon coming bull run. The Lord has given us targets and to short using the short coin from those levels. It looks like DOGE went 4x and maybe other coins will also. I am mindful ETN hit my buy ranges from dreams. I saw

yesterday in a dream buying more LUNC so that's what I have been doing, as well as long coin (BTC3L), ready for the bull run. I am hopeful LUNC will hit our targets on the bull run. So I am positioned for this and waiting for it. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi everyone, this morning 30/5/22 in a dream I heard, "It will hit 4.9 cents on the exchanges". I knew it was about LUNC. I prayed about this and believe it was from the Lord. I do not know if this target will be hit on this coming LUNC run we are expecting. You could set aside a portion of your LUNC encase it runs higher than expected. So far from dreams I have 1.5 cents as a minimum sell target as it went higher than that and was coming down. I also saw 3.X (3 point something cent price), so within the 3 cent range. This last dream is 4.9 cents so please seek the Lord and do as He leads you. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share I received today 1/6/2022. Previously I had been asking the Lord whether ETN (Electroneum) will run on this coming bull run. In a dream today I saw ETN was trading on Binance and saw its price as people were trading and I heard someone say, "Wow it crashed so much!" It was trading between 3 and 4 cents (\$0.03 to \$0.04). That was the dream. The current price of ETN is \$0.0038, which is still under the buy price the Lord gave me a long while back of \$0.004. Now for ETN to crash so much, yet still be trading at 3 or 4 cents (10x current price), it must mean it rose much greater before it crashed. Also ETN does not yet trade on Binance. From older dreams I saw 30 cents to \$0.005, I saw 50 cent targets, I saw a big move to \$1. So I'd say 50 cents (131x from current price) and above is likely, and at least 30 cents (78x). Now I'm not certain it will happen on this bull run, it could be later after BTC to zero, but I bought some ETN also. Based on the targets LUNC has similar upside potential (from current price \$0.000114 to 1.5 cents is 131x), though this increases if LUNC runs into the 3 or 4 cent range. I am mostly in Luna Classic (LUNC), some BTC3L and ETN. Also I posted this dream in the comments section, it's a previous dream about LUNC at 4.9 cents if you haven't seen it <https://t.me/c/1749237879/4266>. Please seek the Lord Jesus Christ and do as He leads you. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share with you I received today 4/6/22. I saw a LUNC chart moving up slowly diagonally and it kept inching up, then all of a sudden it exploded upward vertically off the chart screen. The screen then panned upwards to see it rocketing upwards vertically. I thought I saw 4 cents. Then I heard a voice say "Above 50 cents". Then the dream ended. To 50 cents it would be an astonishing increase from current levels (5,370x). I do not know the timing, whether this move is before or after the crash to zero. Now I was thinking and realised I had seen prices in this range before. The very first post I made about Luna on 13/5/22 was seeing it at \$0.50. The next day on 14/5/22 I saw in a dream \$0.004 and \$0.40. The day after 15/5/22 after I prayed for a safe sell I saw \$0.004 and after I saw \$0.40. It could be the move above 50 cents is later on, but I don't know, and I wanted to share this with you. Later this morning I had a dream where I saw BTC moving up quickly to 38k and I saw LUNC around \$0.00017. I was wondering whether we were going to continue bull from 38k. A woman was there asking me what this was about, and I told her urgently, "If you want to make a bunch of money go buy Luna Classic now". That was the dream. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, this morning 5/6/22 I had a dream where I saw the LUNC chart. I saw the price crashed down severely and hit both lower targets \$0.000032 and \$0.000014 before rebounding. Then I saw BTC was at 25k. It felt like I didn't expect it in the dream. That was the dream. I was unsure when those low LUNC targets would be hit. Previously I was unsure when exactly we would begin the bull run the Lord showed me. I believe we have more to drop and the Lord showed me this. It's still possible the price could rise some before dropping, like the 38k dream but I don't know. I am expecting 25k BTC and the low LUNC prices to be hit before the bull run. Please seek the Lord Jesus Christ. At this stage I sold partially and set low limit buy orders for LUNC. Please pray and do as the Lord leads you. I will seek the Lord more about when we will drop but wanted to tell you soon after receiving the dream. God bless you. Christopher."

As posted to Telegram, "Hi brothers and sisters, I have more to share that I received today 5/6/22 after I posted the first dream. I was asking the Lord if we would go up before the drop He showed me. In a dream I saw the prices moving up somewhat in LUNC then it ended. Later I had a dream where I checked my phone and saw BTC was at 16-17k. I was surprised it went that low. I saw BTC3S had gone up (didn't see the figure), and saw my low LUNC order at \$0.000014 hadn't fully filled, and I was wondering why. Now I can understand things are getting more difficult to understand the correct sequence and timing. When I was shown about the coming bull run, I was not shown it would start immediately. I posted in the comments here <https://t.me/c/1749237879/4940?thread=4921>

how I saw a bull with a rope tied to its leg and attached to a boulder, making me think the Lord is holding back the bull market for now. I believe this is so we can acquire more LUNC at cheap prices before it takes off for real. Now my thoughts on what is going to happen, is that we could move up somewhat, but it's likely not the bull run I was shown yet, and we will have further downside to 25k, possibly even 16-17k in a spike. When I saw 25k the prices had already been recovering so that fits. I think at this point we all need to seek the Lord and do as He leads us. I don't have all the answers and the Lord is making parts a mystery for various reasons. I believe the lower prices for LUNC of \$0.000032 and \$0.000014 will be hit on this down move, and these will come before the major bull run. The extra low prices I saw of \$0.0000073 and \$0.0000016 are likely for the crash to zero and not now. Though we are possibly getting lower in BTC soon, I don't believe it's the flash crash yet, as we need to bull run first and I was shown the SEC/Ripple decision will be a trigger. That said I keep a little in BTC low orders always. For now I'm still mostly in LUNC as well as positioned for a drop, but my positions are subject to change. I think these things will take some time to unfold and importantly we will have an opportunity to keep adding LUNC at low prices. Again please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi everyone, a few short dreams this morning 6/6/22 I saw \$7.80 short coin (BTC3S on Kucoin). I believe this could be near the 16-17k BTC I saw, as I have previous dreams of \$6 or \$7 at 20k area BTC. I also saw in a dream \$1 short coin (currently \$1.32), which would be a rise in BTC. I saw my LUNC holdings down about 35% in value (I think that would occur after the upside). I believe we could have some upside before the crash lower. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share today 8/6/22. First in a dream I received a word from the Lord, it was about LUNC, something like, "I will make it rise greatly from near death once again". I felt like He was talking about it going low then making it rise dramatically. I was praying about the crypto market for confirmation of what I have seen previously about a decline, and afterwards in a dream I saw "-49%". In another dream right after I saw "-50 to -65%". From current prices this would be a BTC drop

to around 10 to 15k BTC. I believe we are about to see a big decline in the market. LUNC will decline significantly and maybe even towards my extra low targets of \$0.0000073 and \$0.0000016, I'm not sure, (higher targets are \$0.000032 and \$0.000014). This is going to be a huge opportunity to load up on LUNC again. Like when I first posted about LUNC it was very cheap, now we are going back there again. Then the Lord will raise it greatly for us. I don't know if we will have some rise before the drop, please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, after earnestly seeking the Lord regarding LUNC and the latest burn proposal set to pass soon, I had a dream this morning 9/6/22. In the dream I saw the vote passed and as it did the price of LUNC shot up to \$0.00017 (3x current price). As I saw the chart I said, "It passed". That's all I saw. Please seek the Lord Jesus Christ, and praise Him for answering our prayers on this matter. God bless you. Christopher."

As posted on Telegram, "Hi everyone in a dream this morning 9/6/22 I saw LUNC move up on the chart off the screen then, it came back down and the chart scrolled down (not sure how much time had passed), and went SUPER LOW down into 5 zeros or even 6. It was something like \$0.0000055 or \$0.00000055. That looks like the LUNC crash to zero to me. It is possible we are at the at least 1.5 cent move based off this photo. I'm not certain. Timing and sequence are difficult to discern as new information is revealed. I was praying how high this move would go, I saw a figure \$0.00089. I also heard the words, "Pump and dump". This means a big rise with a huge sell off. I don't know where this move tops out, but if it's the same as the dream it's going to near zero after, so cash out strategically so you have some funds available to buy the extreme bottom coming. Please seek the Lord Jesus. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, in a vision this morning 14/6/22 I saw the GitHub website where they are working on the coding and proposal for the 1.2% LUNC tax. I saw at the bottom of the comments one from the person who proposed the idea which was passed. I saw his comment say, "VERY SOON!!!!!" That was the vision. I believe this is encouragement from the Lord. Soon the 1.2% burn will be implemented, and likely exchanges will begin to adopt it, beginning the rapid reduction of the LUNC supply. We also have the transaction burn passing officially in approx. 32 hours. A combination of these factors is likely to lead to the major spike we are expecting. I don't know exactly when it will come, there could be more downside, so please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have some dreams to share that I received this morning 17/6/22. I heard in a dream something like, "Kucoin will be the first to implement the burn tax." This is for LUNC. I'm not exactly sure if it will be the first or one of the first. This would likely result in a huge price rise for LUNC as based on Kucoin's current daily volume (which would increase) of \$6.4M this would be around 1.2 billion LUNC burned per day. The word also implies other exchanges will follow Kucoin. After the dream I saw \$1.45 LUNC. I also saw BTC rising and it was at around mid 23k. I have an earlier price I shared of 28k so perhaps in the dream it was heading there. I believe there is a lot of potential for good news for LUNC soon. Developers are working on the coding, many people are reaching out and pressuring the exchanges. At some point we are going to see a huge breakthrough. I also had a dream I hadn't shared yet on 12/6/22, I saw LUNC rise over 12 cents (\$0.12) though I didn't see how high. In the dream I sold part of my holdings, then half, and when I checked the price it was back at 1-2 cents (\$0.01-\$0.02). That was the dream. I

am focused on LUNC waiting for the good burn news, and if it goes down I'll try to buy more. Please seek the Lord Jesus Christ on your approach. God bless you. Christopher." As posted on Telegram, "Hi everyone I had a dream today 19/6/22 I was in an elevator trying to go down and pressing the button to go down, but instead it went up on its own to the 27th or 28th floor. It could be BTC moving up to 28k as I've seen that price range recently. Please seek the Lord Jesus. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have two dreams to share today 19/6/22. One I shared in the comments already, where I was in an elevator trying to go down and pressing the button to go down, but instead it went up on its own to the 27th or 28th floor. It could be BTC moving up to 28k as I've seen that price range recently. I don't know exactly when this move could take place. The second dream was from my wife I believe may relate to the crypto market. In the dream she was in a commercial jet taking off and it didn't make it far up before it banked hard, rolled upside down and plummeted straight for the ground, and the dream ended. I believe this dream shows a very serious crash coming soon, and may show that after a rise which doesn't get too far (possibly to 28k or so but I'm not sure how far), BTC will crash very hard. As we personally are still focused on LUNC it's likely after the market turns over our LUNC position will perform very badly. I still have the unfulfilled crash dreams down to BTC 10-15k at least with low LUNC prices below \$0.000014. As LUNC didn't drop much during this decline (only to \$0.000051), so what I saw must still be coming. I believe this dream is a warning of a more severe crash coming. Please seek the Lord Jesus Christ regarding your approach. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, this morning 20/6/22 in dreams and visions I saw a lot of prices. They do not have an order or sequence so be careful regarding interpretation and timing. I saw 25k BTC, 28k BTC, 35k on my laptop price widget. I saw 46.8k BTC (I saw 41k a few days ago). I saw 63k and 93k BTC. I saw \$14,800 BTC, and I saw \$0.000045 LUNC. Aside from the 14.8k and the \$0.000045 the rest of the prices are higher than we are now at 20k. I believe the uprise I saw in the elevator dream is at least to 28k, but I don't know where the top of the move is and how far it goes. I believe from the plane dream it only gets so far before it crashes, though this might relate to LUNC specifically, but I don't know where that will get to. It could be that BTC runs higher than 28k. There is the possibility the bull run I saw to 75k begins soon as we did decline to 17.5k so far, but we have some downside targets that have not been hit such as 10-15k and low LUNC. I am hesitant to share when it makes the picture less clear, but also do not want to withhold what might be important information and I think we all need to seek the Lord regarding this. So far I believe BTC will rise up to 28k. It's possible we decline and make 14.8k first and \$0.000045 LUNC, but if not that could be later. So a rise of BTC to at least 28k, but I don't know how far it will go. Perhaps the Lord will bring more insight soon. Aside from the moves of BTC, I am focused on LUNC and waiting for its dramatic rise, and hoping for the burn proposal to be implemented very soon. With respect to BTC as it's been correlated with the stock market we should pay attention to 13 July for the next inflation data and 26-27 July where the FED will make the next rate rise decision. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I have some dreams to share received today 21/6/22. In a dream I saw a Kucoin post on twitter announcing the burn tax on LUNC. I didn't see the specifics of what it said, though I knew that's what it was about. The Lord keeps showing about the burn tax for LUNC coming soon and I believe this will be the mechanism for the great rise in price. Later in a dream I saw a BTC chart that looked like this (see

comments). I drew two versions as I'm not sure exactly which it was. It looked like it went sideways for a while, possibly a sharp dip in price (or not), then it reared up decently high then went down more steeply a long way. I went back to sleep and later had a dream of seeing the same chart zoomed in and someone was doing a technical analysis on it, showing what seemed to be a period of several months overall, I saw the price moving sideways, rising and topping, then falling fairly steeply a long way and they said, "Basically, to zero", though I didn't see the price hit zero before the dream ended. Now I believe this could be the bull run to 75k we have been waiting for, before the crash to zero. Here are the previous posts on it, <https://t.me/c/1620388801/59> and <https://t.me/c/1620388801/61>. What I expect now on a bigger scale is some sideways movement and possibly a temporary sharp dip but I wasn't sure as I didn't remember that well, then a rise up for a bull run, which then turns over and heads down fairly sharply all the way down to zero. This was an overall perspective which may take some time to unfold. During this time I believe we may see the LUNC burn implemented and the LUNC rise we have been waiting for. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters, I was praying about whether we would indeed see another drop before the BTC bull run. This morning 22/6/22 in a brief dream I saw BTC moving down to 6k. I didn't see from where. I also saw \$0.000037 LUNC. I am thinking now there will be a sharp dip before the bull run to 75k, as I wasn't certain yesterday. I believe some of the low LUNC prices (\$0.000032 and \$0.000014) would be hit on a drop of that magnitude. My current thoughts are we will trade in a range for a while, make at least 28k (based on my elevator dream), and then dip sharply lower before the bull run (in accordance with the plane dream not getting far up before crashing). My drawings I posted yesterday were only approximate and the sharp decline could be to at least 10-15k, maybe 6k, before a quick recovery and bull run to 75k. I'm always keeping some low limit buy orders for BTC encase. Please seek the Lord Jesus Christ. I'll seek the Lord more regarding timing before the drop. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have some dreams to share today 29/6/2022. Today in a dream I saw 9.9 and I knew it was for LUNC. This confirms a previous dream I did not share received on 20/6/22. In that dream I saw a large single red candle with a big wick on top and I saw the number 10 and I knew it was about LUNC. I believe this is likely 10 cents, and the red candle and the wick are showing it won't be there for too long. This confirms the price today I saw of 9.9, which I believe is likely 9.9 cents. I am still holding LUNC looking for the higher targets the Lord showed me. We are pumping and almost at the \$0.00017 price I saw in a dream after the burn vote passed. We still haven't had the burn tax implemented, and when we do and when a big exchange adopts it, I believe LUNC will really sky rocket. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "I saw in a dream today 1/7/22 USTC (Terra Coin) hitting \$2. As this coin's link with LUNC is no longer active, it's not technically a stablecoin and can be more than \$1. I also saw a chart which looked like after a dip LUNC was soon retesting its recent highs of \$0.00015. I don't know if the dip is already over or if there's a bit more to drop. It was basically that not much more downside in LUNC if at all, and will pump again to re-test the recent high. Yesterday 30/6/22 I saw \$39,600 BTC in green and in a separate dream I saw \$0.09 USTC (currently at \$0.041). God bless you. Christopher."

As posted on Telegram, "Hi everyone. I had a short dream today 9/7/22 that SHIB was preparing for a 7x move. It was the feeling it was building for it and was coming soon. Not

sure on timing. Yesterday 8/7/22 I saw in a dream a BTC figure around 40k. In these two pictures we see Do Kwon founder of Luna (Lunc) and Luna 2.0 saying that he is not stopping development on LUNC, or standing in its way. It's up to the new leadership team (Terra Rebels) to get the changes passed with the validators. This is good news that he is making it clear he and TFL (Terra Form Labs) is not holding back LUNC's development. This confirms the new leadership team (Terra Rebels) in time will be able to implement all the proposed changes. God bless. Christopher.”

As posted on Telegram 10/7/22 "Dear brothers and sisters, I have some dreams to share. I am going to link to all the dreams I posted in the latest comment section but did not make a main post for. You can review them at these links if you haven't seen them:

<https://t.me/c/1749237879/8717?thread=8422>, <https://t.me/c/1749237879/9039?thread=8422>,
<https://t.me/c/1749237879/9114?thread=8422>,

<https://t.me/c/1749237879/9316?single&thread=8422>. Today 10/7/22 and on 6/7/22 I saw \$0.0007 LUNC in dreams. I saw this price also on 26/5/22. This is a similar range to a previous price I saw of \$0.00089. Seeing numerous prices around this area may indicate an important price zone, though I'm not sure if it's anything more than that. On a different topic, on 18/6/22 in a dream I received about rice costing \$25 NZD per kg. This is \$22.59 AUD or \$15.49 USD. This is very expensive for 1 kg of rice. A long while back I received from the Lord about a grain shortage. I also shared in my older posts/videos about a dream seeing two small packs of meat in Australia costing more than \$200 AUD (\$137 USD). I believe conditions of severe shortages of food will come and prices will be very high. I recommend when the Lord brings the finances to you, that you make sure you quickly prepare needed long life food and preparation of essential supplies, and make no delay. Even if you have extra money it does not guarantee availability of supply, as things may simply not be available. I believe it is wise to prepare, though even better if you have made some preparations already. I plan to discuss more important information after the Lord brings His financial deliverance. Also note again, I only have this Telegram channel, and my YouTube channel JESUSisLORD and website (linked under my YT videos), I have no other groups or associations. I am not going to PM you to chat, conduct surveys, or ask suspicious questions. You can verify if it's me by my username @ForTheCross. Anything else is a scammer. Beware of scammers impersonating me as they are active. That was what I wanted to share for now. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "In a dream this morning 13/7/22 I saw BTC at \$44,500. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, this morning in a dream 14/7/22 I saw Terra Coin (USTC) crashing hard what seemed very low and I heard what sounded like a radio report saying it was a huge opportunity to buy. I knew it went under 1 cent but didn't see what price it reached. I was trying to buy some as the dream ended. I prayed for confirmation and later received another dream. In this dream I saw USTC crashing again. I saw a chart where it was crashing towards a horizontal line and when it got very close I put in a market buy order. I saw earlier in the chart it had approached the horizontal line and went up off the screen. That was the dream. Here is an image similar to what it looked like (see comment section). It could be that the first touch was the previous low of \$0.00591 and it will go that low again, or it could be two touches very low that haven't happened yet. The horizontal line may represent zero and I don't really know exactly how low it will go. Please seek the Lord regarding that. These dreams are also similar to this severe USTC drop I saw <https://t.me/c/1749237879/9114?thread=8422> and I have previously seen USTC hitting \$2

<https://t.me/c/1749237879/8717?thread=8422> so that is an upper target to consider. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have some dreams to share. On 11/7/22 in a dream I saw an important person from Israel speaking at a conference before USA veterans, the conference was about USA & Israel friendship. The speaker said before the crowd, "Israel is on a collision course, will you help us? Will anyone help us? Or will it be the crash option?" The scene changed and there was a field with hundreds of Muslims who heard the speech and were outraged and hated Israel and wanted to attack them, and they marched off in unison with purpose. That was the dream. On 19/7/22 I heard in a dream, "NATO will attack Iran". I prayed for confirmation. Later that day I saw news reports that a senior adviser to the Iranian government admitted Iran already has the capacity to make a nuclear bomb. This is what Israel has warned about for a long time. I believe this was confirmation. On 22/7/22 in a dream I saw Putin in a room he was picking up the last of a series of these special crates. These crates contained highly valuable weapon deliveries to Russia. I saw Putin smirk as he picked up the last delivery, and knew in the dream that it was within Biden's responsibility and capacity to stop those weapon deliveries, but he chose not to. That was the dream. On 18/7/22 I saw \$46,700 BTC in a dream. Also, 22/7/22 in a dream I saw my price widget for BTC show \$20,000 then it changed and it was \$6,300. I believe this is likely after the rise to 28-46k area, and is showing the tail end of the decline. This dream confirms the sharp drop is to at least 6k, before the bull run to at least 75k, then crash to zero is the sequence I believe. This gives a good possible target for re-entry for the bull run. I'm still waiting patiently for LUNC. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Greetings brothers and sisters, I have made a new YouTube video regarding some dreams and a word and prophecy I received from the Lord Jesus Christ regarding LUNC. He led me to make the video. The dreams I received today 27/7/22. In one dream I saw LUNC move from very low (not sure what price) up past \$0.10 and to \$1.20. In another dream I saw BTC at \$56,000 and LUNC at \$0.40. This could be during the coming bull run. The last dream I spoke a prophecy and word from the Lord. In the dream I was being accused by a person in front of a group. I was answering them and spoke boldly by the Spirit of the Lord, "Buy LUNC to have money to do good works for the Lord. Buy LUNC if you want to escape poverty. Buy LUNC if you want to be delivered financially. Buy LUNC, which is Luna Classic. This is a word and prophecy from the Lord." I spoke this before the group and I believe it was a true word from the Lord and will certainly come to pass. You can watch the video linked below. Please seek the Lord Jesus Christ. God bless you. Christopher."

I want to share that the Lord has shown me LUNC will go over \$100 in the future. The Lord has shown me earlier, and even on 27/7/22 I had a dream LUNC was over \$100. I forgot to mention this dream when I posted my video. I also saw \$118 and \$124 LUNC in dreams on 15/5/22 (it was called Luna at the time). LUNC (Luna Classic) will reach back to its all-time high of over \$100. I have also seen very low unfulfilled prices for LUNC near zero like \$0.0000073. In one dream I saw LUNC went over 1.5 cents (I didn't see how high) and crashed to zero. In other dreams I have seen it go over \$1. You can review all my LUNC dreams on my Telegram. There may be ups and downs and wild moves but I am confident LUNC will reach over \$100 in time as I believe these dreams are from the Lord. I do not know how long it will take. Please seek the Lord Jesus Christ and do as you are led. God bless you. Christopher.

As posted on Telegram, "Hi brothers and sisters this morning 6/8/22 I had a dream and it was abstract and short but it was about LUNC going up very soon. People were excited and there was a feeling of excitement and that it was about to happen. That was the dream. God bless you. Christopher."

As posted on Telegram, "I saw in a dream today 10/8/22, LUNC going down on the chart and even lower than I expected. I saw it was at \$0.000072, but I don't know if it went lower, and it was trading sideways. People were talking in the dream saying that it was going to suddenly take off. Please be aware of the possibility of further downside before the rise we are waiting for. I'm just holding and adding more when I can. God bless you. Christopher." As posted on Telegram, "Dear brothers and sisters, I have some dreams to share. Today 11/8/22 in a dream it was like I was awake looking around my room and I saw two digital number readers on the wall. One was for the BTC price and the other was for LUNC. I saw the BTC price start rising and reach 28k, I saw LUNC was rising too. I looked back and saw BTC continue rising, and saw LUNC and it was at \$0.038 (3.8 cents). I saw BTC hit 51k but I don't know if this was at the same time as LUNC at \$0.038. Then the numbers began to be blurred and I couldn't see what they read after this, and the dream ended. My thoughts on this are these could be the prices we are heading to soon (51k BTC and at least \$0.038 LUNC), and could see the drop to 6k after this, then the run to at least 75k. This move may correlate to the dream I had of LUNC moving above 1.5 cents then to zero (when BTC goes to 6k?) then rising again to 1.5 cents. I have the dream posted on 27/7/22 of seeing BTC at 56k and LUNC at \$0.40 also. I posted this dream <https://t.me/c/1749237879/10985?thread=10238> in the comment section where I saw LUNC at \$0.000072 and it was trading sideways, and people were talking about it suddenly rising. This may come shortly or could be later. I do not know the exact sequence or timing of the dreams. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have a dream I want to share with you received today 13/8/22. In the dream my wife was holding my phone with the LUNC chart on the screen. I was asking her something else and she said, "No, look at the chart!" I looked at the chart and saw LUNC had gone up off the screen. Then I saw a thick green line keep going off the screen of my phone and into the air as the chart continued mid-air, all the way up and I saw it passed a written "10", then topped around what I thought was about 13-15, and went all the way back down below where it started. Here is a rough sketch (see comment section). The colour was green on the way up, I don't remember what colour it was on the way down so I left it green. I sought the Lord for confirmation and received it, and believe this is from the Lord. As I was praying afterward I heard something similar to, "More than what people think". I believe it may actually be an over \$10 move to even \$13-\$15, that was how I felt from the dream. In this earlier dream I posted I saw a big move to "10" <https://t.me/c/1620388801/80>. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Hi brothers and sisters this morning 1/9/22 in a dream I saw a chart and what seemed like this LUNC move and it went up a long way. The dream repeated later with the same message, indicating this move for LUNC will go quite high. I didn't see any figures. Later I had a dream I saw USTC at 8.8 cents (\$0.088). God bless you. Christopher." As posted on Telegram, "Dear brothers and sisters, I have some dreams to share with you. Received today 7/9/2022, in a dream I knew LUNC had risen, I didn't see how far, then I saw a chart showing a long period of steady decline in LUNC back to near \$0.0001. As I was comprehending this in the dream I wondered how high the move was. Then right after I

received 55k BTC. Then I woke up. I believe this shows that the move up with LUNC will correspond with a BTC move up go 55k. This accords directly with this previous dream I posted <https://t.me/c/1620388801/85>, where BTC went to 28k and 51k and LUNC at least \$0.038. I believe today's dream shows 55k BTC will be reached and a long steady decline in LUNC will occur from an unknown high, back to at least \$0.0001. Yesterday in a dream I saw a list of LUNC related information and at the top of the page was clearly "\$0.004" (I couldn't make out the other details). A few days prior I saw \$0.0038 in a dream too. I believe \$0.004 is a significant marker, first described here <https://t.me/c/1620388801/5>. I am considering selling some at this point and holding the rest to higher prices. I may also decide to not sell any and see what LUNC reaches when BTC is around 50k. Please seek the Lord for personal instructions on your approach, and also regarding interpretation and sequence. We have the on-chain LUNC burn scheduled for 20th September, and exchanges should follow with adoption shortly after, so we should see some great developments in the LUNC price. Let us patiently wait on the Lord for the prophetic fulfilment. God bless you. Christopher."

As posted on Telegram 10/9/22 "Dear brothers and sisters. I just woke up from a dream seeing LUNC go bullish on the chart again and it was up at \$0.00071. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have some dreams to share received today 10/9/22. I shared this dream already in the comment section if you haven't seen it (LUNC going bullish again to \$0.00071) <https://t.me/c/1749237879/12449?thread=12255>. Also I later had a short dream of seeing LUNC going vertical on a chart. Then I had another dream of seeing an overall chart of LUNC it had gone up quickly into the cent range seemingly very easily, then to 6 cents (\$0.06). I couldn't tell if it was the top but I saw the move went back down quite far, a big sell off that was severe. But in the dream I was expecting it to return to retest the high. My thoughts on this are that I'm considering exiting part of my position around this area. The decline could be as far what I shared in this previous dream, but I am not sure. <https://t.me/c/1620388801/91>. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I had an important dream I want to share with you received today 23/9/22. This dream is a continuation of this dream I believe <https://t.me/c/1749237879/12919>. In the dream I saw out in the field there was a big brown bear, and it was in the neighbour's property and began to chase after the cows running quickly, but moving toward our property. I yelled at my wife who was outside to get inside but she didn't think it was serious at first. I continued yelling for her to come inside and went over to her, as the bear had now crossed into our property. It moved so fast. The scene changed and we were inside and I was trying to shut the door but the lock was not engaging even though I was slamming it, like something was in the way. I went to try to free up the fabric screen door as the huge bear suddenly walked in front of the door. I quickly shut the main door again with all my effort but the lock didn't engage properly, and knew it wouldn't hold. Then I quickly moved back into our home, my wife in front and told her to get to the back of the room, "This is it, we are going to have to fight for our lives." I gave her a spear and one for myself. I turned around and the bear was in the room walking towards us. It was very intense. I struggled to pop the snapper on the sheath of my spear as the bear was meters away, and was able to get it free. Then the bear continued to walk up towards us and I skewered it through its chest and it froze and backed up some. I was keeping pressure on the spear. When it stopped moving I pulled the spear out and skewered it again through the chest

area and held the pressure again. The bear was not moving but was still on its feet. It was definitely a fatal strike. I knew it would have been losing a huge amount of blood and was about to collapse. Then the dream suddenly ended and I woke up. This was a very intense dream I thought it was real and I was fighting for our lives. As for my interpretation is this. There is going to be a big bear attack. We will prevail, but it will be intense. Earlier in the night in a dream I saw \$0.00008 LUNC. I have a dream from 10/8/22 of seeing a LUNC decline, seeing LUNC at \$0.000072 and seeing it trade sideways and people saying it would suddenly take off <https://t.me/c/1749237879/10985?thread=10238>. Regarding timing I don't know if seeing the bear far off at first it means there will be some time, though it came swiftly in the dream, and I had to fight it. Please seek the Lord Jesus Christ. As for me if we go low I will continue to try to accumulate more LUNC. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I had a dream this morning 27/9/22 that I want to share with you. In the dream I was outside a building sitting on a paved area. Surrounding me were many other LUNC investors also sitting down. We were waiting by the door of the building for an announcement. Inside the building was Kucoin. We were waiting with excited expectation for an announcement. I was expecting one from Kucoin. Unexpectedly Binance came outside and shocked everyone with an announcement that they decided to greatly accelerate the LUNC burn, that they weren't satisfied with the previous burn rate, and their new plan was explained which would have a huge LUNC burn rate. It was massive news immediately everyone started cheering and yelling with joy, I was clapping. I heard someone say "8.5%". They went back inside the building as I saw a laptop in front of me and the LUNC price going up in the cent range to 10 cents before my view changed. I heard someone say, "Wow, it really is a wealth transfer". Then I heard people in the crowd saying, "I should sell", "I should sell", and everyone started saying it and were racing to take profits. I was also trying to sell part of what I had as the dream ended. I believe the major rise for LUNC will occur when Binance announces an even bigger burn plan (aside from burning their LUNC trading fees announced recently). This was a huge deal in the dream and came as a surprise, immediately everyone celebrated because they knew the LUNC supply would be burned so quickly and the price would rise. I do not know the specifics or what the "8.5%" represented. I do expect Kucoin will make a burn related announcement as I have dreams indicating they will burn too. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, in a dream this morning 2/10/22 I saw a zoomed in frame view travelling along a huge LUNC move, it had ups and downs on the way up but it was mostly up a long long way and peaking, before coming down fairly sharply also, I didn't see how far exactly. I saw no figures. My feeling was that it was the next LUNC move, that it's a big move and will take time to unfold. My advice is to seek God before you sell anything, and be led by Him in all things. I also had a dream where I heard "China collapsing quickly like the Russians/Soviets". I believe this could be economically, militarily or both. I also have a prophecy/word I received in a dream not long ago, that China's invasion of Taiwan will fail, and China will suffer a huge defeat/calamity. Also I saw today in a dream a Russian soldier or civilian (I wasn't sure which), who was extremely skinny, dehydrated and malnourished, and I knew it wasn't caused by an enemy, but was due to Russia. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, I have a significant dream to share with you, received today 4/10/22. In a dream I saw a list of Binance burns, and after a series of burns maybe 4 or 5 or so, I saw written "Binance 1.2%". I believe that Binance will decide to

fully implement the 1.2% burn tax on all buy/sells for LUNC. This would be huge news and could be the announcement from my dream we are waiting for that will rocket upwards the LUNC price and lead to the huge upward move I saw here <https://t.me/c/1620388801/94> and <https://t.me/c/1620388801/95>. According to current Binance daily volume for LUNC of 460M USD per day at current LUNC price of \$0.000312 this would be approximately 17.6B LUNC burned per day, or 6.45 trillion per year. If the volume increased it would burn faster, depending if also the higher prices would mean less burned, so that depends. I believe the move will take some time to unfold (and won't be a flash spike), but will be a continued upwards trajectory towards the top with these very fast burns. I believe this is what we are waiting for, and it may not be very far away. I expect other exchanges would also do this so it could be even faster than a year to burn most of the supply. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, this morning 5/10/22 I had two dreams I want to share. In the first dream I saw my Kucoin price widget on my phone for LUNC/USDT very clearly read 99.8. All I could think was wow, as the dream ended. LUNC when it used to be called LUNA once traded at over \$100. I have other dreams already posted of seeing similar prices for LUNC (over \$100). In the second dream I saw an overall chart of LUNC I believe on a big timeframe. I didn't see the exact ups or downs but this was overall what I saw (see the image in the comments). In the dream I was trying to understand the chart and was shocked to see it had gone way past \$30 and \$50. These two dreams are showing the amazing long term price for Luna Classic (LUNC). For example, 10,000,000 LUNC (10M), is now worth \$3,060 USD, but if sold at \$100 would be \$1,000,000,000 (one billion dollars). I believe that in time (I don't know how long), the LUNC supply will be reduced dramatically by burning, and many people will have sold by then along the way, not understanding the eventual prices that will be reached. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "In a dream this morning 7/10/22 I saw LUNC at \$0.000205 or so, and I was excited and expecting a big breakout move upwards. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters I have some dreams I want to share received today 26/10/22. In one dream I saw LUNC move up to \$0.00031 area and then crash very severely. It went lower than \$0.0002 and I started buying, and it went even lower than I was expecting. I prayed for confirmation and later received a dream where I saw a LUNC chart like this (see comments), where it seemed to top out around \$0.00035 area then crash very hard down to \$0.000074 area. Yesterday in a dream I heard about the Lord bringing LUNC back down due to people complaining. I believe this is true and was confirmed to me today, as \$0.000074 is a complete retracement of the move we had. This also goes with this earlier dream I have of LUNC trading at \$0.000072 and taking off upwards from there <https://t.me/c/1749237879/10985?thread=10238>. Regarding the \$0.0002 area I believe we will go down past it, and my dreams about increase from that area may be on the way up from lower prices. Prepare to hold or according to how the Lord leads you to be ready to buy more down at the \$0.00007 area. It's an opportunity to get cheap LUNC again before the real take off begins. Please seek the Lord Jesus Christ. God bless you. Christopher."

As posted on Telegram, "Dear brothers and sisters, since the last post I made I have been seeking the Lord regarding the major LUNC decline I saw and the timing. In a dream today 30/10/22 I saw a LUNC chart like this (see comments). The price came down from an

unknown high that was out of view (off the screen), then had a bounce before continuing lower. I believe the image I posted in my last post <https://t.me/c/1749237879/14784?thread=14783> was the tail end of this chart I saw today. This means we still have a significant rise ahead for LUNC before the major crash to \$0.000074. This is good news. This brings me back to this earlier post and chart I shared, showing a major LUNC spike to at least 1.5 cents, a crash to zero, and a rise up to 1.5 cents more gradually <https://t.me/c/1620388801/58>. Also I was told about "Pump and dump" here <https://t.me/c/1620388801/69>. I believe with my bear dream <https://t.me/c/1620388801/93> and my last post, the Lord was showing us that LUNC will have a major serious decline, and He will bring it back down, but thankfully we are notified about these things in advance, and LUNC will go up first before the crash, giving us a great opportunity to exit and buy again later when it's low. I believe we will head upwards first for a good move. I don't know where this move tops out, but it may be in line with previous expectations. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in a dream this morning 6/11/22, right before I woke up I heard a horse racing trumpeting noise very clearly and loudly, which signals the imminent start of a race. I found a video with exactly the tune I heard <https://youtu.be/Ob9NiVSuRA0>. I believe we are about to start our run/race, and I believe this is an announcement and encouragement of the beginning of a big LUNC upwards move. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, someone asked about whether Coinbase will list LUNC, "Yes they will I had a dream they would on 7/10/22. I forgot to post about it. Thank you."

As posted on Telegram, “I had a dream this morning 10/11/22 of seeing BTC at \$9,800. I saw LUNC had declined but it was not at \$0.000074 or even under \$0.00010. I believe this image may be playing out now, the one with the dip before the bull run <https://t.me/c/1749237879/7536?single&thread=7534>. I believe the race is very soon about to start, but before then we may see more decline. I'm just going to try to buy more LUNC whenever I can and wait for the race to start. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, 12/11/22 “A while back, maybe one month ago, I had a dream of seeing Kucoin, my account on the exchange and saw written "Serious Warning". I prayed about it, seeking confirmation or more explanation but so far haven't received anything further about it, so I wasn't sure about sharing the dream. At this time I am keeping most of my LUNC off exchange. Please seek the Lord and do as you are led. I think it's good to be cautious and keep the bulk of your funds off exchanges. I saw how FTX tweeted, like all the others who failed in similar ways, that they were safe, assets are fine etc, until it was revealed they weren't and user funds are likely all gone. We should exercise wisdom, especially in cases where we do not hear directly from the Lord about a matter.”

As posted on Telegram, “Dear brothers and sisters, this morning 16/11/22 I received a dream and vision I want to share with you. The first, in the dream I saw a NATO general announcing "Boots on the ground" to protect NATO countries and Europe, and to contain Russian aggression. I knew this meant war and in the dream I wondered how crypto was doing and I saw BTC at 24k and LUNC was up. That was the dream. I don't know if what happened today with the missiles striking in Poland will be it, or if there will be something more. Later I had a vision where I saw a horse racetrack. I was standing on the grass track. I saw ahead

was the metal gates where the race begins from, and the horses with different coloured markings and their jockeys atop, and every horse was loaded in the starting gate. A few seconds passed as I watched them and I knew the race was imminently about to begin, then the vision ended. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “In a vision today 30/11/22 I saw this chart which I knew was for LUNC. The impression I got was that the next spike will be big and take us to a new level. I'm not sure if this is part of a bigger overall move or not. I felt it was an encouragement that we will see a big move in LUNC soon. Please seek the Lord. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, this morning 5/12/22 I had a dream where I saw an overall chart for LUNC (as pictured). I knew it was showing the whole of the move we already had from \$0.00008, plus it had an important part at the end. What it showed is that I believe we are right at the part before an imminent vertical rise upwards in LUNC. I saw the rise approaching towards the previous top we had (\$0.0006), but it had not got there yet. This was a great dream from the Lord and very encouraging, we should be about to take off very soon. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, yesterday 6/12/22 I saw in a vision a continuation of the chart I posted on 5/12/22. The chart was extended, showing the vertical spike continued significantly higher than our previous high (\$0.0006), had a correction period then took off again upwards very steeply (see the photo). I didn't see what came after that. I believe this was from the Lord and as confirmation consider this post from 17th September, where I saw in a dream a very similar chart, which I felt was very soon, was a long upward move, and was going higher than \$0.0006 <https://t.me/c/1749237879/12904?thread=12464>. I believe we will have our great LUNC run quite soon, praise the Lord. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, on 12/12/22 I had a dream where I heard the words, "A plethora of burns", which I believe was referring to LUNC burns. To me this implies rapid burning or can also be burns from a variety of sources. I also had a dream where I saw a map from overhead showing that Russia lost their control of Crimea, and I heard a voice saying this was due to "Increased shipments of western artillery". I saw how the artillery was placed on the map and saw Ukraine's control expand, and Russia was expelled from Crimea. I haven't received anything recently about crypto, and I am still waiting patiently for the LUNC rise to begin. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I had a couple of dreams both about two months ago. I have been pondering them since that time and have decided now to share them. In the first dream I saw a tweet from Russian Foreign Minister Sergey Lavrov which said "I am going home in a body bag". I believe this was a prophetic dream that he will die overseas and be returned to Russia. In the other dream I saw Do Kwon being surrounded by men and either arrested or attacked. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I want to share some recent dreams I received. This morning 22/12/22 I saw a chart which looked like this (see image below), showing a steep dip that went off the screen but came back up not long after to where it was. I didn't see exactly, but I believe it could be a LUNC chart as that is what I am following closely. If this is a shorter term fulfillment there might be a temporary spike downwards in the LUNC price, before quickly recovering. This could occur before we get our awaited for big rise. I am not selling anything, just buying more LUNC as I can. Later this morning I saw

in a dream LUNC rising seemingly very easily to \$0.05 (5 cents). It felt like it happened so fast with little resistance. Also another dream I want to share, on 1/12/22 I heard in a dream, "Tourists from all over the world come to see the surrender at Iziium". Iziium is a Ukrainian city in the east recaptured from Russia in the Kharkiv offensive. I considered this dream, praying for further insight. Yesterday 21/12/22 I saw in a dream President Zelensky in Iziium at a big open concrete area, set up with flags and pillars as a celebration. Zelensky was talking about inviting numerous different world leaders to Iziium. That was the dream. I believe the dreams show Ukrainian victory over Russia and celebration will take place in Iziium. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Hi everyone, today 25/12/22 I had a dream where I saw on an exchange LUNC crashing sharply, I thought it was a flash crash and I saw the price at \$0.0000X. I did not see what price it came down from. I don't know the timing of this, it may be related to the previous image I saw posted here <https://t.me/c/1749237879/16675>. As I mentioned before I am looking for a big move up in LUNC very soon, but possibly a temporary sharp drop before that. Please seek the Lord Jesus Christ. Also Merry Christmas to all, and praise God for His great salvation in Jesus Christ our Lord and Saviour! God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, this morning 29/12/22 in a dream I was in a room with tables and I was seated at one of them. A laptop was open before me with a price widget at the top of the screen. I saw BTC was at \$88,000. Next to it I saw LUNC was at \$267 at the same time. I was shocked and exclaimed, "LUNC is at \$267!" A woman sitting nearby heard me and got angry and jealous as she assumed I owned LUNC. I looked closer at the screen and saw there was a third coin on the widget. It was Electroneum (ETN). I looked to see it's price and my view zoomed in, but it was covered by a graphic and was hidden. I knew it was being kept a secret at this time by the Lord. This dream shows the amazing long term price of LUNC. I don't know the timing it could be years away. The jealous and angry woman is a reminder to be discreet about your LUNC holdings. Here are links to previous dreams I posted in the last thread if you haven't seen them:

<https://t.me/c/1749237879/16476?thread=16274>.

Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in a dream this morning 31/12/22, I saw a LUNC price of \$0.00048. Then later I had a dream where I was in front of a group of people and I was telling them about my dream, that the next LUNC target is \$0.00048. I told them if you have any spare money go buy LUNC now. Then about 7 or 8 of them ran off to their computers to go buy LUNC. That was the dream. It won't be long before LUNC starts rising. I believe \$0.00048 is only part of the way up of this big move here

<https://t.me/c/1620388801/107>. Please seek the Lord Jesus Christ. God bless you.

Christopher.”

As posted on Telegram, “Dear brothers and sisters, this morning 3/1/23 I saw in a dream LUNC immediately exploding upwards vertically. I was looking at the chart with my wife shocked and amazed saying, "This is it! It's finally happening!" LUNC blasted upwards with a slight angle and kept going a long way and I saw it hit \$0.001 at least, as the dream ended. I

believe I saw the first leg of this move of LUNC God revealed here <https://t.me/c/1620388801/107>. It was so fun to watch LUNC go up like this, it was an amazing thing to behold the prophecy unfolding before our eyes. I believe this is very close. Here is a dream I posted to the last thread if you have not seen it <https://t.me/c/1749237879/16916?thread=16835>. Please seek the Lord Jesus Christ. Praise His holy name. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters in a dream this morning 10/1/23 I was looking at the LUNC chart and it looked normal. Then I had a brief vision of it spiking up with a big green candle. Then I looked at the chart and it was still normal, and I realised my phone was on airplane mode. I took it off and when the internet loaded back on the LUNC chart was up huge in green at \$0.00032. This was an encouraging dream. I believe we are going to have our big run very soon and the LUNC drop I saw is a later sequence. I also had a dream where I saw a cartoon donkey which looked like it was sneezing, and it was saying DRAFFFFFFFFF. It was about to say the full word DRAFT, but a lion bit it on its behind, and the donkey turned around scared with a weird grin, not wanting to be bitten again. I believe this could show the democrats over a period of time calling for a draft due to the outbreak of war which is coming (see my videos and previous posts), and this is averted at the last moment before it is implemented. The lion could represent Jesus or Christians (“The righteous are bold as a lion”, Proverbs 28:1). Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I had a dream on 8/1/23 where I saw a LUNC chart hitting \$0.40 (40 cents) then coming back down gradually sideways for quite a while to \$0.10 (10 cents). You can see the image in the comments section. I only saw part of the chart. I believe this is one part of the big move of LUNC coming soon. I am going to put together a rough sequence in this post. If you consider this post <https://t.me/c/1620388801/109> I saw the initial big move went to at least \$0.001. If you look at this post <https://t.me/c/1620388801/107> which shows the trajectory of the next big move, it could be that approaching the first top (not necessarily the top) is \$0.004. Then the chart corrects down to \$0.001, before the next huge leg up. Why do I say \$0.004? Well on the 14th of May I saw LUNC at \$0.004 and also \$0.40. Also on 15th May I prayed about a safe sell and saw \$0.004, and also \$0.40 afterward. These may be good points to take some profits, to re-enter lower for a continued run. So after at least \$0.001, possibly \$0.004 or higher, then a correction. Then the next big leg may go all the way to \$0.40 and correct back to \$0.10. We could have a further leg after this all the way into the \$ range up to \$10-15, as I saw this overall move here with ups and downs <https://t.me/c/1749237879/11194?thread=11193>. Going with that chart, I have another dream I received on 6/10/22 (3 months ago), I heard “\$14 then lower after this for 2 years”. It seems around \$14 is an important peak for LUNC which will be lower afterward for quite some time. I do believe after this BTC and LUNC bull run comes the BTC crash to zero (see here also <https://t.me/c/1749237879/7535?single&thread=7534>), which I believe would also have very low LUNC prices. Have a look at the image below I have charted and drawn a possible LUNC sequence. This is not definitive, and I believe these moves will take some time, numerous months. My plan at this stage is I may partially exit some of my holdings at what I think may be the tops of these legs, and wait and re-enter when it's corrected. I still plan to hold the bulk of my LUNC until higher sell prices. I wanted to share this for your consideration. This is based on my interpretation, but I don't have all the information. I wanted to share those recent dreams and provide an insight into my thoughts as to the LUNC sequence. Please seek the Lord Jesus Christ, especially regarding when you sell and how

much to sell. I believe these overall moves will take time to unfold, and as such you can consider staking your LUNC using the Station wallet (web or mobile) which gives a return of currently (it slowly declines) 21.96% per annum (in LUNC and USTC rewards). The downside of that is a 21 day lock period when you want to stop staking before your staked coins are returned. You can access the staking rewards at any time. To calculate your approximate daily reward rate at this time use this equation (coins staked x 0.2196 ÷ 365). You can pray and consider whether that is right for you. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, just a few minutes ago (19/1/23) I had a dream before waking where I saw BTC had reversed its recent drop and had pumped up into mid 22k with big green candles, and continued its bullishness. I then clicked on the LUNC chart to see it but the dream ended. I believe this down move is a small correction and the market will continue in a bull run. I expect LUNC will move big very soon. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, this morning 26/1/23 I had a significant dream about BTC. I saw a chart of BTC, and I wasn't sure what moves took place before, but next thing I saw was a huge move all the way to 37.2k. Then the chart faded and I saw a clear figure 93.8k. I believe this BTC run will reach a new all-time high of at least 93.8k (the previous was 69k). This gives us something to aim for and where to expect the next BTC move will take us. We need to continue to wait for LUNC to move, as when it does it will move BIG. It's possible LUNC will not move much during this next BTC leg, as I have a previous dream from 4/6/22 where I saw BTC move to 38k and LUNC was around \$0.00017, and I told a woman urgently if she wanted to make a lot of money to go buy LUNC right away, see here <https://t.me/c/1620388801/63>. Here is a dream that was posted in the last thread which was fulfilled <https://t.me/c/1749237879/17370?thread=17176>. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Hi everyone, I was thinking further about Electroneum (ETN). As we are about to begin (or have begun) the horse race I do expect a range of cryptos to perform well. I have a dream from 24/3/21 (you can find it in my dreams PDF) where I saw BTC go to 111k, and ETN was around \$1.50, and then BTC went to zero. I am seeking the Lord about it but am considering whether ETN may move in a big way in this run. Previously I thought ETN would run later, as on 28/11/21 I saw BTC crashing to zero, I saw ETN at \$0.004, and then it rose to \$0.19 (19 cents). My thoughts at the time were that the big ETN rise will happen after the BTC crash to zero. Upon further consideration, if BTC makes it to 111k on this move (as I recently saw 93.8k), then it's possible we could see a huge ETN run to over \$1. If ETN hits \$1 then crashes with BTC, it can go back to \$0.004 area when BTC

goes to zero, then after rise to \$0.19. There would be no contradiction with that other dream, so there is no reason why ETN could not run big on this bull run. I am asking the Lord about this and He may confirm it. A few months ago I had a dream I didn't share. The dream was about me buying some ETN. It made me think ETN could run on this BTC bull move. I didn't share the dream as I was shown buying the ETN at a later time (I haven't bought any yet). But it's another factor to consider that ETN may perform well on this run. To give some calculations, ETN's coin supply is 18 billion coins, having hit an all-time high of 23 cents in the past. If ETN hits \$1 an 18 billion market cap would put it at #7 crypto, but if everything else rose too it would place differently. I mention this because hitting \$1 is not out of the question for ETN. Compare to LUNC with a near 7 trillion supply where to hit \$1 we need to burn a lot of LUNC as the whole crypto market cap is only 1 trillion. Now consider if ETN went to \$1.50 from its current price of \$0.0028 that's a 535x increase with \$100 making \$53,500. Consider LUNC moving to \$1 from current price of \$0.00017 is a 5,882x move, and to \$14 is an 82,352x move, with \$100 making \$588,200 or \$8.235M. Comparing both ETN to LUNC shows LUNC's overall move has much more upside at this time, but ETN's move would still be very good. Now to summarise, I am seeking the Lord whether ETN may make its big \$1 run on this BTC bull run, as after further consideration I don't have any dreams which negate ETN making a run now, and I had a dream about buying some. Even before hearing further from the Lord on this, I plan to buy some ETN when I can. I am still focused on LUNC and am not selling any to buy ETN or anything else. I am waiting for the high prophetic prices for LUNC but may sell smaller portions at different prices on its run, which I described here <https://t.me/c/1620388801/110>. Please note I am holding the bulk of my LUNC until high prophetic prices. Please seek the Lord regarding your approach, as I have said earlier. I will update if I hear further from the Lord regarding ETN. God bless you. Christopher.”

As posted on Telegram, “Today 29/1/23 in a dream I heard about a "Price Explosion", I knew it was about crypto. I was thinking of BTC and LUNC. Later in a dream I heard, "0.2% after 8%". Now I believe this relates to Binance's plan for LUNC. In my dream from 27/9/22, linked here <https://t.me/c/1620388801/94>, the plan from Binance which caused the LUNC price to take off and hit 10 cents, I heard one of the celebrating people say "8.5%". This is very similar to the 8% I heard today. My thoughts on what this could be is Binance putting up to \$1 billion to buy and burn LUNC. With that amount of money they could burn 8% of the supply, which is 549 billion LUNC, even as the price rose. Such a huge burn and announcement, and the act of buying so much LUNC to burn could be what causes the price to immediately 10x to above \$0.001, which I saw in this dream <https://t.me/c/1620388801/109>. Now these are my thoughts and the Lord has not confirmed what the 8% is yet. After this was the 0.2%, which is the current on-chain burn tax. Binance only burns 0.1% of their fees, so if they implemented a burn of 0.2% it would at least double the burns from Binance we were having before. I don't think that's the end of Binance's changes and based on previous dreams I've had, we may see a higher burn tax later for faster burns. I also had a dream today showing that Christians have the righteous vision for LUNC and are to protect it. I believe this may come into place later, as if we make good profits on this bull run and exit, when we buy back into LUNC near BTC to zero, Christians can get a lot of LUNC and have more governance power over the chain, such as running our own validators etc. This would give us the ability to protect LUNC from bad changes and have the voting power to drive positive change for LUNC. That is something to think about later. I have also heard in a dream a while back that I believe was from the Lord, I heard an enemy of God saying, "We hate LUNC, it's the enemy's money". Their enemy is us, Christians. I

believe LUNC will be important for God's people. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “In a dream this morning 30/1/23 I saw BTC on a chart with big green candles and it had rallied up to 77k. Then the scene changed and I saw BTC was printing huge green candles and there was volatility as it was trying to break 100k, I saw it was at 98k and the dream ended. I believe this bull run will be big. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “This is a dream from my PDF posted on 14/1/22, please keep this in mind, as if we break 100k BTC these dreams come into play, "I had a dream also about seeing BTC at 160k and then saw it suddenly dropping down past 50k and all the way to zero on Kucoin. Three big red 0's showed up as it was being slammed down to zero repeatedly on Kucoin. I think this is the same flash crash I saw from 110k to zero."

As posted on Telegram, “This morning 1/2/23, I saw a vision of a bull's head. It had two large horns. I believe we are going to see a bull move very soon. God bless you. Christopher.”

As posted on Telegram, 5/2/23 “Dear brothers and sisters, LUNC has been suffering under intense and withering attacks from the enemy. They are now trying to stop Binance's burns so we lose their support, they are trying to destroy the L1 team. These same people were behind minting and other terrible proposals. They are relentless in their efforts and have a large faction of supporters to attack and destroy LUNC. They are doing the will of the enemy. As Christians we do not yet have much power to influence governance on the chain through ordinary means. I do plan to make a validator soon to allow anyone who wanted to stake with me, giving my validator a higher voting power to influence LUNC's direction in governance. The main dream I posted here <https://t.me/c/1620388801/112> was that Christians have the righteous vision for LUNC and are to protect it, and that God will use LUNC greatly to help Christians. We need to take this up now, in any way we can. For now I am asking for you to pray to God for LUNC's protection, for the enemies of LUNC to be bound and silenced, for God's will to be done and the righteous vision for LUNC for God's people to prevail over the forces of evil. I feel we really need to pray now. Thank you and God bless you. Christopher.”

As posted on Telegram, 6/2/23 “Hi brothers and sisters. The Lord has instructed me to proceed with the validator in numerous dreams last night. I have been shown to use the advanced service through Allnodes. The cost for the first month is \$960 USD (the same thereafter). If you wanted to contribute to the operating cost for the first month I would appreciate it. Afterward I will be able to handle it, and will have the cost offset somewhat by the 1% commission. The commission will be set at 1%, with a maximum possible of 5%, but I intend to leave it at 1% unless the Lord leads me otherwise. The reason for this is to make it easy for Christians to choose my validator so we can gain voting power. According to my estimates with a 1% commission at current LUNC prices I would need to get 26 billion staked with me to break even in cost to run the validator (almost in the top 10 validators). When LUNC rises in price it would be less. The validator will operate at a loss for some time. This is fully expected and is worth it to achieve my goals to influence governance on LUNC. My crypto addresses for receiving gifts are listed on this page <https://www.survivetheearthchanges.com/downloads/>. I will use any proceeds received at this time towards the cost for the validator. If we can cover the first month that is sufficient. I do not know how quickly my validator will grow, it may take quite some time, but I know from the Lord to proceed with it now. I have written a series of detailed instructions about the

validator, my governance views for LUNC, how to stake etc. I will share this soon. I will update when everything is live. Thank you and God bless you. Christopher.”

As posted on Telegram, “In a vision this morning 6/2/23 I saw a huge bull from behind. It was massive and extremely muscular and large. It looked similar to this, but dark brown. I believe it represents the huge bull run about to begin. This goes with my prior dreams that this bull run is going to be massive. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, today 7/2/23 I officially launched my Luna Classic (LUNC) validator. It is up and live and ready to receive staking delegations. The purpose of this validator is to gain voting power to fulfill the righteous Christian vision for LUNC, and to protect it. I will engage in on-chain governance to this end as led by the Lord Jesus Christ. For a complete write up with full details about the validator, how to stake and more, please read the information at this link <https://www.survivetheearthchanges.com/luncvalidator/> Thank you to all those who contributed towards the first month’s cost. God bless you. Christopher.”

As posted on Telegram, 8/2/23 “Dear brothers and sisters, please be advised that as I am a prophecy receiving Bible believing Christian, when I engage in discussion for LUNC governance on Agora, YouTube or on Twitter, the enemy is infuriated. They have and will continue to make numerous false accusations against me, as they did against the Lord. This is especially the case when I call out their wickedness. Please be advised about this. This is to be expected. God has prepared me for this. This leading from God to make the validator does not come easy, we together need to engage in spiritual warfare against these forces of evil, and continue to believe in what the Lord has revealed about LUNC and its purpose for the body of Christ. Thank you for your support and God bless you my brothers and sisters in Christ. Your brother, Christopher.”

As posted on Telegram, “Thank you for sharing your dream and I believe it was from the Lord. Today 9/2/23 I had a dream showing my voting power for my validator was in the 19% range. I do not know how long it will take, but I will continue forward with my validator as the Lord leads me. Praise God!”

As posted on Telegram, 13/2/23 “Praise the Lord everyone we just made 1% voting power and #21 out of 130! This is only the 7th day since launching my validator JESUSisLORD. That’s amazing growth thank you for delegating with me. Thank you for supporting how God has led me, and let us together continue in the mission toward fulfilling the righteous Christian vision for LUNC, and to protect it. God bless you. Christopher.”

As posted on Telegram, 13/2/23 “Dear brothers and sisters, in respect of the LUNC communities vote passing proposal #11322, to set a minimum validator commission of 5%, I will begin today raising my commission to 5%. This will take 8 days and my maximum possible commission is 5%. Also see the comments for a dream today I had of a LUNC chart, I don't believe we have long before our much awaited rise. God bless you. Christopher.”
As posted on Telegram, 15/2/23 “JESUSisLORD Validator Roadmap - Vision for Luna Classic (LUNC) - 15 February 2023 This is the righteous Christian vision for LUNC that I believe in, as God has led me. These points are subject to further advice from the Lord Jesus Christ, discussion, and community wishes, and may be subject to change. I will work towards achieving these following goals with my validator JESUSisLORD, using my voting power

for the betterment of LUNC and its investors. This post serves as a clear communication to my delegators, and the community, of what I hope to be accomplished for LUNC. I believe the future of LUNC rests in being an important deflationary store of value, a source of continued competitive passive income through staking, and providing every day utility and spending convenience for years to come. JESUSisLORD Principles/Goals for LUNC

1. Never allow minting, inflation mechanisms, or reverse splits. LUNC must remain a deflationary coin. We must burn the supply down to a sustainable level and never increase it. We must also fund our basic needs as a chain, such as the community pool and oracle staking rewards pool, without being dependent upon outside funding. We must block dangerous and potentially fatal experiments to the LUNC chain.
2. Raise the on-chain LUNC burn tax to between 0.4% to 1.5%, and partially exempt Dapps to the on-chain tax.
3. Adjust the upgraded burn Ante Handler (when passed) to send 10% to 30% of the on-chain burn tax directly to the community pool. 90% to 70% will remain solely for burning.
4. CAP the community pool at between 2 to 6 billion LUNC (\$340k to \$1.02M USD at price \$0.00017, which will be worth much more as LUNC gains in value).
5. Implement an automatic overflow on the community pool after the CAP is reached, where 100% is sent to the oracle rewards pool. We must fund staking rewards for the long term sustainability of LUNC. By funding the oracle rewards pool we can ensure good staking rewards for years ahead, which will continue to attract more investors.
6. Lower the staking lockup time to 14 days from 21 days to provide more incentive to stake and more flexibility, while still preserving stability.
7. Increase gas fees 2x to 10x from current values on all transactions for further funding to the community pool and oracle rewards pool. Gas on withdrawing staking rewards could possibly be exempted from further raises, as increasing this can harm auto-compounding for smaller investors who stake.
8. Petition Binance to burn their trading fees on USTC. We can pass a governance signalling proposal to this effect. This alone could lead to \$1+ USTC within a few years, no dangerous re-peg experiments necessary.
9. Petition Binance via community efforts to increase their LUNC burning and implement off-chain burn tax higher than 0.1% fees. Assess this after Binance has begun burning again.
10. Petition via community efforts other exchanges to adopt an off-chain burn tax for LUNC. Whitelist exchanges internal wallets from on-chain tax who agree to an off-chain LUNC burn tax (on buy and sells), such as Kucoin etc.
11. Promote more adoption of LUNC. This includes petitioning Coinbase to list LUNC, having LUNC available on payment services, having LUNC fully integrated on Ledger Live, having LUNC available on Trezor, having a LUNC debit/credit card so we can easily make payments in LUNC. Invite useful Dapps to build on and offer their services on the LUNC chain. Any more beneficial adoption and partnerships should be considered.
12. Repeal the minimum 5% validator commission proposal #11322 which passed, to allow free-market operation, better choices for delegators, price competition between validators, without unnecessary restrictions. LUNC is a decentralised coin which must have capitalism with minimum restrictions, not socialism/communism.
13. Meet and exceed technical parity with LUNA V2 but by no means whatsoever merge or pair LUNC to them. LUNC should remain independent, and careful possible use of USTC and other classic coins can be considered.
14. Continue to reject divisive attacks and toxic individuals who wage war against LUNC and its community. These are the principles and proposals I believe in and will pursue to accomplish with my validator JESUSisLORD over time, whether days, months or years, as part of fulfilling the righteous Christian vision for LUNC, and to protect it. God has given me many prophetic dreams about LUNC, and I believe LUNC will rise greatly and be very important to the Christian people. For believers in Christ I encourage you to pray for the fulfillment of the Lord's will for LUNC for His people, and to pray against the forces of darkness which attack LUNC. If you agree with my cause you are welcome to delegate with me at JESUSisLORD, and to assist me in achieving higher voting power to

influence governance and to achieve these goals. Thank you to all my delegators. God bless you. Brother in Jesus Christ, Christopher Harris.”

As posted on Telegram, “I had a minor dream this morning 16/2/23 where I saw LUNC back up to \$0.0002 and USTC was up decently too. I also had a dream confirming to me the Lord approved of my vision for LUNC roadmap, which I will continue to work on. God bless you. Christopher.”

As posted on Telegram, “I had a dream yesterday 15/2/23 showing me to do a giveaway on Twitter to promote my validator and gain more delegators. To fulfill my vision for LUNC roadmap plan I need more voting power and delegators, so I plan to do some marketing related activities on Twitter to this end, as the Lord has instructed me. God bless. Christopher.”

As posted on Telegram, 20/2/23 “My commission changes to reach 5% are completed. My validator is now at 5% commission which is my maximum possible, it cannot increase further, and this is the minimum rate set by the community in vote #11322. My focus now is to build my reach as a validator to influence governance, and to be ready for when I am upgraded to the Enterprise Plan with Allnodes at 2% voting power. At that stage Allnodes has indicated I will have an option available for auto-compounding your stake. I will be working on promoting my validator on Twitter and YouTube, as the Lord has led me to do so with dreams of making competitions and today in a dream showing me to expand my YouTube channel. This will help me gain more delegators and influence to achieve my Validator Roadmap and the righteous Christian vision for LUNC. LUNC is very important for God's people as I have been shown, and we as Christians all need to rally together to do our part to fulfill God's will for us with LUNC. I will do my best. God bless you. Christopher.”
As posted on Telegram, “In a dream this morning 21/2/23 I saw a big move up in Bitcoin to 37k, which was the same as what I saw here <https://t.me/c/1749237879/17498>.”

As posted on Telegram, 22/2/23 “This video goes into why I believe LUNC is important for Christians, some common attacks I receive, and how Christians should take charge in fulfilling the prophecy of the Lord. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in this video made today 23/2/23, I go into detail about my JESUSisLORD Validator Roadmap, explaining my goals for governance and for LUNC's future. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in a dream this morning 26/2/23, I saw a big bull with large horns that also looked like a horse, like it was a horse and a bull. That was the dream. I believe this is from the Lord and is about the horse race and the bull run, which are about to begin! See these previous dreams about the horse race and the bull: <https://t.me/c/1620388801/104> and <https://t.me/c/1620388801/105> and <https://t.me/c/1749237879/17691> and <https://t.me/c/1749237879/17878>. God bless you my brothers and sisters in Christ. Our patience in the Lord will be rewarded. Your brother, Christopher.”

As posted on Telegram, 26/2/23 “Dear brothers and sisters, as we wait patiently for the prophecy from the Lord to be fulfilled, I made this video today going over 12 epic LUNC prophetic dreams I have received. You are welcome to watch this to review what is coming ahead. God bless you. Christopher.”

As posted on Telegram, 1/3/23 “Dear brothers and sisters, if you don't mind could you please pray the upgrade to v1.1.0 is successful and any issues will be solved. They are still having issues working out what is wrong and the chain is still halted. If the upgrade does not happen today, we may not see Binance's burn tomorrow, as this upgrade contains what Binance requested to burn again. Your prayers would be appreciated. The Lord's will be done. God bless you. Christopher.”

As posted on Telegram, 1/3/23 “Praise God it worked out! I was in the validator discord. It was getting worrying earlier, there were some talks about reverting to v1.0.5 and launching to v1.1.0 later (which means we could lose the Binance burn for tomorrow). But praise God they pushed through, the chain is up and running, and so is my validator. Thank you to all who prayed! Thank you Jesus.”

As posted on Telegram, “Dear brothers and sisters, I had a dream this morning 3/3/23 that the LUNC breakout is very soon. That was all. I didn't get exact timing. Stay focused on what is ahead. Buy more LUNC if you can as you feel led by God. I am waiting patiently. God bless you. Christopher.”

As posted on Telegram, “Today 6/3/23 I just calculated the current rewards rate for those who stake with my validator and it works out at 21.86% per annum, when you also swap your USTC rewards for LUNC. To work this out yourself simply collect rewards, then put a 24 hour timer on. Once the timer goes off write down your LUNC rewards, then collect your rewards. Then swap your USTC rewards into LUNC, write that figure down. Then take your total LUNC earned over the 24 hour period, and divide it by your total amount staked, and multiply by 365, and then multiply by 100 = 21.86% or should be very close.

Please note that overtime rewards for everyone decline due to the oracle rewards pool declining. Part of my validator roadmap is to fund the oracle rewards pool to ensure good staking rates for the long term. Also, another validator has put up a proposal to reduce the undelegation period for staking to 14 days. This is one of the points in my validator roadmap at #6 <https://t.me/c/1620388801/120> so I certainly support this move. I previously proposed this change on agora but did not get support (before I was a validator). The proposal is only in discussion phase I will update how it goes later, and about my 75/25% proposal which I hope will be successful. I also had a short dream on 4/3/23 of sending 1,000,000 LUNC to Kucoin from my wallet. When it arrived I saw its value in Kucoin and it was worth \$17,000 USD. This means LUNC was at a price of \$0.017 (1.7 cents). I am still waiting patiently for the LUNC rise. It is coming soon. Continue to seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I just woke up from a dream today (8 Mar 23) that was epic. I saw BTC trading sideways on a chart, it felt quiet and normal. Then I suddenly felt a huge rush of energy, and said, "This is about to go!" And I saw what looked like a single green candle for BTC launch upwards all the way to \$40,000. I saw posts on Twitter from TA accounts absolutely shocked. I went to post on Twitter about my prior prophetic dream from God of 26/1/23 being fulfilled, of seeing BTC make a huge move to 37.2k <https://t.me/c/1620388801/111>. I believe this dream shows the beginning of the horse race and huge bull run that is about to come. Let us wait patiently for it my brothers and sisters, and glorify the Lord our God Jesus Christ when He raises LUNC, and the prophecies are fulfilled. God bless you. Christopher.”

As posted on Telegram, 10/3/23 “Wow we made 1.5% voting power on my validator JESUSisLORD! That's great thank you everyone who staked, and supported! The next major milestone is 2% voting power. At that point I will be upgraded from the Advanced Plan to the Enterprise Plan with Allnodes, which will provide even better uptime, security and decentralisation for my validator. There will also be an option for auto-compounding your stake through the Allnodes portfolio page, which increases your annual percentage yield (APY) by compounding interest (I'll update about that later). This enterprise plan will support us forward into the future no matter how big my validator grows. It is good to be a Christian validator in LUNC, and to believe in Jesus Christ and what He reveals, and to do His will in our lives. I know God is leading me in this and I do my best every day to do as He guides me, with the validator, and everything in my life. I will continue to work towards achieving my Validator Roadmap <https://t.me/c/1620388801/120> and all the Lord leads me. Thank you for being a part of this my brothers and sisters in Christ, and for your prayers. We have made great progress so far. God bless you. Christopher.”

As posted on Telegram, 18/3/23 “Dear brothers and sisters, I have some dreams I want to share with you. On 15/3/23 I had a dream where I saw I was successfully implementing a 1.5% on-chain tax for LUNC. That was the dream. I was previously shown by the Lord 1.5% tax in a dream over a month ago, and it is a fair transaction tax. We can leave 1.2% for burning and 0.3% for funding the chain. Then push for 1.2% burn to be adopted by exchanges on buy/sell, which the Lord already showed me would be successful with Binance here <https://t.me/c/1620388801/96> and previous dreams about it on Kucoin, which hasn't happened off-chain yet. CZ Binance said in an AMA he would adopt the 1.2% off-chain if other exchanges agreed. Having the 1.2% burn off-chain has always been the goal to burn the supply and raise the price, which the community has lost sight of.

On 16/3/23 I was shown in a dream to stay at 5% commission and that it's fair. I believe this was from the Lord and I plan to stay at 5% commission (which is my max) unless the Lord tells me otherwise. This will allow me to afford the hosting costs which will soon increase 4x on the Enterprise Plan at 2% voting power, and to be able to do continue to do other things the Lord has shown me to do, such as competitions and giving to the L1 Team. This morning 18/3/23 I had a brief dream of seeing LUNC rise up to \$0.09 (9 cents). That was all I saw I didn't see much detail. I have been continuing to speak for the LUNC tax to be raised and for the fulfilment of my Validator Roadmap as the Lord has led me <https://t.me/c/1620388801/120>. Now certain people are calling for the burn tax to be removed, which is a horrible idea. I have been opposing this on Twitter, and rather than discuss the topic, numerous anti-Christian enemies of God have attacked me for my faith continually and attack the word of God. From our spiritual adversary, witchcraft and demonic attack has been coming against me. This is ongoing, but I stand strong by the strength of the Lord Jesus Christ within me, praise Him. He has prepared me for this. I am ready and passionate to persevere until the end. My validator group got attacked with over 2,000 spam accounts joining, which took time to remove. Our enemy is stirred up, because we are on the right path. You are my people. I love you. We have no one else on the earth. Faithful Christians need to stick together. I do my best to do as the Lord leads me and will continue to do so. Resist the evil attacks that come against me and our righteous cause. As long as I have your support from loyal faithful Christians, we will be able to achieve what the Lord has showed me. I believe the Lord is having me participate in governance like this, and you who support me, to take an active role in the fulfilment of prophecy, otherwise there would be no point in getting involved and I could stay on the sidelines. But that was not the Lord's will. He wants us to gain power and influence over LUNC so it will be very important for God's

people. We are continuing to climb, at 1.74% voting power now. I will continue to do all the Lord leads me and work towards fulfilling His will. Thank you for your support and prayers. God bless you my brothers and sisters in Christ. Christopher.”

As posted on Telegram, 18/3/23 “Dear brothers and sisters, this is my vision plan for LUNC to \$1+, from my validator roadmap and is refined. This is what I am pushing for, as the Lord has shown me to do. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I had a dream this morning 19/3/23 that I believe is from the Lord. In the dream I saw a violent bull rampaging, jumping up and down and attacking. That was the dream. I prayed about this and I believe the interpretation is that the coming crypto bull run will be wild, violent, will not be able to be tamed, and will have a huge aggressive rise. This goes with my prior dreams from God about this bull run, which I believe we are in the early stages of.”

As posted on Telegram, 19/3/23 “Dear brothers and sisters, my latest and updated Vision Plan to achieve \$1+ LUNC is now up on agora as a discussion thread. You can read through and see the details. <https://classic-agora.terra.money/t/vision-plan-to-achieve-1-lunc/50412>. The proposal is to raise the on-chain burn tax, exempt Dapps from on-chain tax, and focus on off-chain 1.2% burn tax adoption by exchanges including Binance and Kucoin. I strongly believe in this plan. God bless you. Christopher.”

As posted on Telegram, 19/3/23 “Thank you! I'll also mention this plan is informed by the different prophetic dreams I have received, of a 1.5% on-chain tax, Binance adopting 1.2% tax off-chain etc.”

As posted on Telegram, 22/3/23 “Dear brothers and sisters, I made a flowchart which is my complete and refined Vision Plan for LUNC to \$1+. You can see the image attached. Also I made a competition to promote the plan on Twitter which you are welcome to enter. As posted on Telegram, “Dear brothers and sisters, in a dream this morning 28/3/23, I saw LUNC had risen to around \$0.00025 and USTC had risen and seemed to have led the rise. I saw Terraport was out and the USTC re-peg proposal was up for discussion or vote, which seemed to be the impetus. That was the dream. As the Terraport DEX is launching on the 31st and the USTC re-peg proposal funding pitch and further explanation is due soon, we could expect there will be speculation of a coming re-peg of USTC which could cause the price to rise, as well as LUNC's. While I do not support USTC re-peg because I have been shown in dreams USTC over \$1 at \$3 and \$5 (not pegged to \$1), and that it is legally risky, it does not mean it won't be attempted and lead to a pump in price. I will seek the Lord about it further when the proposal/vote is out. So overall hopefully we see a nice LUNC move soon. We are still waiting for the major rise I have seen for LUNC to begin <https://t.me/c/1620388801/107>. I also heard in a dream the words, "Two Trillion", and my first thought was bailouts. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, 3/4/23 “I'm planning to buy all the coins the Lord has shown me when BTC near zero or after it, LUNC, ETN, RDD, XLM, XRP, LINK, ETH, BTG, BCH, PPT, LTC, DOGE, SHIB. I plan to hold my money in banks, maybe some in stablecoins, in gold/silver. I will seek the Lord more about it later if he gives me any warnings.”

As posted on Telegram, 1/4/23 “Praise the Lord Jesus Christ! Thank you everyone who has staked their LUNC with me. My validator JESUSisLORD has made the top 15 validators in less than 2 months! We are at 1.88% voting power and getting close to 2%! I am continuing to do as the Lord leads me, promoting my Vision Plan for LUNC to \$1+, and working to achieve my validator roadmap. Thank you for your support my brothers and sisters in Christ, and to all who stake with me. God bless you. Christopher.”

As posted on Telegram, 5/4/23 “Dear brothers and sisters, please see this video I just uploaded where I go over my Vision Plan for LUNC to \$1+ in detail. This is the plan God has led me to pursue and I will continue to do so. It is an excellent plan informed by the prophetic dreams God has given me. Thank you for considering, and for your support. God bless you. Christopher. <https://youtu.be/6VL2FChR5Xw>”

As posted on Telegram, 7/4/23 “It's Good Friday today in Australia. We are so blessed by the Lord our God Jesus Christ, God the Father and the Holy Spirit. We are blessed by the amazing salvation of our Lord Jesus Christ, His sacrifice for us on the cross, and His resurrection from the dead, for saving us from our sins and delivering us from death, and giving us the gift of everlasting life. God has blessed us with a fellowship between our brothers and sisters in Christ, and has blessed us to be partners in the prophecy of God to receive the Lord's provision as He has showed us, including with LUNC. God is giving us the opportunity, and we have taken it, to believe in faith in what He has revealed, so that we may be blessed by Him to provide for ourselves and our households, and to do good works for the Lord. This is God's will for us as He has led us. I am thankful for all your support for my validator and with this group. I know what God showed us will come to pass, and we will rejoice. Thank God for all He has blessed us with in our lives, and let us all strive to do His will always. I love you my brothers and sisters in Christ, in Jesus name. God bless you. Christopher.”

As posted on Telegram, 8/4/23 “I just got upgraded today to the Enterprise Plan by Allnodes for my validator JESUSisLORD, since I hit 2% voting power (2.05% now). It is the highest tier plan they provide and is good for the long term, with excellent security, decentralisation and service. Thank you for your support, and praise the Lord we hit 2% voting power in only 2 months! God bless you. Christopher.”

As posted on Telegram, “In a simple dream this morning 9/4/23 I saw a chart going bullish rising up like this. I didn't see what it was for, but either BTC or LUNC would be good for us. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in a dream this morning 22/4/23 I was given a timing for a certain month for the implementation of the 1.2% burn tax. I do not want to share the timing information. But what I will say is that it is soon, and not far away. I do not know if this timing is for the 1.2% off-chain on exchanges, or having the 1.2% burn tax on-chain. What I am coming to think, is that my Vision Plan for LUNC to \$1+ passing and coming into effect is necessary for the major LUNC moves I have seen to come to pass. I am the only one I know of advocating for the 1.2% burn tax, with a proper plan to achieve it. God showed me previously that I was implementing the 1.5% on-chain tax <https://t.me/c/1620388801/133>. God showed me previously that Binance and Kucoin would implement the 1.2% burn tax off-chain on their exchange. I have the right plan as God led me to achieve this. Now the LUNC price may start rising from another unknown factor, or just market forces, I don't know. But I am thinking that the big rise we are waiting for and that

God has shown me numerous times by prophetic dreams, that this rise is dependent upon my Vision Plan for LUNC to \$1+ passing and being implemented. If this is the case, this means the Lord has given me and us together an active role in the fulfillment of His prophecy that He has revealed. I believe the Lord has certainly led me with my plan, and it is the only plan we have that can achieve massive burns and the prices God has shown us. We've had 6 months after the 1.2% burn tax was dropped with no good volumes, utility or burns. LUNC's price has been floundering for a long time now. I believe my plan is necessary for LUNC to rise and achieve greatness as the Lord has shown us. Due to these reasons I now ask you my brothers and sisters in Christ, to pray, that if it's the Lord's will, my Vision Plan for LUNC to \$1+ will pass and be successfully implemented, that all enemies will fall to the wayside, and the Lord Jesus Christ by His Almighty power will make a way through for us to succeed. I would greatly appreciate your prayers. I am in prayer before the Lord seeking Him each day asking Him what I need to do to advance the plan and for His will for me. I have recently began reaching out to many LUNC validators putting my plan out to them, asking them for their opinions on it, so I can gauge sentiment and so they have advanced warning before my plan proceeds to vote. In the meantime I will be promoting my plan as the Lord leads me, and waiting until He leads me before putting it up for a vote. The plan itself will require 5 governance votes. The first is the most important, a signalling text proposal to approve the plan itself and its particulars. The next 3 votes will come simultaneously to approve the tax changes and tax exempting Dapps. The final governance vote will be if we are successful in achieving the 1.2% burn tax off-chain, to approve wallet whitelisting for participating exchanges. I'll post the plan flowchart in the comments section so you can see it again, it has everything explained. My plan is ready to go. I will do what I can as the Lord leads me, if it passes I will take full responsibility for its implementation, doing all I can to achieve the awesome goal. I'm asking the community for 6 months to achieve 1.2% off-chain burns, and I believe we certainly can. I wanted to share this with you my brothers and sisters. I appreciate your prayers and support. God bless you. Your brother in Jesus Christ. Christopher.

As posted on Telegram, 25/4/23 "I posted my updated and Final Vision Plan for LUNC to \$1+ on agora. You can read the whole write-up at this link: <https://classicagora.terra.money/t/final-vision-plan-for-lunc-to-1/51477>. God bless you. Christopher."

As posted on Telegram, 7/5/23 "Dear brothers and sisters, I have decided that my Final Vision Plan for LUNC to \$1+ will go up for vote in June. This is to allow the L1 Team time to complete parity in May, so they have time to help implement my proposal and nothing will hold it back if the vote is successful.

Here is the link to my proposal: <https://classic-agora.terra.money/t/final-vision-plan-for-luncto-1/51477>. I also want to share that the timing the Lord showed me on 22/4/23 for the implementation of the 1.2% burn tax (whether on-chain only or off-chain I'm not sure) that I posted about here <https://t.me/c/1620388801/145>, was indeed the month of June. I have decided to share this with you my brothers and sisters and leave it all out there.

I believe June is our time and where my proposal, Lord willing, will pass, and the tax changes will be made on-chain and the push for the off-chain 1.2% burn tax on transactions will begin there. How long that takes to succeed I do not know. I ask if you feel led to pray if it's God's will (I believe it is), that my plan will pass governance. I was shown in a dream my proposal will be successful, and I ask for your prayers all will be according to God's will. I also had an interesting dream today which I felt was relevant to me working on my plan, defending it, advocating for it and its hopeful success. In a dream I was attacked by a demon in a human form with a machete and knife. I called on Jesus to help me. I had a machete and a knife too, and we duelled. I struck his hand, arm, head, and shoulder but every strike barely opened up

his thick demon skin. He threw another machete and it struck my foot but did no damage. He lunged with his knife and got close to my neck or made contact, and said "Why didn't that hurt you?" I said, "Because you missed" (later I realised he may not have missed). He motioned as if he was going to throw his knife at me but something held him back. Then one of my slashes opened up a big gash on him. The demon said, "He helped you with that!", referring to Jesus. Then we stood still facing each other and suddenly the demon cried out, slashes appeared on its body and its face, and something shot through its face, and it screamed and collapsed to the floor. I knew the Lord had just finished my battle for me, and the dream ended. This reminded me of my efforts with this proposal as God has led me. Many enemies, lots of opposition, but I'm doing my best fighting with all I have. God delivers me as He delivered me in the dream, as I kept fighting the best I could. Then eventually, because I called on the Lord Jesus Christ, He finished my battle. I believe the Lord will finish this, and that this is of God and it will succeed according to all that He has shown us. So please pray if you feel led. My plan will be up for vote in June. June is THE month the 1.2% burn tax will be implemented, according to my dream. I will update when my plan goes for vote. God bless you my brothers and sisters in Christ. Christopher."

As posted on Telegram, 25/5/23 "Dear brothers and sisters, I have made the official 7 day countdown for my Final Vision Plan for LUNC to \$1+ proposal, which is going up for vote in 7 days on June 1st. I have also laid out the schedule of voting and key details. The first text signalling proposal to authorise the plan will go up on 1st June, if it passes on 8th June the next proposal of 1.5% on-chain tax will go up. If that passes on 15th June, it will be implemented on-chain from the next epoch (around 21st June). The plan is live from there to convince exchanges to accept the 1.2% burn tax off-chain. Please read the tweet for more details. There have been many demonic attacks coming against my plan, in the physical and spiritual. Please pray that the Lord's will be done, and His plan for His people be done, and that nothing the enemy will do can stop His good purpose. I appreciate all your support and prayers. God bless you my brothers and sisters in Christ. Christopher.

As posted on Telegram, 28/5/23 "Dear brothers and sisters, as part of the lead up of my Final Vision Plan for LUNC to \$1+ going up for vote on June 1st, I'll be doing a YouTube livestream where I will go over the plan, the voting schedule, implementation, answer common questions, and questions from the live chat. The livestream will be up to 1 to 2 hours long. Here is the link to the stream, which begins in around 44 hours (12pm AEST): <https://www.youtube.com/live/qoUBNx-uDNI?feature=share>. If you want to attend and listen live you are welcome. I appreciate all your support and prayers. God bless you. Christopher." As posted on Telegram, 30/5/23 "Thank you brothers and sisters to all who attended my Final Vision Plan for LUNC to \$1+ Proposal Livestream and for all who supported in prayer and by encouragement. The livestream went well, was 1hr 13m long, with good topics covered and good questions asked. Here is the full video for anyone who wants to see it but was not able to attend live <https://www.youtube.com/live/qoUBNx-uDNI?feature=share>. God bless you. Christopher." As posted on Telegram, 1/6/23 "Dear brothers and sisters, my Final Vision Plan for LUNC to \$1+ proposal is officially live for vote now, prop #11549. I have already voted YES with my validator so if you're staked with me you don't need to vote. Please pray the Lord's will be done and thank you for all your support. God bless you. Christopher.
https://twitter.com/ForTheCross_CH/status/1664091456561364993"

As posted on Telegram, 5/6/23 "Dear brothers and sisters, here is an update regarding the vote for my Final Vision Plan for LUNC to \$1+ proposal. It still has 3 days left on the vote,

but I see some people are getting very concerned. Let me explain the situation. I shared that the Lord gave me the month of the implementation of the 1.2% burn tax in a dream and I kept the month to myself. Later I felt led to share what I received, and that it was the month of June. I also saw my proposal passing in another dream. Now the vote is so far not going well, though not impossible to turn around. If it does not pass now, it's important for me to explain my view on the dreams received and shared. It's important to distinguish between the exact dream from God, and my or our interpretation of the dream or timing, which can be mistaken. When I was shown the month of the implementation of the 1.2% burn tax, I was shown June. I believe this was from the Lord. I did not see any mention of year. Out of hope I believed it would be this June. I also saw my proposal pass in a dream, but I was not shown specifically if this passes now, or passes at a later date. Out of hope, I believed it would be this time. I was led by God to put my proposal up on June 1st, to do a competition, a 7 day countdown, and various other guidance I received, which I obeyed and followed. If my proposal does not pass now, then I believe it will pass at a later date, and the June could be next year. I believe both dreams were from the Lord. Why would the Lord show dreams like this? The Lord knows all the reasons. I was entirely committed to passing my proposal and hoped it would pass now. I gave all of my efforts over a 70 day campaign, including my AMA, responding to hundreds of comments, every day being focused on the goal. I am completely satisfied we did well in putting this forth, in prayer and effort. If it doesn't succeed now, it means it was not ready yet. This doesn't mean the effort was not from God, or the dreams were not. They are not invalidated. If the plan does not pass now, we need to consider various realities. One is that without my plan passing, and the burn tax being implemented off-chain, there is no way to get to the prophetic prices I have shared and others have also seen, without massive burning of the LUNC supply. The enemies of God are attempting to do all they can to delay what God is planning for His people, and to resist it with all their efforts. I have seen their nonsensical attacks on my proposal, false accusations, mockery and attacks on my faith and character. I have been engaged in serious battle with enemies of God and haters of my proposal in the LUNC community. They have a huge stronghold over the chain, and carry much influence. Yet the Lord showed me LUNC will become a coin for God's people, as I shared before. I believe it. My validator has been in existence for less than 4 months, and is already in the top 10 with 3.09% VP, thanks to your support and by God's grace. This is our first attempt to pass my proposal, and our first campaign. We made great progress in this effort, even if the plan does not pass now. Though it may be difficult to accept, if the plan does not pass now we must not give up and we must push to build support and influence and pass it later. I certainly believe my proposal will pass. It may not be now. For a long time we all waited for what God showed to come to pass for LUNC. Only around 4 months ago did God reveal to me to become a validator, to help me formulate my plan, and to push for its adoption, revealing that we had to play an active role in the fulfilment of the prophecies. Before that I was just waiting and assuming it would happen on its own. But that's not the case. This is because we need to fight for this. This is a war, not a single battle. If we don't succeed on the first attempt we can't lose hope. This is about a monumental transfer of wealth to God's people, to bless them and so they will bless others and do the will of God for the days ahead. This is truly a historic thing we are fighting for. Miraculous wealth into the hands of God's people, who have journeyed in faith to receive it. The story of this victory would be recorded and this is watched by heaven, I am sure. I can see the enemies many efforts to hinder it from happening. If we need to wait another year, we need to wait another year, so be it. We have to be patient and faithful to victory. If you cannot accept this, and do not believe these things are from God, you are free to leave the group, and go in peace. I'm forcing no-one to be here. I have done everything in prayer and diligent consideration before the Lord. I am very serious about all of these matters and give you my honest words and the truth at all

times. I fear the Lord and strive to always do His will. What is fact is that God has chosen LUNC to bless His people. He has shown me the plan that is instrumental in making it happen. He showed me it will pass. If we don't succeed the first time, we already have all we need to not give up and to strive to accomplish the goal. Yesterday in a dream I saw my validator with 19.8% voting power (20% is the cap). On the 14th of June the zero commission anti-tax validators who vetoed my proposal will all be forced to 5% commission, they will lose their advantage, so we can climb faster. By the campaign we waged, we built up a lot of support. The enemy was afraid, they vetoed my proposal instead of voting no, because they wanted to ensure they blocked the proposal by the 33% veto power. Something else our effort achieved was that as my campaign began over 70 days ago, after some time dfunk felt he could put his proposals for vote, which led to the first tax increase in a long time to 0.5%, and some other good changes which were part of my proposal such as the 80/20% split and the Dapp smart contract exemption. I believe our efforts contributed to a different environment where his proposals could pass. Before that every tax proposal was getting vetoed or wouldn't even get voted on, even 0.3% tax failed. Things have really changed, and the conditions have improved. God showed me the anti-tax LUNC group spiritually as a huge monster. It's not an easy thing to overcome, and I was shown we made progress. In the scripture the Lord says some demons only come out by prayer and fasting. My point being, this is a tough battle. We may not get the win this time, but we have to keep fighting because our victory is assured if we continue forward in the strength of the Lord. We seriously did a good job. The enemies stronghold over LUNC is big. We have made good progress. But if we don't succeed now I believe we have set an important foundation for the future, and we need to keep fighting to build support, to gain power and influence, and bring the proposal back and pass it. If it is not the Lord's will now, He will bring it to pass at the right time. People who reject my proposal believe in unknown Dapps from LUNA V2 burning the supply which is a nonsensical plan, and their only other hope is a USTC re-peg. It was the peg of UST to LUNA which failed and caused the hyperinflationary minting death spiral, and having Do Kwon and TFL subject to charges of fraud by the SEC. They want to bring it back, or some variant of it, which has a myriad of issues. I was shown USTC at \$3 and \$5, so I don't believe it will be pegged at \$1. My plan on the other hand is simple and effective. I was shown Binance and Kucoin would do the 1.2% off-chain, and shown I would implement 1.5% on-chain. I believe in all these things. Nothing has changed, and I don't believe what I have shared has been invalidated, even if the proposal does not pass now. I hope you can understand the situation if the proposal does not pass now, to not lose hope. I believe without my proposal passing and being implemented, we may not see the massive prophetic prices for LUNC, as it's impossible without a massive burning of the supply. It doesn't mean we won't see movement, as I have this dream here of a move to \$0.00025 which seemed to be USTC related <https://t.me/c/1620388801/138>. But I don't believe the amazing prices like 10 cents and \$1+ will come before my plan is implemented. I believe God has given us the insight and enough information to understand what is going on. Many of you have seen what we are up against out there. As to this dream here <https://t.me/c/1620388801/107>, I believe it is not a literal one for one of the chart, but showing the major move to come. If you have any questions let me know and I'll do my best to answer them. God bless you my brothers and sisters in Christ. Thank you everyone who has supported and prayed. We are yet to see the final outcome of the vote, but I thought it was important to share this now. Your brother in Christ, Christopher.”

As posted on Telegram, 5/6/23 “Dear brothers and sisters, I was considering my older dreams about USTC and seeing the communities continued focus on wanting a USTC re-peg. I have been praying and thinking about the matter. I had been not supporting this idea due to seeing

numerous very bad proposals that wanted to mint coins, mess with the dangerous mint-burn algorithm which hyperinflated LUNC to begin with, legal risks and more. The best proposal I saw so far was Redline's but I still had issues with it, which I detailed here https://twitter.com/ForTheCross_CH/status/1650347268950880258, so I voted ABSTAIN there but did not oppose it. Now the L1TF is proposing to make a test-net to test USTC repeg ideas under safe conditions. I voted ABSTAIN on this initially, but I have since changed by vote to YES for the following reasons: I have a few prophetic dreams about USTC (formerly called UST). On 20/5/2022 I saw UST (now USTC) going from low and returning to \$1 <https://t.me/c/1620388801/54>. I posted a dream on 12/5/22 where I saw a stablecoin returning to \$1 <https://t.me/c/1620388801/48>. I saw these things before the Lord showed me about my Vision plan. I also have dreams where I saw USTC at \$3 and \$5. This would mean it was not pegged at \$1. I also saw LUNC rising to \$0.00025 with USTC leading the way and the rise seemed to be related to USTC <https://t.me/c/1620388801/138>. Based on these dreams, it seems the community succeeds in bringing back confidence to USTC, and it will return to \$1, and later over \$3 and \$5. The exact way this occurs is unknown. As LUNC and USTC are related (not pegged now), when USTC rises so does LUNC. If the community pulls off a successful USTC re-peg, even if it doesn't stay at \$1, it would mean LUNC would also rise a lot, which is good for us. Depending on the USTC plan, they can also burn LUNC. After considering the matter further, I believe I should not oppose the attempts but support them where they are done carefully and wisely. I shouldn't oppose a good thing which will benefit us. I will still vote down USTC proposals I believe are dangerous, but I am going to support the effort more in general, as based on the dreams I have received even from May last year shows there will be success there. I will continue to work towards the passing of my Final Vision Plan for LUNC to \$1+ proposal to burn LUNC, and if unsuccessful with the first attempt at vote here, we will continue to build support and bring it again later when God leads me. This was an update regarding my approach to USTC after careful consideration. God bless you. Christopher.”

As posted on Telegram, 8/6/23 “Dear brothers and sisters, my Final Vision Plan for LUNC to \$1+ proposal vote #11549 has ended. It did not pass. You can see my new post here on Twitter https://twitter.com/ForTheCross_CH/status/1666626621527425027 and previous post here <https://t.me/c/1620388801/151>. I am seeking the Lord regarding when to bring the proposal again. For now we can work on building support and influence for the next attempt. God bless you. Christopher.”

As posted on Telegram, 8/6/23 “Dear brothers and sisters, I have two dreams I want to share with you. The first was received about a week ago, in the dream I was in a factory in China holding a new type of battery. It was very light, and I remarked to a worker that it was about 3x lighter than other batteries I had felt. They agreed and said it also had 3x the amount of power. I saw these batteries were being mass produced and I knew they were very significant. That was the dream. I believe these far lighter and far more energy dense high-tech batteries will come later, making big advances in ground and air electric vehicles, drones, and robotics, and AI possible. This would be like a new industrial age having batteries with that kind of capability and would change the world significantly. The second dream I want to share was received two days ago. In the dream there was a tough spiritual battle, I and others were trying to escape from an area that enemy forces were seeking to keep us captive in. There were physical battles, distractions, and towards the final part I was with a group of people hiding in bushes trying to make a run for it. There were red birds which were from the enemy which flew through the bushes and were attacking everyone so they could not leave. I was represented by a green bird and fought the red birds, but I was losing health. I had a health

bar which almost went to zero, but I had done enough that the red birds got afraid and flew away. Now everyone was free to leave the captive area. Then I looked around and saw a large group of people sitting on the floor relieved. The men all in unison started to sing this song, there was music in the background: "Give my glory my glory, to the King of Kings, Give my glory my glory, to the King of Kings, Give my glory my glory, to the King of Kings." After this a powerful and deep voice sounded from heaven saying, "I AM". It was the Lord God. Then He said, "Does any of you have a sword?" The group responded, I'm not sure what they said but I responded with, "Yes I do", while thinking of the sword of the Spirit, as I had no physical sword on me in the dream. Then God said, "Point your swords at the target. For financial windfall and distant lands. In less than 12 hours, this deal will be done!" That was what He said as the dream ended. His voice was powerful, rich, and awesome. I considered these things and the next day prayed and asked the Lord what the deal was that He spoke about. I received a dream that it was in relation to the overall crypto market, and received the impression it was in relation to the market going up. This goes with the Lord's words. I believe pointing our swords at the target is about praying for the financial deliverance of the Lord, and for His plans for us to be fulfilled, whether that includes moving locations, or whatever His will is for us. As to what the deal is I don't know, but it was a done deal. If it's 12 literal hours I don't know, as that has already passed by. I wanted to share this encouraging dream with you my brothers and sisters in Christ. The Lord Jesus Christ is for us. God bless you. Christopher.”

As posted on Telegram, 16/6/23 “Dear brothers and sisters, I have two dreams to share that I believe were from the Lord. The second dream is very confronting, please be warned. In the first dream received on 14/6/23, I heard a voice saying words very similar to this, "The devil is trying to delay as long as possible you receiving the prophesied wealth, because of the impact for God's kingdom you will make once you receive it." That was the dream. I knew this addressed my wife and I, and I believe it also applies to all God's faithful children who are led by Him in patiently waiting for these prophesied blessings. With such financial provision we will be able to do many good works before the Lord and make needed preparations. This dream confirms the need to pray against the schemes of the enemy and for the Lord's financial deliverance to come speedily <https://t.me/c/1620388801/156>. Note that the devil can only hope to attempt to delay what God has planned for His people, but cannot stop it. All will occur in God's timing. In the second dream received on 15/6/23, I was watching a TV (I don't watch TV) and a show was on that was very upsetting. It was still daylight and it was an unrestricted live prime-time major show. It was like a burlesque with many performers on a big stage, a huge audience, with the camera zooming in on them as they were singing songs. There were many transgender performers, males dressed as females, and a few women. The transgender men were completely naked in their pink and rainbow outfits, and were visibly complete eunuchs, and there were many naked breasts showing from men with implants and from the few women. It was a complete show of hell on the screen, of detestable sexual immorality. I turned away from the screen as they all began to sing the next song, an Australian classic to the cheering crowd, "We are one, but we are many, and from all the lands on earth we come, we'll share a dream and sing with one voice, I am, you are, we are Australian." Then the dream ended. When I woke up I thought it was a demonic attack at first, but I realised the Lord was showing me what is coming. Their song was particular to Australia, and also showing the powerfully evil "equality" and "unity" propaganda of the devil will be cheered for, in the push for the world to descend into abject degeneracy. The Lord has given me similar dreams before about the terrible and perverse sexual immorality that is coming. In one dream I saw the sexually immoral LGBT+ crowd killing and crucifying Christians while calling them "Haters". The Lord has shown me the sexual

immorality movement's push is going for children and to normalise paedophilia and child marriage, and to make heterosexuality and faithful marriage between a man and a woman as God created and intended, into an abnormality. This dream I share today is a warning of the days ahead. We are in the last days. When the fullness of these abominations come close, the end and God's judgement will be at the door. We as Christians must separate ourselves from such wickedness, as society will continually embrace it and it will grow much worse from what it is now, and God's faithful need to live together and protect each other and their families and children. The financial blessings that God will deliver are one part of our lives in our Lord Jesus Christ. Righteousness, holiness, obedience and faithfulness to Jesus and His word are vital. We know about the falling away. Who is going to stay faithful to Jesus and His word under the withering attacks of the world and their persecution? God's faithful and chosen will. Let us be counted among them. Let us do our best to do the will of our God, and wait patiently, and when the Lord delivers us financially, to seek Him with all our hearts and minds and souls and strength to do His will, and to do our part for God's kingdom, and to fulfil our destiny in the Lord. Let each person be taught and be led by our Lord God Jesus Christ and to follow the Holy Spirit. We don't know what may happen in our lives, even tomorrow. Make sure you're doing right before the Lord, that whatever may come you will have confidence in Him. Let us thank God the Father, Jesus Christ the Son of God, and the Holy Spirit, our Almighty God who is One, for blessing us with the knowledge of the truth and for His salvation! Please seek the Lord our Saviour Jesus Christ. God bless you. Your brother in Christ, Christopher.”

As posted on Telegram, 17/6/23 “I had a dream yesterday about a small bear. It seemed to be attached on someone's leg. Then this morning I had a confirmation about the dream. A small bear could be more downward movement but not excessive, and attached on the leg may mean it's difficult to shake off for a while. As for me I'm not selling my LUNC holdings and adding more when I can. Please seek the Lord. God bless you. Christopher.”

As posted on Telegram, 8/7/23 “Dear brothers and sisters, I have some dreams to share with you. The first is from my wife, who had a dream while my vote for my Final Vision Plan for LUNC to \$1+ was on-going, and was not looking as if it would pass. She had a spiritual battle and called on Jesus. Then came another level of attack and she called on Jesus again. The attack was defeated, and a secret entrance opened and she went inside and saw numerous options she believed were to do with my plan. The first one she saw was June 1st. She went another way to look for more options but that was the wrong way and time was running out. She came back just in time to select one, and she thought it was the June 1st option, the first one she had seen initially, and the dream ended. As I shared earlier, the Lord led me to bring my plan for vote on June 1st, preceded by a 7 day countdown and a competition, which I did. I was shown in "June" my proposal would pass. I believe my wife's dream is a confirmation of what I intend, to bring my proposal up for vote again next year, on June 1st, unless the Lord leads me otherwise to bring it earlier. I believe the conditions have to be right for the proposal to succeed. I believe in what the Lord showed me about the 1.5% on-chain tax passing and the 1.2% off-chain burn being implemented. Patience is essential. The rewards for faith and steadfastness in our LUNC investments will be great and have many positive consequences we cannot understand now. In another dream I received on 21/6/23, I saw a white plate handed to me and on it was a bread roll in halves, with lovely pleasant toppings on each half of the roll. I knew the roll represented the 0.5% tax. I gladly took the plate and the dream ended. The roll representing the 0.5% tax was prepared and handed to me on a platter. I don't know exactly what it means. It could be that the 0.5% tax on-chain was handed to us on a platter, which passed during my campaign for my Final Vision Plan for LUNC to

\$1+, which I believe helped contribute to its passing. But as I had this dream on 21st June, almost 2 weeks after my proposal did not pass, and around a month since the 0.5% tax was implemented on-chain, it could be referring to something else new about the 0.5% tax, perhaps off-chain burns. There are two people who have contacted me who have been working on a 0.5% off-chain burn tax proposal, and perhaps that goes well and meets success, I am not sure. I will be ready to do as the Lord leads me with regard to these things. Last night 7/8/23 as I was about to go to sleep I heard the horse race trumpet sound in my mind. This is the same sound I heard from this dream here <https://t.me/c/1620388801/104>. I had not been thinking about this at all for some time. I believe this is a reminder of our coming huge bull run/horse race that I have been shown about. Let's be patient until it arrives and is fully under way. As to the small bear dream I had recently, this may be in play until we get to the bigger bull run really taking off <https://t.me/c/1749237879/21972>. My validator is having steady growth, with 3.29% voting power. We're 11th at the moment, with validator positions moving around. Lord willing if we can continue a steady rate of growth we will get to where we need to be in time, and gain more influence in governance. Thank you for all your support. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, in a dream this morning 30/7/23 I saw clearly USTC at \$0.033 (3.3 cents). That was all. This is a 2.1x increase from its current price. An increase of this would also lead to an increase for LUNC. It could be a reference to this dream from earlier <https://t.me/c/1620388801/138>, signalling some USTC related move which also leads to a rise in LUNC. Please seek the Lord. God bless you. Christopher.”

As posted on Telegram, 7/8/23 “Dear brothers and sisters, I wanted to share a post I made on Twitter and in my LUNC validator group: "It's been 6 months since I started my LUNC validator JESUSisLORD on 7/2/23. In that time we have reached over 3% VP and are in the top 10 validators, and are gradually gaining more positive influence in governance. During this time I brought forward important proposals, one to increase the burn tax and the pursuit of off-chain burns by my Vision Plan, another to increase funding to the community pool and oracle pool by a gas fee increase, and one to reduce the undelegation period to 14 days. Unfortunately none were successful at this stage, which highlights the difficulty of getting good proposals to pass governance. Despite this, good changes were made to benefit LUNC, with the tax increase to 0.5%, the 80/20% funding split (I previously proposed 75/25% which didn't pass), chain parity, and the increased funding to the oracle pool set to begin at the next chain upgrade. I will continue to seek to fulfil my validator roadmap and the righteous Christian vision for LUNC as God leads me

https://twitter.com/ForTheCross_CH/status/1625562143574872064 During this time I also voted on many governance proposals put forward by other members of the community, after careful consideration, and I communicate the reasons for my votes to my delegates in my Telegram group, and often on Twitter also. This is part of my commitment to communicate with my delegates. Delegates are at any time free to override my vote by manually voting for their staked portion, or to redelegate to another validator. I take this responsibility as a steward of LUNC seriously and do what I believe is in the best interests of the chain, for its security and the benefit of its investors, sometimes needing to make difficult decisions, praying and seeking God to guide me. My validator is noncustodial, with the highest tier enterprise plan powered by Allnodes, with high security, decentralisation, and a maximum 5% commission. I look forward to continued growth for LUNC, to make positive change, and the fulfilment of the prophetic dreams the Lord has shown me. Thank you to everyone who has supported by staking their LUNC with me. Thank you for everyone's prayers. I will continue forward patiently and steadfastly in this role the Lord has led me to, and look

forward to the success of LUNC in the years ahead. May God bless you, in Jesus Christ name. Christopher. JESUSisLORD † LUNC Validator."

"I also want to share a dream I had today 7/8/23, I saw a developer implanting an airdrop mechanism within the code, a hack, an exploit. This is a confirmation of a dream I had around a month ago, where I saw LUNC trading at \$80 (amazing price), and there was an exploit on the chain where \$44M was minted and stolen, and I was angry hearing about it in the dream. I do not know if this can be avoided, or is a warning so that actions could be taken. In any case I wanted to share, and I will push initiatives to secure the chain such as auditing code when the chain has more funding, and resisting those the Lord warns me against. Aside from this I wanted to thank you my brothers and sisters in Christ for staying with me, for being patient while we wait for what the Lord has revealed, and not losing heart. There are many enemies of God in LUNC, with much influence, seeking to do harm and cause chaos, it's a big battle to gain more influence over the chain, and we are making gradual progress thank the Lord. What the Lord has revealed will come to pass in time. I will continue to do my best as the Lord leads me, seeking Him to guide and strengthen me. Thank you for all your support, understanding, prayer and encouragement. God bless you in Jesus Christ name. Your brother in Christ, Christopher."

As posted on Telegram, "Dear brothers sisters, I have two dreams I want to share with you, received today 20/8/2023. The first dream is not directly about crypto or LUNC. The dream started and I was a taxi driver who had finished dropping off a customer. I was in my house going in, and he was outside at the front door speaking to me. He had given me 2 circular gold pieces, a centimetre in diameter, which were already in my house. He asked me reluctantly, unsure, whether what he had given me was too much, saying "It was only a 50 kilometre trip?". I asked him, "Were those 100% gold?" He said "Yes". I then thought he had given me too much, and said, "I'll give you 500 kilometres, and I'll give you back one of the gold pieces, and let me write you a receipt". He smiled and was very happy, and as I turned around to go further into the house to get the gold piece and a receipt, he immediately started singing. He sung in a heavenly voice with orchestral instruments and an uplifting anointing from heaven. He sung about the beauty and excellence of good works before God, how they were praiseworthy, and sung of the goodness of the Lord. As I was getting ready to take the one piece of gold back with the receipt, I sung with him simultaneously the last line of his song, as led by the Holy Spirit, which were thanks and praises and love to the Lord Jesus Christ, my heart full of the joy of the Lord as the dream ended. It was an amazing dream and I felt the great goodness of God. God had sent an angel in the dream to test me, and I did what was good (thank God) and heard the angels heavenly praise and joined in. It was a lovely dream showing how important it is to deal fairly, with righteousness, not taking unfair advantage of others if the opportunity arises, and the blessedness of good works before the Lord our God. This is encouragement to deal in a righteous manner before God to all, especially when it comes to finances. While this dream was not about crypto or LUNC directly, it encouraged me knowing God's close presence and that He is in control, is watching all things, and will certainly manifest His word and prophecy. After this dream I had another dream where I saw my validator was suddenly in the 10% range voting power. I was shocked and I spoke in the dream how I was resolved to seek to fulfil God's plan for LUNC, not my plan, but God's. This was the second dream. I believe the Vision Plan I proposed for vote on June 1st was led by God, as both the 1.5% on-chain tax and 1.2% off chain burn tax being accepted were by prophetic revelation from God. Therefore I will continue to seek the Lord and diligently work to fulfil His plan for LUNC, as He leads me. God bless you my brothers and sisters in Christ. Your brother, Christopher."

As posted on Telegram, “Dear brothers and sisters, this morning 6/9/23 I had a dream where I saw one of the enemies of LUNC that I know of, being upset that one of their evil plots was blocked or didn't work, and he was proclaiming to his other evil friends that this was due to, "The enemies prayers". This is an important dream God gave me, showing directly that our prayers before God about LUNC are very important, and we all have something to offer. It may not always seem like it, but prayer accomplishes much that we do not see. James 5:16 "...The effective, fervent prayer of a righteous man avails much." I ask you my brethren to pray with me against the forces of darkness which continually work to destroy LUNC, to delay its rise, to hope to steal from it and God's people, who devise evil plots and seek to sway governance and deceive the community, who diligently work to oppose the revelation of God about LUNC for His faithful people, and God's plan for LUNC. Please pray against these evil ones, their attacks and their influence and control over LUNC. Pray however God leads you in your heart, but know that your prayers are greatly appreciated and are treasured. God bless you my brothers and sisters in Christ. Your brother, Christopher.”

As posted on Telegram, 30/9/23 “Dear brothers and sisters, I have a few dreams to share. In a dream I received a few days ago I saw a section of the LUNC chart and the price was sideways and then had declined to \$0.000047. I prayed for confirmation and today 30/9/23 in a dream I saw the LUNC price had declined to \$0.000047 and I remarked how I should have shared the dream. I also saw around the time of the first dream, in another brief dream LUNC was at \$0.00023, which is similar to the price I saw in this dream

<https://t.me/c/1620388801/138>. I had a dream on 21/8/23 where I saw Do Kwon and he looked anxious, then I saw a man representing LUNA sinking down towards the bottom of a lake. The dream repeated right after and I saw a man representing LUNA again sinking down towards the bottom of a lake. I assume this is bad news for LUNA and subsequent bad price movement, but I don't know the timing. I also had a dream about a month ago where I saw a price for LUNA of \$16. This is a big increase from its current price of \$0.50. While LUNA may have its own run, I have been warned against investing in it from a long time ago <https://t.me/c/1620388801/53>, so keep that in mind. I am focused on LUNC.

On 24/8/23 I had a dream where I saw numerous companies were offering discounts on their products if people paid in LUNC. This would help promote their products but also LUNC, and shows about LUNC's future utility for purchases. I posted about this earlier but if you didn't see, on 26/9/23 I had a dream where I saw CZ and he was mad at LUNC, though I wasn't sure what caused it <https://t.me/JESUSisLORDValidator/181>. Please seek the Lord Jesus Christ, and regarding the sequence and timing. I am waiting patiently for the rises in LUNC the Lord has shown, not selling my holdings but acquiring more LUNC when I can. If there is a drop soon I will keep looking to acquire more LUNC and stake it. When the massive bull run takes off as the Lord has shown me <https://t.me/c/1749237879/17878>, we will see great improvement, and staking even with the same APY will bring much bigger returns due to the price increases. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, this morning 1/10/23 in a dream I saw LUNC was up in green and I saw 593%. If from current price (I don't know when exactly the move will start) that would be a new price of around \$0.00044. God is reminding about the coming good move for LUNC, let's patiently wait for it. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I have a dream I want to share that I received today 12/10/23. In the dream I was a passenger in a van which arrived at a building. I went to quickly get my possessions out and saw I had numerous books which I put on the ground, 10 in total. I saw that the building I was at was a Palestinian support centre, and several members of the group were outside nearby. I looked down at the books I had put out

and saw they were all books that were for Israel, and against the Palestinians. The books were favourable to Israel and their right to their land. I saw also there were numerous faces of Jewish children on the front of the books. I then heard the Palestinian group members start screaming and yelling furiously as they saw the books, being enraged about what they saw. I knew the books were from God and were a message to the Palestinians that God supports Israel. I knew God had sent me to place the books before them so they could see it as a testimony to them of God's love and support for Israel. The number 10 (the number of books) is a significant number in the Bible, carrying weight behind the message given by God. That was the dream I wanted to share. I believe God gave me this dream to reiterate His word in scripture towards His people Israel, the Jews, who despite being estranged from Him are subject to the prophetic promise of their redemption: Zechariah 12:9-10 "It shall be in that day that I will seek to destroy all the nations that come against Jerusalem. 10 "And I will pour on the house of David and on the inhabitants of Jerusalem the Spirit of grace and supplication; then they will look on Me whom they pierced. Yes, they will mourn for Him as one mourns for his only son, and grieve for Him as one grieves for a firstborn." Especially in these days, let this dream be a reminder to us all of God's love and favour towards Israel, and for us to pray for their people in this time of their suffering a heinous and vile attack from Islamic terrorists, for God's deliverance for them and their children, and for their salvation in Jesus Christ. God bless you. Christopher.”

As posted on Telegram, “Dear brothers and sisters, I had a dream this morning 23/10/23 where I saw Edward Kim (former Terra Rebels member who helped bring staking and the burn tax) commenting that the blacklisting proposal opened up problems for the blockchain. That was the dream. I voted VETO on that proposal and spoke against it strongly, but it still passed. Another LUNC developer Inon-Man has warned it could cause issues as it requires numerous source code changes. I will look to work against the proposal as the Lord leads me. God bless you. Christopher.”

As posted on Telegram, “As I was waking up this morning 28/10/23 out of a dream I heard the words, "A big rise". Hopefully this will be very soon. God bless you. Christopher.” As posted on Telegram, 30/10/23 “My proposal #11849 to stop blacklisting did not pass and was rejected, though it made quorum <https://station.terraclassic.community/proposal/columbus-5/11849>. Allnodes was the deciding vote who again supported blacklisting voting no, a big mistake, and strongly criticised me for bringing a re-vote saying it was an abuse of governance and the communities will, a completely unfair and very wrong statement. They have unfortunately voted against or not even cast a vote for every single proposal I have brought to vote, including the Vision Plan for the 1.2% burn tax as God showed me. I cannot do anything more about the blacklisting, and what will happen will unfold. You can see the dream I shared warning about it here <https://t.me/c/1749237879/23956?thread=23833>. I will continue to do as the Lord leads me. In time Lord willing as He has shown me, my validator will gain more voting power and I will be able to help put in place the Lord's plan for LUNC as He shows me. Thank you everyone for your support. God bless you. Christopher.”

As posted on Telegram, 7/11/23 “Dear brothers and sisters, I have several prophetic dreams I want to share with you about war that I received in the last few months. In one dream I was in Syria and it seemed that the government had been conquered, and around me were allied western troops, and many Israeli soldiers. I saw as the Israeli soldiers walked past, males and females, their faces with fatigue and determination, and I was strongly moved emotionally for them and by their righteous cause. I then heard about preparations for defence as the enemy was going to attack. I thought the enemy was Russia. I asked to join the allied army to fight

with them against the enemy and was accepted, and the dream ended. In another dream I was outside of Melbourne Australia, and I saw several hundred allied Polish soldiers moving towards the city to set up defence. I knew China was shortly coming to attack the city. I saw inside an Australian military camp and they were appealing for the EU to send soldiers to help repel the invasion. In another dream I was in Melbourne and knew the city was under attack and was rushing to ask people off the street to come and help defend the city. I knew it was Russia and China who were attacking, and I knew the defence at Melbourne would be successful, and I was earnestly seeking out volunteers to help defend the city. In another dream I was part of allied defences in Melbourne and seeing waves of Chinese troops attacking, with also dark skinned troops in different uniforms. I heard someone say, "They say the city has already been given to China", I saw an official document on the ground with signatures, purporting to show the city being given to China by a traitorous official. The Australian soldiers paid this no regard. Then I saw Chinese and other dark skinned officials in parade attire with medals walking proudly towards us with Australian hostages in front, as if they were coming to lay claim and take over, but when they came close they were opened fire on, and the dream ended. I had another dream where I heard about Putin being overthrown in a coup. This goes with my prior dream of "Soviet Leader Overthrown" <https://t.me/c/1620388801/42>. Further outbreak of war is coming. These go with the other dreams I have been shown of war which you can search on the main page or my YouTube. I don't know the timing of when these things will be. Please seek the Lord Jesus Christ. God bless you. Christopher.”

As posted on Telegram, 10/11/23 “Dear brothers and sisters, I wanted to share this here as well as my validator Telegram <https://t.me/JESUSisLORDValidator>, so you are aware of coming changes to all validators minimum commissions including my own. Initially validators could set their own commissions freely, then they implemented 5% minimum commission, now they are going to implement a dynamic commission based on voting power. I have voted ABSTAIN on proposal #11874, which is a software upgrade and chain halt to occur on 20th November to incorporate the dynamic commission module which previously passed governance (prop #11738). The dynamic commission proposal (#11738) passed by 83% YES and I was one of only three validators to vote NO on the proposal, as I believe validators should be free to set their own commissions as they please in accordance with free market principles <https://t.me/JESUSisLORDValidator/171>. As the dynamic commission proposal passed, and this is for the implementation of it, I voted ABSTAIN because the community already overwhelmingly decided to implement this change, and the change is not a security risk or dangerous to the chain whereby I would vote against it even if a prior proposal passed. If this software proposal passes, and it will, this means is that all validators minimum commission will be set automatically based on their voting power, the higher voting power you have, the more your minimum commission. My commission is 5%, which is my maximum under the current chain rules, and I planned for this to be my maximum continually, and 5% as God showed me in a dream is a fair amount. With the dynamic commission my minimum commission would be automatically raised to 8%, and continue to increase as I grow in voting power, with a cap of 20%. The formula is $(VP - 0.5) \times (2 + VP/10)$. While I did not support the dynamic commission, it may have effects which will benefit my validator. I have seen in two dreams from the Lord the dynamic commission passing and being in effect, and my validator was 3rd on the list, it had caused big changes in the validator ranking. I support removing dynamic commission in the future, but things will have to play out for some time before there will be any consensus to overturn the proposal. If you want to continue to support me and help me gain higher voting power to fulfil the Lord's plan for LUNC as He shows me, you are welcome to keep staking with me even

though my commission rate will automatically rise as my voting power does, being set by the protocol rules. If you want to redelegate and go stake with a lower commission smaller validator you are free to do so also. I hope this explains the situation for the changes coming to validator commissions on the 20th of November. Let me know if you have any questions. Thank you for all your support. God bless you. Christopher.”

As posted on Telegram, 11/11/23 “Dear brothers and sisters, I have two dreams I want to share with you. The first I received yesterday 10/11/23, and in the dream I checked my phone to see the crypto prices and saw BTC was up significantly, and I was shocked to see ETN at \$0.53. I immediately went to try to sell part of my ETN. That was the dream. This is a reminder from the Lord about ETN, and I believe it will do well during this major bull run, as I also discussed here <https://t.me/c/1749237879/17553>. I am still focused on LUNC as God led me, but I have some ETN also as I mentioned before <https://t.me/c/1749237879/23491>. In a dream this morning 11/11/23 I was with my wife and I checked my phone to see the crypto prices and saw LUNC was at \$0.000445. I was surprised as I thought it happened quickly, and I was happy. Then the scene changed and I saw my phone with the LUNC price written in green, changing rapidly up into cents and into dollars and I saw a number that I recall was \$169. I was shocked it was that high and I said to my wife, "Remember that number". Then I saw the price quickly go to zero or near zero and the dream ended. I have an earlier dream where I saw the LUNC overall move trajectory going way up before going way down very low. In that dream I saw a "10" on the chart at the upper portion of the move (though not at the top), but I didn't see a dollar sign, <https://t.me/c/1749237879/11194?thread=11193>, so the interpretation was not certain. I believe that seeing a 10 without a dollar sign may have had a different meaning than \$10, yet in my dream today I saw a clear dollar sign next to the figure I recall as \$169, before the drop to zero. This is a further and clearer revelation of the move. I believe we will see LUNC's amazing run during this major bull run, even up to \$169, before the move to zero. Major bull runs can last some time, and God will put into place what is needed to achieve this. We will see these amazing things and receive these blessings from the Lord Jesus Christ. The Lord is encouraging us about what is ahead. Also, here is my latest dreams PDF with all posted dreams up-to-date to 11/11/23, so you can have a backup copy of all dreams to review, as the last version is over one year old. God bless you my brothers and sisters in Christ. Christopher.”

In a dream this morning 7/10/22 I saw LUNC at \$0.000205 or so, and I was excited and expecting a big breakout move upwards. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters I have some dreams I want to share received today 26/10/22. In one dream I saw LUNC move up to \$0.00031 area and then crash very severely. It went lower than \$0.0002 and I started buying, and it went even lower than I was expecting. I prayed for confirmation and later received a dream where I saw a LUNC chart like this (see comments), where it seemed to top out around \$0.00035 area then crash very hard down to \$0.000074 area. Yesterday in a dream I heard about the Lord bringing LUNC back down due to people complaining. I believe this is true and was confirmed to me today, as \$0.000074 is a complete retracement of the move we had. This also goes with this earlier dream I have of LUNC trading at \$0.000072 and taking off upwards from there <https://t.me/c/1749237879/10985?thread=10238>. Regarding the \$0.0002 area I believe we will go down past it, and my dreams about increase from that area may be on the way up from lower prices. Prepare to hold or according to how the Lord leads you to be ready to buy

more down at the \$0.00007 area. It's an opportunity to get cheap LUNC again before the real take off begins. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, since the last post I made I have been seeking the Lord regarding the major LUNC decline I saw and the timing. In a dream today 30/10/22 I saw a LUNC chart like this (see comments). The price came down from an unknown high that was out of view (off the screen), then had a bounce before continuing lower. I believe the image I posted in my last post <https://t.me/c/1749237879/14784?thread=14783> was the tail end of this chart I saw today. This means we still have a significant rise ahead for LUNC before the major crash to \$0.000074. This is good news. This brings me back to this earlier post and chart I shared, showing a major LUNC spike to at least 1.5 cents, a crash to zero, and a rise up to 1.5 cents more gradually <https://t.me/c/1620388801/58>. Also I was told about "Pump and dump" here <https://t.me/c/1620388801/69>. I believe with my bear dream <https://t.me/c/1620388801/93> and my last post, the Lord was showing us that LUNC will have a major serious decline, and He will bring it back down, but thankfully we are notified about these things in advance, and LUNC will go up first before the crash, giving us a great opportunity to exit and buy again later when it's low. I believe we will head upwards first for a good move. I don't know where this move tops out, but it may be in line with previous expectations. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 6/11/22, right before I woke up I heard a horse racing trumpeting noise very clearly and loudly, which signals the imminent start of a race. I found a video with exactly the tune I heard <https://youtu.be/Ob9NiVSuRA0>. I believe we are about to start our run/race, and I believe this is an announcement and encouragement of the beginning of a big LUNC upwards move. Please seek the Lord Jesus Christ. God bless you. Christopher.

Someone asked about whether Coinbase will list LUNC, "Yes they will I had a dream they would on 7/10/22. I forgot to post about it. Thank you."

I had a dream this morning 10/11/22 of seeing BTC at \$9,800. I saw LUNC had declined but it was not at \$0.000074 or even under \$0.00010. I believe this image may be playing out now, the one with the dip before the bull run <https://t.me/c/1749237879/7536?single&thread=7534>. I believe the race is very soon about to start, but before then we may see more decline. I'm just going to try to buy more LUNC whenever I can and wait for the race to start. Please seek the Lord Jesus Christ. God bless you. Christopher.

12/11/22 A while back, maybe one month ago, I had a dream of seeing Kucoin, my account on the exchange and saw written "Serious Warning". I prayed about it, seeking confirmation or more explanation but so far haven't received anything further about it, so I wasn't sure about sharing the dream. At this time I am keeping most of my LUNC off exchange. Please seek the Lord and do as you are led. I think it's good to be cautious and keep the bulk of your funds off exchanges. I saw how FTX tweeted, like all the others who failed in similar ways, that they were safe, assets are fine etc, until it was revealed they weren't and user funds are likely all gone. We should exercise wisdom, especially in cases where we do not hear directly from the Lord about a matter.

Dear brothers and sisters, this morning 16/11/22 I received a dream and vision I want to share with you. The first, in the dream I saw a NATO general announcing "Boots on the ground" to protect NATO countries and Europe, and to contain Russian aggression. I knew this meant

war and in the dream I wondered how crypto was doing and I saw BTC at 24k and LUNC was up. That was the dream. I don't know if what happened today with the missiles striking in Poland will be it, or if there will be something more. Later I had a vision where I saw a horse racetrack. I was standing on the grass track. I saw ahead was the metal gates where the race begins from, and the horses with different coloured markings and their jockeys atop, and every horse was loaded in the starting gate. A few seconds passed as I watched them and I knew the race was imminently about to begin, then the vision ended. Please seek the Lord Jesus Christ. God bless you. Christopher.

In a vision today 30/11/22 I saw this chart which I knew was for LUNC. The impression I got was that the next spike will be big and take us to a new level. I'm not sure if this is part of a bigger overall move or not. I felt it was an encouragement that we will see a big move in LUNC soon. Please seek the Lord. God bless you. Christopher.

Dear brothers and sisters, this morning 5/12/22 I had a dream where I saw an overall chart for LUNC (as pictured). I knew it was showing the whole of the move we already had from \$0.00008, plus it had an important part at the end. What it showed is that I believe we are right at the part before an imminent vertical rise upwards in LUNC. I saw the rise approaching towards the previous top we had (\$0.0006), but it had not got there yet. This was a great dream from the Lord and very encouraging, we should be about to take off very soon. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, yesterday 6/12/22 I saw in a vision a continuation of the chart I posted on 5/12/22. The chart was extended, showing the vertical spike continued significantly higher than our previous high (\$0.0006), had a correction period then took off again upwards very steeply (see the photo). I didn't see what came after that. I believe this was from the Lord and as confirmation consider this post from 17th September, where I saw in a dream a very similar chart, which I felt was very soon, was a long upward move, and was going higher than \$0.0006 <https://t.me/c/1749237879/12904?thread=12464>. I believe we will have our great LUNC run quite soon, praise the Lord. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, on 12/12/22 I had a dream where I heard the words, "A plethora of burns", which I believe was referring to LUNC burns. To me this implies rapid burning or can also be burns from a variety of sources. I also had a dream where I saw a map from overhead showing that Russia lost their control of Crimea, and I heard a voice saying this was due to "Increased shipments of western artillery". I saw how the artillery was placed on the map and saw Ukraine's control expand, and Russia was expelled from Crimea. I haven't received anything recently about crypto, and I am still waiting patiently for the LUNC rise to begin. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I had a couple of dreams both about two months ago. I have been pondering them since that time and have decided now to share them. In the first dream I saw a tweet from Russian Foreign Minister Sergey Lavrov which said "I am going home in a body bag". I believe this was a prophetic dream that he will die overseas and be returned to Russia. In the other dream I saw Do Kwon being surrounded by men and either arrested or attacked. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I want to share some recent dreams I received. This morning 22/12/22 I saw a chart which looked like this (see image below), showing a steep dip that

went off the screen but came back up not long after to where it was. I didn't see exactly, but I believe it could be a LUNC chart as that is what I am following closely. If this is a shorter term fulfillment there might be a temporary spike downwards in the LUNC price, before quickly recovering. This could occur before we get our awaited for big rise. I am not selling anything, just buying more LUNC as I can. Later this morning I saw in a dream LUNC rising seemingly very easily to \$0.05 (5 cents). It felt like it happened so fast with little resistance. Also another dream I want to share, on 1/12/22 I heard in a dream, "Tourists from all over the world come to see the surrender at Iziun". Iziun is a Ukrainian city in the east recaptured from Russia in the Kharkiv offensive. I considered this dream, praying for further insight. Yesterday 21/12/22 I saw in a dream President Zelensky in Iziun at a big open concrete area, set up with flags and pillars as a celebration. Zelensky was talking about inviting numerous different world leaders to Iziun. That was the dream. I believe the dreams show Ukrainian victory over Russia and celebration will take place in Iziun. Please seek the Lord Jesus Christ. God bless you. Christopher.

Hi everyone, today 25/12/22 I had a dream where I saw on an exchange LUNC crashing sharply, I thought it was a flash crash and I saw the price at \$0.0000X. I did not see what price it came down from. I don't know the timing of this, it may be related to the previous image I saw posted here <https://t.me/c/1749237879/16675>. As I mentioned before I am looking for a big move up in LUNC very soon, but possibly a temporary sharp drop before that. Please seek the Lord Jesus Christ. Also Merry Christmas to all, and praise God for His great salvation in Jesus Christ our Lord and Saviour! God bless you. Christopher.

Dear brothers and sisters, this morning 29/12/22 in a dream I was in a room with tables and I was seated at one of them. A laptop was open before me with a price widget at the top of the screen. I saw BTC was at \$88,000. Next to it I saw LUNC was at \$267 at the same time. I was shocked and exclaimed, "LUNC is at \$267!" A woman sitting nearby heard me and got angry and jealous as she assumed I owned LUNC. I looked closer at the screen and saw there was a third coin on the widget. It was Electroneum (ETN). I looked to see it's price and my view zoomed in, but it was covered by a graphic and was hidden. I knew it was being kept a secret at this time by the Lord. This dream shows the amazing long term price of LUNC. I don't know the timing it could be years away. The jealous and angry woman is a reminder to be discreet about your LUNC holdings. Here are links to previous dreams I posted in the last thread if you haven't seen

them: <https://t.me/c/1749237879/16476?thread=16274>. <https://t.me/c/1749237879/16516?thread=16274>. <https://t.me/c/1749237879/16675?thread=16274>. <https://t.me/c/1749237879/16731?thread=16274>. <https://t.me/c/1749237879/16776?thread=16274>.

Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 31/12/22, I saw a LUNC price of \$0.00048. Then later I had a dream where I was in front of a group of people and I was telling them about my dream, that the next LUNC target is \$0.00048. I told them if you have any spare money go buy LUNC now. Then about 7 or 8 of them ran off to their computers to go buy LUNC. That was the dream. It won't be long before LUNC starts rising. I believe \$0.00048 is only part of the way up of this big move here <https://t.me/c/1620388801/107>. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, this morning 3/1/23 I saw in a dream LUNC immediately exploding upwards vertically. I was looking at the chart with my wife shocked and amazed saying, "This is it! It's finally happening!" LUNC blasted upwards with a slight angle and

kept going a long way and I saw it hit \$0.001 at least, as the dream ended. I believe I saw the first leg of this move of LUNC God revealed here <https://t.me/c/1620388801/107>. It was so fun to watch LUNC go up like this, it was an amazing thing to behold the prophecy unfolding before our eyes. I believe this is very close. Here is a dream I posted to the last thread if you have not seen it <https://t.me/c/1749237879/16916?thread=16835>.

Please seek the Lord Jesus Christ. Praise His holy name. God bless you. Christopher.

Dear brothers and sisters in a dream this morning 10/1/23 I was looking at the LUNC chart and it looked normal. Then I had a brief vision of it spiking up with a big green candle. Then I looked at the chart and it was still normal, and I realised my phone was on airplane mode. I took it off and when the internet loaded back on the LUNC chart was up huge in green at \$0.00032. This was an encouraging dream. I believe we are going to have our big run very soon and the LUNC drop I saw is a later sequence. I also had a dream where I saw a cartoon donkey which looked like it was sneezing, and it was saying DRAFFFFFFFFF. It was about to say the full word DRAFT, but a lion bit it on its behind, and the donkey turned around scared with a weird grin, not wanting to be bitten again. I believe this could show the democrats over a period of time calling for a draft due to the outbreak of war which is coming (see my videos and previous posts), and this is averted at the last moment before it is implemented. The lion could represent Jesus or Christians ("The righteous are bold as a lion", Proverbs 28:1). Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I had a dream on 8/1/23 where I saw a LUNC chart hitting \$0.40 (40 cents) then coming back down gradually sideways for quite a while to \$0.10 (10 cents). You can see the image in the comments section. I only saw part of the chart. I believe this is one part of the big move of LUNC coming soon. I am going to put together a rough sequence in this post. If you consider this post <https://t.me/c/1620388801/109> I saw the initial big move went to at least \$0.001. If you look at this post <https://t.me/c/1620388801/107> which shows the trajectory of the next big move, it could be that approaching the first top (not necessarily the top) is \$0.004. Then the chart corrects down to \$0.001, before the next huge leg up. Why do I say \$0.004? Well on the 14th of May I saw LUNC at \$0.004 and also \$0.40. Also on 15th May I prayed about a safe sell and saw \$0.004, and also \$0.40 afterward. These may be good points to take some profits, to re-enter lower for a continued run. So after at least \$0.001, possibly \$0.004 or higher, then a correction. Then the next big leg may go all the way to \$0.40 and correct back to \$0.10. We could have a further leg after this all the way into the \$ range up to \$10-15, as I saw this overall move here with ups and downs <https://t.me/c/1749237879/11194?thread=11193>. Going with that chart, I have another dream I received on 6/10/22 (3 months ago), I heard "\$14 then lower after this for 2 years". It seems around \$14 is an important peak for LUNC which will be lower afterward for quite some time. I do believe after this BTC and LUNC bull run comes the BTC crash to zero (see here also <https://t.me/c/1749237879/7535?single&thread=7534>), which I believe would also have very low LUNC prices. Have a look at the image below I have charted and drawn a possible LUNC sequence. This is not definitive, and I believe these moves will take some time, numerous months. My plan at this stage is I may partially exit some of my holdings at what I think may be the tops of these legs, and wait and re-enter when it's corrected. I still plan to hold the bulk of my LUNC until higher sell prices. I wanted to share this for your consideration. This is based on my interpretation, but I don't have all the information. I wanted to share those recent dreams and provide an insight into my thoughts as to the LUNC sequence. Please seek the Lord Jesus Christ, especially regarding when you sell and how much to sell. I believe these overall moves will take time to unfold, and as such you can consider staking your LUNC using the Station wallet (web or mobile) which gives a return of

currently (it slowly declines) 21.96% per annum (in LUNC and USTC rewards). The downside of that is a 21 day lock period when you want to stop staking before your staked coins are returned. You can access the staking rewards at any time. To calculate your approximate daily reward rate at this time use this equation (coins staked x 0.2196 ÷ 365). You can pray and consider whether that is right for you. God bless you. Christopher.

Dear brothers and sisters, just a few minutes ago (19/1/23) I had a dream before waking where I saw BTC had reversed its recent drop and had pumped up into mid 22k with big green candles, and continued its bullishness. I then clicked on the LUNC chart to see it but the dream ended. I believe this down move is a small correction and the market will continue in a bull run. I expect LUNC will move big very soon. God bless you. Christopher.

Dear brothers and sisters, this morning 26/1/23 I had a significant dream about BTC. I saw a chart of BTC, and I wasn't sure what moves took place before, but next thing I saw was a huge move all the way to 37.2k. Then the chart faded and I saw a clear figure 93.8k. I believe this BTC run will reach a new all-time high of at least 93.8k (the previous was 69k). This gives us something to aim for and where to expect the next BTC move will take us. We need to continue to wait for LUNC to move, as when it does it will move BIG. It's possible LUNC will not move much during this next BTC leg, as I have a previous dream from 4/6/22 where I saw BTC move to 38k and LUNC was around \$0.00017, and I told a woman urgently if she wanted to make a lot of money to go buy LUNC right away, see here <https://t.me/c/1620388801/63>. Here is a dream that was posted in the last thread which was fulfilled <https://t.me/c/1749237879/17370?thread=17176>. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, this morning 26/1/23 I had a significant dream about BTC. I saw a chart of BTC, and I wasn't sure what moves took place before, but next thing I saw was a huge move all the way to 37.2k. Then the chart faded and I saw a clear figure 93.8k. I believe this BTC run will reach a new all-time high of at least 93.8k (the previous was 69k). This gives us something to aim for and where to expect the next BTC move will take us. We need to continue to wait for LUNC to move, as when it does it will move BIG. It's possible LUNC will not move much during this next BTC leg, as I have a previous dream from 4/6/22 where I saw BTC move to 38k and LUNC was around \$0.00017, and I told a woman urgently if she wanted to make a lot of money to go buy LUNC right away, see here <https://t.me/c/1620388801/63>. Here is a dream that was posted in the last thread which was fulfilled <https://t.me/c/1749237879/17370?thread=17176>. Please seek the Lord Jesus Christ. God bless you. Christopher.

Hi everyone, I was thinking further about Electroneum (ETN). As we are about to begin (or have begun) the horse race I do expect a range of cryptos to perform well. I have a dream from 24/3/21 (you can find it in my dreams PDF) where I saw BTC go to 111k, and ETN was around \$1.50, and then BTC went to zero. I am seeking the Lord about it but am considering whether ETN may move in a big way in this run. Previously I thought ETN would run later, as on 28/11/21 I saw BTC crashing to zero, I saw ETN at \$0.004, and then it rose to \$0.19 (19 cents). My thoughts at the time were that the big ETN rise will happen after the BTC crash to zero. Upon further consideration, if BTC makes it to 111k on this move (as I recently saw 93.8k), then it's possible we could see a huge ETN run to over \$1. If ETN hits \$1 then crashes with BTC, it can go back to \$0.004 area when BTC goes to zero, then after rise to \$0.19. There would be no contradiction with that other dream, so there is no reason why ETN could not run big on this bull run. I am asking the Lord about this and He may confirm it.

A few months ago I had a dream I didn't share. The dream was about me buying some ETN. It made me think ETN could run on this BTC bull move. I didn't share the dream as I was shown buying the ETN at a later time (I haven't bought any yet). But it's another factor to consider that ETN may perform well on this run. To give some calculations, ETN's coin supply is 18 billion coins, having hit an all-time high of 23 cents in the past. If ETN hits \$1 an 18 billion market cap would put it at #7 crypto, but if everything else rose too it would place differently. I mention this because hitting \$1 is not out of the question for ETN. Compare to LUNC with a near 7 trillion supply where to hit \$1 we need to burn a lot of LUNC as the whole crypto market cap is only 1 trillion. Now consider if ETN went to \$1.50 from its current price of \$0.0028 that's a 535x increase with \$100 making \$53,500. Consider LUNC moving to \$1 from current price of \$0.00017 is a 5,882x move, and to \$14 is a 82,352x move, with \$100 making \$588,200 or \$8.235M. Comparing both ETN to LUNC shows LUNC's overall move has much more upside at this time, but ETN's move would still be very good. Now to summarise, I am seeking the Lord whether ETN may make its big \$1 run on this BTC bull run, as after further consideration I don't have any dreams which negate ETN making a run now, and I had a dream about buying some. Even before hearing further from the Lord on this, I plan to buy some ETN when I can. I am still focused on LUNC and am not selling any to buy ETN or anything else. I am waiting for the high prophetic prices for LUNC but may sell smaller portions at different prices on its run, which I described here <https://t.me/c/1620388801/110>. Please note I am holding the bulk of my LUNC until high prophetic prices. Please seek the Lord regarding your approach, as I have said earlier. I will update if I hear further from the Lord regarding ETN. God bless you. Christopher.

Today 29/1/23 in a dream I heard about a "Price Explosion", I knew it was about crypto. I was thinking of BTC and LUNC. Later in a dream I heard, "0.2% after 8%". Now I believe this relates to Binance's plan for LUNC. In my dream from 27/9/22, linked here <https://t.me/c/1620388801/94>, the plan from Binance which caused the LUNC price to take off and hit 10 cents, I heard one of the celebrating people say "8.5%". This is very similar to the 8% I heard today. My thoughts on what this could be is Binance putting up to \$1 billion to buy and burn LUNC. With that amount of money they could burn 8% of the supply, which is 549 billion LUNC, even as the price rose. Such a huge burn and announcement, and the act of buying so much LUNC to burn could be what causes the price to immediately 10x to above \$0.001, which I saw in this dream <https://t.me/c/1620388801/109>. Now these are my thoughts and the Lord has not confirmed what the 8% is yet. After this was the 0.2%, which is the current on-chain burn tax. Binance only burns 0.1% of their fees, so if they implemented a burn of 0.2% it would at least double the burns from Binance we were having before. I don't think that's the end of Binance's changes and based on previous dreams I've had, we may see a higher burn tax later for faster burns. I also had a dream today showing that Christians have the righteous vision for LUNC and are to protect it. I believe this may come into place later, as if we make good profits on this bull run and exit, when we buy back into LUNC near BTC to zero, Christians can get a lot of LUNC and have more governance power over the chain, such as running our own validators etc. This would give us the ability to protect LUNC from bad changes and have the voting power to drive positive change for LUNC. That is something to think about later. I have also heard in a dream a while back that I believe was from the Lord, I heard an enemy of God saying, "We hate LUNC, it's the enemies money". Their enemy is us, Christians. I believe LUNC will be important for God's people. Please seek the Lord Jesus Christ. God bless you. Christopher.

In a dream this morning 30/1/23 I saw BTC on a chart with big green candles and it had rallied up to 77k. Then the scene changed and I saw BTC was printing huge green candles

and there was volatility as it was trying to break 100k, I saw it was at 98k and the dream ended. I believe this bull run will be big. Please seek the Lord Jesus Christ. God bless you. Christopher.

This is a dream from my PDF posted on 14/1/22, please keep this in mind, as if we break 100k BTC these dreams come into play, "I had a dream also about seeing BTC at 160k and then saw it suddenly dropping down past 50k and all the way to zero on Kucoin. Three big red 0's showed up as it was being slammed down to zero repeatedly on Kucoin. I think this is the same flash crash I saw from 110k to zero."

This morning 1/2/23, I saw a vision of a bull's head. It had two large horns. I believe we are going to see a bull move very soon. God bless you. Christopher.

Dear brothers and sisters, LUNC has been suffering under intense and withering attacks from the enemy. They are now trying to stop Binance's burns so we lose their support, they are trying to destroy the L1 team. These same people were behind minting and other terrible proposals. They are relentless in their efforts and have a large faction of supporters to attack and destroy LUNC. They are doing the will of the enemy. As Christians we do not yet have much power to influence governance on the chain through ordinary means. I do plan to make a validator soon to allow anyone who wanted to stake with me, giving my validator a higher voting power to influence LUNC's direction in governance. The main dream I posted here <https://t.me/c/1620388801/112> was that Christians have the righteous vision for LUNC and are to protect it, and that God will use LUNC greatly to help Christians. We need to take this up now, in any way we can. For now I am asking for you to pray to God for LUNC's protection, for the enemies of LUNC to be bound and silenced, for God's will to be done and the righteous vision for LUNC for God's people to prevail over the forces of evil. I feel we really need to pray now. Thank you and God bless you. Christopher.

Hi brothers and sisters. The Lord has instructed me to proceed with the validator in numerous dreams last night. I have been shown to use the advanced service through Allnodes. The cost for the first month is \$960 USD (the same thereafter). If you wanted to contribute to the operating cost for the first month I would appreciate it. Afterward I will be able to handle it, and will have the cost offset somewhat by the 1% commission. The commission will be set at 1%, with a maximum possible of 5%, but I intend to leave it at 1% unless the Lord leads me otherwise. The reason for this is to make it easy for Christians to choose my validator so we can gain voting power. According to my estimates with a 1% commission at current LUNC prices I would need to get 26 billion staked with me to break even in cost to run the validator (almost in the top 10 validators). When LUNC rises in price it would be less. The validator will operate at a loss for some time. This is fully expected and is worth it to achieve my goals to influence governance on LUNC. My crypto addresses for receiving gifts are listed on this page <https://www.survivetheearthchanges.com/downloads/>. I will use any proceeds received at this time towards the cost for the validator. If we can cover the first month that is sufficient. I do not know how quickly my validator will grow, it may take quite some time, but I know from the Lord to proceed with it now. I have written a series of detailed instructions about the validator, my governance views for LUNC, how to stake etc. I will share this soon. I will update when everything is live. Thank you and God bless you. Christopher.

In a vision this morning 6/2/23 I saw a huge bull from behind. It was massive and extremely muscular and large. It looked similar to this, but dark brown. I believe it represents the huge bull run about to begin. This goes with my prior dreams that this bull run is going to be

massive. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, today 7/2/23 I officially launched my Luna Classic (LUNC) validator. It is up and live and ready to receive staking delegations. The purpose of this validator is to gain voting power to fulfill the righteous Christian vision for LUNC, and to protect it. I will engage in on-chain governance to this end as led by the Lord Jesus Christ. For a complete write up with full details about the validator, how to stake and more, please read the information at this link <https://www.survivetheearthchanges.com/luncvalidator/> Thank you to all those who contributed towards the first months cost. God bless you. Christopher.

Dear brothers and sisters, please be advised that as I am a prophecy receiving Bible believing Christian, when I engage in discussion for LUNC governance on Agora, YouTube or on Twitter, the enemy is infuriated. They have and will continue to make numerous false accusations against me, as they did against the Lord. This is especially the case when I call out their wickedness. Please be advised about this. This is to be expected. God has prepared me for this. This leading from God to make the validator does not come easy, we together need to engage in spiritual warfare against these forces of evil, and continue to believe in what the Lord has revealed about LUNC and its purpose for the body of Christ. Thank you for your support and God bless you my brothers and sisters in Christ. Your brother, Christopher.

Thank you for sharing your dream and I believe it was from the Lord. Today 9/2/23 I had a dream showing my voting power for my validator was in the 19% range. I do not know how long it will take, but I will continue forward with my validator as the Lord leads me. Praise God!

Praise the Lord everyone we just made 1% voting power and #21 out of 130! This is only the 7th day since launching my validator JESUSisLORD. That's amazing growth thank you for delegating with me. Thank you for supporting how God has led me, and let us together continue in the mission toward fulfilling the righteous Christian vision for LUNC, and to protect it. God bless you. Christopher.

Dear brothers and sisters, in respect of the LUNC communities vote passing proposal #11322, to set a minimum validator commission of 5%, I will begin today raising my commission to 5%. This will take 8 days and my maximum possible commission is 5%. Also see the comments for a dream today I had of a LUNC chart, I don't believe we have long before our much awaited rise. God bless you. Christopher.

JESUSisLORD Validator Roadmap - Vision for Luna Classic (LUNC) - 15 February 2023
This is the righteous Christian vision for LUNC that I believe in, as God has led me. These points are subject to further advice from the Lord Jesus Christ, discussion, and community wishes, and may be subject to change. I will work towards achieving these following goals with my validator JESUSisLORD, using my voting power for the betterment of LUNC and its investors. This post serves as a clear communication to my delegators, and the community, of what I hope to be accomplished for LUNC. I believe the future of LUNC rests in being an important deflationary store of value, a source of continued competitive passive income through staking, and providing every day utility and spending convenience for years to come. JESUSisLORD Principles/Goals for LUNC 1. Never allow minting, inflation mechanisms, or reverse splits. LUNC must remain a deflationary coin. We must burn the supply down to a sustainable level and never increase it. We must also fund our basic needs as a chain, such as

the community pool and oracle staking rewards pool, without being dependent upon outside funding. We must block dangerous and potentially fatal experiments to the LUNC chain.

2. Raise the on-chain LUNC burn tax to between 0.4% to 1.5%, and partially exempt Dapps to the on-chain tax.
3. Adjust the upgraded burn Ante Handler (when passed) to send 10% to 30% of the on-chain burn tax directly to the community pool. 90% to 70% will remain solely for burning.
4. CAP the community pool at between 2 to 6 billion LUNC (\$340k to \$1.02M USD at price \$0.00017, which will be worth much more as LUNC gains in value).
5. Implement an automatic overflow on the community pool after the CAP is reached, where 100% is sent to the oracle rewards pool. We must fund staking rewards for the long term sustainability of LUNC. By funding the oracle rewards pool we can ensure good staking rewards for years ahead, which will continue to attract more investors.
6. Lower the staking lockup time to 14 days from 21 days to provide more incentive to stake and more flexibility, while still preserving stability.
7. Increase gas fees 2x to 10x from current values on all transactions for further funding to the community pool and oracle rewards pool. Gas on withdrawing staking rewards could possibly be exempted from further raises, as increasing this can harm auto-compounding for smaller investors who stake.
8. Petition Binance to burn their trading fees on USTC. We can pass a governance signalling proposal to this effect. This alone could lead to \$1+ USTC within a few years, no dangerous re-peg experiments necessary.
9. Petition Binance via community efforts to increase their LUNC burning and implement off-chain burn tax higher than 0.1% fees. Assess this after Binance has begun burning again.
10. Petition via community efforts other exchanges to adopt an off-chain burn tax for LUNC. Whitelist exchanges internal wallets from on-chain tax who agree to an off-chain LUNC burn tax (on buy and sells), such as Kucoin etc.
11. Promote more adoption of LUNC. This includes petitioning Coinbase to list LUNC, having LUNC available on payment services, having LUNC fully integrated on Ledger Live, having LUNC available on Trezor, having a LUNC debit/credit card so we can easily make payments in LUNC. Invite useful Dapps to build on and offer their services on the LUNC chain. Any more beneficial adoption and partnerships should be considered.
12. Repeal the minimum 5% validator commission proposal #11322 which passed, to allow free-market operation, better choices for delegators, price competition between validators, without unnecessary restrictions. LUNC is a decentralised coin which must have capitalism with minimum restrictions, not socialism/communism.
13. Meet and exceed technical parity with LUNA V2 but by no means whatsoever merge or pair LUNC to them. LUNC should remain independent, and careful possible use of USTC and other classic coins can be considered.
14. Continue to reject divisive attacks and toxic individuals who wage war against LUNC and its community.

These are the principles and proposals I believe in and will pursue to accomplish with my validator JESUSisLORD over time, whether days, months or years, as part of fulfilling the righteous Christian vision for LUNC, and to protect it. God has given me many prophetic dreams about LUNC, and I believe LUNC will rise greatly and be very important to the Christian people. For believers in Christ I encourage you to pray for the fulfillment of the Lord's will for LUNC for His people, and to pray against the forces of darkness which attack LUNC. If you agree with my cause you are welcome to delegate with me at JESUSisLORD, and to assist me in achieving higher voting power to influence governance and to achieve these goals. Thank you to all my delegators. God bless you. Brother in Jesus Christ, Christopher Harris.

I had a minor dream this morning 16/2/23 where I saw LUNC back up to \$0.0002 and USTC was up decently too. I also had a dream confirming to me the Lord approved of my vision for LUNC roadmap, which I will continue to work on. God bless you. Christopher.

I had a dream yesterday 15/2/23 showing me to do a giveaway on Twitter to promote my validator and gain more delegators. To fulfill my vision for LUNC roadmap plan I need more voting power and delegators, so I plan to do some marketing related activities on Twitter to this end, as the Lord has instructed me. God bless. Christopher.

My commission changes to reach 5% are completed. My validator is now at 5% commission which is my maximum possible, it cannot increase further, and this is the minimum rate set by the community in vote #11322. My focus now is to build my reach as a validator to influence governance, and to be ready for when I am upgraded to the Enterprise Plan with Allnodes at 2% voting power. At that stage Allnodes has indicated I will have an option available for auto-compounding your stake. I will be working on promoting my validator on Twitter and YouTube, as the Lord has led me to do so with dreams of making competitions and today in a dream showing me to expand my YouTube channel. This will help me gain more delegators and influence to achieve my Validator Roadmap and the righteous Christian vision for LUNC. LUNC is very important for God's people as I have been shown, and we as Christians all need to rally together to do our part to fulfill God's will for us with LUNC. I will do my best. God bless you. Christopher.

In a dream this morning 21/2/23 I saw a big move up in Bitcoin to 37k, which was the same as what I saw here <https://t.me/c/1749237879/17498>.

This video goes into why I believe LUNC is important for Christians, some common attacks I receive, and how Christians should take charge in fulfilling the prophecy of the Lord. God bless you. Christopher.

<https://youtu.be/ebQS1-DBefo>

Dear brothers and sisters, in this video made today 23/2/23, I go into detail about my JESUSisLORD Validator Roadmap, explaining my goals for governance and for LUNC's future. God bless you. Christopher. <https://youtu.be/veNQnUHTVvU>

Dear brothers and sisters, in a dream this morning 26/2/23, I saw a big bull with large horns that also looked like a horse, like it was a horse and a bull. That was the dream. I believe this is from the Lord and is about the horse race and the bull run, which are about to begin! See these previous dreams about the horse race and the bull: <https://t.me/c/1620388801/104> and <https://t.me/c/1620388801/105> and <https://t.me/c/1749237879/17691> and <https://t.me/c/1749237879/17878>. God bless you my brothers and sisters in Christ. Our patience in the Lord will be rewarded. Your brother, Christopher.

Dear brothers and sisters, as we wait patiently for the prophecy from the Lord to be fulfilled, I made this video today going over 12 epic LUNC prophetic dreams I have received. You are welcome to watch this to review what is coming ahead. God bless you.

Christopher. https://youtu.be/-1o-ny_sLjk

Dear brothers and sisters, if you don't mind could you please pray the upgrade to v1.1.0 is successful and any issues will be solved. They are still having issues working out what is wrong and the chain is still halted. If the upgrade does not happen today, we may not see Binance's burn tomorrow, as this upgrade contains what Binance requested to burn again. Your prayers would be appreciated. The Lord's will be done. God bless you. Christopher.

Praise God it worked out! I was in the validator discord. It was getting worrying earlier, there

were some talks about reverting to v1.0.5 and launching to v1.1.0 later (which means we could lose the Binance burn for tomorrow). But praise God they pushed through, the chain is up and running, and so is my validator. Thank you to all who prayed! Thank you Jesus.

Dear brothers and sisters, I had a dream this morning 3/3/23 that the LUNC breakout is very soon. That was all. I didn't get exact timing. Stay focused on what is ahead. Buy more LUNC if you can as you feel led by God. I am waiting patiently. God bless you. Christopher.

Today 6/3/23 I just calculated the current rewards rate for those who stake with my validator and it works out at 21.86% per annum, when you also swap your USTC rewards for LUNC. To work this out yourself simply collect rewards, then put a 24 hour timer on. Once the timer goes off write down your LUNC rewards, then collect your rewards. Then swap your USTC rewards into LUNC, write that figure down. Then take your total LUNC earned over the 24 hour period, and divide it by your total amount staked, and multiply by 365, and then multiply by 100 = 21.86% or should be very close. Please note that overtime rewards for everyone decline due to the oracle rewards pool declining. Part of my validator roadmap is to fund the oracle rewards pool to ensure good staking rates for the long term. Also, another validator has put up a proposal to reduce the undelegation period for staking to 14 days. This is one of the points in my validator roadmap at #6 <https://t.me/c/1620388801/120> so I certainly support this move. I previously proposed this change on agora but did not get support (before I was a validator). The proposal is only in discussion phase I will update how it goes later, and about my 75/25% proposal which I hope will be successful. I also had a short dream on 4/3/23 of sending 1,000,000 LUNC to Kucoin from my wallet. When it arrived I saw it's value in Kucoin and it was worth \$17,000 USD. This means LUNC was at a price of \$0.017 (1.7 cents). I am still waiting patiently for the LUNC rise. It is coming soon. Continue to seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I just woke up from a dream today (8 Mar 23) that was epic. I saw BTC trading sideways on a chart, it felt quiet and normal. Then I suddenly felt a huge rush of energy, and said, "This is about to go!" And I saw what looked like a single green candle for BTC launch upwards all the way to \$40,000. I saw posts on Twitter from TA accounts absolutely shocked. I went to post on Twitter about my prior prophetic dream from God of 26/1/23 being fulfilled, of seeing BTC make a huge move to 37.2k <https://t.me/c/1620388801/111>. I believe this dream shows the beginning of the horse race and huge bull run that is about to come. Let us wait patiently for it my brothers and sisters, and glorify the Lord our God Jesus Christ when He raises LUNC, and the prophecies are fulfilled. God bless you. Christopher.

Wow we made 1.5% voting power on my validator JESUSisLORD! That's great thank you everyone who staked, and supported! The next major milestone is 2% voting power. At that point I will be upgraded from the Advanced Plan to the Enterprise Plan with Allnodes, which will provide even better uptime, security and decentralisation for my validator. There will also be an option for auto-compounding your stake through the Allnodes portfolio page, which increases your annual percentage yield (APY) by compounding interest (I'll update about that later). This enterprise plan will support us forward into the future no matter how big my validator grows. It is good to be a Christian validator in LUNC, and to believe in Jesus Christ and what He reveals, and to do His will in our lives. I know God is leading me in this and I do my best every day to do as He guides me, with the validator, and everything in my life. I will continue to work towards achieving my Validator Roadmap <https://t.me/c/1620388801/120> and all the Lord leads me. Thank you for being a part

of this my brothers and sisters in Christ, and for your prayers. We have made great progress so far. God bless you. Christopher.

Dear brothers and sisters, I have some dreams I want to share with you. On 15/3/23 I had a dream where I saw I was successfully implementing a 1.5% on-chain tax for LUNC. That was the dream. I was previously shown by the Lord 1.5% tax in a dream over a month ago, and it is a fair transaction tax. We can leave 1.2% for burning and 0.3% for funding the chain. Then push for 1.2% burn to be adopted by exchanges on buy/sell, which the Lord already showed me would be successful with Binance here <https://t.me/c/1620388801/96> and previous dreams about it on Kucoin, which hasn't happened off-chain yet. CZ Binance said in an AMA he would adopt the 1.2% off-chain if other exchanges agreed. Having the 1.2% burn off-chain has always been the goal to burn the supply and raise the price, which the community has lost sight of.

On 16/3/23 I was shown in a dream to stay at 5% commission and that it's fair. I believe this was from the Lord and I plan to stay at 5% commission (which is my max) unless the Lord tells me otherwise. This will allow me to afford the hosting costs which will soon increase 4x on the Enterprise Plan at 2% voting power, and to be able to do continue to do other things the Lord has shown me to do, such as competitions and giving to the L1 Team.

This morning 18/3/23 I had a brief dream of seeing LUNC rise up to \$0.09 (9 cents). That was all I saw I didn't see much detail. I have been continuing to speak for the LUNC tax to be raised and for the fulfilment of my Validator Roadmap as the Lord has led me <https://t.me/c/1620388801/120>. Now certain people are calling for the burn tax to be removed, which is a horrible idea. I have been opposing this on Twitter, and rather than discuss the topic, numerous anti-Christian enemies of God have attacked me for my faith continually and attack the word of God. From our spiritual adversary, witchcraft and demonic attack has been coming against me. This is ongoing, but I stand strong by the strength of the Lord Jesus Christ within me, praise Him. He has prepared me for this. I am ready and passionate to persevere until the end. My validator group got attacked with over 2,000 spam accounts joining, which took time to remove. Our enemy is stirred up, because we are on the right path. You are my people. I love you. We have no one else on the earth. Faithful Christians need to stick together. I do my best to do as the Lord leads me and will continue to do so. Resist the evil attacks that come against me and our righteous cause. As long as I have your support from loyal faithful Christians, we will be able to achieve what the Lord has showed me. I believe the Lord is having me participate in governance like this, and you who support me, to take an active role in the fulfillment of prophecy, otherwise there would be no point in getting involved and I could stay on the sidelines. But that was not the Lord's will. He wants us to gain power and influence over LUNC so it will be very important for God's people. We are continuing to climb, at 1.74% voting power now. I will continue to do all the Lord leads me and work towards fulfilling His will. Thank you for your support and prayers. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters, this is my vision plan for LUNC to \$1+, from my validator roadmap and is refined. This is what I am pushing for, as the Lord has shown me to do. God bless you. Christopher.

Dear brothers and sisters, I had a dream this morning 19/3/23 that I believe is from the Lord. In the dream I saw a violent bull rampaging, jumping up and down and attacking. That was the dream. I prayed about this and I believe the interpretation is that the coming crypto bull

run will be wild, violent, will not be able to be tamed, and will a huge aggressive rise. This goes with my prior dreams from God about this bull run, which I believe we are in the early stages of.

Dear brothers and sisters, my latest and updated Vision Plan to achieve \$1+ LUNC is now up on agora as a discussion thread. You can read through and see the details. <https://classic-agora.terra.money/t/vision-plan-to-achieve-1-lunc/50412>. The proposal is to raise the on-chain burn tax, exempt Dapps from on-chain tax, and focus on off-chain 1.2% burn tax adoption by exchanges including Binance and Kucoin. I strongly believe in this plan. God bless you. Christopher.

Thank you! I'll also mention this plan is informed by the different prophetic dreams I have received, of a 1.5% on-chain tax, Binance adopting 1.2% tax off-chain etc.

22/3/23 Dear brothers and sisters, I made a flowchart which is my complete and refined Vision Plan for LUNC to \$1+. You can see the image attached. Also I made a competition to promote the plan on Twitter which you are welcome to enter. I appreciate your prayers before the Lord for His will to be done for LUNC, and if it's His will, that this plan may come to pass. God bless you. Christopher.

Dear brothers and sisters, in a dream on 22/3/23 I heard someone from NATO speaking in what sounded like a press release saying, "Russian expansion will invade all of Georgia by this weekend". That was the dream. I believe this is from the Lord and indicates Russia will invade further than the 20% of Georgia that they already occupy, to seize the whole country. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 28/3/23, I saw LUNC had risen to around \$0.00025 and USTC had risen and seemed to have led the rise. I saw Terraport was out and the USTC re-peg proposal was up for discussion or vote, which seemed to be the impetus. That was the dream. As the Terraport DEX is launching on the 31st and the USTC re-peg proposal funding pitch and further explanation is due soon, we could expect there will be speculation of a coming re-peg of USTC which could cause the price to rise, as well as LUNC's. While I do not support USTC re-peg because I have been shown in dreams USTC over \$1 at \$3 and \$5 (not pegged to \$1), and that it is legally risky, it does not mean it won't be attempted and lead to a pump in price. I will seek the Lord about it further when the proposal/vote is out. So overall hopefully we see a nice LUNC move soon. We are still waiting for the major rise I have seen for LUNC to begin <https://t.me/c/1620388801/107>. I also heard in a dream the words, "Two Trillion", and my first thought was bailouts. Please seek the Lord Jesus Christ. God bless you. Christopher.

I'm planning to buy all the coins the Lord has shown me when BTC near zero or after it, LUNC, ETN, RDD, XLM, XRP, LINK, ETH, BTG, BCH, PPT, LTC, DOGE, SHIB. I plan to hold my money in banks, maybe some in stablecoins, in gold/silver. I will seek the Lord more about it later if he gives me any warnings.

Praise the Lord Jesus Christ! Thank you everyone who has staked their LUNC with me. My validator JESUSisLORD has made the top 15 validators in less than 2 months! We are at 1.88% voting power and getting close to 2%! I am continuing to do as the Lord leads me, promoting my Vision Plan for LUNC to \$1+, and working to achieve my validator roadmap. Thank you for your support my brothers and sisters in Christ, and to all who stake with me.

God bless you. Christopher.

Dear brothers and sisters, please see this video I just uploaded where I go over my Vision Plan for LUNC to \$1+ in detail. This is the plan God has led me to pursue and I will continue to do so. It is an excellent plan informed by the prophetic dreams God has given me. Thank you for considering, and for your support. God bless you.

Christopher. <https://youtu.be/6VL2FChR5Xw>

It's Good Friday today in Australia. We are so blessed by the Lord our God Jesus Christ, God the Father and the Holy Spirit. We are blessed by the amazing salvation of our Lord Jesus Christ, His sacrifice for us on the cross, and His resurrection from the dead, for saving us from our sins and delivering us from death, and giving us the gift of everlasting life. God has blessed us with a fellowship between our brothers and sisters in Christ, and has blessed us to be partners in the prophecy of God to receive the Lord's provision as He has showed us, including with LUNC. God is giving us the opportunity, and we have taken it, to believe in faith in what He has revealed, so that we may be blessed by Him to provide for ourselves and our households, and to do good works for the Lord. This is God's will for us as He has led us. I am thankful for all your support for my validator and with this group. I know what God showed us will come to pass, and we will rejoice. Thank God for all He has blessed us with in our lives, and let us all strive to do His will always. I love you my brothers and sisters in Christ, in Jesus name. God bless you. Christopher.

I just got upgraded today to the Enterprise Plan by Allnodes for my validator JESUSisLORD, since I hit 2% voting power (2.05% now). It is the highest tier plan they provide and is good for the long term, with excellent security, decentralisation and service. Thank you for your support, and praise the Lord we hit 2% voting power in only 2 months! God bless you. Christopher.

In a simple dream this morning 9/4/23 I saw a chart going bullish rising up like this. I didn't see what it was for, but either BTC or LUNC would be good for us. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 22/4/23 I was given a timing for a certain month for the implementation of the 1.2% burn tax. I do not want to share the timing information. But what I will say is that it is soon, and not far away. I do not know if this timing is for the 1.2% off-chain on exchanges, or having the 1.2% burn tax on-chain. What I am coming to think, is that my Vision Plan for LUNC to \$1+ passing and coming into effect is necessary for the major LUNC moves I have seen to come to pass. I am the only one I know of advocating for the 1.2% burn tax, with a proper plan to achieve it. God showed me previously that I was implementing the 1.5% on-chain tax <https://t.me/c/1620388801/133>. God showed me previously that Binance and Kucoin would implement the 1.2% burn tax off-chain on their exchange. I have the right plan as God led me to achieve this. Now the LUNC price may start rising from another unknown factor, or just market forces, I don't know. But I am thinking that the big rise we are waiting for and that God has shown me numerous times by prophetic dreams, that this rise is dependent upon my Vision Plan for LUNC to \$1+ passing and being implemented. If this is the case, this means the Lord has given me and us together an active role in the fulfillment of His prophecy that He has revealed. I believe the Lord has certainly led me with my plan, and it is the only plan we have that can achieve massive burns and the prices God has shown us. We've had 6 months after the 1.2% burn tax was dropped with no good volumes, utility or burns. LUNC's price has been floundering for a

long time now. I believe my plan is necessary for LUNC to rise and achieve greatness as the Lord has shown us. Due to these reasons I now ask you my brothers and sisters in Christ, to pray, that if it's the Lord's will, my Vision Plan for LUNC to \$1+ will pass and be successfully implemented, that all enemies will fall to the wayside, and the Lord Jesus Christ by His Almighty power will make a way through for us to succeed. I would greatly appreciate your prayers. I am in prayer before the Lord seeking Him each day asking Him what I need to do to advance the plan and for His will for me. I have recently began reaching out to many LUNC validators putting my plan out to them, asking them for their opinions on it, so I can gauge sentiment and so they have advanced warning before my plan proceeds to vote. In the meantime I will be promoting my plan as the Lord leads me, and waiting until He leads me before putting it up for a vote. The plan itself will require 5 governance votes. The first is the most important, a signalling text proposal to approve the plan itself and its particulars. The next 3 votes will come simultaneously to approve the tax changes and tax exempting Dapps. The final governance vote will be if we are successful in achieving the 1.2% burn tax off-chain, to approve wallet whitelisting for participating exchanges. I'll post the plan flowchart in the comments section so you can see it again, it has everything explained. My plan is ready to go. I will do what I can as the Lord leads me, if it passes I will take full responsibility for its implementation, doing all I can to achieve the awesome goal. I'm asking the community for 6 months to achieve 1.2% off-chain burns, and I believe we certainly can. I wanted to share this with you my brothers and sisters. I appreciate your prayers and support. God bless you. Your brother in Jesus Christ. Christopher.

I posted my updated and Final Vision Plan for LUNC to \$1+ on agora. You can read the whole write-up at this link: <https://classic-agora.terra.money/t/final-vision-plan-for-lunc-to-1/51477>. God bless you. Christopher.

Dear brothers and sisters, I have decided that my Final Vision Plan for LUNC to \$1+ will go up for vote in June. This is to allow the L1 Team time to complete parity in May, so they have time to help implement my proposal and nothing will hold it back if the vote is successful. Here is the link to my proposal: <https://classic-agora.terra.money/t/final-vision-plan-for-lunc-to-1/51477>. I also want to share that the timing the Lord showed me on 22/4/23 for the implementation of the 1.2% burn tax (whether on-chain only or off-chain I'm not sure) that I posted about here <https://t.me/c/1620388801/145>, was indeed the month of June. I have decided to share this with you my brothers and sisters and leave it all out there. I believe June is our time and where my proposal, Lord willing, will pass, and the tax changes will be made on-chain and the push for the off-chain 1.2% burn tax on transactions will begin there. How long that takes to succeed I do not know. I ask if you feel led to pray if it's God's will (I believe it is), that my plan will pass governance. I was shown in a dream my proposal will be successful, and I ask for your prayers all will be according to God's will. I also had an interesting dream today which I felt was relevant to me working on my plan, defending it, advocating for it and its hopeful success. In a dream I was attacked by a demon in a human form with a machete and knife. I called on Jesus to help me. I had a machete and a knife too, and we duelled. I struck his hand, arm, head, and shoulder but every strike barely opened up his thick demon skin. He threw another machete and it struck my foot but did no damage. He lunged with his knife and got close to my neck or made contact, and said "Why didn't that hurt you?" I said, "Because you missed" (later I realised he may not have missed). He motioned as if he was going to throw his knife at me but something held him back. Then one of my slashes opened up a big gash on him. The demon said, "He helped you with that!", referring to Jesus. Then we stood still facing each other and suddenly the demon cried out, slashes appeared on its body and its face, and something shot through its face, and it

screamed and collapsed to the floor. I knew the Lord had just finished my battle for me, and the dream ended. This reminded me of my efforts with this proposal as God has led me. Many enemies, lots of opposition, but I'm doing my best fighting with all I have. God delivers me as He delivered me in the dream, as I kept fighting the best I could. Then eventually, because I called on the Lord Jesus Christ, He finished my battle. I believe the Lord will finish this, and that this is of God and it will succeed according to all that He has shown us. So please pray if you feel led. My plan will be up for vote in June. June is THE month the 1.2% burn tax will be implemented, according to my dream. I will update when my plan goes for vote. God bless you my brothers and sisters in Christ. Christopher.

25/5/23 Dear brothers and sisters, I have made the official 7 day countdown for my Final Vision Plan for LUNC to \$1+ proposal, which is going up for vote in 7 days on June 1st. I have also laid out the schedule of voting and key details. The first text signalling proposal to authorise the plan will go up on 1st June, if it passes on 8th June the next proposal of 1.5% on-chain tax will go up. If that passes on 15th June, it will be implemented on-chain from the next epoch (around 21st June). The plan is live from there to convince exchanges to accept the 1.2% burn tax off-chain. Please read the tweet for more details. There have been many demonic attacks coming against my plan, in the physical and spiritual. Please pray that the Lord's will be done, and His plan for His people be done, and that nothing the enemy will do can stop His good purpose. I appreciate all your support and prayers. God bless you my brothers and sisters in Christ.

Christopher. https://twitter.com/ForTheCross_CH/status/1661552783269707776

28/5/23 Dear brothers and sisters, as part of the lead up of my Final Vision Plan for LUNC to \$1+ going up for vote on June 1st, I'll be doing a YouTube livestream where I will go over the plan, the voting schedule, implementation, answer common questions, and questions from the live chat. The livestream will be up to 1 to 2 hours long. Here is the link to the stream, which begins in around 44 hours (12pm AEST): <https://www.youtube.com/live/qoUBNx-uDNI?feature=share>. If you want to attend and listen live you are welcome. I appreciate all your support and prayers. God bless you. Christopher.

30/5/23 Thank you brothers and sisters to all who attended my Final Vision Plan for LUNC to \$1+ Proposal Livestream and for all who supported in prayer and by encouragement. The livestream went well, was 1hr 13m long, with good topics covered and good questions asked. Here is the full video for anyone who wants to see it but was not able to attend live <https://www.youtube.com/live/qoUBNx-uDNI?feature=share>. God bless you. Christopher.

1/6/23 Dear brothers and sisters, my Final Vision Plan for LUNC to \$1+ proposal is officially live for vote now, prop #11549. I have already voted YES with my validator so if you're staked with me you don't need to vote. Please pray the Lord's will be done and thank you for all your support. God bless you. Christopher.

https://twitter.com/ForTheCross_CH/status/1664091456561364993

5/6/23 Dear brothers and sisters, here is an update regarding the vote for my Final Vision Plan for LUNC to \$1+ proposal. It still has 3 days left on the vote, but I see some people are getting very concerned. Let me explain the situation. I shared that the Lord gave me the month of the implementation of the 1.2% burn tax in a dream and I kept the month to myself. Later I felt led to share what I received, and that it was the month of June. I also saw my proposal passing in another dream. Now the vote is so far not going well, though not impossible to turn around. If it does not pass now, it's important for me to explain my view on

the dreams received and shared. It's important to distinguish between the exact dream from God, and my or our interpretation of the dream or timing, which can be mistaken. When I was shown the month of the implementation of the 1.2% burn tax, I was shown June. I believe this was from the Lord. I did not see any mention of year. Out of hope I believed it would be this June. I also saw my proposal pass in a dream, but I was not shown specifically if this passes now, or passes at a later date. Out of hope, I believed it would be this time. I was led by God to put my proposal up on June 1st, to do a competition, a 7 day countdown, and various other guidance I received, which I obeyed and followed. If my proposal does not pass now, then I believe it will pass at a later date, and the June could be next year. I believe both dreams were from the Lord. Why would the Lord show dreams like this? The Lord knows all the reasons. I was entirely committed to passing my proposal and hoped it would pass now. I gave all of my efforts over a 70 day campaign, including my AMA, responding to hundreds of comments, every day being focused on the goal. I am completely satisfied we did well in putting this forth, in prayer and effort. If it doesn't succeed now, it means it was not ready yet. This doesn't mean the effort was not from God, or the dreams were not. They are not invalidated. If the plan does not pass now, we need to consider various realities. One is that without my plan passing, and the burn tax being implemented off-chain, there is no way to get to the prophetic prices I have shared and others have also seen, without massive burning of the LUNC supply. The enemies of God are attempting to do all they can to delay what God is planning for His people, and to resist it with all their efforts. I have seen their nonsensical attacks on my proposal, false accusations, mockery and attacks on my faith and character. I have been engaged in serious battle with enemies of God and haters of my proposal in the LUNC community. They have a huge stronghold over the chain, and carry much influence. Yet the Lord showed me LUNC will become a coin for God's people, as I shared before. I believe it. My validator has been in existence for less than 4 months, and is already in the top 10 with 3.09% VP, thanks to your support and by God's grace. This is our first attempt to pass my proposal, and our first campaign. We made great progress in this effort, even if the plan does not pass now. Though it may be difficult to accept, if the plan does not pass now we must not give up and we must push to build support and influence and pass it later. I certainly believe my proposal will pass. It may not be now. For a long time we all waited for what God showed to come to pass for LUNC. Only around 4 months ago did God reveal to me to become a validator, to help me formulate my plan, and to push for its adoption, revealing that we had to play an active role in the fulfilment of the prophecies. Before that I was just waiting and assuming it would happen on its own. But that's not the case. This is because we need to fight for this. This is a war, not a single battle. If we don't succeed on the first attempt we can't lose hope. This is about a monumental transfer of wealth to God's people, to bless them and so they will bless others and do the will of God for the days ahead. This is truly a historic thing we are fighting for. Miraculous wealth into the hands of God's people, who have journeyed in faith to receive it. The story of this victory would be recorded and this is watched by heaven, I am sure. I can see the enemies many efforts to hinder it from happening. If we need to wait another year, we need to wait another year, so be it. We have to be patient and faithful to victory. If you cannot accept this, and do not believe these things are from God, you are free to leave the group, and go in peace. I'm forcing no-one to be here. I have done everything in prayer and diligent consideration before the Lord. I am very serious about all of these matters and give you my honest words and the truth at all times. I fear the Lord and strive to always do His will. What is fact is that God has chosen LUNC to bless His people. He has shown me the plan that is instrumental in making it happen. He showed me it will pass. If we don't succeed the first time, we already have all we need to not give up and to strive to accomplish the goal. Yesterday in a dream I saw my validator with 19.8% voting power (20% is the cap). On the 14th of June the zero

commission anti-tax validators who vetoed my proposal will all be forced to 5% commission, they will lose their advantage, so we can climb faster. By the campaign we waged, we built up a lot of support. The enemy was afraid, they vetoed my proposal instead of voting no, because they wanted to ensure they blocked the proposal by the 33% veto power. Something else our effort achieved was that as my campaign began over 70 days ago, after some time dfunk felt he could put his proposals for vote, which led to the first tax increase in a long time to 0.5%, and some other good changes which were part of my proposal such as the 80/20% split and the Dapp smart contract exemption. I believe our efforts contributed to a different environment where his proposals could pass. Before that every tax proposal was getting vetoed or wouldn't even get voted on, even 0.3% tax failed. Things have really changed, and the conditions have improved. God showed me the anti-tax LUNC group spiritually as a huge monster. It's not an easy thing to overcome, and I was shown we made progress. In the scripture the Lord says some demons only come out by prayer and fasting. My point being, this is a tough battle. We may not get the win this time, but we have to keep fighting because our victory is assured if we continue forward in the strength of the Lord. We seriously did a good job. The enemies stronghold over LUNC is big. We have made good progress. But if we don't succeed now I believe we have set an important foundation for the future, and we need to keep fighting to build support, to gain power and influence, and bring the proposal back and pass it. If it is not the Lord's will now, He will bring it to pass at the right time. People who reject my proposal believe in unknown Dapps from LUNA V2 burning the supply which is a nonsensical plan, and their only other hope is a USTC re-peg. It was the peg of UST to LUNA which failed and caused the hyperinflationary minting death spiral, and having Do Kwon and TFL subject to charges of fraud by the SEC. They want to bring it back, or some variant of it, which has a myriad of issues. I was shown USTC at \$3 and \$5, so I don't believe it will be pegged at \$1. My plan on the other hand is simple and effective. I was shown Binance and Kucoin would do the 1.2% off-chain, and shown I would implement 1.5% on-chain. I believe in all these things. Nothing has changed, and I don't believe what I have shared has been invalidated, even if the proposal does not pass now. I hope you can understand the situation if the proposal does not pass now, to not lose hope. I believe without my proposal passing and being implemented, we may not see the massive prophetic prices for LUNC, as it's impossible without a massive burning of the supply. It doesn't mean we won't see movement, as I have this dream here of a move to \$0.00025 which seemed to be USTC related <https://t.me/c/1620388801/138>. But I don't believe the amazing prices like 10 cents and \$1+ will come before my plan is implemented. I believe God has given us the insight and enough information to understand what is going on. Many of you have seen what we are up against out there. As to this dream here <https://t.me/c/1620388801/107>, I believe it is not a literal one for one of the chart, but showing the major move to come. If you have any questions let me know and I'll do my best to answer them. God bless you my brothers and sisters in Christ. Thank you everyone who has supported and prayed. We are yet to see the final outcome of the vote, but I thought it was important to share this now. Your brother in Christ, Christopher.

5/6/23 Dear brothers and sisters, I was considering my older dreams about USTC and seeing the communities continued focus on wanting a USTC re-peg. I have been praying and thinking about the matter. I had been not supporting this idea due to seeing numerous very bad proposals that wanted to mint coins, mess with the dangerous mint-burn algorithm which hyperinflated LUNC to begin with, legal risks and more. The best proposal I saw so far was Redline's but I still had issues with it, which I detailed here https://twitter.com/ForTheCross_CH/status/1650347268950880258, so I voted ABSTAIN there but did not oppose it. Now the L1TF is proposing to make a test-net to test USTC re-

peg ideas under safe conditions. I voted ABSTAIN on this initially, but I have since changed by vote to YES for the following reasons: I have a few prophetic dreams about USTC (formerly called UST). On 20/5/2022 I saw UST (now USTC) going from low and returning to \$1 <https://t.me/c/1620388801/54>. I posted a dream on 12/5/22 where I saw a stablecoin returning to \$1 <https://t.me/c/1620388801/48>. I saw these things before the Lord showed me about my Vision plan. I also have dreams where I saw USTC at \$3 and \$5. This would mean it was not pegged at \$1. I also saw LUNC rising to \$0.00025 with USTC leading the way and the rise seemed to be related to USTC <https://t.me/c/1620388801/138>. Based on these dreams, it seems the community succeeds in bringing back confidence to USTC, and it will return to \$1, and later over \$3 and \$5. The exact way this occurs is unknown. As LUNC and USTC are related (not pegged now), when USTC rises so does LUNC. If the community pulls off a successful USTC re-peg, even if it doesn't stay at \$1, it would mean LUNC would also rise a lot, which is good for us. Depending on the USTC plan, they can also burn LUNC. After considering the matter further, I believe I should not oppose the attempts but support them where they are done carefully and wisely. I shouldn't oppose a good thing which will benefit us. I will still vote down USTC proposals I believe are dangerous, but I am going to support the effort more in general, as based on the dreams I have received even from May last year shows there will be success there. I will continue to work towards the passing of my Final Vision Plan for LUNC to \$1+ proposal to burn LUNC, and if unsuccessful with the first attempt at vote here, we will continue to build support and bring it again later when God leads me. This was an update regarding my approach to USTC after careful consideration. God bless you. Christopher.

8/6/23 Dear brothers and sisters, my Final Vision Plan for LUNC to \$1+ proposal vote #11549 has ended. It did not pass. You can see my new post here on Twitter https://twitter.com/ForTheCross_CH/status/1666626621527425027 and previous post here <https://t.me/c/1620388801/151>. I am seeking the Lord regarding when to bring the proposal again. For now we can work on building support and influence for the next attempt. God bless you. Christopher.

Dear brothers and sisters, I have two dreams I want to share with you. The first was received about a week ago, in the dream I was in a factory in China holding a new type of battery. It was very light, and I remarked to a worker that it was about 3x lighter than other batteries I had felt. They agreed and said it also had 3x the amount of power. I saw these batteries were being mass produced and I knew they were very significant. That was the dream. I believe these far lighter and far more energy dense high-tech batteries will come later, making big advances in ground and air electric vehicles, drones, and robotics, and AI possible. This would be like a new industrial age having batteries with that kind of capability and would change the world significantly. The second dream I want to share was received two days ago. In the dream there was a tough spiritual battle, I and others were trying to escape from an area that enemy forces were seeking to keep us captive in. There were physical battles, distractions, and towards the final part I was with a group of people hiding in bushes trying to make a run for it. There were red birds which were from the enemy which flew through the bushes and were attacking everyone so they could not leave. I was represented by a green bird and fought the red birds, but I was losing health. I had a health bar which almost went to zero, but I had done enough that the red birds got afraid and flew away. Now everyone was free to leave the captive area. Then I looked around and saw a large group of people sitting on the floor relieved. The men all in unison started to sing this song, there was music in the background: "Give my glory my glory, to the King of Kings, Give my glory my glory, to the King of Kings, Give my glory my glory, to the King of Kings." After this a powerful and

deep voice sounded from heaven saying, "I AM". It was the Lord God. Then He said, "Does any of you have a sword?" The group responded, I'm not sure what they said but I responded with, "Yes I do", while thinking of the sword of the Spirit, as I had no physical sword on me in the dream. Then God said, "Point your swords at the target. For financial windfall and distant lands. In less than 12 hours, this deal will be done!" That was what He said as the dream ended. His voice was powerful, rich, and awesome. I considered these things and the next day prayed and asked the Lord what the deal was that He spoke about. I received a dream that it was in relation to the overall crypto market, and received the impression it was in relation to the market going up. This goes with the Lord's words. I believe pointing our swords at the target is about praying for the financial deliverance of the Lord, and for His plans for us to be fulfilled, whether that includes moving locations, or whatever His will is for us. As to what the deal is I don't know, but it was a done deal. If it's 12 literal hours I don't know, as that has already passed by. I wanted to share this encouraging dream with you my brothers and sisters in Christ. The Lord Jesus Christ is for us. God bless you. Christopher.

16/6/23 Dear brothers and sisters, I have two dreams to share that I believe were from the Lord. The second dream is very confronting, please be warned. In the first dream received on 14/6/23, I heard a voice saying words very similar to this, "The devil is trying to delay as long as possible you receiving the prophesied wealth, because of the impact for God's kingdom you will make once you receive it." That was the dream. I knew this addressed my wife and I, and I believe it also applies to all God's faithful children who are led by Him in patiently waiting for these prophesied blessings. With such financial provision we will be able to do many good works before the Lord and make needed preparations. This dream confirms the need to pray against the schemes of the enemy and for the Lord's financial deliverance to come speedily <https://t.me/c/1620388801/156>. Note that the devil can only hope to attempt to delay what God has planned for His people, but cannot stop it. All will occur in God's timing. In the second dream received on 15/6/23, I was watching a TV (I don't watch TV) and a show was on that was very upsetting. It was still daylight and it was an unrestricted live prime-time major show. It was like a burlesque with many performers on a big stage, a huge audience, with the camera zooming in on them as they were singing songs. There were many transgender performers, males dressed as females, and a few women. The transgender men were completely naked in their pink and rainbow outfits, and were visibly complete eunuchs, and there were many naked breasts showing from men with implants and from the few women. It was a complete show of hell on the screen, of detestable sexual immorality. I turned away from the screen as they all began to sing the next song, an Australian classic to the cheering crowd, "We are one, but we are many, and from all the lands on earth we come, we'll share a dream and sing with one voice, I am, you are, we are Australian." Then the dream ended. When I woke up I thought it was a demonic attack at first, but I realised the Lord was showing me what is coming. Their song was particular to Australia, and also showing the powerfully evil "equality" and "unity" propaganda of the devil will be cheered for, in the push for the world to descend into abject degeneracy. The Lord has given me similar dreams before about the terrible and perverse sexual immorality that is coming. In one dream I saw the sexually immoral LGBT+ crowd killing and crucifying Christians while calling them "Haters". The Lord has shown me the sexual immorality movement's push is going for children and to normalise paedophilia and child marriage, and to make heterosexuality and faithful marriage between a man and a woman as God created and intended, into an abnormality. This dream I share today is a warning of the days ahead. We are in the last days. When the fullness of these abominations come close, the end and God's judgement will be at the door. We as Christians must separate ourselves from such wickedness, as society will continually embrace it and it will grow much worse from

what it is now, and God's faithful need to live together and protect each other and their families and children. The financial blessings that God will deliver are one part of our lives in our Lord Jesus Christ. Righteousness, holiness, obedience and faithfulness to Jesus and His word are vital. We know about the falling away. Who is going to stay faithful to Jesus and His word under the withering attacks of the world and their persecution? God's faithful and chosen will. Let us be counted among them. Let us do our best to do the will of our God, and wait patiently, and when the Lord delivers us financially, to seek Him with all our hearts and minds and souls and strength to do His will, and to do our part for God's kingdom, and to fulfil our destiny in the Lord. Let each person be taught and be led by our Lord God Jesus Christ and to follow the Holy Spirit. We don't know what may happen in our lives, even tomorrow. Make sure you're doing right before the Lord, that whatever may come you will have confidence in Him. Let us thank God the Father, Jesus Christ the Son of God, and the Holy Spirit, our Almighty God who is One, for blessing us with the knowledge of the truth and for His salvation! Please seek the Lord our Saviour Jesus Christ. God bless you. Your brother in Christ, Christopher.

17/6/23 I had a dream yesterday about a small bear. It seemed to be attached on someone's leg. Then this morning I had a confirmation about the dream. A small bear could be more downward movement but not excessive, and attached on the leg may mean it's difficult to shake off for a while. As for me I'm not selling my LUNC holdings and adding more when I can. Please seek the Lord. God bless you. Christopher.

8/7/23 Dear brothers and sisters, I have some dreams to share with you. The first is from my wife, who had a dream while my vote for my Final Vision Plan for LUNC to \$1+ was on-going, and was not looking as if it would pass. She had a spiritual battle and called on Jesus. Then came another level of attack and she called on Jesus again. The attack was defeated, and a secret entrance opened and she went inside and saw numerous options she believed were to do with my plan. The first one she saw was June 1st. She went another way to look for more options but that was the wrong way and time was running out. She came back just in time to select one, and she thought it was the June 1st option, the first one she had seen initially, and the dream ended. As I shared earlier, the Lord led me to bring my plan for vote on June 1st, preceded by a 7 day countdown and a competition, which I did. I was shown in "June" my proposal would pass. I believe my wife's dream is a confirmation of what I intend, to bring my proposal up for vote again next year, on June 1st, unless the Lord leads me otherwise to bring it earlier. I believe the conditions have to be right for the proposal to succeed. I believe in what the Lord showed me about the 1.5% on-chain tax passing and the 1.2% off-chain burn being implemented. Patience is essential. The rewards for faith and steadfastness in our LUNC investments will be great and have many positive consequences we cannot understand now. In another dream I received on 21/6/23, I saw a white plate handed to me and on it was a bread roll in halves, with lovely pleasant toppings on each half of the roll. I knew the roll represented the 0.5% tax. I gladly took the plate and the dream ended. The roll representing the 0.5% tax was prepared and handed to me on a platter. I don't know exactly what it means. It could be that the 0.5% tax on-chain was handed to us on a platter, which passed during my campaign for my Final Vision Plan for LUNC to \$1+, which I believe helped contribute to its passing. But as I had this dream on 21st June, almost 2 weeks after my proposal did not pass, and around a month since the 0.5% tax was implemented on-chain, it could be referring to something else new about the 0.5% tax, perhaps off-chain burns. There are two people who have contacted me who have been working on a 0.5% off-chain burn tax proposal, and perhaps that goes well and meets success, I am not sure. I will be ready to do as the Lord leads me with regard to these things. Last night 7/8/23 as I was about to go to sleep I heard

the horse race trumpet sound in my mind. This is the same sound I heard from this dream here <https://t.me/c/1620388801/104>. I had not been thinking about this at all for some time. I believe this is a reminder of our coming huge bull run/horse race that I have been shown about. Let's be patient until it arrives and is fully under way. As to the small bear dream I had recently, this may be in play until we get to the bigger bull run really taking off <https://t.me/c/1749237879/21972>. My validator is having steady growth, with 3.29% voting power. We're 11th at the moment, with validator positions moving around. Lord willing if we can continue a steady rate of growth we will get to where we need to be in time, and gain more influence in governance. Thank you for all your support. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 30/7/23 I saw clearly USTC at \$0.033 (3.3 cents). That was all. This is a 2.1x increase from its current price. An increase of this would also lead to an increase for LUNC. It could be a reference to this dream from earlier <https://t.me/c/1620388801/138>, signalling some USTC related move which also leads to a rise in LUNC. Please seek the Lord. God bless you. Christopher.

Dear brothers and sisters, I wanted to share a post I made on Twitter and in my LUNC validator group: "It's been 6 months since I started my LUNC validator JESUSisLORD on 7/2/23. In that time we have reached over 3% VP and are in the top 10 validators, and are gradually gaining more positive influence in governance. During this time I brought forward important proposals, one to increase the burn tax and the pursuit of off-chain burns by my Vision Plan, another to increase funding to the community pool and oracle pool by a gas fee increase, and one to reduce the undelegation period to 14 days. Unfortunately none were successful at this stage, which highlights the difficulty of getting good proposals to pass governance. Despite this, good changes were made to benefit LUNC, with the tax increase to 0.5%, the 80/20% funding split (I previously proposed 75/25% which didn't pass), chain parity, and the increased funding to the oracle pool set to begin at the next chain upgrade. I will continue to seek to fulfil my validator roadmap and the righteous Christian vision for LUNC as God leads me https://twitter.com/ForTheCross_CH/status/1625562143574872064 During this time I also voted on many governance proposals put forward by other members of the community, after careful consideration, and I communicate the reasons for my votes to my delegates in my Telegram group, and often on Twitter also. This is part of my commitment to communicate with my delegates. Delegates are at any time free to override my vote by manually voting for their staked portion, or to redelegate to another validator. I take this responsibility as a steward of LUNC seriously and do what I believe is in the best interests of the chain, for its security and the benefit of its investors, sometimes needing to make difficult decisions, praying and seeking God to guide me. My validator is non-custodial, with the highest tier enterprise plan powered by Allnodes, with high security, decentralisation, and a maximum 5% commission. I look forward to continued growth for LUNC, to make positive change, and the fulfilment of the prophetic dreams the Lord has shown me. Thank you to everyone who has supported by staking their LUNC with me. Thank you for everyone's prayers. I will continue forward patiently and steadfastly in this role the Lord has led me to, and look forward to the success of LUNC in the years ahead. May God bless you, in Jesus Christ name. Christopher. JESUSisLORD  LUNC Validator" I also want to share a dream I had today 7/8/23, I saw a developer implanting an airdrop mechanism within the code, a hack, an exploit. This is a confirmation of a dream I had around a month ago, where I saw LUNC trading at \$80 (amazing price), and there was an exploit on the chain where \$44M was minted and stolen, and I was angry hearing about it in the dream. I do not know if this can be avoided, or is a warning so that actions could be taken. In any case I

wanted to share, and I will push initiatives to secure the chain such as auditing code when the chain has more funding, and resisting those the Lord warns me against. Aside from this I wanted to thank you my brothers and sisters in Christ for staying with me, for being patient while we wait for what the Lord has revealed, and not losing heart. There are many enemies of God in LUNC, with much influence, seeking to do harm and cause chaos, it's a big battle to gain more influence over the chain, and we are making gradual progress thank the Lord. What the Lord has revealed will come to pass in time. I will continue to do my best as the Lord leads me, seeking Him to guide and strengthen me. Thank you for all your support, understanding, prayer and encouragement. God bless you in Jesus Christ name. Your brother in Christ, Christopher.

Dear brothers sisters, I have two dreams I want to share with you, received today 20/8/2023. The first dream is not directly about crypto or LUNC. The dream started and I was a taxi driver who had finished dropping off a customer. I was in my house going in, and he was outside at the front door speaking to me. He had given me 2 circular gold pieces, a centimetre in diameter, which were already in my house. He asked me reluctantly, unsure, whether what he had given me was too much, saying "It was only a 50 kilometre trip?". I asked him, "Were those 100% gold?" He said "Yes". I then thought he had given me too much, and said, "I'll give you 500 kilometres, and I'll give you back one of the gold pieces, and let me write you a receipt". He smiled and was very happy, and as I turned around to go further into the house to get the gold piece and a receipt, he immediately started singing. He sung in a heavenly voice with orchestral instruments and an uplifting anointing from heaven. He sung about the beauty and excellence of good works before God, how they were praiseworthy, and sung of the goodness of the Lord. As I was getting ready to take the one piece of gold back with the receipt, I sung with him simultaneously the last line of his song, as led by the Holy Spirit, which were thanks and praises and love to the Lord Jesus Christ, my heart full of the joy of the Lord as the dream ended. It was an amazing dream and I felt the great goodness of God. God had sent an angel in the dream to test me, and I did what was good (thank God) and heard the angels heavenly praise and joined in. It was a lovely dream showing how important it is to deal fairly, with righteousness, not taking unfair advantage of others if the opportunity arises, and the blessedness of good works before the Lord our God. This is encouragement to deal in a righteous manner before God to all, especially when it comes to finances. While this dream was not about crypto or LUNC directly, it encouraged me knowing God's close presence and that He is in control, is watching all things, and will certainly manifest His word and prophecy. After this dream I had another dream where I saw my validator was suddenly in the 10% range voting power. I was shocked and I spoke in the dream how I was resolved to seek to fulfil God's plan for LUNC, not my plan, but God's. This was the second dream. I believe the Vision Plan I proposed for vote on June 1st was led by God, as both the 1.5% on-chain tax and 1.2% off-chain burn tax being accepted were by prophetic revelation from God. Therefore I will continue to seek the Lord and diligently work to fulfil His plan for LUNC, as He leads me. God bless you my brothers and sisters in Christ. Your brother, Christopher.

Dear brothers and sisters, this morning 6/9/23 I had a dream where I saw one of the enemies of LUNC that I know of, being upset that one of their evil plots was blocked or didn't work, and he was proclaiming to his other evil friends that this was due to, "The enemies prayers". This is an important dream God gave me, showing directly that our prayers before God about LUNC are very important, and we all have something to offer. It may not always seem like it, but prayer accomplishes much that we do not see. James 5:16 "...The effective, fervent prayer of a righteous man avails much." I ask you my brethren to pray with me against the forces of darkness which continually work to destroy LUNC, to delay its rise, to hope to steal from it

and God's people, who devise evil plots and seek to sway governance and deceive the community, who diligently work to oppose the revelation of God about LUNC for His faithful people, and God's plan for LUNC. Please pray against these evil ones, their attacks and their influence and control over LUNC. Pray however God leads you in your heart, but know that your prayers are greatly appreciated and are treasured. God bless you my brothers and sisters in Christ. Your brother, Christopher.

30/9/23 Dear brothers and sisters, I have a few dreams to share. In a dream I received a few days ago I saw a section of the LUNC chart and the price was sideways and then had declined to \$0.000047. I prayed for confirmation and today 30/9/23 in a dream I saw the LUNC price had declined to \$0.000047 and I remarked how I should have shared the dream. I also saw around the time of the first dream, in another brief dream LUNC was at \$0.00023, which is similar to the price I saw in this dream <https://t.me/c/1620388801/138>. I had a dream on 21/8/23 where I saw Do Kwon and he looked anxious, then I saw a man representing LUNA sinking down towards the bottom of a lake. The dream repeated right after and I saw a man representing LUNA again sinking down towards the bottom of a lake. I assume this is bad news for LUNA and subsequent bad price movement, but I don't know the timing. I also had a dream about a month ago where I saw a price for LUNA of \$16. This is a big increase from its current price of \$0.50. While LUNA may have its own run, I have been warned against investing in it from a long time ago <https://t.me/c/1620388801/53>, so keep that in mind. I am focused on LUNC. On 24/8/23 I had a dream where I saw numerous companies were offering discounts on their products if people paid in LUNC. This would help promote their products but also LUNC, and shows about LUNC's future utility for purchases. I posted about this earlier but if you didn't see, on 26/9/23 I had a dream where I saw CZ and he was mad at LUNC, though I wasn't sure what caused it <https://t.me/JESUSisLORDValidator/181>. Please seek the Lord Jesus Christ, and regarding the sequence and timing. I am waiting patiently for the rises in LUNC the Lord has shown, not selling my holdings but acquiring more LUNC when I can. If there is a drop soon I will keep looking to acquire more LUNC and stake it. When the massive bull run takes off as the Lord has shown me <https://t.me/c/1749237879/17878>, we will see great improvement, and staking even with the same APY will bring much bigger returns due to the price increases. God bless you. Christopher.

Dear brothers and sisters, this morning 1/10/23 in a dream I saw LUNC was up in green and I saw 593%. If from current price (I don't know when exactly the move will start) that would be a new price of around \$0.00044. God is reminding about the coming good move for LUNC, let's patiently wait for it. God bless you. Christopher.

Dear brothers and sisters, I have a dream I want to share that I received today 12/10/23. In the dream I was a passenger in a van which arrived at a building. I went to quickly get my possessions out and saw I had numerous books which I put on the ground, 10 in total. I saw that the building I was at was a Palestinian support centre, and several members of the group were outside nearby. I looked down at the books I had put out and saw they were all books that were for Israel, and against the Palestinians. The books were favourable to Israel and their right to their land. I saw also there were numerous faces of Jewish children on the front of the books. I then heard the Palestinian group members start screaming and yelling furiously as they saw the books, being enraged about what they saw. I knew the books were from God and were a message to the Palestinians that God supports Israel. I knew God had sent me to place the books before them so they could see it as a testimony to them of God's love and support for Israel. The number 10 (the number of books) is a significant number in

the Bible, carrying weight behind the message given by God. That was the dream I wanted to share. I believe God gave me this dream to reiterate His word in scripture towards His people Israel, the Jews, who despite being estranged from Him are subject to the prophetic promise of their redemption: Zechariah 12:9-10 "It shall be in that day *that* I will seek to destroy all the nations that come against Jerusalem. 10 "And I will pour on the house of David and on the inhabitants of Jerusalem the Spirit of grace and supplication; then they will look on Me whom they pierced. Yes, they will mourn for Him as one mourns for *his* only *son*, and grieve for Him as one grieves for a firstborn." Especially in these days, let this dream be a reminder to us all of God's love and favour towards Israel, and for us to pray for their people in this time of their suffering a heinous and vile attack from Islamic terrorists, for God's deliverance for them and their children, and for their salvation in Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I had a dream this morning 23/10/23 where I saw Edward Kim (former Terra Rebels member who helped bring staking and the burn tax) commenting that the blacklisting proposal opened up problems for the blockchain. That was the dream. I voted VETO on that proposal and spoke against it strongly, but it still passed. Another LUNC developer Inon-Man has warned it could cause issues as it requires numerous source code changes. I will look to work against the proposal as the Lord leads me. God bless you. Christopher.

As I was waking up this morning 28/10/23 out of a dream I heard the words, "A big rise". Hopefully this will be very soon. God bless you. Christopher.

30/10/23 My proposal #11849 to stop blacklisting did not pass and was rejected, though it made quorum <https://station.terraclassic.community/proposal/columbus-5/11849>. Allnodes was the deciding vote who again supported blacklisting voting no, a big mistake, and strongly criticised me for bringing a re-vote saying it was an abuse of governance and the communities will, a completely unfair and very wrong statement. They have unfortunately voted against or not even cast a vote for every single proposal I have brought to vote, including the Vision Plan for the 1.2% burn tax as God showed me. I cannot do anything more about the blacklisting, and what will happen will unfold. You can see the dream I shared warning about it here <https://t.me/c/1749237879/23956?thread=23833>. I will continue to do as the Lord leads me. In time Lord willing as He has shown me, my validator will gain more voting power and I will be able to help put in place the Lord's plan for LUNC as He shows me. Thank you everyone for your support. God bless you. Christopher.

7/11/23 Dear brothers and sisters, I have several prophetic dreams I want to share with you about war that I received in the last few months. In one dream I was in Syria and it seemed that the government had been conquered, and around me were allied western troops, and many Israeli soldiers. I saw as the Israeli soldiers walked past, males and females, their faces with fatigue and determination, and I was strongly moved emotionally for them and by their righteous cause. I then heard about preparations for defence as the enemy was going to attack. I thought the enemy was Russia. I asked to join the allied army to fight with them against the enemy and was accepted, and the dream ended. In another dream I was outside of Melbourne Australia, and I saw several hundred allied Polish soldiers moving towards the city to set up defence. I knew China was shortly coming to attack the city. I saw inside an Australian military camp and they were appealing for the EU to send soldiers to help repel the invasion. In another dream I was in Melbourne and knew the city was under attack and was rushing to ask people off the street to come and help defend the city. I knew it was

Russia and China who were attacking, and I knew the defence at Melbourne would be successful, and I was earnestly seeking out volunteers to help defend the city. In another dream I was part of allied defences in Melbourne and seeing waves of Chinese troops attacking, with also dark skinned troops in different uniforms. I heard someone say, "They say the city has already been given to China", I saw an official document on the ground with signatures, purporting to show the city being given to China by a traitorous official. The Australian soldiers paid this no regard. Then I saw Chinese and other dark skinned officials in parade attire with medals walking proudly towards us with Australian hostages in front, as if they were coming to lay claim and take over, but when they came close they were opened fire on, and the dream ended. I had another dream where I heard about Putin being overthrown in a coup. This goes with my prior dream of "Soviet Leader Overthrown" <https://t.me/c/1620388801/42>. Further outbreak of war is coming. These go with the other dreams I have been shown of war which you can search on the main page or my YouTube. I don't know the timing of when these things will be. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I wanted to share this here as well as my validator Telegram <https://t.me/JESUSisLORDValidator>, so you are aware of coming changes to all validators minimum commissions including my own. Initially validators could set their own commissions freely, then they implemented 5% minimum commission, now they are going to implement a dynamic commission based on voting power. I have voted ABSTAIN on proposal #11874, which is a software upgrade and chain halt to occur on 20th November to incorporate the dynamic commission module which previously passed governance (prop #11738). The dynamic commission proposal (#11738) passed by 83% YES and I was one of only three validators to vote NO on the proposal, as I believe validators should be free to set their own commissions as they please in accordance with free market principles <https://t.me/JESUSisLORDValidator/171>. As the dynamic commission proposal passed, and this is for the implementation of it, I voted ABSTAIN because the community already overwhelmingly decided to implement this change, and the change is not a security risk or dangerous to the chain whereby I would vote against it even if a prior proposal passed. If this software proposal passes, and it will, this means is that all validators minimum commission will be set automatically based on their voting power, the higher voting power you have, the more your minimum commission. My commission is 5%, which is my maximum under the current chain rules, and I planned for this to be my maximum continually, and 5% as God showed me in a dream is a fair amount. With the dynamic commission my minimum commission would be automatically raised to 8%, and continue to increase as I grow in voting power, with a cap of 20%. The formula is $(VP - 0.5) \times (2 + VP/10)$. While I did not support the dynamic commission, it may have effects which will benefit my validator. I have seen in two dreams from the Lord the dynamic commission passing and being in effect, and my validator was 3rd on the list, it had caused big changes in the validator ranking. I support removing dynamic commission in the future, but things will have to play out for some time before there will be any consensus to overturn the proposal. If you want to continue to support me and help me gain higher voting power to fulfil the Lord's plan for LUNC as He shows me, you are welcome to keep staking with me even though my commission rate will automatically rise as my voting power does, being set by the protocol rules. If you want to redelegate and go stake with a lower commission smaller validator you are free to do so also. I hope this explains the situation for the changes coming to validator commissions on the 20th of November. Let me know if you have any questions. Thank you for all your support. God bless you. Christopher.

Dear brothers and sisters, I have two dreams I want to share with you. The first I received yesterday 10/11/23, and in the dream I checked my phone to see the crypto prices and saw BTC was up significantly, and I was shocked to see ETN at \$0.53. I immediately went to try to sell part of my ETN. That was the dream. This is a reminder from the Lord about ETN, and I believe it will do well during this major bull run, as I also discussed here <https://t.me/c/1749237879/17553>. I am still focused on LUNC as God led me, but I have some ETN also as I mentioned before <https://t.me/c/1749237879/23491>. In a dream this morning 11/11/23 I was with my wife and I checked my phone to see the crypto prices and saw LUNC was at \$0.000445. I was surprised as I thought it happened quickly, and I was happy. Then the scene changed and I saw my phone with the LUNC price written in green, changing rapidly up into cents and into dollars and I saw a number that I recall was \$169. I was shocked it was that high and I said to my wife, "Remember that number". Then I saw the price quickly go to zero or near zero and the dream ended. I have an earlier dream where I saw the LUNC overall move trajectory going way up before going way down very low. In that dream I saw a "10" on the chart at the upper portion of the move (though not at the top), but I didn't see a dollar sign, <https://t.me/c/1749237879/11194?thread=11193>, so the interpretation was not certain. I believe that seeing a 10 without a dollar sign may have had a different meaning than \$10, yet in my dream today I saw a clear dollar sign next to the figure I recall as \$169, before the drop to zero. This is a further and clearer revelation of the move. I believe we will see LUNC's amazing run during this major bull run, even up to \$169, before the move to zero. Major bull runs can last some time, and God will put into place what is needed to achieve this. We will see these amazing things and receive these blessings from the Lord Jesus Christ. The Lord is encouraging us about what is ahead. Also, here is my latest dreams PDF with all posted dreams up-to-date to 11/11/23 <https://www.mediafire.com/file/ujf7pcatshzqji7/>, so you can have a backup copy of all dreams to review, as the last version is over one year old. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters, I had a dream this morning 19/11/23, and in the dream I saw a BTC price of \$40,000, then I saw it change immediately to \$300,000, then the dream ended. I believe this short dream shows the massive bull run the Lord has been showing earlier, and that BTC will reach at least \$300,000, giving us a good indication from the Lord. The immediate change from \$40,000 to \$300,000 may indicate a rapid rise. I believe LUNC will do extremely well during this time. Our patience will be rewarded. God bless you. Christopher.

In a dream this morning 26/11/23 I saw Bitcoin had risen sharply on a chart and was at \$60,000. That was it. Hopefully it will happen soon. God bless you. Christopher.

Dear brothers and sisters, I wanted to refer to this dream from 4/6/2022 <https://t.me/c/1620388801/63>. You can see the text of the dream in the image. I saw in the dream BTC moving up quickly to 38k, and then I saw LUNC around \$0.00017. BTC has gone to 38k and is trading now at 39.5k, and LUNC has just hit \$0.000173. I believe this dream is fulfilled, from over a year ago praise God. Importantly this dream gave advice to urgently buy LUNC right away to make a lot of money. I believe we are on track for this major rise revealed by God <https://t.me/c/1620388801/107> which is evident by placing the chart over this image <https://t.me/c/1749237879/25108?thread=24913>. We will see the glorious prophecy fulfilled praise God. Thank you for all your support we made #6 validator. God bless you. Christopher.

I have voted NO on proposal #11898, which is a complicated proposal proposing to use USTC as a gas fee for a new coin the developers are making. How exactly USTC will be used and any benefits is uncertain, the proposal is complex, and it's unclear what kind of involvement or necessity is needed for them to do what they are proposing. I don't support new coins or changing the way our gas fees are done, or altering USTC and how it functions. If they want to incorporate USTC into their coin, then unless they want us to change something, they don't need governance approval. If they do want to make changes these need to be clearly specified before any vote. Overall I am a NO on this proposal at this stage. God bless you. Christopher.

Dear brothers and sisters, I wanted to draw attention to this amazing dream now fulfilled, from 28 March 2023, 8 months ago. Terraport was released after being closed for a long time, there was an important USTC re-peg proposal which went up for discussion (not at vote yet) with regards to the market maker module. Shortly after this went up and was promoted on X, USTC started pumping hard, leading the charge from 1.3 cents to nearly 7 cents. LUNC followed and has now hit \$0.00025, completely fulfilling this dream! How amazing, praise the Lord! It's so good and wonderful to see the awesome fulfilment of prophecy from God. We also saw LUNC take-off on its run from the \$0.000072 area, which was a fulfilled dream from over a year ago on 10/8/22 <https://t.me/c/1749237879/10985?thread=10238>. Praise the Lord for giving us the hidden knowledge and His favour and blessing. Thank you and God bless you my brothers and sisters in Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I had a dream this morning 8/12/23 where I saw LUNC was trading sideways and it began a big move upwards with large green candles. I also had a dream where I saw the LUNCUP I have on Kucoin was worth 17x its current value, which would make it worth about \$268 per coin (currently it's \$15.7). LUNCUP is a leveraged coin linked to LUNC without liquidation risk, that rises at a higher proportion than LUNC when LUNC rises. Though these types of leveraged coins are good for bullish rises, they lose value in more stable or declining markets. I only have a small holding of LUNCUP compared to actual LUNC. Yesterday I saw in a dream the LUNC price of \$0.00047. The day before that I saw in a dream the LUNC price of \$0.00038, and I had another dream that same night where I saw \$0.00038 again. These dreams are encouragements from the Lord that LUNC will soon rise again in a great way, doubling and more, and to help us be patient and expectant before the Lord for the fulfilment of the prophecy He has revealed. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 17/12/2023 I saw a chart of LUNC, and it was at the \$0.00044 area moving sideways. The visible movement was at the bottom of what I could see, and all above that price area was big open space on the chart, and my attention was drawn to it and it was significant. Then the dream ended. I believe seeing a huge space above the \$0.00044 area was foreshadowing a big rise above this area much higher, and perhaps meaning the \$0.00044 area forms a new price floor. I had another dream today of seeing LUNC dropping on a chart to \$0.0001. I had a similar dream a few days ago. I don't know the timing of this, whether this is soon or later on. I am hoping we rise in a big way soon, and I believe we will, we just need to keep being patient. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, the LUNC governance proposal #11933 I mentioned earlier that I assisted with drafting <https://t.me/c/1749237879/25937?thread=25639>, for the 1.5% on-chain tax is doing well so far on its second day of voting. I just realised the voting ends on Christmas day (Australia) the 25th. If the proposal passes it will be official on Christmas day, the day

Jesus Christ's birth is celebrated. I never even intended to bring this proposal now. If this proposal passes it would be amazing, and fulfil the prophecy I received on 15/3/2023 that I would implement the 1.5% tax on-chain <https://t.me/c/1620388801/133>. I hope to the Lord it succeeds this time, as many things have come together to get us this far, and whether it passes this time or later, I am so happy for the Lord who has blessed us and given us this guidance and knowledge. Your prayer about the success of the proposal according to God's will I greatly appreciate. God bless you my brothers and sisters. Christopher.

With less than 3 days left on the vote for proposal #11933 for the 1.5% on-chain tax for Terra Classic (LUNC and USTC), we are at the critical time. Several large validators have not voted. The vote is down to the wire, currently neck and neck. Please join me in prayer before God that He delivers us the victory in Jesus Christ name, and the will of God be done. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters, with almost 48 hours left on the critical and historic vote for proposal #11933, for the 1.5% burn tax that God showed me by prophecy on 15/3/23 to implement on chain, I have a few dreams to share with you, including one I just received before waking up recently. On 21/12/23 I heard in a dream the words "Best crypto weekend ever". I also saw in another dream the LUNC community group chat LUNCZONE everyone celebrating intensely, I assumed something very good happened. Yesterday 22/12/23 I had a dream where I was attacked over and over by a big group of fallen angels, and I fought them and rebuked them in Jesus Christ name and endured their attacks the best I could. The scene changed I was in a large room with many of them, they were so evil it was shocking, and asked me "who are you" in a mocking way, I said boldly, "Christopher Harris". I could speak with real control of my mind and rebuked them passionately for betraying God and being traitors to Him and for all their evil as the dream ended, and I woke up. It was the most intense spiritual experience I have ever had and it lasted a whole hour. I knew they were responsible for the opposition to the 1.5% tax proposal. I knew this was a pivotal moment and God allowed this encounter. I went back to sleep later that morning 22/12/23 and saw in a dream the words written, "ETFs and 1.5%". I also had another dream of seeing the vote turn green in our favour. Then this morning 23/12/23 I just woke up from a dream where I was outside with my wife on the other side of a green lawn. I looked at my phone and I heard a voice from one of the Allnodes staff saying, "We can't vote NO", and then I looked at the vote for the proposal on my phone and saw Allnodes had voted YES, with a big green bar, making the vote be passing. I put my hands in the air and screamed to my wife "Allnodes voted YES!" and she screamed back in celebration, and I ran to her and as I was running I said, "Praise God for fulfilling His words!" and embraced my wife and celebrated with her as the dream ended. I will put it on the line, God has delivered me this far, I believe the critical proposal will pass and Allnodes will vote yes. I also believe the Bitcoin ETF's will be approved, and we are on the cusp of the prophetic rises. God will deliver us this time the victory. Let's praise His glorious name Jesus Christ when He does. God bless you my brothers and sisters in Christ. Christopher.

I also had a vision from God this morning as I was waking up, I saw "1.1% burn 0.1% exchange". I knew this was an answer to my prayer about how I should do the off-chain burn tax plan. God gave me the answer so I am confident in the off-chain burn tax proposal, which I have already prepared. We are waiting on God to deliver on #11933, praise Him.

Dear brothers and sisters, this morning 24/12/23 I had a dream where I saw the founder of Allnodes Sephiroth in an internal chat say "Yes". I knew it was about the 1.5% tax. Later after

I woke up and was speaking to my wife wondering when Allnodes would vote since it was the last day on the proposal, I closed my eyes and saw a brief vision of my mobile phone with the time written large "4:58". I felt led to look this up on Strong's and found in Strong's Hebrew the definition was "God is king". I believe it was from the Lord, not about it happening at that time specifically, but the message from God that He is King, and to trust in Him. I believe in what God showed and that He will bring the victory. Praise His holy name the Lord our God Jesus Christ. God bless you. Christopher.

I have a dream I want to share I received on 12/12/23, it is not crypto related. In the dream I saw a large explosion hitting a building and several Ukrainian soldiers outside were consumed with part of the explosion and some kind of chemical substance, and I felt bad for the soldiers. My view zoomed out and I was now watching this footage on YouTube, and the video was about Russia using chemical weapons in attacks on Ukraine, and I saw the comment section full of Russians supporting the use of chemical weapons and saying they should have used them earlier. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 26/12/23 I saw a figure of \$0.00085. I believe this was for LUNC. This is a big move from our current price of \$0.00016, a 5.3x move. I am still expecting LUNC to go in a bullish trajectory according to the earlier prophetic vision I saw <https://t.me/c/1620388801/107>. Hopefully the BTC ETF's get approved by January 10 without any delay, and we can expect the whole market to become bullish including LUNC. God bless you. Christopher.

I had a dream today 28/12/23 Allnodes was saying tax to gas implementation was done, it seemed quicker than I expected. I was speaking to my wife and was excited to bring the 1.5% tax proposal up for vote again saying how important it is. That was the dream.

I had a short dream this morning 3/1/24 of seeing LUNC on a chart trading a bit above \$0.0002. Later in the night I had another dream seeing basically the same thing. God bless you. Christopher.

8/1/2024 - Staking rewards have been declining over time, but the way they are set up is during high volume spikes the short term APR can increase the reward rate. I have a proposal I made about funding the oracle pool, which is the primary source of staking rewards <https://t.me/JESUSisLORDValidator/213>. I had one dream where it seemed to be a later time and LUNC staking rewards were still a good rate (APR) but I didn't see specifics.

Dear brothers and sisters, I have a few dreams to share with you. This morning 18/1/24 I had a dream where I saw a chart for LUNC, and it was very bullish (see the photo in the comments section). It showed a move up, then a choppy upward move, followed by a massive diagonal move upwards. The bigger moves for LUNC are coming and we need to continue to be patient. In a short dream I received yesterday 17/1/24, I saw that a tax proposal had passed (I assume the 1.5% tax), and some of my enemies were complaining and saying they were going to sell. I would be glad if they did, and I believe it was more encouragement from the Lord about the 1.5% tax prop passing. We had the BTC ETF's approved, so the first part of the "ETFs and 1.5%" was fulfilled <https://t.me/c/1620388801/178>, we just need the second part. I also had a dream a few days ago of seeing \$16 LUNCUP (current price \$1.70). My enemies in the LUNC community keep trying to harass me away, to make all sorts of vile false accusations against me publicly and in the validator discord, they have now moved onto attempting to petition governance and even Allnodes to censor me so I remove my validator

name JESUSisLORD, or be removed as a validator. You can see their latest attempt with this governance proposal in deposit stage not actually up for vote yet (see the picture in the comments section), the initial depositor deposited exactly 666 LUNC to make the proposal, a sign of who is behind it. Truly to do good for LUNC and for God's plan for LUNC to be fulfilled, we must war against the evil forces of darkness. Ephesians 6:12 "For we do not wrestle against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this age, against spiritual hosts of wickedness in the heavenly places." God showed me clearly the demons were behind opposition to God's plan for LUNC <https://t.me/c/1620388801/178>, but God will bring the victory. I will continue to do as the Lord leads me in patience and determination to achieve our goals, which is the great rise of LUNC and the blessing of God's people with great wealth, which will have many effects on the world and lead to many being saved. Accomplishing these goals as the Lord showed me for LUNC is one of my important life goals. The effect of success in these things will have far reaching ramifications to our lives and the lives of many. Let us remember this as we exercise our faith and trust in Jesus in patience. Thank you for all your support and your prayers before the Lord. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 21/1/24 I saw a large base like out of a video game with different buildings, like a town or military base which represented LUNC. I then knew that Terra Form Labs (TFL), the original creators of LUNC and USTC (used to be named LUNA and UST), were about to give us a lot of help/assistance. Then in an empty area of the outskirts of the LUNC base, numerous nice new buildings of various types started popping up. I noticed a number were very useful and valuable, even the basic ones were upgraded and expensive. They kept appearing until a small city/town size area was formed of all the new buildings, with a perimeter fence around it. I then was able to reposition the whole site closer to the centre of the LUNC base. I knew it was a great gift of help/assistance from TFL and was happy to receive it. That was the dream. I believe this means TFL will help LUNC in a substantial way that will benefit us, either financially or with development assistance, or otherwise. The assistance was very generous like a large gift they wanted to give us. I will keep this dream in mind and I wanted to share this with you all. This is a positive sign of the future development of LUNC. God bless you. Christopher.

Dear brothers and sisters, I wanted to share a few things with you. In a short dream on 22/1/24 I saw \$68,000 in black writing with a solid green background, which I believe was BTC. I had a dream this morning 24/1/24 where I was encouraging people to not sell too early as the market was taking off. It's important for everyone to be very patient. The Lord told me about patience <https://t.me/c/1620388801/180>, and reminded me again 2 days ago, saying to me in a dream, "Be patient". Don't think you can trade your LUNC easily without consequences. You might think you can sell and buy lower. You may learn a hard lesson. It may take off without you. The price will rise and you may decide to sell early and buy back lower, because you are convinced it's a trading opportunity and you will succeed. But maybe it doesn't go where you think and it keeps rising, and in fear realising your mistake you buy back much higher and lose many of your coins in the process of trying to accelerate your gains. I have been in crypto now since late 2017, and learned many lessons along the way. The market is designed to take money from people using events and human psychology against them. The safest bet is to buy as much LUNC as you can, and to hold for the later prophetic prices, seeking the Lord before you sell. This will avoid these traps you can fall in. LUNC is very cheap now. I have bought LUNC even when it was over \$0.0002, believing and knowing it was cheap, because I look to the future of what God showed us. I stake the vast majority of my holdings, to earn continual rewards and contribute to the voting power of

my validator JESUSisLORD. This results in greater influence on governance, so I can work to achieve God's plan for LUNC as He leads me. Staking helps you focus on the long term, it also provides extra layers of security, as your holdings are not on exchanges where the exchange could be hacked and your coins all lost, but are in your secure self-custody with you holding the seed phrase. Staking also provides protection where if your wallet is compromised they cannot steal your LUNC immediately, as they are securely staked on the blockchain and require 21 days for the undelegation period. During this time you can take advantage of a discounted StakeRecover service with Allnodes for a good chance to recover your stake, instructions are at #6 on my website. This has already benefited one of my delegates who was able to return a substantial sum after their wallet was compromised. I believe the prophetic rises for LUNC will take time, numerous months, and there will be time to undelegate. Overall market bull runs can take well over a year to complete, as has been the case historically. If you stake you take advantage of receiving approximately 14-15% per annum (APR) returns (approximate APR listed here <https://validator.info/terra-classic>), and contribute to my voting power, and enhance your own security. Rewards accrue continually in LUNC and USTC, and you can withdraw them immediately and use them anytime. You can also enable auto-compounding for your stake with instructions at #7 here, which improves your APR as it continues to automatically consolidate your LUNC stake. For a guide I wrote of how to stake your LUNC with my validator, see #4 and #5 on my website. We are still waiting to be able to achieve the 1.5% on-chain tax, and the off-chain burn tax plan, which is God's plan for LUNC, and is needed to burn huge amounts and see the major prophetic prices. Soon the market will turn bullish in a huge way and we will benefit. Let us continue to be patient and not lose hope. We are in this journey together. Great things will come of this and our faith and stewardship, for us and our household, and many others who will benefit, and to advance the will of the Lord with great wealth in the hands of God's people. This is a major event with far reaching ramifications. Remind yourself of this as you exercise patience. Always seek the Lord Jesus Christ for guidance and strength and to help your faith. Thank you for all your support, for staking and contributing to our righteous cause, for your efforts and prayer and encouragement. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters, numerous months ago I had a dream from the Lord about having more than one validator. Recently a delegate of my validator JESUSisLORD asked me if I could launch a new validator with lower commission. I prayed about this and I had a dream on 30/1/24 where I saw about opening a new validator and I heard the words, "accelerate growth". Then on 31/1/24 I saw in a short dream my first validator was higher than it is now, and I had a new validator which had also grown significantly. I did as I was led by the Lord and I created a new validator just recently. It is now live, safe, and fully operational. Its name is JESUSisLORD 2. You can find it in the list of validators near the bottom, or search "JESUS" and it will come up. The reason for the new validator is to offer a lower commission option to any existing commission sensitive delegates, and to attract new delegates to grow my overall voting power. My validator JESUSisLORD is on the highest tier enterprise plan for excellent up-time and decentralisation, has auto-compounding and discount stake recover. My new validator JESUSisLORD 2 is more basic, with high up-time and 1% commission. It does not have auto-compounding or discount stake recover. The commission will stay 1% until the validator reaches about 1% voting power, after then the dynamic commission system voted in by governance will start raising the commission automatically. It is good to stake with my first validator JESUSisLORD, and we made the 5th ranked validator, and Lord willing it will keep growing. For the new validator JESUSisLORD 2 you are welcome to stake there also. I believe in what the Lord showed me and I have taken action, and I want to

accelerate our growth in total voting power to implement God's plan for LUNC as He shows me, and have more influence in governance. Thank you everyone for your support. God bless you. Christopher.

Dear brothers and sisters, it has now been exactly one year since I launched my LUNC validator, you can see my post here on 7/2/2023 <https://t.me/c/1620388801/114>. Thank the Lord we have come so far in one year, with my validator JESUSisLORD having over 5% voting power and the launch of my second validator JESUSisLORD recently as God led me. Sadly the chain is still ruled by the wicked. Every day I see the fruits of this fact, and see the unchecked evil continuing to cause trouble and the hope of the evil scammers to destroy the chain. I hope to be able to gain more power and influence to do good as the Lord leads me, and to oppose the influence of the wicked. Thank God for the prophecy He has revealed, and His goodness in our lives. God will deliver us and lead us. God will bless LUNC, and bless our people who invest in faith. He will bring to pass His word according to His glorious power and might. Those days are coming and we must continue to believe and fight for good with our righteous cause in the name of our Lord Jesus Christ. Thank you everyone for your support, for your prayers, for enduring the attacks of the wicked, for standing for righteousness and what is good. You can see this post I made on X about the one year anniversary of my validator launch https://twitter.com/ForTheCross_CH/status/1755075830114595225. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters when I launched my second validator JESUSisLORD 2 , I chose 1% commission because that's what I originally launched my first validator JESUSisLORD  with. I had no plans to change this, but I received revelation from God in a dream this morning to adjust the commission to 2%. I intend to do this and it will take a couple of days to take effect. I intend to leave the commission at 2% which by the dynamic commission system will only increase after the validator reaches around 1.5% voting power (currently at 0.24%). 2% is still a low commission and brings the new validator closer to making back its operating costs. My new validator is under attacks by the enemy who have made a discussion thread accusing me of launching a network attack on the blockchain (totally false and I have not broken any rules), with some of my enemies proposing to have my validator jailed or to tombstone it. They hate that we are doing well and to see another JESUSisLORD . So far these are just words and there has been no governance proposal made. I will keep everyone updated in the event they come against my new validator. Perhaps the 2% commission will help with this as it's further from 0%, but I am not sure. I am certain I have done according to the Lord's leading in these things with my new validator, and I trust in Him to make the way. Thank you for your understanding and support. God bless you, Christopher.

Dear brothers and sisters, I have a dream I want to share with you, received this morning 14/2/2024. In the dream I saw an image of a written Binance announcement on their website. The announcement was about Binance applying the burn tax on LUNC transactions and the date and time it will go into effect, though I couldn't see the specifics. I was happy and excited to see the announcement, knowing it was what we had been waiting for. That was the dream. This is a reminder from God about what is ahead. The great goal is to achieve the off-chain burn tax, which can allow us to burn so much LUNC to reach over \$1+ and the prophetic prices God revealed. This dream is another confirmation of the future success of God's plan for LUNC. This begins with the 1.5% on-chain tax which will hopefully pass on the next attempt, and then the 1.2% burn tax off-chain on-exchanges, for massive burning of the supply. These are my consistent goals and have been for some time when the Lord first

showed me, and I am determined to do as the Lord leads me. All that we are doing and that I am doing with LUNC, governance, and my validators, is to achieve these goals and to see the fulfilment of God's blessings upon His people. To complete these achievements is one of my major goals in life personally, as a son of God, and as a brother in Christ. I fully believe in what God has shown me, and that it will come to pass. Let's continue in faith towards the promises of God in the name of our Lord Jesus Christ. Thank you brothers and sisters for all your support. God bless you. Christopher.

16/2/24 - I had a dream this morning where two large crocodiles came out of the sea to attack me, but the Lord held their mouths shut and they couldn't bite me. The Lord is our deliverer. Praise our Lord Jesus Christ.

18/2/24 - Dear brothers and sisters, I wanted to share with you about this journey and the steps forward, with an evaluation of the situation. Right now it's abundantly clear to me, this chain LUNC is predominantly ruled by the wicked. We have limited power, influence and control over governance. We are not powerless, but we have yet to come into the position the Lord has set for us. By the grace and goodness of the Lord we have made it to over 5% voting power over two validators in one year's time. I have followed the strategy the Lord reveals to me, and His plan for LUNC. I am determined to see the 1.5% on-chain tax implemented, and the 1.2% burn tax on exchanges. We need this to burn massive amounts of LUNC to reach the major prophetic targets. However, there are many obstacles in the way. The devil and the demons are continually against me and my efforts to do good for LUNC, our people, and all LUNC investors. They continue to lie, falsely accuse, distort, manipulate, attack, and do all manner of evil. The recent proposal I put to vote #12069 for example, this is for Guidelines to exchanges to spread their stake over the active set of validators, not on only 8 out of the top 11, which they stake \$39M worth of LUNC on. They improperly influence governance and stake with mainly LUNA V2 validators. Yet I am accused of violating freedom and being "ungodly" by some validators, and right now my proposal is being vetoed. We are fighting a serious battle, and it won't be over quickly. God showed me over several dreams to bring this proposal to vote and about its success, and I did so. There could be a turn around, but it seems the proposal is not going to pass now, yet God led me to bring it anyway. This is similar to what the Lord has shown me before about other proposals I brought to vote, that they will pass, but the timing of when was never clearly revealed. It has become very clear to me that at this time, we lack the power and influence ourselves to bring to pass the needed proposals to fulfil the Lord's plan for LUNC. Of course the Lord can do anything, and nothing is impossible for Him, but I believe the fulfilment of God's plan for LUNC will happen over time. I believe the Lord is using this journey to improve all of our faith, and our relationship with Him. With LUNC we need to continue to build strength over time until we have the voting power to succeed over the adversary, and for the conditions and timing to be right as the Lord wills. The Lord has shown me many things, some of which I have not shared, about great things happening and future successes. I long to see them all fulfilled, but the timings and seasons belong to the Lord. He knows when these things will come to pass. Now we can see at voting, the tax to gas implementation proposal is not passing, and could be delayed again. This is required before I plan to bring the 1.5% tax for vote. However, it's important to know that at this time the venom against me is of a high level. They continually mock me, attack me for having a second validator, and like to veto my proposals just because it's me. They hate me without a cause, and hate the name of my validators, they hate us and speak evil of my delegates, and they hate the Lord Jesus Christ. Yet in all things, God is for us. I know what God has called me to do, and I will continue to do all I can to achieve it. I still expect LUNC to rise in price according to what God showed

me, but we need to be prepared for enduring in faith for the long term, even if it takes longer than we expect. Hopefully the 1.5% tax passes on the next attempt, as the Lord has led me to put it up after tax to gas is implemented. But if it doesn't pass then, we will have to wait until we can pass it later with higher % voting power. I had a dream this morning where I knew we had met success, but was looking back on all the proposals, writings and efforts which came before as led by God, and how they formed like a testimony of the journey of our efforts, and how we had tried our best to bring it sooner, but were continually stopped, until we finally succeeded. I believe our efforts are valuable and are not in vain, and work together for good in God's plan for us. I hope LUNC rises quickly, I hope we can pass all the important proposals soon, but I am also prepared for the long term, and to continue in faith, steadfast until our assured victory in the Lord Jesus Christ. God bless you my brothers and sisters in Christ. Let us keep moving forward in faith, in patience and obedience to the Lord, and awaiting the fulfilment of His promises. Let no evil thing disturb you, the Lord will surely bring the victory in due time. Thank you for all your support and prayer, which I greatly appreciate. Your brother in Christ, Christopher.

Dear brothers and sisters, I am pleased to announce I have obtained SolidProof KYC Certificates for both of my validators JESUSisLORD and JESUSisLORD 2. This is something the Lord led me to obtain by dreams and I believe it will help our growth. SolidProof is the first governance approved KYC provider and I am glad to achieve the KYC Certificates with them. This is part of my commitment to accountability and professionalism to my delegates and the LUNC community. You can see more details in my post below. God bless you. Christopher. https://twitter.com/ForTheCross_CH/status/1759521414523330655

Dear brothers and sisters, in a dream this morning 20/2/2024 I saw LUNC rising up quite decently. I didn't see the specifics but it looked like a good rise. Later I saw in another dream my LUNC widget showing a price of \$78. Those days will come, and we are working on building the groundwork for them now. God bless you. Christopher.

Dear brothers and sisters, I wanted to share this post with you, as it shows the evil that comes against us from the pit of hell. This is in relation to an evil person, Youtuber, and LUNC validator, who continues to speak malicious lies against us, against me, and my Christian supporters. Be informed about the wickedness that exists on this chain, and what kinds of things we are up against. Thank you my brothers and sisters in Christ for all your support and prayer against the forces of darkness. Thank God we will prevail in our Lord Jesus Christ, our Saviour and deliverer. God bless you.

Christopher. https://twitter.com/ForTheCross_CH/status/1759910267008536852

Dear brothers and sisters, I made a YouTube video today 25/2/2024, providing an update on my current situation, about my validators, my Validator Goals, and my continued mission from God. The content is what I have already shared here, but I hadn't made a YouTube video in a long time so wanted to make an update there. You are welcome to watch the video. God bless you. Christopher.

https://youtu.be/iUE7LrTg7bc?si=Hxtj1PwMV_DW0W6o

27/2/24 - Dear brothers and sisters, I have two dreams I want to share with you that I had in the last couple of days. In the first dream I saw numerous USA soldiers carrying wounded Ukrainian soldiers on their shoulders, male and female, with each US soldier carrying an injured Ukrainian soldier. I believe the dream shows that the USA will help Ukraine and won't abandon them. In another dream this morning I saw USTC at 9.6 cents (\$0.096). God

bless you. Christopher.

Dear brothers and sisters, in a dream this morning I saw my price widget like I have on my computer, and it showed 57 for LUNCUP/USDT and 130 for LUNC/USDT. This is a high LUNC value of \$130, similar to other prices I have seen of 78, 99.8, 118, 169 and 267. These are huge coming prices for LUNC in the future. Another point to notice from this dream was that LUNCUP was at 57 (worth \$57), which is only a 31x move from its current price, whereas LUNC to \$130 is a 911,000x move. LUNCUP loses its value over time as it's a leveraged token. It's not the best for long term holding, as holding LUNC itself will be better long term. But it is good for shorter term holding, where you can take advantage of a big rise, sell and look to re-enter LUNCUP or buy more LUNC on dips. I have some LUNCUP, and my plan for the coming run is to sell staking rewards and LUNCUP when I feel led to, and otherwise keep my main LUNC holdings until much higher prophetic prices. I believe the Lord will reveal more guidance for those times about selling, but make sure you seek the Lord before you sell your LUNC holdings. Also see this post <https://t.me/c/1620388801/185>. God bless you. Christopher.

Dear brothers and sisters, this morning 12/3/24 I saw in a vision the LUNC chart like this, which showed a large breakout move upwards. It seemed like it was from our current area and was very soon. Please seek the Lord Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, yesterday 18/3/24 in a dream I saw a chart showing a V shaped recovery. The chart went down fairly steeply but went back up also fairly steeply, not lingering low for long. After seeing the image I thought it was about LUNC. I believe the dream was to let us know it will go back up soon and won't stay low for long. Right now BTC is having trouble convincingly retaking its prior ATH of 69k, which has led to steep corrections across the market. We should see good momentum return once BTC convincingly breaks the prior ATH levels. God bless you. Christopher.

I had a short dream yesterday 3/4/24 where I went to check the LUNC price on my phone and saw it was at \$0.003. I was expecting three zeroes after the decimal not two, so I was surprised. In time we will get there and higher. God bless you. Christopher.

Dear brothers and sisters, as we approach the BTC halving in less than 3 days, and await the bull market really taking off, I'll provide a short update and share a few dreams I received today 17/4/24. I am still waiting for developers to complete the tax to gas implementation, and in accordance with this dream from the Lord <https://t.me/c/1749237879/26622>, to bring the prophesied 1.5% on-chain tax to vote then. Hopefully it will pass on the next attempt. Based on current developer workload (Genuine Labs are in the middle of a chain upgrade job) it could be around June when we can bring the 1.5% tax to vote. Recently there have been on and off spam network attacks on our chain (and other Cosmos chains), which have resulted in some validators going down temporarily. As part of a response to this, as well as this being something I supported for a long time, I have put up a proposal to raise chain gas fees by 10x. Currently gas fees are way too cheap, costing only 3.74 LUNC for a send transaction (\$0.00038). As gas fees go 50% to the community pool and 50% to staking rewards, if the proposal passes it will improve funding to the chain while also making network spam attacks more cost prohibitive. You can see the proposal here <https://station.terraclassic.community/proposal/columbus-5/12095>. That is an update on the current situation. The two dreams I had today, one was I saw clearly BTC at \$83,000. In another dream I saw money raining down from above, people celebrating, jumping up and

down and hugging each other, being so happy, and I believe it was in relation to LUNC. Our patient faith will be rewarded by the Lord. God bless you my brothers and sisters.
Christopher.

Recently there have been on and off spam network attacks on our chain (and other Cosmos chains), which have resulted in some validators going down temporarily. As part of a response to this, as well as this being something I supported for a long time, I have put up a proposal to raise chain gas fees by 10x. Currently gas fees are way too cheap, costing only 3.74 LUNC for a send transaction (\$0.00038). As gas fees go 50% to the community pool and 50% to staking rewards, if the proposal passes it will improve funding to the chain while also making network spam attacks more cost prohibitive. You can see the proposal here <https://station.terraclassic.community/proposal/columbus-5/12095>. I have voted YES on #12095 to raise gas fees by 10x. I have also voted YES on proposal #12094 which is from Genuine Labs and is to decrease maximum block size from 5mb to 2mb, as an effort to counter the spam transaction attacks. Aside from this I am still waiting for tax to gas to be completed before bringing the 1.5% tax to vote. Currently Genuine Labs are over half way through their 8 week chain upgrade proposal, and may take up tax to gas after. It could be around June we could bring the 1.5% tax to vote, and hopefully it passes then. God bless you.
Christopher.

Dear brothers and sisters, I had a dream this morning 20/4/24 I wanted to share with you. In the dream I saw the chart of LUNC, and saw it had exploded upwards almost purely vertically, up above the recent high and started trading sideways. It looked like based on the chart I saw that it was not far from happening and was close. I didn't see price figures in the dream, but the image I provided is the LUNC daily chart and is close to what I saw. Praise the Lord. God bless you my brothers and sisters. Christopher.

I saw in a vision this morning 25/4/24 people on the LUNC community Telegram posting wildly about USTC and images of it rising and speaking about it excitedly. Often USTC rising precedes LUNC rising, so it's something we could expect to see soon. God bless you.
Christopher.

Dear brothers and sisters, I had a dream this morning 16/5/24 that I want to share. In the dream I was shown about the desire of groups within LUNC who want a USTC re-peg. I saw they were pushing for USTC but were sacrificing LUNC to do so and were happy and proud about it. I saw they were trying to make USTC great and were planning to destroy LUNC in the process, and I heard them speaking of this plan. They cared only about USTC and not LUNC, and they were willing to take enormous risks and experiments without regard to the well-being of LUNC and its investors. I was shown statements I had made indicating support for testing in relation to a USTC re-peg, and a "safe USTC re-peg", and I felt bad for making those statements, realising the outcome would not end well, and that this is not God's plan for LUNC. This was the dream. I believe this dream was from the Lord and is to help me to correctly understand the path forward for LUNC and USTC into the future, so I can set my course correctly with regards to USTC. Initially I was opposed to a USTC re-peg because every proposal I had seen was a dangerous experiment and often involved minting LUNC, which is the exact opposite of burning, which God showed me. I wrote in my Validator Roadmap on 15 February 2023 in point 1 to "never allow minting", and that "We must block dangerous and potentially fatal experiments to the LUNC chain". Later, after seeing considerable support within the LUNC community for a USTC re-peg, I signalled support for a "safe USTC re-peg", and decided to support testing of the market maker algorithm with

strict mint limitations. I was mistaken. This is not a good idea whatsoever. This will result in LUNC being minted, potentially large amounts, to benefit USTC and raise its value, while sacrificing LUNC. Such a peg I believe as God has shown will be used to drag down and destroy LUNC. The latest proposal in discussion is for large amounts to be minted and added into the oracle pool, and I certainly do not support LUNC being like new LUNA with inflation being the source of the bulk of their staking rewards. There are many risks including legally, another hyperinflation crash event, the destruction of our investments, and going against the will of the Lord. The desire of many to walk down the same failed path is extremely strong. Why do any of this when God already showed by prophetic revelation what to do? Raise the on-chain tax to 1.5%, work to obtain a 1.2% burn tax off-chain on exchanges. It's that simple. This can be applied to both LUNC and USTC. God has shown me this is His plan for LUNC, guidance for how to do it, and that it will succeed. This is all that is needed for the recovery of LUNC and USTC. It's so simple but is viciously opposed by many enemies. My long term vision for LUNC is as a deflationary store of value with good staking rewards which delivers value to investors. I was shown USTC reaching \$3 and \$5 in earlier dreams, yet was shown nothing by God about a re-peg. Therefore I want to focus on what God has shown me, and not become sidetracked by unnecessary and dangerous paths. What this will mean is I will be strongly opposing any proposal which leads to any minting of LUNC or USTC. I will be opposing USTC re-peg proposals. I will continue to oppose what I believe are dangerous proposals for the chain. I will keep focused on God's plan for LUNC that He has shown me, and to do as He leads me. I wanted to share this with you my brothers and sisters. The plan now is to bring the 1.5% tax to vote after tax to gas is completed, as God showed me. Right now Genuine Labs is still working on finalising the SDK 47 blockchain V3 upgrade. When this is completed they have indicated they can take up the tax to gas job. Hopefully we can bring the 1.5% tax proposal in June. Passing this is the main priority. I have prepared a good promotion for the vote as the Lord led me. God bless you my brothers and sisters in Christ. Christopher.

Dear brothers and sisters, I had a dream yesterday 2/6/24 where I saw some crypto prices listed. I could only make out two of them, XRP was \$20, and LUNCUP was \$2.20. I do not know if this was at the same time, or just future price targets. Please seek the Lord. We just had the successful V3 blockchain upgrade so hopefully Genuine Labs puts up the tax to gas prop soon. After tax to gas I will bring the 1.5% tax to vote. Lord willing we can pass it on the next attempt. God bless you. Christopher.

Dear brothers and sisters, in a dream this morning 10/6/2024 I heard a song I knew that was very significant to me for around five seconds, which encouraged me. This song I had used in a simple celebration video and memento slide-show, in anticipation of the 10x gas proposal I had made passing. I had fully prepared the video with the song but the proposal, although it was passing, was defeated by a coordinated veto campaign from the opponents, which was upsetting. I was not able to use the video with the song. I look to revisit a gas fee proposal in the future. Now I continue to look towards the 1.5% tax, shown to me by God in a prophetic dream on 15/3/23 that I would implement it on-chain <https://t.me/c/1620388801/133>. I know this is essential to achieve the 1.2% burn tax off-chain on exchanges, which is key to burn massive amounts of the supply and achieve the higher prophetic prices God has revealed. God gave us an active role in the fulfilment of the prophecy. I have been doing my best to achieve what God has shown me, as He leads me. This has taken time. It's now nearly 15 months since I was shown in the dream implementing the 1.5% on-chain tax, and one year since my Vision Plan proposal, and longer since I was first shown about the 1.2% off-chain burn tax. I have been shown many things by the Lord including about the growth of my

validators, and the future of LUNC for God's people. It is clear that these things are taking time. It's not going to be achieved in a moment. It's a real difficult battle over months and years. I pray to the Lord for LUNC, against the enemies in LUNC, and for God's people often. I wanted to share this dream, that God is reminding us that one day the victory will come, the victory song will sound, and the prophetic dreams will come to pass. God is faithful always. He knows us and everything we go through, and all our efforts. Please be encouraged that the day of success draws closer, and the prior defeats and troubles strengthens our resolve and hope in the Lord Jesus Christ, to see the fulfilment of His word and prophecy. Now we should shortly see the long awaited tax to gas proposal going up to vote, as it's currently up for discussion, and there will be some weeks to complete its implementation. After this is done I will bring the 1.5% tax to vote with all my efforts. God led me to prepare a video trailer for the proposal which I completed and will share at the right time. I will also use the song from the dream this morning in celebration when we can pass the 1.5% tax, hopefully this time at vote, God willing. I am entirely committed to achieving what God has shown me, and I am confident we will, in time, and God will deliver the victory. I only ask my brothers and sisters for your continued support, prayer as you feel led by God, and steadfast patience in hope. Thank you my brothers and sisters in Jesus Christ. God bless you. Christopher.

Dear brothers and sisters, I have posted for discussion the 1.5% tax proposal on Commonwealth, which will go to vote after tax to gas is successfully implemented. Please see my tweet below and the 1.5% tax trailer I prepared. Lord willing it will pass this time. Please feel free to support in any way you are led. Thank you for your support. God bless you, Christopher. https://x.com/ForTheCross_CH/status/1814810895375343928

Dear brothers and sisters, I had a couple of dreams a few days ago in the same night. I wasn't sure about sharing them as I had been getting a lot of enemy spiritual attacks lately, and I wanted to be careful, but I decided to share them now. In the first dream I was seated outdoors and a smallish bear came running up to me to try to attack and eat me, but I stood up and pulled out a knife, and the bear got intimidated and ran off. Later in the night I saw a dream of a huge bear being scared and chased away by a donkey. After seeing the recent declines and concerns in the market, I wanted to share these dreams. The second one makes me think of democrats making moves to chase off the big bear, and as it's an election season it seems they would want to intervene in a crashing market. This is something to keep in mind if we see further decline. God bless you. Christopher.

Dear brothers and sisters, I had a dream yesterday 11/8/24 where I saw BTC was at \$37k and the crypto market was red. I also saw a brief vision this morning of seeing BTC at \$35.1k with the crypto market in red. I don't know the timing of when this would be, but it could be in relation to the bear dreams I shared. Please seek the Lord. God bless you. Christopher.

Dear brothers and sisters, here is a post I made on X: "We have numerous members in the #LUNC community who are not content to just disagree, argue, accept that others believe differently and vote differently, but they want to censor their opposition using extreme measures. The push to tombstone my validators JESUSisLORD and JESUSisLORD 2 has escalated to dangerous levels. I have broken no chain rules in creating either of my two validators. Both my validators operate with high up-time, have never been jailed, with no faults or reason to be slashed by the protocol. Both of my validators are KYC with the first governance approved KYC provider SolidProof, demonstrating my commitment to accountability. I am entirely focused on #LUNC. I am working to fulfil the vision God

showed me for the chain, and my Validator Roadmap, and I believe in the great future of \$LUNC for its investors. Political targeting of my validators has been a persistent threat for some time, but the rhetoric has climbed to another level with numerous community members calling for my validators to be tombstoned, and are planning to bring a proposal to do so. If this attack were to be successful my validators would be permanently closed, all delegates would have to undelegate, and would be slashed of their staked holdings by 5%. I will take all available legal options to stop this and to defend and protect my validators, and my delegates. I am currently consulting with legal representation on this matter. I appreciate all your support and prayer, and I believe that God will make the way. 🙏 God bless you.

Christopher. JESUSisLORD 🏴‍☠️ LUNC Validator"

https://x.com/ForTheCross_CH/status/1828690495561969813

Dear brothers and sisters, I hope you are doing well. There is a time of testing when waiting in patience on the fulfilment of revelations from the Lord. We are closer than ever, and I believe God will greatly bless all who endure in faith. We are still waiting for the bull market to take off, for tax to gas to be completed (there are some complexities/bugs being worked out), and for the 1.5% tax vote. So far those who were attempting to bring a tombstone proposal against my validators have not put it to vote. The Lord has shown me about continued attacks in the future, guided me what to do, and I already have legal representation fully across the matter. The attacks on those who are open about their Christian faith, and do the will of God as He leads them, are trying and are part of the difficulties we endure in faith and perseverance. Lately owners of certain LUNC validators on-chain have accused me of being a scammer, a fraud, and of criminal behaviour. These are highly malicious false accusations, and is defamation. These individuals are brazen in their lies, distortions of the truth, and false narratives. They hide behind their anonymous identities, while never proving their false claims. You can read over my response to one of the false accusers here: https://x.com/ForTheCross_CH/status/1834513359632568799. I believe in all of what the Lord showed me and I believe the Lord will greatly bless His people. Thank you for all your support, for supporting my validators, and for your prayers. God will make the way. Isaiah 54:17 "No weapon formed against you shall prosper, and every tongue *which* rises against you in judgment you shall condemn. This *is* the heritage of the servants of the Lord, and their righteousness *is* from Me," says the Lord." God bless you. Christopher.

Dear brothers and sisters, I have a few dreams I want to share with you. The first I received on or around 23/9/24, and in the dream I saw LUNC on the Kucoin app where you buy and sell, and I saw its price in digits (I didn't see the chart), and I saw it go from \$0.000070 area all the way speeding rapidly up to over \$2,000, and the dream ended. I believe this is a long term overall move for LUNC, and the Lord shows us again the amazing future for LUNC. In a dream on 19/9/24 I saw two older women in a Christian church had arranged for their younger female relatives to get married together. This was celebrated by the church. That was the dream, showing corruption in the church. In another dream on 24/9/24 I was in a room of a university or school, and people in the room were discussing "transgender females" and were supporting them. As I walked out of the room I calmly said, "Transgender females are not females". A mob immediately came sprinting for me to violently attack me and one of them pulled out a knife to try to kill me. I had to fight to defend myself as the dream ended. This dream shows how the LGBT movement will be hyper-prone to violence against any dissenters, especially Christians. These are the dreams I wanted to share with you. For LUNC we are waiting for tax to gas to be completed, of which issues are still actively being worked out, then I will bring the 1.5% tax to vote. I am waiting for LUNC's rise and the bull market to take off. May the Lord bless you and deliver you and provide for all your needs. Your

brother, Christopher.

Dear brothers and sisters, I had a dream this morning 25/11/24 where I saw my crypto price bar on my computer and my view was very wide like a widescreen, but my view zoomed in very close and very clearly to see only the LUNC price, which was \$0.00240. There was soft music playing in the background and it felt very significant, and the view stayed on the price for several seconds to emphasise it. The scene changed and now the price read \$0.088 and the dream ended. From current price a move to \$0.0024 is a 19.3x increase. I have seen earlier dreams of \$0.004 as mentioned in this possible sequence post <https://t.me/c/1620388801/110>, and this dream of a big move going up to at least \$0.001 <https://t.me/c/1620388801/109>. I wanted to share this dream with you, as we wait patiently for the rises for LUNC. God bless you. Christopher.

Dear brothers and sisters, in a short dream this morning 28/11/24 I saw the price list of crypto on tradingview and LUNC was up 63%. Hopefully we see this soon. God bless you. Christopher.

Dear brothers and sisters, I had two dreams I want to share relating to Russia's invasion of Ukraine. In one dream on 15/11/24 I heard that there will be a compromise and President Trump will continue to fund Ukraine. The second dream received today 1/12/24, I saw Trump boasting how he is offering diverse military aid to Ukraine, and was standing up to Russia in a loud and confident way. I then saw a post on X from certain former Trump supporters and they were livid. God bless you. Christopher.

Dear brothers and sisters, I had a dream yesterday 15/12/24 where I heard Trump speaking about Benjamin Netanyahu, the Prime Minister of Israel saying, "I am really disgusted by the power he is taking". This dream appears to signify Trump turning against Netanyahu and Israel. Please seek the Lord. God bless you. Christopher.

Dear brothers and sisters, I want to share about another important topic which is personal health. In waiting for the financial blessings prophesied to come from the Lord, I believe we should also be focusing on our health and longevity. Even once the financial revelations are fulfilled, it will take time to use these resources, to multiply them, and do according to what the Lord leads you. I believe as Christians we should be focusing on creating generational wealth and the establishment of righteous Christian communities, and for each person to seek the Lord's guidance and to do as He leads them. I will discuss regarding the financial topic in more detail later when LUNC has risen significantly. Something my wife has been looking into and researching is healing / athletic diets over the last year, more recently though she has found the carnivore diet. This is a low/zero carb diet ("low" for people who add dairy due to some lactose carbs) focusing on eating meat and fats (avoiding seed oils). Many people have shared testimonies of going on this diet healing their diseases and ailments and becoming stronger, healthier and significantly improving their lives. While I am not fully on the carnivore diet, I now have a meat focused diet which I found has improved my health, energy levels and muscle. My wife had been trying to get healthier and prayed to the Lord every night for years for some of her health issues, such as for a long term knee injury she had. My wife lost around 24kg over the last year and some, pretty much entirely through diet (she wasn't on the carnivore diet at the time) but found her diet and weight loss didn't feel sustainable long term. Additionally the long term knee injury was flaring up with pain and knee instability. She found that a much higher protein diet with added collagen was able to able to reverse the knee pain and instability but she also found a more standard high protein

ketogenic diet still seemed hard to maintain due to issues such as carb temptations, constant need for calorie tracking, lack of satiation and some digestion problems she was having. Since finding and focusing on the carnivore diet and increasing her protein intake to at least 1g per pound of bodyweight (often closer to 1.4g), as well as a similar proportion in animal fats (1g per lb), she has been able to maintain weight, feel more satiated, be stronger and gain muscle easier, recover faster, feel healthier, the pain in her knee is gone and stability is much improved, an elbow injury has been greatly improved, she is able to focus for long periods of time without fatigue and "brain fog", has had skin improvements, and her overall body composition is continuing to improve. She can now run regularly on the treadmill (previously she could only walk and extra walking or speed walking would aggravate the knee) and has good energy for working out regularly with quick recovery times. On the carnivore diet she ensures to have good amount of daily animal fat consumption, which was previously lacking, this provides stable energy, hormone stability and aids digestion. She recommends and uses a macro tracking app to track daily macros goals. Red meat is good to eat though we often eat chicken wings which are cheap, fatty and have a lot of skin and cartilage in them. Once the wings are eaten my wife puts the bones in our pressure cooker for four hours, resulting in a nutritious bone broth filled with gelatine which aids the skin, bones, joints and healing. My wife has been able to discontinue our expensive collagen powder purchases for her knee by regularly drinking this gelatine rich bone broth. My wife also makes great jerky in our dehydrator from 95/5 lean beef mince which is seasoned. We also drink a home-made electrolyte drink which is like the popular drink "LMNT". The recipe for a plain version is (requires a jewellers scale) for 500mL of water add 2,500mg sea salt, 385mg potassium chloride, 375mg magnesium malate, (my wife likes to add Greek yoghurt to her plain electrolytes). For an orange flavoured mix which I drink, you additionally add 1,000mg citric acid, 0.06mg pure stevia powder, and 3,000mg orange powder. She makes batches of the powder by multiplying all these ingredients by 50. The powders are mixed in advance so it's easy to prepare the drink during the day. I mix the electrolyte powder with plain sparkling water or berry/lime flavoured sparkling water if available. My wife prepared a video compilation for anyone who wants to hear more about the carnivore diet and to look into it. There are many people who are on this diet indefinitely (not just temporarily) with experts in the field. I also had a dream where I was telling someone about the carnivore diet. We believe this can help people and improve their lives, and especially for some people it can be a huge transformation. You can review any/all of these videos below, and also pray and seek the Lord. Focusing on your personal health is a good decision and we should do what we can to aid our longevity, health and effectiveness. God bless

you.Christopher. 1) <https://www.youtube.com/watch?v=0ka9WBEijhk>

Dear brothers and sisters, I have a few dreams I want to share with you. Today 2/1/25 I saw in a dream the price widget I use on a screen showing Electroneum (ETN) at \$3,142. The scene changed and I saw a portrait of a small group of people who had bought ETN, then I saw below them another portrait of the same people, but they had aged and a significant amount of time had passed, one of the men now had grey hair, from my guess it looked like about 20 years. I had the understanding this related to the price of ETN in the future, that it would take time to reach such a price and it was a long term investment. This reminds me of a dream I had a number of months ago where I had been thinking about LUNC and I heard in a dream "Rome wasn't built in a day", which signifies that great achievements can take time. I had a dream yesterday 1/1/25 where I saw ETN had risen (I didn't see a price) and people were excited and it was in relation to some kind of announcement. I saw in a dream this morning 2/1/25 a LUNC chart of all green candles building momentum before the ending candle was a tall green one. Hopefully we see good movement soon. I wanted to share these dreams with you and also to help us understand that the prophetic revelations will be fulfilled in time, they are coming and the Lord is setting up His people for enduring provision for years ahead. God bless you. Christopher.

Dear brothers and sisters, I saw in a dream yesterday 14/1/25 that BTC was taking off with bullish momentum over \$110k, and then the scene changed and I saw LUNC started moving up significantly. I am hoping to see this soon and expect LUNC to move up after BTC leads. God bless you. Christopher.

Dear brothers and sisters, I had a dream on 28/1/25 where I saw a countdown in days until my next 1.5% tax proposal. I believe it was from the Lord and showed He is counting down the days until the next 1.5% tax proposal. This is a reassurance from the Lord that we are on track and where we are meant to be, and these things will unfold according to His will. I will let everyone know when the Lord leads me to bring the 1.5% tax proposal again. In the meantime I will wait for that time, and I am hoping to see LUNC rise soon with BTC. God bless you. Christopher.

Dear brothers and sisters, I had a dream I received on 24/1/25 where I heard the words, "Keir Starmer will be removed". He is the current UK Prime Minister. I wanted to share this with you. God bless you. Christopher.

Dear brothers and sisters this morning 22/3/25 in a dream I saw a price of BTC in green at around \$100k, and I saw a price for LUNC of \$0.000085. I have the dream I shared earlier on 14/1/25 where BTC went up with bullishness past 110k and LUNC started moving up significantly. I am still expecting major bull market conditions to come soon. God bless you.

Dear brothers and sisters, I had a brief dream this morning 29/3/25 where I saw and heard that Putin betrayed Trump, and Trump was extremely offended. That was the dream. This goes with my earlier dream I posted on 1/12/24, "I saw Trump boasting how he is offering diverse military aid to Ukraine, and was standing up to Russia in a loud and confident way. I then saw a post on X from certain former Trump supporters and they were livid." These dreams show there will be a change in Trump's friendly approach to Russia, and he will support Ukraine. God bless you.

Dear brothers and sisters, thanks be to God as we honour our Lord and Saviour Jesus Christ for His great salvation and triumph on the cross. I hope you are doing well. I had a vision this morning 20/4/2025 where I saw BTC at 56k. This would be a significant decline from its current price of 85k. The dream did not have any timing associated with it, so it's unclear when it will be fulfilled. With LUNC at \$0.000059 these are very good prices to buy, and if it went lower it would be even better. I am hoping to accrue as much LUNC as I can and stake it to increase my voting power, so we can pass the 1.5% tax later, and to benefit from these low prices when the coming bull market arrives. I am in the process of selling unneeded assets to make further investments in LUNC. I am paying careful attention to LUNC as we patiently wait for the prophetic revelation to be fulfilled. I have agreed to be on a 10 person multi-sig wallet with others in order to set-up a LUNC/USDC (stablecoin) market on decentralised exchanges on the LUNC chain. This means I play a role in directing the funding from the community pool to the liquidity pool of the governance approved decentralised exchange. I think it's good to have a LUNC to stablecoin market which you don't need a centralised exchange for, and the swaps will be subject to the tax so will contribute to burning, community pool and oracle pool funding. The proposal to authorise the overall plan passed governance recently, and next steps will take place soon. You can follow on my Validator Telegram. I have also prepared an updated prophetic revelations PDF so you can review all dreams and visions I have shared with an up-to-date list. Any dreams will be posted here moving forward. Please only share the document with faithful Christians. The link is here: God bless you. Christopher.
